Michael Ranita Michele Panteloukas Senior Court Reporters

THE COURT OFFICER: All rise. Part 37 is now in session. The Honorable Judge Arthur Engoron presiding. Make sure all cell phones are on silent. Laptops and cell phones will be permitted, but only to members of the press. There's absolutely no recording or photography of any kind allowed in the courtroom. Now be seated and come to order.

THE COURT: Would defendants like to call their next witness?

MR. WALLACE: Apologies, your Honor, but plaintiffs had a couple of housekeeping issues we wanted to raise.

THE COURT: Okay.
MR. WALLACE: And we are springing this on the defendants a little bit, but I wanted to talk about the scheduling for the week of December 11 th, which is currently scheduled for Mr. Trump's testimony, which I believe will be the last witness for the defendants.

I think our view is is that to the extent plaintiffs have any rebuttal case, it could be presented on the 12th. I think it would, at most, be two witnesses, both of whom --

THE COURT: Just be one day.
MR. WALLACE: One day. Each witness would be an hour or less, would be our expectation, but that depends on a little bit what we here from Mr. Bartov on the seventh and eighth. That would be our expectation. So we could propose
that closing arguments be held on the 13 th and that we follow the process we did on openings, with 90 minutes for the government and two hours for the defense, with leave for them to ask for more time, if needed, since they are sharing.

THE COURT: Go ahead.
MR. KISE: So Mr. Robert, as you know, is the CPLR expert and/or procedural. One thing that we had thought about proposing the Court, which in a case like this seems to make, at least to me, and I'll let Mr. Robert speak.

THE COURT: Yes.
MR. KISE: It seems to make, at least to me, far more sense is for us to provide our posttrial submissions simultaneously, and then after the Court has a chance to look at those, we would come back for argument on those and you could provide -- Mr. Robert will do a better job on this than me. I'm sure in the interim you could provide us questions that you want us, after you've seen both parties' submissions. In most bench trials, for what it's worth, that I've ever handled have been done that way, where because a closing right after we are done with the evidence on a two-month trial, it's not like there is a jury here. You've got what's going to be probably a 9,000 page record. There's just an awful lot of ground to cover. I mean we can certainly make arguments on the 13th. I just don't know,
frankly, how productive they would be for the Court, because we are all just going to be saying things that -- that are sort of in brief as opposed to you having the opportunity to review everything.

I'll let Mr. Robert speak to the practice here in New York, but that's certainly been my practice.

MR. ROBERT: My experience has been, I don't think I've ever had a closing argument after the close of evidence in a bench trial, ever, in New York. Usually what I have seen, or probably on almost every instance, if not every instance, we prepare conclusions of law and the summary of our facts as we see them, usually like a 60-day window after the trial we submit it to the Court, both in a word version as well as in a PDF, or however the Court wants it.

And then what I've seen happen in the Commercial Division very often is after that submission, let's say the Court gives you 60 days to submit that. The Court will then analyze it and review it, as Mr. Kise said, since there's simultaneous submissions, there's no reply to it, but then the Court sets a time for what I'll call slash oral argument/closing, at which point sometimes the Court will send questions to the parties ahead of time to focus on. And also that's an opportunity to respond to the other side's submission.

So I think a closing, per se, like you would have
in a jury trial just wouldn't fit in a trial like this. It's certainly not something that we contemplated, because we figured it would be the normal route of a bench trial, which is findings of fact, conclusions of law, a period of time then, after that, and then make a formal presentation to the court.

So I guess at this point, whatever Mr. Wallace is saying, what I would ask for is when the close of evidence closes, that the Court then give us 60 days or so to submit it to the Court, and we could put a date on the calendar at that point, or now, as to when the Court would want us to come back to argue that. And then obviously, totally up to the Court, whether you want to key us to certain issues you want us to specifically answer at that argument date.

MR. KISE: We'll also, of course, have to have time for another directed verdict motion.

THE COURT: Well, good luck with that.
MR. WALLACE: I'll say, your Honor, I have done closings in bench trials in this courthouse in matters where there is public interest, and people have a desire to hear both sides summarize the case. So I don't know that there's a typical process. I do think it is typical, often not, to have openings or closings in bench trials, but, you know, each judge does as they see fit.

I certainly don't think we need 60 days to prepare
a posttrial briefing. This case has been extensively briefed and argued by all sides. Everyone is familiar with the record. I think -- we think a two-week period after the close of evidence is more than sufficient. I don't know that we have an objection to having an argument on -- after simultaneous briefing in lieu of closing, but I think 60 days, so stretching this out into, I guess, February at some point doesn't make sense from our perspective, but in terms of process, no objection from us to close the evidence, submit our findings of fact and conclusions of law, and if the Court wants argument, we could do argument.

MR. KISE: So the only thing I'll add, and I'll let Mr. Robert add, if your Honor is not interested in 60 days, I would try and maybe find somewhere between two weeks and 60 days, because the two weeks, as you know, happens to fall, most particularly on my birthday, but sort of the end of the year where it's going to be pretty compressed for everyone, particularly having been for those of us that have been a way for quite some time.

So if you are not interested in 60, which I think is a reasonable time period, but I understand the Court may have a different view, certainly something beyond the two-week period, maybe two weeks into January, maybe 30 or 45 days as opposed to -- and then the entire process would be wrapped up by the last week of January if we did that.

We wouldn't be into February, as Mr. Wallace is saying, and I understand what he is saying.

Keep in mind, also, that we do have, as we've had for 14,15 months now, there's no public exigency because there is a monitor in place. Everything is still operating pursuant to the Court's direction and supervision.

THE COURT: Give me one second. Okay. That's a second. I like the idea of the briefs then the argument; there seems to be an agreement on that. Two weeks seems very short and a month seems very long -- two months seems very long. I feel like -- what is the -- Goldilocks and the Three Bears; too hot, too cold, just right. So we'll come up with a just right. Let me sit on this. Obviously we have time. I think we'll all come to an accommodation.

Mr. Wallace.
MR. WALLACE: So two additional issues. These relate to expert testimony. First, tomorrow, in addition to our renewing our motion to preclude Mr. Shubin, we are also going to renew our applications to Mr . Moens. So these are two witnesses who both deal with Mar-a-Lago. We already submitted our briefs on this. We are not going to submit any new briefing, but we'll just raise it when we make the motion tomorrow.

THE COURT: Okay. MR. WALLACE: The other issue we wanted to raise is
the -- we received a number of updates last night to Mr. Unell's opinions in this matter. And we do not think that they have been timely disclosed and that they should not -- should not be allowed to include these opinions. In particular -- can we put up defendant's demonstrative Exhibit 5.
(Whereupon, the exhibit was displayed on the screen.)

MR. WALLACE: So this is a chart that I believe is an adjustment that Mr. Unell prepared on the calculations prepared by Mr. McCarty. We got this last night around 9:30 at night -- Mr. Unell is here, maybe he should not --

THE COURT: Oh.
MR. WALLACE: -- be in the courtroom while we are testifying. Sorry, sir.
(Mr. Unell exited the courtroom.)
MR. WALLACE: We'll talk about him behind his back.
MR. SUAREZ: It was 7:47 p.m.
MR. WALLACE: Maybe it felt like 9:30.
MR. SUAREZ: I could see why.
MR. WALLACE: So I was just going to say that the -- well, let me see if I could -- it appears to now calculate interest differential based on a 25 basis points increase. I assume this is due to a guarantee. It appears that this is based on testimony from Mr. Williams about an
adjustment on the Doral loan in 2015.
The testimony simply confirmed what's in the documents that the defendants have had the entire time. The defendants could've prepared this rebuttal to Mr . McCarty as part of Mr. Unell's expert rebuttal report. Those were due in June. So for them to now introduce this the night before he's going to testify, um, is untimely and inappropriate. So we think the demonstrative and the new opinions should be struck.

MR. KISE: So, your Honor, a couple of things, and Mr. Robert may have things to add.

First of all, the supplement --
THE COURT: Mr. Kise, it might be easier if you sat or just --

MR. KISE: I'll hold it up here. Usually no one has a problem. Maybe I'm in a calm mood today. Usually they could hear me without the microphone.

So a couple of items on this. First of all, I believe the government, I'm pretty sure 11:00 on a Friday, before Mr . McCarty took the stand on Monday, provided a supplemental report as well, for Mr. McCarty, which modified his opinions to take into account events subsequent to his initial opinions. So back to the goose/gander proposition. Um, that's one, but I don't think necessarily controls, although it's certainly in our favor.

Two, if you look at Mr. Unell's report, he spends a considerable amount of time talking about the pricing of the loans and Mr. McCarty's analysis, and so on and so forth. So for him to now make observations -- this is a demonstrative exhibit. It's not being introduced as substantive evidence. It's just a demonstrative. For him to now make observations about documents in the record, he's reviewed all these documents before. He's not limited to the words that are exactly in the page. No expert is. It's the subject matter. He's fully covered on the subject matter about the pricing of the -- the loans about Mr. McCarty's analysis. And every expert is entitled to -to adjust based on what is presented at trial and make comments on what is presented at trial, and to offer rebuttal to what is presented at trial, as long as it's within the scope of the initial opinion.

And so if you look at pages -- I mean, there's so many pages here in this report. This would be Mr. Unell's June 30th report, just this one. Starting on pages six and going through 7, 8, 9, 10, I mean, there's all manner of discussion throughout this report about the credit pricing, the loan pricing, Mr. McCarty's then analysis, different from Mr. McCarty's analysis now, because as you heard me say, they changed their theory of the case. So Mr. McCarty's analysis is now morphed to fit that theory.

His original analysis was based on the loans, and now much of it was based on the certifications. And so just like they have done in terms of their numbers, we are doing the same thing. We are just challenging that analysis, and we are challenging his fundamental assumptions.

We don't -- as long as we've covered the subject matter, they were certainly free to ask in his deposition about the subject matter and so forth. So I don't know -again, I'll let Mr. Robert speak to New York specific issues, but all of this is covered, the subject matter and the scope, abundantly. The supplemental report wasn't even necessary. We did it more as an accommodation to them so that they would have a better understanding.

The demonstrative exhibit is just that. It's a demonstrative exhibit, and we are entitled to allow the use of demonstrative exhibits. It's not substantive evidence. And they could fully explore on cross examination.

The same documents that were available to us and Mr. Unell are also available to the government. So I don't see any prejudice, any basis to exclude any testimony in that regard.

MR. ROBERT: Just echoing on what Mr. Kise said, the government, as it was the business day before, sent us a supplement where they, as Mr. Kise said, changed, in theory, of what Mr. McCarty was going to testify about. This is
just our expert with a demonstrative exhibit commenting on the events that have happened in the testimony that came out during the trial.

So, again, we could've very easily just had the witness testify with it without incident. Candidly, we have this rule where we have to exchange demonstratives the night before, which is what we did, just as they did. They did more than that. They changed the substance of it the night before, and our expert is free to be able to comment on it and comment on the testimony that he heard or that he read about from Mr. Williams and others during the course of the trial. So I truly think this a nonissue.

THE COURT: A few words.
MR. WALLACE: So, your Honor, I'll say the change in opinion is nothing of the kind. On the left is the demonstrative that we produced the night before. On the right is the demonstrative that was contained in Mr. McCarty's opening report produced on May 30th of this year. And what he did is he eliminated interest for 2012 and 2013, and then extended for the amount of time that it continues from his report in May until the time of his testimony in November. You'll see this calculations remain the same. He is using the same process. He is using the same calculation to come up with a disgorgable amount.

The defendants --

THE COURT: I was going to say, I'm more interested in what you think they are doing than what they think you are doing.

MR. WALLACE: So let's pull up, if we could, DD5, which is their new opinion.
(Whereupon, the exhibit was displayed on the screen.)

MR. WALLACE: If we could just have DD5 alone. So the 25 plus basis points, I assume, is their now opinion that this is the pricing difference between a loan with a guarantee and a loan without a guarantee. And I challenge anyone to find somewhere in their expert reports an opinion -- in Mr. Unell's expert reports from May and June, an opinion that the pricing difference between a loan with a guarantee, and a loan without a guarantee is 25 basis points. It's not in there. And I don't think this is just -- you know, it's the subject matter. And we need to, um, you know, inquire of him if his opinion is -- his reports are more than a hundred pages. So to say, well, he is discussing the topics and so the topics are fine. They had the report from Mr. McCarty. If his opinion was that Mr. McCarty had priced the interest difference improperly, and that the proper basis was to use 25 basis points, he should have disclosed it in the rebuttal report in June. We could have deposed him about it. We could've had our own
experts look at it. We could have spent the last five months thinking about it. Instead we get it the night before.

I would say there's nowhere in the reports that says the price difference between a guaranteed loan and unguaranteed loan is 25 basis points. It's not in there.

THE COURT: Nevertheless, plaintiff's objection is overruled. There's no jury. Let's just hear the evidence. You could question him on his conclusions. So --

MR. WALLACE: I would just note, your Honor, that the issue isn't just cross examination, the issue is notice. And we agreed to a process where we were supposed to have notice of everything the experts thought by the end of June. That was -- extra time was provided at the defendant's request because they were going to need to build in so much in their rebuttal reports, and we would then have a chance to examine, in detail, over seven hours, the expert's opinions. I guess we'll do it live now. It's not a question of do we get to examine the witness. It was a matter that we were supposed to have notice of his opinion many months ago.

THE COURT: I understand that. I'm not justifying or accepting everything defendants position is, but I'm letting it in, so.

MR. WALLACE: Understood, your Honor.

MR. SUAREZ: The defense calls Robert Unell. THE COURT OFFICER: Witness entering. (Whereupon, the witness stepped into the witness stand.)

THE COURT OFFICER: Please raise your right hand. (The witness complied.)

THE COURT OFFICER: Do you solemnly swear or affirm that any testimony you give will be the truth, the whole truth and nothing but the truth?

THE WITNESS: I do.
THE COURT OFFICER: Please have a seat.
THE WITNESS: Thank you.
ROBERT EVAN UNELL, called by and on behalf of the Defendant, having been first duly sworn, was examined and testified as follows:

THE COURT OFFICER: State your name and either home or business address for the record.

THE WITNESS: Robert Evan Unell. 5470 East
Idlewood Lane, Atlanta, Georgia.
DIRECT EXAMINATION
BY MR. SUAREZ:
Q Mr. Unell, good morning.
A Good morning.
Q Please describe your educational background after high school.

A Yes. I attended the University of Georgia where I majored in real estate, which is part of the Terry College of Business. I graduated in 2000, and then subsequently went to go into the workforce.

Q What did you study at the University of Georgia College of Business?

A In the Terry College of Business, I majored in real estate, which is a program that combines the risk management side as well as finance and practical real life real estate experience and development.

Q Where did you work after you graduated from the University of Georgia?

A I began may career at Wachovia Bank, and was there until the merger with First Union. I then went to Bank of America, and I spent approximately 12 years there, or so, at Bank of America in the Commercial Real Estate Finance Group, as well as the Credit Risk Management Group of Special Assets, which handled real estate, specifically.

Q Let's go back to your time at Wachovia. What was your title at Wachovia?

A I started out as analyst, and then eventually rose to title of AVP, assistant vice president, but I'm not certainly of the exact title.

Q What was your job function a Wachovia?
A At Wachovia, I began in the underwriting process of
commercial real estate loans, and income producing, as well as homebuilder. And then eventually moved into the relationship management side of it, which would encompass more of the structuring of the deals, the client management, and the overall relationship with the entire bank.

Q And how did your responsibilities change when you moved over to Bank of America, if at all?

A The responsibilities when I first moved over to Bank of America did not change because I was hired as a relationship manager and managed a portfolio of builders, developers and commercial real estate developers. And in approximately late 2007 to early 2008, I was asked to move over to the Real Estate Special Assets Group, which was a function of Credit Risk Management, and was done in conjunction with the downturn in the commercial real estate markets. In that role I performed analysis and review and restructuring of deals that were in default or were stressed.

Q And while at Bank of America, what industries did you service?

A I serviced the commercial real estate industry, homebuilders -- homebuilders, cash flowing properties, as well as construction.

Q What type of deals did you work on when you were at Bank of America?

A At Bank of America I worked on deals that were as small

\section*{Proceedings}
as two and a half million dollars up to large syndicated facilities upwards of \(\$ 500\) million plus, encompassing all aspects of real estate collateral.

Q And what role, specifically, did you have on those deals?

A On those deals, both as a relationship manager and in the Credit Risk Management side at Special Assets, I was involved in the structuring, underwriting. And then as a Credit Risk Management side at Special Assets, I also did have a signatory for a small approval authority.

Q What training, if any, have you received in the private sector?

A In the private sector. So at Wachovia, there was not necessarily a formal training program, but I shadowed senior lenders. I took classes that were internal as it related to risk as is related to financial underwriting. And the same at Bank of America with continuing education that was required, both from a compliance perspective, as well as continuing to refine tools for underwriting and other trends in commercial real estate.

Q After you left Bank of America, where were you employed?

A Alvarez \& Marsal.
Q What responsibilities did you have at Alvarez \& Marsal?
A At Alvarez \& Marsal, I was part of the REAS Group,
which is Real Estate -- I don't know what it stood for. It was the real estate group at Alvarez \& Marsal.

The practice there consisted of a multitude of things. We liked to say we would take a real estate and we were able to go from essentially cradle to grave, which means from the beginning on the cradle side, um, we assisted multiple national lenders, both on the CMBS and the balance sheet side, with their underwriting, their valuation management, um, and we also have done a lot of advisory work for developers and real estate professionals.

And then also a tremendous amount of restructuring work, which involved, both from a lender perspective and a developer/borrower perspective of analyzing loans that were in distress or already in default.

Q What is the difference between your experience on CMBS loans and balance sheet loans?

A CMBS loans are nonrecourse loans that are originated by, typically, investment banks. They are then bundled up and securitized with other similar loans, or sometimes they are done what's called a "single asset" or "single borrower." That would be for a large asset. And they are a commoditized, very kind of fit in the box. If it doesn't fit in the box, move on. And that's because when they do bundle them together, they like to bundle similar assets so that they have similar cash flows and can also minimize risk through a multitude of diversified
assets.
Q Please elaborate on your experience working on loan restructuring?

A Loan restructuring can take on a multitude of different kind of looks. We worked on primarily assets that were already in default. They may not have been noticed of default, but there was an inherent risk of loss for the bank.

At that time those assets are transferred over to the Special Assets Group where we are trained and able to restructure deals, analyze deals, and assist in trying to come to a satisfactory agreement to restructure the loan on terms satisfactory, not only to the borrower, but also to the lender. And often times that worked out, and often times it did not.

If it did not, role also included the exercising of remedies to include foreclosure, as well as collection on guarantees and enforcement of other loan documents.

Q What industries did you serve at Alvarez \& Marsal?
A Strictly commercial real estate.
Q What was your title at Alvarez \& Marsal?
A I started as a director, and when I left I was a senior director.

Q And how did your responsibilities change from director to senior director, if at all?

A They did not change.
Q When did you leave Alvarez \& Marsal?

A Approximately five years ago or four and a half years ago. Myself and several colleagues left and we established the real estate practice at Ankura.

Q And what is your title at Ankura?
A Managing director.
Q What are your responsibilities as a managing director at Ankura?

A Very similar to what we did at Alvarez \& Marsal. The practice was designed to be the exact same. So both front end, from what we call "cradle to grave", which is origination through advisory, and then ultimately the restructuring disposition of commercial real estate finance assets.

Q Please elaborate on the origination section of your experience?

A So as part of the origination side of it, our team is contracted by several large lenders, insurance companies, balance sheet and CMBS lenders, to perform either the full underwriting and due diligence process, or it could be just a subset including the valuation management side of it, which is done by my peers, or environmental due diligence and engineering due diligence as well.

Q What does the advisory side consist of?
A The advisory side consists of helping operating real estate businesses become more efficient. We are able to help, I would say, in times of where they have large, heavy lifts where
we can come in and assist where they may not need full time personnel for special projects; that could be an acquisition. It could be a joint venture. It could be a very large project where they just need additional assistance.
(Continued on the next page.)

Q And then please describe the final stage, the "grave" part of your work.

A The grave part would be the restructuring aspect of it, which, as a lot of what we are doing now as you can imagine with the current market situation, and we represent both borrowers and lenders in various stages, anything from initial pre-default where borrowers come to us because they know that there could be a looming default that is coming and want to be proactive; and we do the same for lenders.

And then we also are involved in litigation as well as, you know, hopefully it doesn't come down to that, but also the disposition.

And also at the end of it perhaps trying to negotiate settlements as it would relate to various loan documents and guaranties of, you know, the interested parties.

Q What, if any, experience do you have evaluating personal financial statements?

A I have evaluated personal financial statements throughout my career as Wachovia, at Bank of America and at Alvarez \& Marsal and Ankura.

Q What experience, if any, do you have working with troubled assets?

A A tremendous amount of experience. Since about 2008 that has been the majority focus of my career since that time. So for approximately 15 years that has been where I have spent
the majority of my time working.
Q Have you previously testified as an expert witness?
A Yes, sir.
Q How many times have you been retained as an expert witness?

A I have been retained, I believe, five or six times; but testimony only once.

Q What area did you testify in?
A Commercial real estate finance.
Q Have you ever been qualified as an expert witness at trial?

A Yes, sir.
Q And what was your expertise in that trial?
A Commercial real estate finance and loan management and dealing with, I would say, course of dealing between a borrower and a lender.

MR. SUAREZ: Your Honor, we tender the witness as an expert in the field of commercial real estate finance and banking.

THE COURT: Hearing no objection, granted.
MR. WALLACE: I am just curious, in describing his experience the witness mentioned that at Wachovia and later in his career part of his job responsibilities included evaluating personal financial statements. So I am just curious if the expertise is extending to the
evaluation of personal financial statements.
THE COURT: I am assuming not.
MR. SUAREZ: The witness is certainly prepared to testify about the bank's perspective in the evaluation of financial statements.

MR. WALLACE: Sure. I assume that means the process a bank might follow when they would receive a personal financial statement as part of a lending -- that sounds consistent with his testimony. I am not sure if evaluating means the witness will go through a personal financial statement and offer an opinion as to its accuracy, you know, the things we have heard before whether it complies with GAAP and evaluation issues.

MR. SUAREZ: Simply what the bank does with them and how they see them.

MR. WALLACE: That was it.
THE COURT: And Mr. Suarez, just in as few words as you can, what -- let's go over the exact description of his expertise.

MR. SUAREZ: Commercial real estate finance.
THE COURT: Right. That's it?
MR. SUAREZ: And banking.
THE COURT: The banking is a rather broad category.

Do you feel like you are an expert in banking,

Mr. Unell?
THE WITNESS: Yes, sir. As spending nearly approximately 15 years in the banking field, I have worked across multiple lines of business and collaborated with associates in multiple different fields at various institutions that I have worked at.

THE COURT: Okay. We will call you -- we will deem you a banking expert in the -- within the fields that you just mentioned.

So granted, and let's go ahead.
Q Mr. Unell, what is the scope of your engagement in this case?

A I was retained to provide opinions as it related to the loans -- the four subject loans and their process and how they were underwritten; and, I guess, the submission and the ordinary course of business as to how loans are originated and processed.

Q What do you mean by "the four subject loans"?
A The four subject loans would be Doral; the Old Post Office; 40 Wall Street and Chicago.

Q And just to be clear, Trump Chicago, Doral, and OPO were loans made by Deutsche Bank; and 40 Wall Street was a loan made by Ladder Capital, correct?

A Correct.
Q Generally, what information did you review to reach
your opinions in this case?
A I reviewed a multitude of documents, including Statements of Financial Condition, credit reports, appraisal reports, underwriting reports, annual reviews, as well as internal memos that were prepared by Deutsche Bank and Ladder Capital. Along with other correspondence, as well, as it related to these four subject loans.

Q Have you reviewed any of the proceedings in this case?

A Yes, sir.
Q What have you reviewed from the proceedings in this case?

A I have reviewed the initial complaint as well as some of the subsequent filings as well, including the motions for summary judgment by both sides.

Q Have you reviewed any of the testimony given in this case?

A Yes, sir. I have reviewed the deposition -- excuse me, not the deposition. I did review the depositions of several folks. But at trial I have read the transcript of Mr. Haigh. And then I was able to view the testimony of Mr. Williams and Ms. Vrablic and Ms. Pereless.

Q And are you able to offer opinions today to a reasonable degree of certainty in the field of commercial real estate finance and --

A Can I say one more thing?
Q Yes.
A I also did review the testimony and transcript of Mr. McCarty. I wanted to get that in there as well.

Do you mind repeating the question, please?
Q Sure.
Are you able to give opinions today to a reasonable degree of certainty in the field of commercial real estate finance and banking as described earlier?

A Yes, sir.
Q Are you being compensated for your work here?
A Yes, sir.
Q At what rate is Ankura being compensated for your work here?

A I believe it is around 900 or 950 an hour, I am not certain of the exact number.

Q Approximately how many hours have you spent on this engagement to date?

A A couple hundred probably, over the life of -- over, call it, nine months or so give or take. I am not exactly certain of that.

Q Has anyone asked you to testify in a particular manner in this case?

A Could you please repeat that?
Q Has anyone asked you to testify in any particular
manner in this case?
A No, sir.
Q Is your compensation conditioned on the opinions in this case that you offer?

A No, sir.
Q In your experience in the banking industry, what experience have you had with compiled financial statements provided by guarantors?

A Compiled financial statements are typically the norm of what I have seen. Either that or they are borrower-prepared. So compiled is a step up from that. And it is typical for larger relationships, especially on larger commercial real estate developers that have a multitude of assets of various types.

Q Have you reviewed President Trump's Statements of Financial Condition and compared those to compiled financial statements that you have previously reviewed in your career?

A Yes, I have. And in my opinion and based on my experience --

THE COURT: Wait. The answer is yes, you have reviewed it. You should wait until they ask you the next question.

THE WITNESS: I thought it was a compound
question. Sorry about that.
Go ahead.

Q What opinions, if any, have you reached after reviewing the Statements of Financial Condition?

A The Statements of Financial Conditions that were provided by the defendants are in line or, in my opinion and experience, were of better quality than those than what are typically received in commercial real estate finance transactions.

Q And what is the -- withdrawn.
Are you able to elaborate on that opinion?
A Yes. The level of detail provided allows for a roadmap of -- or a -- to figure out exactly how various assets were valued. It gives the user ample information in order to be able to evaluate a financial statement.

That information is nice to have in front of you. A lot of times you would have to go actually out and ask the questions of a borrower to be able to find that information. And it is very nice to see that a complete, kind of, disclosure, what I would call it, of information was available without having to go back and ask, what I would consider to be, a lot of questions to be able to properly analyze those statements.

Q In your experience, how do lenders use Statements of Financial Condition provided to them by borrowers or guarantors?

A As I just mentioned, the Statement of Financial

Condition in a commercial real estate loan is typically done to provide a roadmap for a lender to do their own analysis of the assets that are out there. It is truly an estimated opinion of the individual that is submitting it. And that it is the guide for which the lender can make their appropriate analysis and ask questions and form their own opinions.

MR. SUAREZ: Your Honor, I would like to show the witness Plaintiff's Exhibit 729 previously admitted into evidence.
(Handing)
THE WITNESS: Thank you, sir.
Q And I would like to draw your attention to page three of this exhibit. And specifically to the last paragraph, which states:

Because the significance and pervasiveness of the matters discussed above make it difficult to assess their impact on the Statement of Financial Condition, users of this financial statement should recognize that they might reach different conclusions about the financial condition of Donald J. Trump if they had access to a revised Statement of Financial Condition prepared in conformity with accounting principles generally accepted in the United States of America.

Do you see that?
A Yes, sir.
Q Based on your experience in the banking industry, how
would a lender view that disclosure?
A A disclosure of that type is typical in financial statements, whether it be -- or excuse me, personal financial statements, whether it be compiled or if it is even on -- a lot of times there will be forms that banks provide. And there is typical language in there even on those that would state that it is, you know, up to the user to determine exactly what they would like to do out of this.

And it is -- I wouldn't say it is a "beware" but it does give notice to the user that it is, as it states, you know, that things could change and they may reach different conclusions. So it is typical.

Q And who is the user of a financial statement, of a personal financial statement in a lending transaction?

A In a commercial real estate transaction the user would be the financial institution, the lender.

Q And what affect, if any, does this disclosure have on a lender's ability to use a borrower or guarantor-provided financial statement?

A It doesn't change the ability to use it. What it does is, as I mentioned earlier, it provides the roadmap and the information to a user to be able to conduct their own commercial analysis.

Q And in your analysis of the four loans at issue, in your opinion, how, if at all, was the process followed by the
lenders different from what is traditionally used in the industry?

A From my review of the documents as well as the various items I have also reviewed, it is consistent with how I have seen it done throughout my career and in my experience.

Q Why is that?
A They, they being Deutsche Bank, as a user, took this information and conducted their own analysis, formed their own opinions, and utilized those opinions that they conducted and analysis themselves, to make a decision. And that is what the intent of this document is.

And they followed that through and did, in my opinion, conduct their own analysis and formed their own opinion.

Q How about Ladder Capital?
A Ladder Capital the same. They were also provided this and were able to form their own opinions and conduct their own analysis on the contents of this statement.

THE COURT: I can't help but jump in. Maybe this is obvious, but how do you know what you just testified to? How do you know what Ladder did and what Deutsche Bank did with this information?

THE WITNESS: I have been able to review the
credit memos. And in those credit memos there is analysis
of -- writeup of their review of the various assets and
how they viewed them. As well as a fairly large writeup about President Trump and his financial wherewithal. So, in reviewing those documents you are able to see that the analysis that went into it, as well as any adjustments that were made by the users of those statements.

THE COURT: Okay. Thank you.
MR. WALLACE: Your Honor, I wanted to raise a belated objection to the witness's response about what the intent of the document was. I don't think he is being offered as an expert about the intent of Mazars, the Trump Organization, or any of the people that prepared the document.

THE COURT: Well, I wish it hadn't been so belated.

MR. WALLACE: Apologies, Your Honor.
THE COURT: You are objecting to his testimony about what the intent was of Mazars and the defendants; is that right?

MR. WALLACE: He testified as to what the intent of the document was. That's the piece I object to.

THE COURT: Overruled. I'll allow it as part of what he would understand about these things.

Q Was the analysis conducted by Deutsche Bank on President Trump's Statements of Financial Condition consistent with what you have seen in the lending industry?

\section*{Unell - by Defendant - Direct (Suarez)}

A Yes. It is consistent with what \(I\) have seen in my experience.

Q Same with Ladder Capital?
A Yes, sir.
Q What is the Office of Comptroller of Currency?
A The Office of Comptroller of Currency, also known as the OCC, is a federal agency that is one of the oversight for federally chartered banks.

Q What guidance, if any, does the OCC provide with the respect -- with respect to a lender's analysis of a proposed guarantor's financial statement?

A The OCC provides guidance in -- guidance for lenders, and in all aspects of underwriting to include guarantors. So there is guidance that they provide, and that guidance is expected to be incorporated into the various institutions that they regulate into their policies and procedures. And that is how it gets filtered down.

So the OCC guidance is guidance for how the institution should handle it. And the institutions are then charged with creating their own policies and procedures that would be in accordance with OCC guidelines.

Q And how, if at all, are the policies and procedures implemented at Deutsche Bank consistent with the OCC guidelines?

A In my review and experience I believe that the

Deutsche Bank policies and procedures are consistent with the guidance that is provided by the OCC.

Q And were the Deutsche Bank policies and procedures in your evaluation applied with respect to the three loans that they made at issue in your report?

MR. WALLACE: Objection, leading.
THE COURT: Sustained.
Q How, if at all, were the Deutsche Bank lending procedures applied in connection with the three loans at issue in your report that were made by them?

A In my review and experience I believe they were applied correctly and as prescribed in the OCC documents.

Q And is that opinion -- would your opinion be the same for 40 Wall?

A Yes, sir.
MR. SUAREZ: Your Honor, I would like to show the witness Defendant's Exhibit 390 premarked for identification.

MR. WALLACE: I am just going to note an objection. I guess I am unclear as to whether the witness is saying that the OCC guidelines applied to Ladder Capital's loans? He mentioned Deutsche Bank, I just wasn't sure if that also encompassed Ladder Capital.

THE WITNESS: Ladder Capital, to my knowledge,
is not under the purview of the OCC.

MR. SUAREZ: My question was a little different. It was whether the process was consistent.

Q Mr. Unell, do you recognize this document?
A Yes, sir.
Q What is this document?
A This is the Safety and Soundness Commercial Real Estate Lending Handbook that is issued by the OCC dated March 2022.

Q How, if at all, did you rely on this document in recommending your expert opinions in this case.

A I reviewed it and took it into consideration when forming my opinions in my reports.

Q If you turn to page 34 of the exhibit, which is the number on the lower left-hand corner, I would like to turn your attention to the section titled: Analysis of Borrowers' and Guarantors' Financial Condition.

A \(\quad \mathrm{Mm}-\mathrm{Hm}\).
Q How, if at all, does this guidance affect Deutsche Bank's underwriting of the three loans at issue in this case?

A This is the guidance that they would have followed in putting together their own policies and procedures. And in my review, it is my opinion that it was followed correctly.

MR. WALLACE: Again, note an objection to
foundation. If we are talking about guidance from 2022,
how it applies to loans that were made earlier than 2014.

THE COURT: I'll allow a follow-up. MR. SUAREZ: Sure.

Q How was the guidance relevant, if it is dated March 2022, to the loans at issue in this case?

A The guidance would not have changed over the period of time. It would be consistent and would still remain the same. You know, as the time goes on, one thing that does change -- doesn't change is really an underwriting process. You know, still the fundamentals and foundation is there from the beginning of when you do it. It is, you know, from the time I have been involved in my experience, there is nothing that has changed from this to, call it, back in 2000 when I began my career.

Q Do you see at the bottom paragraph where it says: Underwriting includes determining whether the borrower demonstrates the capacity to meet a realistic repayment plan from available cash flow and liquidity?

A Yes, sir.
Q How did you see that concept applied, if at all, in the underwriting of the Deutsche Bank loans?

A Well, I mean, it follows, in my opinion, what they had done is they looked to see whether or not how the sources of repayment would be made and how a loan gets repaid. And a loan typically gets repaid through cash flow or the liquidation of the asset to repay the debt, whether it be a sale of the
asset to retire the debt, or the cash flow generated in order to service the debt on a monthly or annual basis.

Q Is that consistent with the following sentence? It says: Cash flow from the underlying property or other indicators of borrower capacity is evaluated to determine whether and to what extent the borrower can adequately service interest and principal on a prospective loan?

A Yes, sir. And I think that it is key to note that this is the borrower here that is -- so you are not looking at the guarantor here, you are looking at the borrower, which is the owner of the subject collateral, which is able to provide that itself.

Q How does that distinction apply with respect to the three Deutsche Bank loans?

A There was an independent analysis conducted on the assets that were taken as collateral for those three loans, and it was determined by Deutsche Bank that they wanted to make the loans.

And the first thing that you do when you are looking at a deal is you would look at whether or not you want to do the deal based only the actual collateral in a real estate loan. If you don't like the collateral, you are not going to go beyond that. You are not going to go beyond what the loan or the collateral itself can service. So if, for example, Deutsche Bank did not like the Doral loan and the ability to
service itself, it would never have taken the next steps because it would have been a waste of everybody's time. If you don't like the collateral, that's the first step. And then you move on to looking at the other supports of credit such as a guaranty or other items that may support the credit in a time of need.

Q And how, if at all, did this concept apply to the loan made by Ladder Capital on 40 Wall?

A The same exact thing. It would look to the underlying collateral first to make sure they were comfortable with that, and make sure that they were comfortable with that as their collateral, because that's the primary source of repayment. And then from there they would look for other credit support items, anything from a personal guaranty, as it was in this case, or some of these loans, to letters of credit are sometimes posted; and sometimes cash escrow. There are multiple forms of credit support that can be provided out there.

Q Was the credit support provided to the collateral in the 40 Wall loan different than the credit support provided in the Deutsche Bank loans?

A Yes. The guaranties were different in that there was a full guaranty on the Deutsche Bank loans.

Q And how was that different in the 40 Wall loan?
A The 40 Wall had a limited guaranty.

MR. SUAREZ: If you can turn to the next page of the document?

Q Looking to the second paragraph, it says: When evaluating guarantor support, examiners should consider whether the guarantor has both the willingness and ability to provide support for the credit, and whether the guaranty is legally enforceable.

Do you see that?
A Yes, sir.
Q How was this concept -- withdrawn.
Was this concept consistent with your analysis of the
Deutsche Bank underwriting process?
A Yes, sir.
Q How so?
A They received -- they being Deutsche Bank, received the Statements of Financial Condition. They conducted their own analysis. They had conversations with the borrower and guarantor, which would indicate the willingness and the ability to do so. You know, the guaranty is beyond just the actual numbers behind it. It provides a level of engagement for the lender. And that level of engagement keeps them where, in a time like today, where we have office buildings all over that are going back on non-recourse loans. It is very easy for somebody without any personal recourse just to hand the keys back. And banks do not want that.

So, despite whether or not the guaranty is a full guaranty or a partial guaranty, the engagement of a borrower is vital to a lender in their underwriting. And it could be, as it says, the willingness is very key there. Because if you have somebody that is willing to provide a guaranty, but they are not going to be willing to utilize it to support the credit, then you may as well not have it because of the prolonged litigation that could take, in my experience it has been years of litigation, in order to be able to act on that guaranty, if they are not willing.

Q In your experience, how are guaranties typically enforced in troubled loan situations?

A Guaranties are typically enforced in a troubled loan situation in order to promote, I guess, cooperation. They are, typically, the last thing that you would file or go after. Obviously every state is different in that there are judicial and non-judicial Foreclosure Laws, and that can play into the strategy. But ultimately what matters most is is that the guaranty is there and that you have that engagement behind them which will allow the lender to know that there is something standing behind the asset. As well as the potential for there to be collection on guaranty if needed.

THE COURT: I think the question was how, not
why.
MR. SUAREZ: Why would have been the next
question.
THE COURT: Well, but no, you don't have to ask him why. He just answered why.

How are these guaranties enforced normally in your experience?

THE WITNESS: Guaranties are typically enforced -- to kind of step back. If there is a default under a loan, it depends whether it is a payment default or if it is a covenant default or a foot fault.

A foot fault would be a minor default. A non-payment default.

MR. WALLACE: He is from the south, Judge. I am probably one of the few people who understood what he meant.

THE COURT: I didn't get it. But I am not from the south.

MR. WALLACE: I got it. I am not from the south.

MR. SUAREZ: I am from Miami, I had no idea what he meant.

THE WITNESS: So, you know, it would trigger a conversation with the borrower and the guarantor. And that's what opens up the conversation for a restructuring. Typically enforcement and exercising of remedies is a last resort that any lender wants to go through.

So when you look at a guaranty, and that is typically a tertiary or beyond, sort of, repayment, but it is mainly there for engagement, you know.

The term "comfort guaranty" is there because the lender has comfort that there is somebody standing behind it. And it necessarily -- doesn't necessarily mean how much they have behind it. I mean, we have had guarantors that sign on the deals that have minimal net worth. But at the end of the day their engagement and their expertise and their ability to complete the project and keep the project generating cash flow, and cash flow is what services the debt, is what is important. And without that individual, the asset is not as valuable to the lender.

So, that level of engagement and comfort is almost, in my opinion, as important as the actual financials behind the guaranty.

THE COURT: I still don't think that answers the question. How do you enforce it if there is non-cooperation?

THE WITNESS: You would enforce it through litigation.

THE COURT: That answers the question. Thank you.

THE WITNESS: And I would say as a last resort. In my experience as a lender, litigation is not something
that you lead with. It would come after multiple attempts at negotiating a non-litigious outcome.

THE COURT: I think all of the lawyers in this room understand that it is a last resort.

Q When the collateral is being repositioned, what value, if any, does the guaranty have?

A Well, in underwriting any deals, as I mentioned earlier, you have to feel comfortable with the actual project. And the project not only includes what it is doing, but who is doing it and their experience and their view of the market. And what the market view of them is.

And also just an overall vision that real estate developers have. Lenders do not have the vision of a real estate developer. So that real estate developer, for lack of a better term, becomes their partner in the deal. It is not a financial partner but it is their completion partner. And without that partner, or a guarantor -- who is most of the time a guarantor, they need them in order to complete a very complex repositioning project from a construction standpoint, from a marketing standpoint and from a PR perspective.

Q How, if at all, did you observe that concept with respect to the Deutsche Bank location?

A It was very clear in my review of the various Deutsche Bank credit memos that the -- it was a high reliance upon the experience of President Trump and the Trump

\section*{Unell - by Defendant - Direct (Suarez)}

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Q Then is goes on to say, "A presumption of willingness to provide borrower, open parenthesis, close parenthesis, project -- (project) security, when the guarantor has an economic incentive, is usually appropriate unless there is evidence to the contrary."

How is that factor implemented, if at all, in Deutsche Bank's underwriting of the loans?

A In the subject loans with Deutsche Bank there was a tremendous amount of equity placed into these deals. And the equity would be the economic incentive. So the borrower and guarantor would have the incentive to perform on the loan in order to protect their equity.

In the event that the asset was returned to the bank for litigation, that equity, which is in this case the economic incentive is wiped out, so if you do have the economic incentive, it does keep, once again, the engagement of that guarantor, because they do have the incentive to try to at least to recoup or try to garner back as much of their equity as they could in a distressed project. Or if it is something as a cost overrun that would provide a creative down the line, that it would provide them an economic incentive to perhaps place additional equity into a deal if needed for cost overruns or other items.

Q And with respect to the Deutsche Bank loans, was that concept -- was that concept in play, in your analysis of the

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
credit memos?
A Yes, sir.
Q How so?
A If there was a focus and highlight of the amount of equity that was placed in the deals, the loan-to-value of those deals as well, and the structuring of those deals where there were various changes and loan terms based off of loan-to-value would really show how that economic incentive is tied to a guarantor.

Q Then it goes on to say "Examiners should consider weather a guarantor has demonstrated a willingness to fulfill previous obligations, has sufficient economic incentive, and has a significant investment in the project."

A Yes, sir.
Q Was that factor evaluated in Deutsche Bank's underwriting of President Trump's guarantee?

A Yes. In my review, I did see that the willingness to fulfill the economic incentive and the investment was all acknowledged in the various credit memos.

Q Then the following sentence says, "Analysis should consider the liquidity of any assets that collateralize the guarantee."

A Yes, sir.
Q Was that analysis conducted by Deutsche Bank in its

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
underwriting of President Trump's guarantee?
MR. WALLACE: Objection. Leading. THE COURT: Sustained.

Q How, if at all, was that analysis conducted by Deutsche Bank in its analysis of President Trump's guarantee?

A Deutsche Bank completed, in their credit memos, a full analysis of the guarantor's liquidity, all of their assets, and went above an beyond additional kind of diligence on various items, including the verification of liquidity, which is extremely important, amongst other things.

Q Then it goes on to say "guarantor's unpledged assets should not be considered a substitute for project equity."

What does that mean?
A It means that assets that are on the guarantor's Statement of Financial Condition balance sheet that do not have a liability assigned to them, or tied to them, that that is not a substitute for the collateral. The collateral stands on its own, which would be what the project is; that those non-collateral assets are -- should not -- they go on, but not tied to this particular loan or asset, but they are part of the whole guarantor's financial picture as -- and would be analyzed as such.

Q And how, if at all, was that concept implemented by Deutsche Bank in it's underwriting of President Trump's financial condition?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A In my review of the credit memos, Deutsche Bank took a fairly deep dive into various assets. They engaged their valuation services group to look at four very large assets, and conducted their own analysis on those assets.

In my experience, that is, you know, typical with very complex real estate assets, to engage experts within your own organization to do so, but it would not be something where we would require, in my experience, to provide any sort of appraisals for non-collateral assets.

Q The following says "Guarantor liquidity should be verified by the bank."

What does that mean?
A "Liquidity" is one of the most important items of a balance sheet. It's cash, it's readily available. And in order to be able to make sure that that is true and correct, typically bank statements, or brokerage statements, or other backup is provided to the lender to support that liquidity on the Statement of Financial Condition.

Q And how, if at all, was this concept implemented by Deutsche Bank in its review of President Trump's financial condition?

A In my review of the credit memos, on several occasions there were members of the Deutsche Bank team that, in person, per the credit memos, met at the guarantor and borrower's office to verify the liquidity.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Q And how, if at all, were these concepts that we just discussed implemented by Ladder Capital in it's underwriting of the limited guarantee provided in that transaction?

A In similar fashion.
Q In the real world, Mr. Unell, how are these factors implemented in underwriting guarantees and the Statements of Financial Condition of guarantors?

A In the real kind of concept here is, is that if, as I said earlier, it provides a road map, the Statement of Financial Condition does. And allows for a lender or a user, in this case being Ladder Capital and Deutsche Bank, to make their own determination, whether it is the willingness, the sufficient economic incentive, or the investment in the project.

The Statement of Financial Condition allows for those various items to be analyzed on a deal-by-deal basis as it relates to the investment in the project, as well as the history of the borrower, um, to be able to know about their ability to fulfill previous obligations. And the liquidity, as I mentioned earlier, being one of the most important factors of analyzing a Statement of Financial Condition.

Q What, if anything, did you observe in connection with the underwriting of the Deutsche Bank loans was inconsistent with the way that it normally works in the real world?

A In my experience and my review, I believe that Deutsche Bank acted consistently with how I have seen it done at various

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
lending institutions that I have worked at and worked with over the years.

Q Same question about Ladder Capital.
A The same answer. Would be the exact same, acted in a similar fashion.

MR. SUAREZ: Your Honor, I move Defendant's Exhibit D390 into evidence.

THE COURT: Granted. It's in.
(Defendant's Exhibit D390 was deemed marked and admitted in evidence.)

MR. SUAREZ: I would like to show the witness what's been previously admitted into evidence as Defendant's Exhibit 62.
(Whereupon, the exhibit was displayed on the screen.)
(The witness was handed the exhibit.)
MR. SUAREZ: May I take the opportunity to commend the court officers for the fantastic job in keeping track of all of our exhibits?

THE COURT: You may. And I'm sure we all agree with you.

MR. SUAREZ: With your Honor's permission, I could start moving through the document that's on the screen.

THE COURT: I think that's perfectly reasonable.
(The witness was handed the exhibit.)

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

THE WITNESS: Thank you sir.
Q Mr. Unell, do you recognize this document?
A Yes, sir.
Q What is this document?
A This is titled, "The New Private Wealth Management US, Lending Product, Commercial Real Estate Finance." Reviewed April 23rd, 2014, in Private Wealth Management, Deutsche Bank.

Q And how, if at all, was this document relevant to the formulation of your opinions in this case?

A I reviewed this document and I took what was in it and applied it to kind of the underwriting and standards that were put forth in the credit memos by Deutsche Bank.

MR. SUAREZ: Let's take a look at the second page of this document.
(Whereupon, the exhibit was displayed on the screen.)

MR. SUAREZ: In the middle of the first paragraph.
Q It says, "Real estate entrepreneurs and investors represent an important component of our client base and US wealth creation capacity."

A Yes, sir.
Q Is that consistent with your experience in banking?
A Yes, sir.
Q And how, if at all, is the contents of this memo reflective of your experience in -- in banking?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A It's very similar to banks that I've worked at and their private wealth groups. There is a very good relationship with the institutions \(I\) worked at between the commercial real estate bank and the private wealth bank. And the same guidelines that apply from a regulatory standpoint that apply to a commercial real estate group, would also apply to the Private Wealth Group, if real estate is the main form of collateral.

Q Then it goes on to say "The offering of this product on competitive terms is a central aspect of PWM's initiative to expand our business with selected, proven and successful real estate entrepreneurs and investors."

Do you see that?
A Yes, sir.
Q Were the loans extended by Deutsche Bank, in your experience, those at issue here in the report, consistent with the objectives set forth in this memo?

MR. WALLACE: Objection. Leading.
THE COURT: Sustained.
Q How, if at all, in your experience were the loans extended by Deutsche Bank consistent with the objectives set forth in this report?

A Very consistent. In with -- in my experience of dealing with high net wealth and ultrahigh net wealth developers, that credit is one of very -- it was one of -- is a leading item. And in order to expand the share of wallet, is

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
what it would be referred to, and create other income opportunities for the bank, that this would be something that would bring them in. Real estate developers love the credit side of things, but with that comes the open relationship and cross selling which is a vital part of a large banking institution. And that cross selling would allow a bank to create additional revenue opportunities in the form of whether it be trust and estates, deposits, other items. It could be brokerage accounts, et cetera, that also provide what -- would be a total relationship value.

And the to the Al relationship value is something that is looked at at the highest levels of a bank. And while certain items may be, as I said, more competitive, other items are more commodities, and it is those commodities that lenders like to get their hands on -- I should say banks like to get their hands on, but they typically have to lead with credit, because credit is what is most important to those real estate developers. And that ultimately leads to a relationship where depository, trusts and other relationships are established within the bank.

Q What, if any, evidence have you observed in this trial that is consistent with that opinion?

A You know, hearing Ms. Vrablic's testimony, it was clear that she was driving the kind of the relationship, and was leading with credit, but also referenced multiple other opportunities for revenue from the bank to include, also,

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
introduction to other high net worth individuals. I believe she testified, or she did testify that there were, you know, that referrals were their main source of new business, and that they felt that this was a very good client to -- in order to be able to grow the share of wallet, and also to bring in new business from other family members and friends.

THE COURT: Five-minute warning. MR. SUAREZ: Let's go to page ten of this document. (Whereupon, the exhibit was displayed on the screen.)

Q Do you see the section that says "Guarantees"?
A Yes, sir.
Q Then it says, "Although it is not standard in the industry, PWM will require personal guarantees, or a guarantee, from an acceptable creditworthy entity."

A Yes, sir.
Q How is the use of guarantees by the Private Wealth Management Group different than the standard in the industry, if at all?

A Private Wealth Management is -- it's a relationship business, and the private individual is typically where that relationship is driven.

And so as Ms. Vrablic also said, that is one of the factors that's in there, that the relationship is with that individual, which is why the guarantee is there.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

It also is, as I said, it provides that comfort level. The comfort guarantee that the individual or the entity will stand behind the project and be there in the event of it's need for additional capital, or that there are cash flow short falls during that period of time.

Q Then is goes on to say "The amount of guarantee can range from 25 to 100 percent depending on the deal structure and embedded risk."

A Yes, sir.
Q What do you understand that to mean?
A That the underwriting team and the deal structuring can range from, as it says 25 to a hundred percent, so either a limited to a full guarantee.

In my experience, it has usually started off as a full guarantee and then burn off, as it did in the case of several of the subject ones.

Q And how is accepting a guarantee for less than the full amount of the facility consistent with the bank's lending obligations, if at all?

A Banks are in the business of evaluating risk, and if a loan-to-value is extremely low, call it below 60 percent, and in some cases even lower than that, that the guarantee, whether it be at 25 percent, would probably, highly unlikely, if ever need to be utilized to fund a short fall. However, as I mentioned, it does provide that comfort and the ability to go back to a

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
guarantor, or an entity that is standing behind it, in the event of cost overruns, cash flow short falls.

You can use COVID as an example, where there was massive cash flow short falls of office and retail because tenants were not paying. That is something where you would then, even under at a 25 percent guarantee, you would have the comfort of going back to the guarantor to say, "Okay, we need some level here. How are you going to fill the gap or bridge the gap between the cash flow and the debt service needs, or the capital needs?"

Q How, if at all, was this concept reflected in the underwriting of the loans extended -- the facilities extended by Deutsche Bank in this case?

A Deutsche Bank had mechanisms in several of the loans that would allow for the guarantee to stepdown from a full guarantee to various levels based off of, whether it be debt service coverage or LTV's.

Q In your experience in the industry, how, if at all, is that consistent with the use of guarantees in commercial real estate transactions?

A It's very consistent. Guarantor's, you know, they are -- would like to reduce their liability and contingent liabilities as much as possible. So a reduction from a hundred percent to 75 percent to 50 percent or 25 percent gives them that comfort. But on the flip side, a ten percent or 25 percent

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
guarantee for the lender also provides them the comfort that they have engagement and a tertiary or beyond source of -additional source of repayment.

THE COURT: Before we break, which we are about to, I want to -- I'll admonish the witness not to discuss this case, or his testimony, or anything related to it during the break. We usually take ten minute breaks, but they take 15 minutes.

I want to make sure Counsel, all Counsel are aware, and they probably already are, that this morning the Appellate Division, First Department issued a decision vacating the stay on the two gag orders that I imposed earlier on this case. So I intend to enforce the gag orders rigorously and vigorously, and I want to make sure that Counsel inform their clients of the fact that the stay was vacated.

MR. KISE: We are aware, your Honor. It's a tragic day for the rule of law, but we are aware.

MR. WALLACE: Objection.
THE COURT: It is what it is to a state of tautology. See you all at 11:35.
(Whereupon, a 15-minute break was agreed upon and taken by all parties.)

THE COURT OFFICER: All rise. Part 37 is back in session. Please be seated and come to order.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

THE COURT: Just before we resume, I've considered the request for the scheduling of the posttrial briefs and the oral argument, and I'll let the person sitting alongside of me announce what I've decided.

MS. GREENFIELD: Okay. Given both parties seem to be comfortable with doing closing arguments after the briefs being due, so we are going to adopt that strategy.

The briefs are going to be due by noon on January 5th, and then we'll hold oral argument, or closing arguments, whatever you want to call it, January 9th at 10:00 a.m. We will no longer have access to this courtroom, so that will be in our normal courtroom, 418, and the space will just be limited.

THE COURT: And I will issue a decision a few weeks after the ninth. I would hope this month, but no guarantees.

Mr. Kise.
MR. KISE: Your Honor, is there --
THE COURT: January. Sorry.
MR. KISE: I have conflicts on other cases. Is there any way we could have until the 8 th , and then have the hearing the following week, the 15th, sometime that following week? I just have -- everything, as you might imagine, in my professional life has been on hold for months, and I have those weeks -- I'll do whatever the Court

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
decides, but is there any way to get until the 8 th to file something, and then have the hearing sometime the week of the 15th? Really, the 16 th, because I believe Monday, the 15th, is a holiday.

THE COURT: I certainly appreciate we've all put things on hold. The schedule I tentatively announced is -that was intended, very precisely, to shaving days here and there. Give me a moment.

MR. KISE: Even the end of that week would help, like the 11 th or 12 th would be better than the ninth.

THE COURT: Mr. Kise, and everyone, is there any way to have -- would it help to have oral argument the first week in January instead of the second week?

MR. KISE: No, that would be even worse. I guess all I'm really asking is instead of the 9 th , like the 11 th or 12 th .

MS. HABBA: I'm out of state, your Honor.
THE COURT: Let's do this. Let me think about
this. We have plenty of time.
MR. KISE: That's fine.
THE COURT: Maybe we'll consult again.
MR. KISE: I'm talking about a two-day shift. The submission date is not really the problem; that's not really the issue, but the argument date, if there is any way I might be able to shift around things later in that week.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

THE COURT: I'm sorry, Mr. Kise, did you say you could do oral argument the 11 th?

MR. KISE: Yeah, January 11th.
THE COURT: Yeah, we'll do that.
MR. KISE: All I'm saying is two days. I'm proposing the following week, that would be even easier, but if the 11 th is an option, or the 12 th .

MS. GREENFIELD: Okay. As long as we could still have the brief due January 5th at noon, we could move oral argument to the 11th. I just have to let parties know on another case.

MR. KISE: Can I have until five on the fifth?
MS. GREENFIELD: No.
MR. KISE: All right. Thanks.
THE COURT: Give me one more moment.
MR. KISE: Thank you, Judge.
THE COURT: Attorney General, are you okay with the 5th and the 11th?

MR. WALLACE: Moving from the 9th to the 11th seems fine, I think, from our perspective.

THE COURT: Okay. Let's resume the direct examination.

Q Mr. Unell, drawing your attention to the section that says, "Covenants on the guarantor may include: Minimum net worth after adjusted contingent liabilities, and minimum

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
unencumbered liquidity and/or cash flow."
How, if at all, are those covenants consistent with what you've seen applied in the real world?

A They are consistent with my experience.
Q And how, if at all, are those covenants utilized by lenders in real estate lending transactions?

A Covenants are typically utilized by lenders to monitor performance and would indicate a -- one way or the other, a positive or negative trend as they are required to be tested. And it gives a lender an idea of how their loan, or I should say not necessarily the loan, um, in this case, a guarantor covenant would be how the guarantor may have changed year over year in order to be able to assess how strong that guarantee is, and provide their own analysis.

Q And how, if at all, is that consistent with any observations that you may have made in Deutsche Bank's underwriting of the loans at issue in this case?

A It is consistent with what \(I\) have reviewed in this case.

Q How is that?
A Um, that the covenants on the subject Deutsche Bank loans did include a minimum net worth, as well as a liquidity covenant.

Q And how are the covenants, in your review of the credit analysis, applied in the subject loan transactions?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A They were determined, obviously, by the bank in their sole discretion based off of where they believed it would set a threshold to allow them to monitor the performance and the capability of the guarantee, and conduct an analysis thereof.

Q Then is goes on to say "Nonrecourse loans would be considered on a very limited exception" -- excuse me, "very limited exception basis only for top tier clients on very low risk transactions."

Do you see that?
A Yes, sir.
Q How, if at all, is that consistent with the burn off of the guarantees in the two Deutsche Bank transactions in this case?

A It would be consistent in that it was reviewed and approved, and it was in conjunction with the risk profile of the transaction improving for the lender.

Q What, if anything, would Deutsche Bank's agreement to extinguish the guarantee in two of the transactions at issue in this case mean in the real world?

A Ideally, it would mean that the guarantor is off the hook, if you wanted to call it that. It would also mean that Deutsche Bank would have lost a tertiary, or beyond, source of repayment, or the ability to have the engagement as the -- what I would go back and say, of the guarantor, in the event that they needed it.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Q And how, at all, is that consistent with the OCC guidelines on underwriting guarantees?

A It is consistent, and consistent that as the risk profile changes and becomes improved for the lender, that they would then drop certain restrictions and covenants and guarantees, because they're, as I said earlier, in the business of assessing risk. And if the collateral itself it a low loan-to-value and a positive cash flow is able to carry it on itself, then that would consider -- it would be considered a lower risk profile, and thus eliminate the need for additional support.

MR. WALLACE: Not an objection. Can the witness clarify when he says that "they're in the business of assessing risk", who he is referring to?

THE WITNESS: Yes, sir. Deutsche Bank. Deutsche Bank, and banks in general.

MR. SUAREZ: Your Honor, if I may show the witness what's been previously admitted into evidence as Plaintiff's Exhibit 515.
(Whereupon, the exhibit was displayed on the screen.)
(The witness was handed the exhibit.)
THE WITNESS: Thank you very much.
Q Mr. Unell, do you recognize this document?
A Yes, sir.

Q What does this language mean in the real world, Mr. Unell?

A It means it is in the opinion of the person that submitted it, in this case it is the guarantor and the borrower, that the information that is being presented is correct in all material respects.

Q And I would like to focus your word -- your attention on the phrase "in all material respects -- "presents fairly in all material respects." How do banks interpret, or lenders more specifically, interpret the concept of presenting fairly in all material respects?

A Materiality is in the eye of the user, and that the lender is able to determine what they believe in their own risk rating, their own risk profile and underwriting and analysis, what is material to them. And that the Statements of Financial Condition, as well as this document is -- that it is -- they are the ones to decide what is material and not material, and at what levels those are.

Q And in your experience, how is a compliance certificate of this nature used by a lender in the real estate lending industry?

A The compliance certificate is kind of a -- I wouldn't say it is a check-the-box; it is a report card or a health check, and is done based on what the terms of the loan are, quarterly, annually. It could be -- obviously it is prescribed
in the loan documents. And what this allows a lender to do is to see if there have been any significant changes in the financial profile of both the borrower and the guarantor throughout the period of time. And allow for them to, as I said earlier, to see if there has been any positive or negative trends over the time period and able to allow them to compare them to each other.

Q And why do banks require this information?
A Banks require this information so that they can perhaps see a leading indicator if there is a decline. Even though it may not be a breach or a default of a covenant, allows to see if there are potential weaknesses and allow, potentially, for conversations.

On the flip side, it also can show that there has been improvement in the condition of a guarantor, whether it be liquidity, whether it be a reduction of liabilities, et cetera. It gives, as I said, an updated snapshot to make sure that they were in compliance.

Q And in your review of Deutsche Bank's underwriting of the loans at issue in this case, how, if at all, were the compliance certificates utilized by the bank?

A They were utilized as I would expect, and throughout my experience, in the manner that \(I\) just described, to monitor the condition of the borrower and the guarantor throughout the life of the loan.

Q What factors would you expect a bank to consider in determining whether the compliance certificate presents fairly in all material respects, the financial condition of the guarantor?

A Would you mind repeating that?
Q What factors?
A The factors? Whether the presentation is the same as it has been over the years for consistency, the sources, the information provided in their Statements of Financial Condition, and most importantly whether or not it provides ample information for the user to conduct their own analysis.

Q Are you aware in this case of a discrepancy in the reporting of the size of President Trump's triplex?

A Yes, sir.
Q And would a change in the reporting of the size of the guarantor's triplex, for example, be something that would factor into the bank's evaluation as to whether the guarantor's financial condition is presented fairly in all material respects?

A In my opinion it would not be material based on the other information and the amount of assets and liabilities that are included on the Statement of Financial Condition.

Q Why is that?
A Because when you look at it, it is a personal residence. It is -- was a minor portion of the overall
financial profile of the guarantor. And also, you know, in my experience it would be very rare for a lender to try to exercise any sort of remedy upon a personal residence.

Q Are you familiar with the net worth covenants contained in the loan documents on the four transactions that you have evaluated in this case?

A Yes, sir.
Q Can you briefly describe your understanding of the net worth covenant in the Deutsche Bank loans?

A Yes. The net worth covenant was \(\$ 2.5\) billion and was to be determined based off of the guarantor's submission as is usual practice.

Q What does the term adjusted net worth mean in the lending context?

A Adjusted net worth is a calculation that is undertaken once a lender has an analysis. And there are various adjustments that are made throughout in order to provide a conservative view of how the bank looks at a Statement of Financial Condition.

Q And in underwriting a guaranty, what is the purpose of the bank utilizing an adjusted net worth, if any?

A The adjusted net worth provides, as I said, a conservative view of what the assets are on there.

More importantly, it also does not adjust liability, so the liabilities remain. However, assets are analyzed
individually and are determined by the lender in their sole discretion as to where they would like that from a conservative basis. And it is done in order to, as I said, as banks are in the business of analyzing risk, and from a conservative approach, that is what is done on these sort of statements.

Q And how is the concept of an adjusted net worth used with respect to the determination of a minimum net worth covenant by a lender, if at all?

A They are unrelated.
Q Why is that?
A Because the covenant is based on the net worth of the guarantor, and is not the adjusted net worth. If the adjusted net worth were to be the determinant, because it is done by a lender, in their own discretion and under their own analysis, it would be unfair to a borrower because a lender could manufacture a default. If it is in their sole discretion and for whatever reason -- and there have been, I have worked on several deals where there have been claims by borrowers that defaults were manufactured -- it would result in very dirty litigation and lengthy litigation as it results to what is the value.

Q What options are available to a lender if there is a violation of a net worth covenant?

A There are several options. You know, first, it could be whether or not you want to issue a default; whether or not
how you approach the client. Typically in my experience, no matter what the relationship is with the borrower, whether it be adverse or whether it be in the form of a very good bank customer Private Wealth, that you would have a conversation with them to understand exactly what is going on. And that information would inform how the potential breach or covenant default would impact the loan and the ability for the loan to be repaid. And the ability for the loan to be debt serviced.

From there, conversations would then also then say, okay, well what caused that default. Is there a -- is this a long-term situation that will result in the net worth being lower than it had been prescribed previously? Or, is it a short-term blip because of a cash need for another project or waiting for sales, proceeds, et cetera.

But it opens up the conversation. And typically if it does not impact the repayment performance of a loan, it would be forbear-ed against or would perhaps even be readjusted downward if there was an indication that the net worth was going to be lower on an ongoing basis.

Q And how, if at all, was the use of minimum net worth covenants by Deutsche Bank consistent with your experience in the real world?

A In my experience, in my review of the Deutsche Bank credit memos, it is consistent with that.

Q Why is that?

A Because they -- they relied upon the -- their knowledge and their information to set the net worth covenant. And then consistent with my experience, the net worth covenant was determined by the guarantor submitted statements.

Q I just want to clarify one point. You said "inconsistent with" or "in consistency with"?

A In consistency with.
THE COURT: It is an important distinction. THE WITNESS: Yes.

Q Why is that?
A Are you asking why they are consistent?
Q Yes.
A Because that's -- that is how every single loan that I have worked on that has a net worth covenant is done. As I mentioned earlier, if you were to rely on an adjusted net worth, which is out of the control of the borrower or guarantor, that would create a multitude of problems down the line. But if it is in somebody's sole and absolute discretion, typically a borrower and guarantor are not given a peek behind the curtain to see what adjustments and analysis are done by a lender. Those are proprietary documents that, in this case, were obviously produced. But that is a behind the scenes approach in what a lender does. You know, every lender kind of has their own special sauce, if you will, as to what metrics they weigh differently. And that typically comes out in their
risk rating process. And risk rating processes are proprietary and, you know, kind of throw everything into a blender and algorithms, et cetera, that are created to define that and that's how that is done.

Q Are your observations in this case with respect to Ladder Capital's conduct any different from those of Deutsche Bank's conduct?

A No, sir.
MR. WALLACE: Objection, leading.
Q How, if at all, are your observations concerning Ladder Capital's conduct different from those of Deutsche Bank?

MR. WALLACE: I am going to object to that as well. Saying how and then asking a leading question, how if at all, it is still a leading question that suggests the answer to the witness.

I haven't been objecting to it overall, but it is still a leading question.

MR. SUAREZ: It doesn't suggest the answer --
MR. WALLACE: It does.
MR. SUAREZ: -- which is the definition of what
a leading question is.
THE COURT: Give me a second.
MR. SUAREZ: I am not saying: Isn't it true that the Ladder Capital underwriting isn't any different. That would be a leading question because it would suggest
the answer. Even if I say, how is it different, that's not a leading question.

THE COURT: How was it different is not a leading question. Overruled, on the basis of common sense.

A In my review of the documents it is consistent with the other loans.

Q In the event of a violation of a minimum net worth covenant, what is the focus of the lender's analysis?

A What caused that it potential decline in net worth.
Q And why would that be the focus of that analysis?
A Because you want to, as I said earlier, figure out exactly what is causing it. Is it a one-time deal? Is it additional liabilities that came on which would have, obviously, decreased it? Is it a lack of liquidity or decline in liquidity? Is it a decline in assets? It could be a multitude of things. But that is -- it is important to see what exactly is causing it to then determine, as I said earlier, if it would impact repayment of the loan.

Q And in the real world what is bank practice when there has been a breach of a covenant that is not related to payment?

A That's typically known as what we call, little d, default. And would not be something that would really raise the eyebrows of the lending institution. It would certainly
open up a conversation to allow the lender to understand what has changes and if the risk profile has changed at all. But it would not necessarily and very limitedly, in my experience, would result in any sort of default being issued and enforcement of remedies and rights.

Q And how, if at all, did you observe the concepts that you described in Deutsche Bank's loan underwriting?

A It was consistent with my experience.
Q How so?
A In that if there was a breach, that they would reach out, they would discuss with the client and kind of go through, et cetera, what that would be. And then conduct their own analysis, as I said, through the annual review, et cetera, to assess their risk and the repayment.

Q Was your analysis any different for Ladder Capital's?
A No. No, sir.
Q What are the factors that a bank considers when pricing a loan?

A There are multitude of factors that are considered when pricing a loan. Obviously the loan itself, the collateral behind it is one. And how well that collateral protects the bank from a loan-to-value standpoint. What the debt service coverage ratio would be. Liquidity of not only the borrower and the guarantor; direct liabilities so that you understand what the overall cash flow of an entity and an individual is.

And then also, even going beyond that, which is also important, when you are looking at pricing is, the overall relationship that an individual or a relationship has at an institution. As discussed earlier, the cross selling is a huge push at all banks in my experience at both of the national banks that I worked at. And trying to drive non-revenue -- excuse me, non-interest income, fee income, is extremely important. And that fee income whether it be through Trust and Estates, whether it be through Derivatives and Swaps, et cetera, is something that weighs heavily as well. So there are a multitude of factors. But relationship is extremely important in determining that, in what the overall relationship value is. As well as risk adjusted return on capital. There are multiple metrics that go beyond just an individual debt product to determine what that pricing would be.

MR. SUAREZ: Your Honor, I would like to show the witness what has previously been marked as demonstrative DD-4.1.

Q Mr. Unell, do you recognize this chart?
A Yes, sir.
Q What is this chart?
A This chart is a chart of average mortgage terms that was sourced from Realty Rates which investor survey. Which shows the average spread for loans over the period of Q-1, 2011 to Q-4, 2012, based on various different asset classes:

Office; Golf Course and Country Clubs; and Lodging Facilities.
Q And where does the information from this chart -withdrawn.

Did you produce this chart?
A Yes, sir.
Q Where did you obtain the information that's contained on this chart?

A Our firm subscribes to Realty Rates and uses them frequently in our assignments.

Q What are Realty Rates?
A Realty Rates is a service that provides various surveys. This one is their investor survey. They have a developer survey and I believe they have one more.

Typically they will survey two to 300 various real estate professionals in development and banking and valuation and comply those results into a quarterly publication that gives an indicative view of rates, loan-to-values and other loan terms that are available in the marketplace.

Q And how does this chart relate to the pricing of the Deutsche Bank loans at issue in this case?

A For this particular chart the loans that were originated during this period of time from Q-1, 2011 through Q-4, 2012, would show what the spread would be on the various asset classes: Office; Golf Course and Country Club; and then finally Lodging Facilities full service. Which Doral would
have been falling under the Lodging Service full service facilities as well as Golf Course and Country Clubs; and the others would fall under Office as well.

MR. SUAREZ: And if we could please pull up Mr. McCarty's chart? PX-3302.

Q Mr. Unell, are you familiar with this chart?
A Yes, sir.
Q And how have you become familiar with this chart?
A I received it as part of Mr. McCarty's report, and then ultimately this version was updated and I am not sure when it was received. But I looked at it.

Q And what -- what work, if any, have you done to review this chart?

A I have gone through and reviewed to make sure that the -- it was accurate from a mathematical standpoint. As well as I have gone through and reviewed the -- the hypothetical CRE interest percentages that are contained in this document.

Q And what, if any, opinion do you have concerning the use of the hypothetical CRE interest rates?

A I do not agree with the rates that are the CRE interest percentage rates here.

Q Why is that?
A They are vastly different than the data that \(I\) have seen provided by Realty Rates, other data sources has shown commercial mortgage, as well as the actual loans and the loan
pricing grid that was -- that was prescribed and part of the Deutsche Bank Private Wealth Management practice.

Q What was the basis for Mr. McCarty's use of those CRE interest rates in his analysis?

A You know, I believe that on one of them he utilized a loan that was originated in 2005; made the assumption that the 2005 interest rate would still be applicable today. Market conditions, time has changed from 2005 during the origination, and utilizing a 2005 rate, in my opinion, is not a good measure for what should be. That being one.

And there was also no other support that I was able to find in Mr. McCarty's report to support that number. The others were -- one was based off of a non-binding term sheet that was non-negotiated and took it as it would be done.

And I am not sure of where the others came from. I know there was some discussion about others. But in general, I did not see any support for those numbers.

And also, you know, saying that what the CRE interest percentage is, to be able to state what a bank that does their own pricing CRE would be, would have to have knowledge of how their pricing would work internally to know, okay, this is 10 percent, it would not be negotiated. And the term sheet for the 10 percent was provided to show -- I am not exactly sure what it was provided. But it would not be atypical for a lender to issue a term sheet at rates or terms that were
obtuse, because they were trying to push business elsewhere or trying to contain it in the Private Wealth Group.

Q How, if at all, is that consistent with the evidence that you have heard in this case?

A It is a -- it is consistent with the evidence that I heard from the Deutsche Bank personnel that testified.

Q How so?
A They testified that the rate is determined by them. That there were a multitude of factors that went into the rate. One factor that was never considered was the complete elimination of the guaranty. And my understanding of what Mr. McCarty did is, is Mr. McCarty is stating that these rates are as if there is no guaranty. And there is a guaranty in place here. And so it would be very difficult to state that you go from a guaranty to no guaranty, and then also apply these to them. It also does not indicate whether or not that there were other options for financing at that time, that the defendants could have gone out and sought on their own. So it is a really, in my opinion, a very narrow-minded approach to come up with an interest percentage that I did not find any support for. As a matter of fact, find actually contrary support from Realty Rates and the testimony of Deutsche Bank.

MR. SUAREZ: If you pull up DD-4.1 next to Mr. McCarty's analysis.

Q Can you explain how the Realty Rates spreads are
inconsistent with the spreads suggested by Mr. McCarty, if at all?

A Yes. So, for instance on Doral, we can use that, where you came with the 10 percent.

First, I also think it is important to note that these loans were contractually done on an index versus spread. And the other problem with Mr. McCarty's analysis is Mr. McCarty does not take into account fluctuations in what the base rate is. And the base rate in this case is LIBOR. He is assuming a fixed rate across the board. These are not fixed-rate loans. These loans fluctuate based on LIBOR and the spread. The spread remains the same.

So, without knowing -- without having in front of me exactly what LIBOR is, the way that these loans would be priced would fall in-between, on Doral, somewhere between the Golf Course and Country Club and the Lodging Facility. So it would be LIBOR, call it, plus 400 in that range.

This also does not take into account the other credit support. It does not take into account other items that are in there. These are just basic as if the loan-to-value was 70 percent, plain vanilla. But it is also the best indication in the market at that time as to what actual rates were and what deals were getting done at. This is real life. This isn't a non-binding term sheet that threw out a number that was never discussed or negotiated.

These are actual deals that are surveyed by people in the market across the country that are living and breathing these deals daily. And it would indicate that the rate would be well below the 10 percent that Mr. McCarty has established in his exhibit.

Q In your answer just now, what did you mean by "credit support"?

A Credit support are other items outside of the collateral. So a guaranty could be considered credit support. Credit support could be the other assets of the borrower. It could be a multitude of items. It could be letters of credit. But, you know, it is, like I said, it is an average.

Unfortunately, because loan terms are by and large confidential, and we saw that yesterday in Ms. Vrablic's with the OPO thing, that banks are very guarded on giving out their terms. This, because it is a survey of two to 300 people on a quarterly basis, is the best indication for value. And is used across the commercial real estate industry to benchmark rates, especially when we are having to go back in time to determine whether or not a rate was -- was applicable; whether it was within a range of what would be considered acceptable. It is nearly impossible to place an exact interest rate on this looking back in time, because none of us have worked for Deutsche Bank. And the best indication as to what this rate would be, would be Deutsche Bank, because Deutsche Bank is the
evaluator of risk. They are the evaluator of materiality. And they are the ultimate user and the one where this matters. And it is their sole determination, based on their analysis, as to how they want to price the loan.

This also would not factor in any sort of relationship value and other products that the family of President Trump may have had with Deutsche Bank. And it is important to note that it is not just -- when a bank looks at it, they look at it as a relationship like a family. And it would consist not only of President Trump but his children as well. So any other loans -- that would fall off and we would all get credit for that relationship and the other items in their total relationship value.

Q And how is the analysis that you just described for the Doral loan -- how does that analysis apply to the Chicago loan?

A The same could be said. So Chicago, when you look at Chicago it would fall within on the Office side as well. And that would be on the lower spread. Spreads are obviously based on risk profile of various assets at various times.

For instance, during COVID spreads on Hospitality went through the roof because everybody thought that Hospitality was dying. Spreads on Retail went up dramatically. On the flip side, spreads on Industrial went down because of the large amount of -- there are a multitude of factors outside
of just what is on the paper and on this loan, that also play into the determination of what a rate is. There are macro level things. There are also individual items that the bank may have.

And also, banks may want to have a diversification of asset classes. Where if they do not want to have 100 percent of their commercial real estate in Office; or they want an even balance between Hospitality, between Retail, between Office, between Multi-family. And so without having the knowledge of what the actual business plan was at Deutsche Bank, but hearing their testimony, feel that they were within their right, as all banks are, to set the pricing based on the multitude of factors. Factors that are unknown to any of us, except for those at Deutsche Bank because it was their decision.

Q And how does your analysis of these loans apply to the OPO transaction?

A Same thing. OPO being a lodging facility. The closest examples that you would be able to find in the marketplace would be the green line on there, which would indicate a spread of, you know, approximately 400 basis points there. Which would be, you know, while the loan at OPO was lower, that also doesn't factor in the 400 basis points here. The various other items that would consist of total relationship value, which would assist in garnering competitive pricing from Deutsche Bank as outlined in their own memo on the

\section*{Unell - by Defendant - Direct (Suarez)}

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

MR. SUAREZ: If we could replace DD4.1 with DD4.2. (Whereupon, the exhibit was displayed on the screen.)

Q Do you recognize this chart, Mr. Unell?
A Yes, sir.
Q Did you prepare this chart?
A Yes, sir.
Q What does this chart represent?
A This is a similar chart. However, the data came from the Commercial Mortgage Commitments database. And the Commercial Mortgage Commitments database is compiled by the Association of Life Insurers, and it is done so -- life insurers place a lot of real estate debt. This is how they are able to benchmark each other to see how each individual life co is pricing various loans, and provides industry data not only for those individuals, but for banks to remain competitive with life cos, as life cos are typically a very good competitor to banks on the real estate lending side.

Q What, if anything, does this analysis reflect with respect to Mr . McCarty's selection of an eight percent rate on the OPO transaction?

A The data on this chart from Commercial Mortgage Commitments would refute that and be, um, not support that eight percent. It would be the spread plus approximately anywhere from 250 to -- at the lowest, um, call it from 300 basis points

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
to 200 basis points, plus the applicable index.
Q And how about Doral?
A Doral would be the same. This would also indicate that figures utilized by Mr. McCarty are not supported by this data.

Q And how about Chicago?
A The same. It would show that the figures utilized by Mr. McCarty are not indicative to actual terms that were available in the market at the time.

MR. SUAREZ: If we could pull up DD4.3.
(Whereupon, the exhibit was displayed on the
screen.)
Q Mr. Unell, do you recognize this chart?
A Yes, sir. This is a chart of -- of -- from realty rates, once again, but this focuses on the average mortgage spread from Q1 2013 to Q4 2015, and focuses solely on full-service lodging facilities.

Q How, if at all, does this -- does the analysis contained within this chart inform your evaluation of the rates selected by Mr. McCarty?

A It would -- this does not support the rate that was utilized by Mr. McCarty.

Q And with respect to the Chicago transaction, why is that?

A Because the Chicago transaction, Mr. McCarty used a fixed 7.5 percent rate. Once again, this was not a fixed rate

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
loan. It did go -- fluctuate based on the index. And not only that, the index plus the spread would have been below the 7.5 percent utilized as a fixed rate by Mr. McCarty.

Q And how does this analysis apply to the Doral loan?
A It would be the same. Once again, it would be much lower than the ten percent that was utilized by Mr. McCarty during this exercise.

Q And with respect to the Chicago loan?
A The Chicago loan, it would be the same, you know, fallen, and once again, below 7.5 percent.

MR. SUAREZ: If we could pull up DD4.4.
(Whereupon, the exhibit was displayed on the screen.)

Q Do you recognize this chart?
A Yes, sir.
Q Did you prepare this chart?
A Yes, sir.
Q What does this chart represent?
A This chart represents the loan-to-value ratio for lodging facilities from Q1 2013 to Q4 2015, and indicates that it remains stable at 70 percent loan-to-value was the average loan-to-value for full-service lodging facilities by lenders during this time period.

Q How does this chart relate to the pricing of defendant's loans?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A As the loan-to-value goes lower, the pricing would improve for the side of the borrower, because lower loan-to-value equates to better security for the lender, which equates to less risk, and if there's less risk, then the risk-based pricing would indicate that it would be lower.

Q And how is your analysis of market rates consistent, if at all, with the manner in which Deutsche Bank priced the loans at issue in your analysis?

A It was consistent, but it's also -- these are guidance. And once again, the pricing is in the sole discretion of the lender. And there are multiple factors that go into that. And as I mentioned, the only folks that are able to determine that are Deutsche Bank. And they did so, and it went through a lot of scrutiny, based off of the e-mails and the discussion \(I\) had, or discussions that I have seen, as it relates to pricing on these various assets.

MR. SUAREZ: If we could please pull up what's been previously admitted into evidence as Defendant's Exhibit 205.
(Whereupon, the exhibit was displayed on the screen.)
(The witness was handed the exhibit.)
THE WITNESS: Thank you, sir.
Q Mr. Unell, do you recognize this document?
A Yes, sir.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Q What is this document?
A This document is the pricing grid that was utilized by the Private Wealth Management at Deutsche Bank.

Q And how was this grid utilized in determining the pricing on the three Deutsche Bank loans at issue in your analysis?

A Based on my review of documents and testimony, and the depositions I've read, that this was a chart that was used as guidance for all clients of the Private Wealth Management bank, and the pricing that was provided to the defendants was consistent with the 2.0 to 2.5 percent of commercial real estate as it states in the Americas line for commercial real estate.

Q And in the case of Deutsche Bank, how would someone qualify for this pricing grid?

A Based on documents and testimony, um, my understanding is that qualification of the Private Wealth Management would be a \(\$ 50\) million net worth.

Q And was President Trump qualified as a member of the Private Wealth Management Group at Deutsche Bank?

A Yes, sir.
Q What does the term "high net worth individual" mean in the banking industry?

A The "high net worth individual" typically is somebody that has a threshold of assets and/or liquidity, and at times there is also the ability for lenders to make exceptions for the

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Private Wealth Management Group if somebody has a closely held business, maybe expecting a liquidity event. Each institution has what their own definition of what high net worth and ultra high net worth are. And 50 million and a hundred million are typically what you see. At one point, 30 million, but as things have changed over the years and wealth has increased, that number has typically gone up to 50 million.

Q Why do banks seek out high net worth individuals as clients?

A High net worth individuals, as clients, provide a multitude of revenue sources for a lender, whether it be credit, whether it be trusts to cross sell opportunities out there. The derivatives for fixing rates, you know, deposits, investments, investment banking, all of that is, as I mentioned earlier, you know, noninterest income. And noninterest income equates to fee income, and banks love fee income.

A lot of times they will lead with credit and then try to grow the relationship so that they can get some of those more advantageous products with a client, such as the ongoing fee.

Debt is also typically a commoditized item in that it is not consistent where a borrower is going to come to you every year where the same request.

So in order to kind of establish that relationship, grow that relationship, you would want to have other tentacles, as I would call it, into there, which provide a multitude of

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
revenue sources, which are a big factor into the pricing of a loan.

MR. SUAREZ: I already know, when your Honor looks at me like that, you have a question.

THE COURT: Can I get a read back of the last question.
(Whereupon, the requested testimony was read back by the court reporter.)

THE COURT: Mr. Suarez, do you know who Willie Sutton was?

MR. SUAREZ: I don't know.
THE COURT: He was a bank robber, and he was asked why he robbed the banks. And his answer was, "Because that's where the money is."

Why do they seek out high net worth individuals? That's because they have money. But we received a much more detailed answer, which is fine.

MR. WALLACE: I think that's been covered by this witness and many others as to why banks like rich people.

MR. KISE: I thought it was the Attorney General's position that President Trump doesn't have any money and that's why he had to go to the banks.

MR. WALLACE: If Mr. Kise carefully read our
papers, it didn't say he had no money.
MR. KISE: He only had \$3 billion, not five. I got

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
it.

THE COURT: Anyway sorry for the interruption. Let's continue.

MR. SUAREZ: If we could turn to defendant's demonstrative DD4.7.
(Whereupon, the exhibit was displayed on the screen.)

Q Do you recognize this demonstrative?
A Yes, sir.
Q What is demonstrative?
A This is a chart that I prepared utilizing data from Forbes that shows the number of billionaires, worldwide and in the United States, by year.

Q And in the period of 2010 to 2012, approximately how many billionaires were there in the world?

A Just over 400.
Q In the world?
A In the world? Between a 1,000 and 1,200.
Q And how many were there in the United States?
A Between 400 and 424.
Q According to Deutsche Bank's own analysis, would
President Trump qualify as one of those 400 or so billionaires in the United States?

MR. WALLACE: Objection. Leading.
THE COURT: Sustained.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Q What, if anything, did you see in Deutsche Bank's analysis as to whether President Trump would qualify as 400 or so billionaires in the United States during that time period?

A Based on my review of the analysis conducted by Deutsche Bank, they firmly believed that he was one of the 400 individuals in the United States that qualified as a billionaire.

Q What capacity does a bank like Deutsche Bank have, if any, to underwrite the financial conditions of a billionaire?

A Deutsche Bank, as a sophisticated international lender, would have ample ability to underwrite and make their own analysis and decisions onto the financial wherewithal of an individual.

Q And what, if anything, is different as to how you underwrite the financial condition of one of these very few people in this country that are worth more than one billion dollars?

A It presents a unique opportunity, and it takes a lot of review work and analysis, which was conducted by the Deutsche Bank team, as evidenced by their review of liquidity, by their engagement of their evaluation services group, as well as the other analysis where they have reviewed and conducted their own adjusted net worth.

Q And what, if anything, about the fact that President Trump was among these very few number of individuals in this

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
country that are billionaires, would have lent credit support to the transactions entered into by Deutsche Bank in this case?

A It would have carried a lot of weight for their ability to grow the relationship and increase the share of wallet.

Q Why is that?
A Because of as I mentioned earlier, leading with credit is typically a good way to win over the hearts and minds of high net worth real estate developers, or any real estate developer in that matter, but with that comes, as I mentioned earlier, the other opportunities to generate revenue from a high net worth individual, or in this case, an ultrahigh net worth individual.

And I also believe that, as stated by Ms. Vrablic, that it also presented an opportunity for introductions, which would also help Deutsche Bank grow their Private Wealth business.

Q What, if anything, about the financial characteristics of a billionaire would make them attractive to a bank as a guarantor?

A You know, when there is only 400 or so of them in the United States, it really kind of puts them up there in what I consider rare air. And when you look at the security and the ability to support a credit, it would place them in, you know, the top quarter percent of individuals in the United States in their ability to support a credit.

MR. SUAREZ: Going back to your Honor's analogy
about why banks like billionaires, I think that's where the

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
money is.
THE COURT: If there is one thing we've learned in the last eight weeks, or whatever it's been, is that banks love billionaires. It could be a motto.

MR. SUAREZ: If we could pull up defendant's demonstrative 4.5.
(Whereupon, the exhibit was displayed on the screen.)

Q Do you recognize this chart, Mr. Unell?
A Yes.
Q Did you prepare this chart?
A Yes, sir.
Q What does this chart represent?
A This chart represents President Trump's net worth as shown on the blue line. It also represents what the Deutsche Bank minimum requirement was for net worth. It also then has the Deutsche Bank adjusted net worth as determined by them.

And then finally the red line down on the bottom shows the Ladder Capital minimum liquidity requirement -- net worth, excuse me, requirement, not liquidity.

Q What, in your experience, does it mean that the DB adjusted net worth and the DB minimum requirement on certain of the loans are so close together?

A That's not indicative of it. What would be indicative of what Deutsche Bank would look at and also as collaborated by

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
their testimony is that when you are looking at, it would be the blue line versus the purple line and not the green line.

Q And would Deutsche Bank -- withdrawn.
How, in your experience, would it be consistent with real world banking practices for there to be a difference between the stated net worth of the guarantor and the adjusted net worth of the lender?

A It is very typical to have a deviation between the net worth reported by a borrower and the adjusted net worth as determined by a lender in their sole discretion.

Q And is that consistent with what you observed in the relationship between Deutsche Bank and President Trump, if at all?

A Yes, sir. It would be consistent with all real estate loans that I've worked on, whether somebody is worth one hundred thousand dollars, a million dollars, one hundred million dollars, or several billion dollars, that this would still remain the same as to what to look at, which would be the net worth versus the requirement, and not the adjusted net worth.

Q How would you describe the difference between the Ladder Capital minimum requirement and President Trump's net worth?

A Close to about -- in 2010 there was about a \(\$ 4\) billion gap, and by 2015, that gap had increased to approximately \$6 billion difference.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Q And what, if any, conclusions do you draw from that gap?

A That there was a wide margin there. Um, that it was -that the -- also that the net worth requirement imposed by Ladder was not something that they felt very strongly on. To place it at such a low minimum, it was probably put in there, in my opinion, as to, "Hey, we've got to have a net worth requirement. Let's just put something in there." But it was based off of its low -- it's not something that was factored into their overall decision.

MR. SUAREZ: If we could put up D-205 next to this chart.
(Whereupon, the exhibit was displayed on the
screen.)
Q What opinion do you have, if any, as to whether President Trump's net worth qualified him for the pricing grid on D-205?

A Based on the net worth, the adjusted net worth, the Deutsche Bank minimum requirement that the threshold would have been met to qualify for the 2 to 2.5 percent, as prescribed in this document.

Q And how, if at all, would a decrease in the loan-to-value of the loans, throughout their course, affect the pricing?

A A lower loan-to-value equates to a more secure loan for

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
the lender, and return for that -- as going back to risk-based pricing, and return for that, the lender typically offers a lower interest rate because they are basing their pricing off of risk. And with a lower loan-to-value, the risk profile is diminished. And so with a lower risk profile comes a lower rate. Like I said, risk-based pricing as determined by Deutsche Bank.

MR. SUAREZ: If we could please pull up Plaintiff's Exhibit 293 at page five.
(Whereupon, the exhibit was displayed on the screen.)
(The witness was handed the exhibit.)
THE WITNESS: Thank you, sir.
Q Mr. Unell, is this a document that you reviewed in connection with your -- in connection with preparing your opinions in this case?

A Yes, sir.
MR. SUAREZ: Can we turn to the recommendations.
(Whereupon, the exhibit was displayed on the screen.)

MR. SUAREZ: Which may be at page five of the document, not the exhibit.
(Whereupon, the exhibit was displayed on the screen.)

MR. SUAREZ: Go forward.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
(Whereupon, the exhibit displayed on the screen was scrolled through.)

MR. SUAREZ: Page three.
(Whereupon, the exhibit was displayed on the screen.)

MR. SUAREZ: Zoom in on recommendations.
(Whereupon, the exhibit displayed on the screen was enlarged.)

Q Do you see here the analysis contained in the Deutsche Bank credit memo?

A Yes, sir.
Q Have you reviewed this credit memo?
A Yes, sir.
Q Have you seen the recommendations made by Deutsche Bank in this credit memo?

A Yes, sir.
Q And what was the basis for recommending this facility, according to the credit memo?

A The financial strength of the guarantor, the nature of the guarantee, the operating experience, and the expected enhanced value due to Capex.

Q Is this consistent with your experience in the real world?

A With one exception. I think it goes without saying, the facility would not be recommended at all if Deutsche Bank

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
was not comfortable with the actual collateral.
So I think that this is additional comfort, because there is a whole section on collateral, and I think it's important to note that none of this comes into play if the lender is not satisfied with the actual project that they are lending on as collateral. So beyond that, it would be consistent.

Q What does the credit memo reflect concerning the strength of the guarantor with respect to Deutsche Bank's own analysis?

A It actually, from this it shows that it is on an adjusted basis. That it shows that the unencumbered liquidity, and then it clearly states on adjusted basis the \(\$ 2.4\) billion of net worth is what the financial strength of the guarantor was, per this document.

Q Is that consistent with your experience in the real world?

A Yes, sir.
Q How so?
A Once again, going back to what I stated earlier about adjusted net worth, you know, banks have their own internal kind of things, and that's what we are looking at here. But on the outside, borrowers don't know about the adjusted net worth. So this is the conservative of view placed forward by the bank showing how they feel about the financial strength of the

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
guarantor on an adjusted basis, based off of their own independent analysis of the Statement of Financial Condition submitted by President Trump.

MR. SUAREZ: If we could turn to page four of the exhibit.
(Whereupon, the exhibit was displayed on the screen.)

Q Do you see the section that says "financial analysis"?
A Yes, sir.
Q With respect to the guarantee actually provided by President Trump, what does this analysis represent?

A This analysis represents Deutsche Bank's independent analysis of the Statement of Financial Condition submitted by President Trump, and it's consistent with transactions and credit memos that I have worked on and reviewed in my experience.

Q And what, if anything, in your experience would explain the difference between the client reported net worth of \(\$ 4.2\) billion, approximately, and the DB adjusted net worth of \(\$ 2.365\) billion?

A You know, if you look at this in detail, the -- you know, the main differential there is the net equity in real estate. There is a change between the adjusted, downward, however, the other assets is adjusted upward by approximately 100 million.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

So the lenders don't necessarily make adjustments all downward. It's their own independent analysis that allows them to arrive at their own decision based off of, not only the document, but their own experience and various other sorts of assets, and also in discussions with the provider of this so that they can better understand the statements.

Q With respect to the guarantee, regardless of whether there's a difference in the value of the assets that support the guarantee, does that change the nature of the assets that support the guarantee?

A Absolutely not. The guarantee stands on its own, despite what is behind it. And that goes whether or not somebody looses everything. The guarantee still remains in place. It's not necessarily tied to any particular asset. There's no portion of the guarantee that says, you have to have this, you have to have that. The guarantee remains in place no matter what the ultimate financial profile is of the guarantor.

Q And how, if at all, does the guarantee change depending on the adjustments to the value of the assets of the guarantor?

A It does not change. It still provides the same level of guarantee that was -- no matter -- that was submitted. The guarantee does not change.

As I mentioned, it still keeps the engagement of the borrower, of the guarantor. Um, it makes them, you know, want to be engaged in the event, as I mentioned earlier, that there

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
was a COVID situation where there was cash flow light. If you don't have the guarantor there, if they've got a dollar or a hundred million dollars, they are going to potentially find a way to help you if they have a dollar, versus trying to be dragged through a legal proceeding to try to enforce a guarantee.

They are going to cooperate. In my experience, it may not be an ultimate cooperation, but you will get a seat at the table with somebody, where if you do not have that guarantee, you are not guaranteed, pun intended, to get a seat at the table to restructure a loan.

THE COURT: Five-minute warning.
Q And in your experience in the real world, what does it mean that Deutsche Bank accepted President Trump's guarantee, even after having a different view of his financial condition?

A That after conducting their own analysis and review, that they felt comfortable with the Statement of Financial Condition and the strength of the guarantor to support the credit as proposed in this document.

Q And in your review of the Deutsche Bank's analysis of these credit facilities during their lifetime, what, if anything, changed about those conclusions?

A None. That the guarantee would still remain in place no matter what the adjusted net worth was.

Q And in the real world, what does that mean?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A It means that the bank got what they wanted and that they have a guarantee. They have a warm body that is going to stand behind the loan and provide additional credit support, if needed.

Q And how, if at all, is this inconsistent with any of the other transactions that you've been involved with in your professional career?

A It is consistent with the transactions that I've worked on throughout my career.

MR. SUAREZ: I'm at good stopping point on my outline.

THE COURT: Okay. I have a quick question for the witness.

In your review of the record in this case, did you see the part about how I wrote an opinion, as risk rises, interest rates rise?

THE WITNESS: I believe I have reviewed a portion of it, but not in detail, your Honor.

THE COURT: Just to refresh your recollection, I wrote an opinion. As risk rises, interest rates rise. And you said that several times yourself today.

When the witness was asked whether he agreed with that statement, you said, well, yes, but I would have used slightly different words. And I asked him, "What words would you have used", so that I could use that next time I
have a case like this. So we agree on risk, interest rates rising.

All right, lunchtime. So whatever you are going to do for the next hour, see you at 2:15.

MR. WALLACE: I don't know if you have a sense of how long you have left. My point is, I don't think we have much, but we could do this later.

THE COURT: Mr. Suarez, any idea how much longer with this witness?

MR. SUAREZ: I expect to finish in the third quarter.

THE COURT: In the?
MR. SUAREZ: Of the day. In the later half of the afternoon.

THE COURT: Okay. I'll admonish the witness, order the witness not to discuss the case.

THE WITNESS: Thank you, your Honor.
THE COURT: This isn't your first rodeo.
(Whereupon, the case on trial was adjourned until
2:15 for the luncheon recess.)
(Continued on the next page.)

COURT OFFICER: All rise.
Part 37 is back in session. Please be seated and come to order.

MR. SUAREZ: Your Honor --
THE COURT: The witness.
MR. SUAREZ: -- we recall the witness.
(Whereupon, the witness resumed the stand.)
THE COURT: As usual I will remind the witness that he is still under oath.

THE WITNESS: Thank you.
THE COURT: Hope you had a good lunch.
MR. SUAREZ: If we could please pull up the McCarty chart, Plaintiff's 3302 at page four. And pull up next to it Plaintiff's Exhibit 552.

Defendant's Exhibit 552.
Q If I could draw your attention, Mr. Unell, it says:
All. Attached is the RUC memo for 40 Wall Street?
A Yes, sir.
Q Are you familiar with the RUC memo for 40 Wall
Street?
A Yes.
Q What is an RUC memo?
A It is a credit memo in the term utilized by Ladder Capital.

MR. SUAREZ: If we could turn to page three of
the exhibit?
Q What is a committee presentation?
A A committee presentation is a formal presentation to a credit committee at a lending institution.

Q How is a committee presentation used, if at all, to determine the price of a loan?

A It is part of the overall approval process typically. Typically it would be presented, as it says here, by an originator, which in this case was Jack Weisselberg, and the underwriters, who present this and recommend it for approval. At which time this document, typically, along with the conversation, would formulate the approval or revision of terms or a denial of the credit as presented by the originator and his underwriting team.

Q Now, on the left, do you see the presentation of 40 Wall in Mr. McCarty's analysis?

A Yes, sir.
Q Have you reviewed Mr. McCarty's presentation for 40 Wall?

A Yes, sir.
Q And have you reached any opinions concerning the analysis performed by Mr. McCarty?

A Yes, sir. Yeah.
Q What opinions have you reached?
A I have reached that, in my opinion, that the interest
rate that is utilized is not commiserate with what the market was at the time.

MR. SUAREZ: Now, if we could turn to page four of the RUC presentation?

Q And if I could direct your attention to the occupancy rate for the collateral.

How does the collateral -- withdrawn.
How do the characteristics of the collateral, if at all, affect pricing?

A Well, collateral in a real estate secured loan is the primary source of repayment, and what lenders look to to not only service the debt, but ultimately to payoff the note, whether it be through sale, refinance, et cetera.

The occupancy is a direct factor in what cash flow is. Occupancy, obviously, has an impact on revenue and is one of multiple factors that a lender would look at in determining whether or not this asset was stabilized and what other opportunities may arise for a particular asset.

Q How does an improvement in the quality of the collateral affect pricing?

A The better the collateral, the better the pricing. It is a direct correlation between risk and risk-based pricing. You know, the lower the risk, the lower the pricing. The higher the risk, the higher the pricing. As a LTV decreases, that places a lender in a better position from a collateral
standpoint, therefore de-risking the loan profile.
Q How does a -- how does the occupancy rate in 40 Wall, at the time this memorandum was prepared, affect pricing?

A Well, it would show that the asset is well occupied and most likely stabilized. Typically when you look at any office facility above in the mid 90 s, that would represent that it is a stabilized asset and is performing as planned.

Q And how would an LTV of 29.6, how would that factor affect the quality of the collateral in a real estate loan?

A That is an extremely good loan-to-value and would represent that 30 percent, approximately, loan-to-value, so that the loan would be approximately 30 percent of the appraised value of their collateral, therefore providing the lender with a very large margin for a slippage in value. And this would be the primary source of repayment, therefore providing a much larger than normal spread.

Q And how would a loan -- a low loan-to-value affect pricing?

A The lower the loan-to-value, the more secure the loan. The more secure the loan, the less risky. And the less risky then equates to lower pricing based off of risk-based pricing.

MR. SUAREZ: If we could turn to page six of the exhibit?

Q If I could turn your attention to the third full
paragraph. It says: Loan proceeds will be utilized to refinance an existing first mortgage originated by Capital One Bank, defined as the prior loan, which featured a principal balance of \(\$ 160\) million ( \(\$ 137.31\) per square foot). In connection with the refinance of the prior loan, the borrower will pay a swap breakage fee, currently estimated at \$6 million, inclusive of closing costs, and upfront reserves, the borrower will invest a total of \(\$ 8.6\) million in cash equity at closing in order to effect the refinancing of the prior loan.

\section*{What does that mean?}

A It means that prior to the loan at Ladder Capital, in order to pay off Capital One Bank, there would be a \(\$ 6\) million fee that would need to be paid to break that swap. In addition, it states that the borrower will invest \(\$ 8.6\) million in cash equity, therefore lowering the amount of the balance owed. Which is an equity infusion, thereby lowering the loan amount that was issued by Ladder Capital.

Q Is that reflected in Mr. McCarty's analysis?
A I did not see where it is reflected in Mr. McCarty's analysis.

Q If Mr. McCarty had reflected it in his analysis, how would that affect the conclusions that he offers with respect to 40 Wall?

A The dynamics of the loan would certainly change. And
the dynamics of the loan with an \(\$ 8.6\) million cash equity infusion would improve the bank's position from a collateral and a credit standpoint, which would really make the loan features in the terms of the loan very different than the existing Capital One loan, because the existing Capital One loan had the swap breakage fee and the \(\$ 8.6\) million is in cash equity infusion, which also would make the Ladder Capital loan more secure than the Capital One loan, and not make them where they can be compared, because the principal balances would be different. And the characteristics of the loan at origination, despite the fact that they were done approximately ten years apart, the actual loan dynamics are different between 20 -2005 and the time of origination of the Ladder Capital loan.

MR. SUAREZ: And if we could turn to page nine of Defendant's Exhibit 552?

Q What is represented in this page, Mr. Unell?
A This is what I would typically see or you would typically see in a credit memo that would outline the strengths of a credit -- typically a credit memo would outline the strengths, the weaknesses, the opportunities and the threats, kind of a squad analysis, as it is typically called. And anything that is not mitigated by the strengths would need to be also addressed by the lender in this. And this is typical deal strengths that looks very familiar to what I have seen throughout my experience with highlighting the various loan
metrics of the loan-to-value.
The dark value is of interest as well. That is something that has, over the years, become a more applicable metric, as especially when you look at assets that have a -- a high, I guess, concentration of occupancy.

So a large tenant, for example, you would look at that analysis and say, well, if the large tenant left.

The cash in refinance is another thing where the sponsor investing \(\$ 8.6\) million into the transaction in closing is providing not only the support of the borrower, but also lowering the risk by reducing the principal amount.

The loan structure, once again, very similar in that the low interest -- the -- excuse me, the interest rate of 3.665 percent and then also the rent-roll, as we talked about with the occupancy.

And then finally, on number six, it looks like they are really addressing what the market is, and looking at the property and its ability to continue to perform at a high level of occupancy. And utilizes its historical occupancy as well as talking about where the activity is. And that is important because while the occupancy still may be 94.5 percent, strong interest in a building shows that when you are looking at, obviously, when you are looking at where the future value may be, and when it says, kind of, is this thing going to be able to maintain where it is at. And all indications are, based off
of this, and in my experience this writeup would indicate that this asset was performing strong and had a bright future ahead.

Q How would these factors affect the evaluation of the collateral for purposes of pricing alone?

A These are all very, very, very important factors of pricing when it comes to the collateral. Just as it was the -as I said, you would never go down and make a loan if you didn't feel comfortable about the asset itself and your underlying collateral. That is what this is displaying here, and the comfort level that Ladder Capital had with the metrics of the collateral.

Q The seventh item here that we -- that we see on this page: High quality landmark collateral. What is the affect of this characteristic of 40 Wall on the quality of the collateral for purposes of loan pricing?

A It is -- it does have some historic value to it. It is something that cannot be replaced in its current condition. And there are users, i.e. tenants, out there that look to be in trophy office buildings, to have trophy addresses, et cetera. And this asset, in the opinion of Ladder Capital, was a trophy asset that was highly desirable in the market for multiple reasons.

Q And in the following page, you see reference to experienced and well-capitalized sponsorship?

A Yes, sir.

Q How does that affect the collateral for purposes of pricing alone?

A Obviously the experience of an owner/developer in the real estate world is extremely important for their ability to continue to operate the asset, as the asset is the primary source of repayment. Not only of the debt service from the cash flow, but also upon sale or refinance. So, it is extremely important to have somebody behind it, whether it is the organization or individual, that is able to perform on the plan that is set forth, and continue to execute the plan to make sure that the bank remains secure, and the same position as when the loan was originated.

Q Do you see there it says Mr. Trump reports a net worth of nearly 5.8 billion and a liquidity in excess of \(\$ 300\) million?

A Yes, sir.
MR. SUAREZ: If we turn to page 12 of this
exhibit.
Q And focus in on: Key principal net worth covenant.
A Yes, sir.
Q What is the key principal net worth covenant on this loan?

A A net worth of \(\$ 160\) million, minimum net worth.
Q And with respect to liquidity?
A At least 15 million.

Q And how is the principal net worth covenant, in your experience, for this loan comparable to the net worth of the sponsor and liquidity of the sponsor?

A This was a fraction of the net worth and a fraction of the liquidity that the guarantor had.

Q What affect would any fluctuations in the net worth or liquidity of the sponsor with respect to this loan have on the pricing of the loan?

A Going by the materiality side, it would have some, but not as much, because Ladder Capital, in my opinion in reading this, felt that the security in the form of the collateral was sufficient and that the pricing was really driven off of that.

Now, having the covenant here would obviously provide a belt and suspenders approach, and also provide for a tertiary or beyond additional source of repayment in the event of, you know, call it an Armageddon situation. However, based off the loan-to-value, the likelihood that either of these would come into play is extremely minimal.

Q And how were the characteristics of this loan transaction reflected in Mr. McCarty's analysis, if at all?

A I don't see how that was done. Because my understanding is, is that 5.71 percent that was utilized was based off of a 2005 loan that had different loan characteristics.

MR. SUAREZ: Okay. If we could turn to Plaintiff's Exhibit 293 on the right.
(Handing)
THE WITNESS: Thank you, sir.
Q If you see here, this is a credit report in connection with the first mortgage lien and first priority security interest in the Doral Golf Resort by Deutsche Bank?

A Yes, sir.
Q It was the initial credit report on the Deutsche Bank loan, correct?

A Yes, sir, dated 12/20/2011.
Q If you look on the second page of the commitment fee, you see a commitment fee. And it says .25 percent of facility commitment, which shall be fully earned and payable on the execution date of this commitment letter.

A Yes, sir.
Q What is the purpose of the commitment fee from the bank's perspective?

A That is really where the loan documentation process would begin, where the bank would have to start spending dollars for appraisals, engineering, environmental reports, and other items. So it is, I don't want to call it a posit, but it is the commitment of the borrower to move forward, which therefore allows the lender to feel comfortable to go spend some of those out-of-pocket expenses. You know, there have
been cases where a facility commitment, in my experience, was not required, and ultimately a borrower would pull out of a transaction, therefore leaving the lender with expenses that they have sought to be reimbursed. And in my experience that's very difficult, because nobody wants to go litigate over \(\$ 100,000\) on something they would just probably decline to do business with that person further.

Q Do you see a little further down it says: Facility fee. 1 percent of facility commitment payable on the closing date of the facility?

A Yes, sir.
Q How does the payment of the 1 percent facility fee affect the pricing of the loan, if at all?

A It is factored into, as I mentioned in prior testimony, that one of the things that is looked at is the total relationship value in RAROC, Risk Adjusted Return on Capital. So when a lender is looking at the RAROC, one of the factors is what the fee is, because that fee is direct income to the bottom line of the bank and is factored into the returns that they are looking at when measuring what the profitability of not only a loan is, but also what the overall relationship value is.

MR. SUAREZ: And if you turn to the next page of this document? In the recommendation box. The fourth bullet.

Q Do you see where it says: Expected enhanced value due to Capex?

A Yes, sir.
Q It says: The resort is a world class location that has been home to a PGA event every year since the resort opened in 1962. As DJT expects to invest approximately \(\$ 50\) million on capital improvements, it is expected that the value of our collateral will increase significantly over the term of the loan?

A Yes, sir.
Q How would that feature in the transaction affect loan pricing, if at all?

A It would have a factor into the loan pricing. It would also have a factor into how the lender would look at the additional capital. The additional capital is a commitment. As we mentioned, as I mentioned earlier I should say, the capital is one of the things that is looked at heavily. And what the investment is, the equity investment. The more equity investment that an individual or an entity has into a project, the more likely they are to continue to spend on that project, whether it is to increase the value, or perhaps in a distress situation continue to support the project so that they may recoup a portion of their previous investment, as opposed to just walking away.

Q And what affect, if at all, does it have on the
quality of the collateral?
A It absolutely improves the collateral, to the benefit of the lenders, because it is a direct investment made by the sponsor into the asset. And that asset serves as collateral for the lender. And the more money that is put into that asset, improves the value of it, which therefore reduces the loan-to-value, which makes the loan more secure to the lender.

Q And how would that affect the risk of the transaction?

A It de-risks the transaction.
Q What do you mean what you say de-risks, for us non-finance folks?

A It makes the transaction less risky with that capital infusion than it otherwise would.

MR. SUAREZ: If we could turn to Plaintiff's --
Q One second, before we move on.
Is the analysis you just conducted concerning this transaction, reflected in Mr. McCarty's selection of a 10 percent CRE rate for the Doral property in his analysis?

A I do not believe so.
Q And what is the result of failing to consider these features of that transaction on the analysis performed by Mr. McCarty?

A It would render that analysis flawed without taking into account all of the factors that contribute to pricing of a
loan.
MR. SUAREZ: If we could move on to Plaintiff's Exhibit 291?
(Handing)
THE WITNESS: A little housekeeping here.
Thank you.
Q Do you recognize this document?
A Yes, sir.
MR. SUAREZ: If we could turn to page five of the exhibit? Which is also page five of the document.

Q Do you see at the top there are two facility fees?
A Yes, sir.
Q A fee of .625 percent of Facility A payable on the closing date. And . 75 of Facility B payable on the closing date of that facility?

A Yes, sir.
Q What affect, if any, does the payment of that facility fee have on the profitability of this transaction for the lender?

A Similar to the other transactions, it would have an impact on the overall return and to the lender and their overall pricing strategy.

Q What affect, if any, does it have on the pricing of the transaction?

A It would have an impact on the pricing because that
would be factored into the overall returns that the bank would be expecting to receive for the risk that they are under taking as part of this transaction.

MR. SUAREZ: And if we turn to Plaintiff's Exhibit -- actually before we do that. Yeah, if we turn to Plaintiff's Exhibit 294.
(Handing)
THE WITNESS: Thank you, sir.
Q And on the first page can we take a look at the Trump International Hotel and Tower Chicago. Do you see that?

A Yes, sir. Collateral B?
Q Collateral B.
A Yes, sir.
Q And you see at the bottom it has a loan-to-value of 51 percent?

A Yes, sir.
Q How would the -- how would a loan-to-value of
51 percent on that collateral affect the risk of the loan secured by the Trump Chicago?

A Loan-to-value of 51 percent would be below normal, as illustrated, actually, by the Realty Rates data presented earlier. And being below the average, which is not only on Realty Rates, but in my experience of 50 percent value being low, would once again de-risk or make this collateral -- this collateral would make the loan less risky based off of that
loan-to-value.
Q And are any of the factors that we have just analyzed on the Trump Chicago facility reflected in the analysis performed by Mr. McCarty that we looked at earlier?

A Not that I can tell.
Q And what is the affect of his failure to consider these factors in that analysis?

A Without considering all of the factors that go into pricing of a loan, it would render the analysis flawed.

MR. SUAREZ: If we could turn to page nine of this exhibit? Actually let's start with page eight so we can see the heading here.

Q Do you see at the top it says: Loan C, Trump Old Post Office?

A Yes, sir.
Q Okay. And if we see on page nine. Fees. This loan also has a facility fee, this time in the amount of half a percent?

A Yes, sir.
Q What affect does the payment of a facility fee have on the pricing of the transaction?

A Similar to the other transactions, it would have a direct impact on the profitability and returns expected by the lender.

MR. SUAREZ: And if we look at page ten?

Q Do you see for All Facilities, it lists in the recommendations --

MR. SUAREZ: The next box on down.
Q Here it is recommending the approval of the annual review for Doral modification to the Trump Chicago and the origination of the Trump Old Post Office. But specifically I would like to draw your attention to the section that says: All Facilities.

The third bullet point says DB relationship. And it says: DJT continues to develop his relationship with DB as Facility C will be the fourth credit facility we have originated with him or his family (three with DJT, one with DJT Jr.) DJT has transferred 40 million in liquidity to DB and has indicated he is interested in continued to grow his non-credit relationship with the firm.

Do you see that?
A Yes, sir.
Q How would that affect the pricing on the credit facility for the Old Post Office?

A It would have a direct impact on pricing. As stated earlier, the relationship value to a bank is an important factor. And as it states here, and consistent with the testimony that I heard from Ms. Vrablic, that the goal was to continue to increase the share of business with President Trump and his family from deposits and other items, including, as I
said the non-credit relationship earlier, which would amount to more fee income.

For real estate developers, typically leading with credit as was done here, is a very common practice in real estate, because that is what real estate developers care most about. And then from there if you can gain the trust and the ability to provide them the debt, they will follow with other services, which make the relationship even more profitable.

MR. SUAREZ: And if we move on to page 12.
Facility C.
Q The recommendation for Facility \(C\), which is the Old Post Office. It says there: Equity injection of the guarantor. While the initial equity injection of the guarantor was estimated at \(\$ 42\) million plus, we have been told that the estimate has been increased to anywhere from 150 to \(\$ 160\) million with approximately 30 million already invested?

A Yes, sir.
Q What affect would that equity injection by the guarantor have on the risk of the collateral?

A The equity injection would have a direct impact on the value of the collateral, therefore making it more valuable. Which ultimately results in a loan lower-to-value. The lower loan-to-value then results in a lower risk profile for that particular loan. And that should be reflected into the pricing.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Q And over the life of the OPO Facility, was the risk to the bank increasing or decreasing?

A Decreasing.
Q Why is that?
A Um, the asset was continuing to be repositioned in a positive manner. The infusion of capital, as well as the operating expertise of the borrower and the entities that are running it, improved the overall value, which, once again, improved value results in a lower loan-to-value. A lower loan-to-value results in a more secure and less risky loan for the lender.

Q And are these characteristics of the OPO Facility reflected in Mr. McCarty's analysis?

A I do not see where they were reflected.
Q What is the effect of the failure to reflect these characteristics in Mr. McCarty's analysis on his analysis?

A That the assumed interest rate utilized in this chart would be incorrect.

Q With respect to the Doral transaction, if we could turn your attention to Plaintiff's Exhibit 2960?
(Whereupon, the exhibit was displayed on the screen.)
(The witness was handed the exhibit.)
THE WITNESS: Thank you, sir.
Q Do you recognize this document?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A Yes, sir.
Q Have you reviewed this document?
A Yes, sir.
Q Do you see at page three of this document?
(Whereupon, the exhibit was displayed on the screen.)

Q It recommends "Approval of a step-down of the personal guarantee from 100 percent to 10 percent, per the loan agreement."

A Yes, sir.
Q In your experience in the real world, what is that indicative of?

A The step-down of the guarantee?
Q Yes.
A That the lender felt that they were secured and that the risk level had declined to a point where that they wanted to have a guarantee for a comfort level, but, however, did not feel that a hundred percent guarantee was needed at this time.

Q And do you see the note down below that says "With an LTV of 34 percent, the entire personal guaranty can be reduced to zero."

A Yes, sir.
Q "However the client has requested to retain a ten percent guaranty on both Tranche A and Tranche B, which corresponds to a spread of L plus 1.75 percent."

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A Yes, sir.
Q Do you see that? What does that mean?
A That means that the client has elected to keep the ten percent guaranty in place in order to save 25 basis points, which was the reduction in pricing without the guaranty.

Q And from the lenders perspective, what, if anything, can be inferred from the ten percent guaranty resulting in a 25 basis points savings on the spread?

A That Deutsche Bank would value the guaranty of 25 basis points to have the comfort.

Q Now, in Mr. McCarty's analysis, is the guaranty -- the existence of the guaranty at ten percent reflected in his analysis?

A No, sir.
MR. WALLACE: Objection. Leading.
Q How, if at all --
MR. SUAREZ: I'll rephrase it.
Q How, if at all, is the step-down of the guaranty reflected in Mr. McCarty's analysis?

A I don't believe it's reflected.
MR. WALLACE: I'm going to renew my objection at
this point, your Honor, that the opinions Mr. Unell is expressing here, including his prior opinions about the failure to account for the fees in the loans, were not disclosed in his expert reports.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

MR. KISE: I mean, in keeping with your rule, you've already ruled on this, first of all.

THE COURT: I don't mind if he asks for a reconsideration.

MR. KISE: But if -- I'm not going to argue if you are going to overrule it, but if you want me to argue, I will.

MR. WALLACE: I think we are going through a series of opinions that were not disclosed in his report. We are hearing them for the first time. And the purpose of expert disclosure is so that the parties know ahead of time what opinions the expert is going to offer and have time to analyze those opinions, which are very complex and go into a great deal of detail about the financing of loans, and have an opportunity to conduct a fair analysis, and ideally, depose the witness on those issues before trial, but at the very least giving us time to understand the opinions before we have to cross examine him.

THE COURT: Is your particular objection just to the last answer, to the last half hour of answers?

MR. WALLACE: I believe -- I'm trying to find it in the report as we are going along, but I don't think this specific analysis -- the step-down is definitely not in the report, as far as we can tell. I'm not sure the specific analysis to the fees, as they relate to Mr. McCarty's

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
opinion, were contained in the -- either the expert report or the rebuttal expert report, either. We are sort -- we are sort of live checking as we go through this.

MR. KISE: So, your Honor, again, the subject matter, every last detail of every last opinion that the expert has is never disclosed. As the trial comes forward, you have evidence that needs to be considered by the expert in the context that has been presented at trial; that's what's happened here.

Mr. McCarty adjusted his position. I know they have a different description of it, but he, in fact, adjusted his position and offered a supplemental report, which was accepted by this Court, and his testimony reflected that supplemental report and his supplemental analysis. So -- and some of that was based on testimony that had happened during the trial, and events that had taken place subsequent, including your Honor's decision. So to say, now, that the defense can't make necessary adjustments to address the evidence that they are faced with at trial, evidence that -- that was available to the government, just as much as it's available to us, about the same subject matter that forms the basis for this expert's opinion, he's opining on -- he's saying the same thing. He is just offering relevant justifications based on the testimony that's been educed at trial, based on the

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
documents that have been introduced at trial, and based on the scope of the issues that are now before us at trial.

So as you said earlier, and I think it was the correct ruling, you can allow this in in a bench trial -there's no opportunity for confusion -- and you can decide what to give weight to and what not to give weight to, but to exclude it wholesale when they've had the opportunity to have an expert come in and modify his opinions, we would have to get into a whole ground war over exactly how he modified it, what he did, which is what we did before.

And I think the more efficient and more balanced approach in a bench trial is to do what your Honor has already decided to do, which is allow it in and then give it the weight that you determine.

MR. WALLACE: I will just note that this is not a question of relevance or repetitiveness, or anything. This is question of whether we had fair notice of this expert's opinion.

I will reiterate that it is very clear from what we did, that Mr. McCarty simply changed the time frame of his analysis. The analysis stayed the same.

If there is an issue with a criticism of Mr. McCarty's report, or if this witness had an opinion about the actual spread on the guaranty based on this step-down, all of that information was available at the time

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
of his reports in May and June. He has not disclosed -- if the defendants can show me where this opinion is covered in either of the two reports, I'm happy to withdraw the objection.

But it is simply, this step-down, . 25 analysis does not appear in this -- either of this witness's reports. THE COURT: Objection overruled for the same and usual reasons. There's no jury. I'll decide what weight to give it. You could cross examine him. If you need a little time before the cross examination to consult, and I also, to a certain extent, accept Mr. Kise's point that you could never finalize things. And there's been a trial since expert disclosure. And I understand the value of expert disclosure so you can prepare, et cetera, but it's in. Let's just move on.

MR. SUAREZ: Can you repeat the last question. THE COURT: The last question. MR. SUAREZ: I'm sorry, your Honor, may I have a read back.

THE COURT: A read back of the last question.
(Whereupon, the requested question was read back by the court reporter.)

A I don't believe it is reflected in his analysis.
Q What is the result of any of his failure to consider
the step-down in the opinions that he gives?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A Similar to utilizing a fixed spread, it would not render the analysis as accurate, because it would change throughout the life of the loan, or have the opportunity to, based on the election of the guarantor.

Q What, if any -- withdrawn.
The -- if I could turn your attention to page three of the Exhibit 2960 down to the section where it says "Expected enhanced value due to Capex" again.
(Whereupon, the exhibit was displayed on the screen.)

A \(\quad \mathrm{Mm}-\mathrm{hmm}\).
Q And then the last sentence says "As noted, DJT has invested nearly \(\$ 250\) million on capital improvements since 2012, and the results has been an increase in collateral value to \(\$ 366\) million. This value should continue to increase significantly over the term of the Facility." Do you see that?

A Yes, sir.
Q How did the risk of the collateral that secured the Doral Facility change over time, if at all?

A Just as on the other loans where there was an injection of capital for improvements, it improved the bank's collateral position, therefore, making the loan less risky because the collateral had more value.

Q And how, if at all, is the lower risk nature of the Facility over time reflected in Mr. McCarty's analysis?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A I don't believe it's reflected since the interest rate remained the same throughout the life of the loan in his analysis.

Q And with respect to the Chicago Facility, was that guaranty also -- withdrawn.

Was the guaranty provided in connection with the Chicago Facility extinguished at any point in time?

A I believe there was an opportunity to do so, but I'm not certain if it ever was.

MR. SUAREZ: Could we please pull up Plaintiff's Exhibit 298, at page seven, on the right-hand side.
(Whereupon, the exhibit was displayed on the screen.)
(The witness was handed the exhibit.)
THE WITNESS: Thank you, sir.
MR. SUAREZ: And if we could zoom up to where it says, Leverage levels required for step-down of the guaranty."
(Whereupon, the exhibit was displayed on the screen.)

Q And it says, "The LTV levels required to for a decrease in the guaranty levels are low enough to ensure that the loan is more than adequately collateralized as evidenced by the current Facility B, in which the guaranty was eliminated once the loan was paid down to \(\$ 45\) million (about 34 percent LTV)."

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A Yes, sir.
MR. SUAREZ: If we could turn to the first page of this exhibit.
(Whereupon, the exhibit was displayed on the screen.)

Q Do you see the date up there at the top?
A Yes, sir. July 20th, 2015.
Q Yes.
Does this refresh your recollection as to when the guaranty of the credit facility secured by The Trump Chicago was extinguished?

A Yes, sir.
Q When was that?
A In July of 2015.
Q And how, if at all, did the -- how, if at all, did the collateral securing The Trump Chicago credit Facility from Deutsche Bank change over the course of that Facility?

A Do you mind repeating the question.
Q Sure, how, if at all, did the risk of the collateral securing The Trump Chicago property change over the life of that Facility?

A The collateral improved, therefore, making the loan to value lower, which ultimately made the loan less risky for the lender.

Q And is the de-risking of the loan of the Chicago credit

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Facility reflected in Mr. McCarty's analysis?
A Not that I can tell.
Q What is the result of the prelude of -- reflect that in his analysis?

A That the increased interest rate does not account for that -- excuse me. The interest rate throughout the life of the loan remains the same, in his analysis, at 7.5 percent, which would not reflect the terms of the loan and the reduction of the guaranty and the improvement of the collateral.

Q And in each of the three credit facilities that we have discussed today with respect to Deutsche Bank, did the value of the collateral increase or decrease over time?

A The value of the collateral increased over time.
Q And what effect did the increase in the value of the collateral over time have on the risk to the bank in connection with the loan?

THE COURT: Oh, come on. Even I could answer that
at this point. We've had a whole tutorial on that every
day. The more value the collateral, the less risk, the
lower the interest rates. Okay, we get it already.
Go ahead, Mr. Kise.
MR. KISE: Your Honor, I think --
THE COURT: We heard this 20 times today.
MR. KISE: Well, but I think he is framing this in
the context of answers that are going to follow from that

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
conclusion.
I don't want to talk about this with the witness present, but, I mean, I think -- I would think within the next question or two he's going to connect it up. I could be wrong, but I think that's where we are headed, and then we'll move on.

But that proposition forms the foundation. I'm glad you are accepting that proposition, but it forms the foundation for something to follow.

So I would ask the Court to just let him ask a couple of more questions, or we could have a more wholesome debate --

MR. SUAREZ: That was last question I had before I moved on.

THE COURT: Okay.
MR. KISE: There you go.
THE COURT: As usual, I'm not looking to, and I'm not restricting. I'm just pointing out it's déjà vu all over again, times 20.

So anywhere, where are we Mr. Suarez? Do you need the question or do you want a read back?

MR. SUAREZ: Yes, please.
THE COURT: Read back the last question.
MR. SUAREZ: That was Yogi Berra, "Déjà vu all over again"?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

THE COURT: He was from New Jersey.
(Whereupon, the requested testimony was read back by the court reporter.)

A The increase in the value of the collateral would result in a lower loan-to-value, which would make the loan less risky for the lender.

MR. SUAREZ: If we could, please, pull up what's been marked as Defense demonstrative 5 ?
(Whereupon, the exhibit was displayed on the screen.)

MR. SUAREZ: If we could zoom in a little bit so it's centered there on the page.
(Whereupon, the exhibit displayed on the screen was enlarged.)

Q Do you recall this demonstrative?
A Yes, sir.
Q Who prepared this demonstrative exhibit?
A I did.
Q And what does this demonstrative exhibit represent?
A This demonstrative exhibit -- excuse me there -represents the differential in interest if there was no guaranty, in a hypothetical situation.

Q With respect to Doral, the Doral credit Facility, can you walk us through the analysis that you undertook to reach the rebuttal to Mr. McCarty's opinion?

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

A Yes, sir. So we started very similar utilizing this the same chart as Mr. McCarty did for ease of understanding for everybody.

What we have done here is we've taken the actual interest percent, which matches up with the same thing that Mr. McCarty had. However, instead of utilizing his assumed CRE interest rates, we have added 25 basis points to reflect the difference that was opined on by Deutsche Bank, and also represented in the documents, that the guaranty was worth 25 basis points.

From there we calculated the delta between the actual interest rate, and what the hypothetical interest rate would be with the additional 25 basis points, and have run that out throughout from origination of the loan through the pay off of the loan.

Q And what hypothetical differential and interest rate results over that period of time if you increase it by the 25 basis points that you suggested is appropriate?

A For this loan in particular, \(\$ 2,458,048\).
Q And with respect to the Old Post Office credit Facility could you please walk us through your analysis on that transaction?

A Okay. Similar to Doral, we did the exact same exercise utilizing the same format as Mr. McCarty, however, instead of utilizing his assumed interest rates, we added the 25 basis

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
points from a hypothetical situation of no guaranty being in place, and ran that out throughout the life of the loan from origination through pay off, and that resulted in a hypothetical lost amount of \(\$ 2.567\) million.

Q And why was it appropriate to do that?
A Why was it appropriate to do that? Because we believed, and based off of the testimony that the value of the guaranty as shown in the mind of Deutsche Bank, and in my experience, would be 25 basis points.

Q And in the case of the Old Post Office Facility, was that guaranty in place throughout this entire time horizon?

A Yes.
Q And if the bank had called that guaranty, would the bank have had the benefit of that guaranty in place on that facility?

A Absolutely. It would have had the benefit of that guaranty. And Mr. McCarty's analysis did not take into account any guaranty at all.

Q And if the values of assets owned by the guarantor were to change, would that, in any way, reduce the credit support available to the Facility?

MR. WALLACE: Objection. Leading.
MR. SUAREZ: I could rephrase it.
THE COURT: Withdrawn.
Q How, if at all, would a change in the values of the

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
assets owned by the guarantor change the credit support available to Deutsche Bank in connection with this Facility?

A In this case it wouldn't, because it would be immaterial.

Q Why is that?
A Because as referenced earlier, part of the reason for a guaranty is not only the financial support, but also the ongoing and continual support for the operation, and ongoing ability to operate the asset in a manner that would maintain value, and enable it to provide enough cash flow for debt service.

Q Would your answer be the same for the Doral Facility during the periods of time that that guaranty was in place?

A Yes, sir.
Q Would your answer be the same for the Chicago Facility during the periods of time when the guaranty was in place?

A Yes, sir.
Q All right.
Moving onto 40 Wall, how, if at all, would the analysis -- would the analysis that you performed change with respect to 40 Wall, to that performed by Mr. McCarty?

A Utilizing the same 25 basis points, it would result in a \(\$ 2.966\) million delta .

Q And what was the basis for doing so?
A The basis was similar to the other assets, that if there was not a guaranty, even though at some points the lower

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}
thresholds and minimum net worth, um, erring on the side of conservatism, we applied the same methodology here as we did to the Deutsche Bank ones.

Q Was a limited guaranty, in fact, in place during the life of the 40 Wall transaction with Ladder Capital?

A Yes.
Q And if I were to ask you the same question about the assets of the guarantor with respect to that guaranty and the effect of the credit support for that transaction, would you give me the same answer?

A Yes, sir.
Q And then if we go to the bottom right hand section. (Whereupon, the exhibit was displayed on the

\section*{screen.)}

Q Can you please walk us through your analysis here.
A Yes, sir. So the \(\$ 9,006,000--\$ 9,006,603\) is the cumulative amount of the four loans; the Doral, OPO, Chicago and 40 Wall.

We also have considered the SWAP breakage fee, which was a cost of doing business at that point, in order to enter into the transaction, which they were not required to do so. There was an out-of-pocket expense of \(\$ 6\) million, and therefore, the hypothetical number that we have derived, or I have derived, is \(\$ 3,006,603\). And I do note that the SWAP breakage fee is an estimate.

\section*{R. Unell - by Defendant - Direct (Mr. Suarez)}

Q And why do you call it a hypothetical lost interest figure?

A Because I don't believe, in my opinion, that there has been any losses to anybody on any of these loan transactions.

Q And why is that?
A Because all contractual obligations were paid. Deutsche Bank did their own analysis. They derived their own interest rates. They negotiated those documents. They executed those documents. The borrower and guarantors performed as prescribed on those documents. And as the user of the information, they were able to make their own informed decisions and not have to rely upon outside parties to do so after the fact.

Q And in your professional experience, is that commonplace with how transactions operate in the marketplace?

A Yes, it is, absolutely one hundred percent. Private transactions are negotiated between sophisticated parties, and in this case both were very sophisticated parties. And everybody was able to make their own decisions based off the information that was provided to them. And nobody, in the process of negotiating or originating a loan, wants to have to worry about, after the fact, having a non-party to their agreement come in and second guess their decision making, which they do for a living.

MR. WALLACE: Objection. I think if he is
suggesting that a law enforcement investigation is improper or something, it seems well beyond the scope of his expertise.

MR. SUAREZ: I don't think that's what he said.
THE COURT: Can I just say, point duly noted.
MR. WALLACE: Fair enough, your Honor.
MR. SUAREZ: May I confer with my colleagues, your Honor.

THE COURT: Yes.
(Whereupon, Counsel conferred off the record.)
MR. KISE: Your Honor, I'm going to try for, maybe a fifth time now, if we take our afternoon break now and come back, we may be able to truncate this as well.

THE COURT: AG, okay with you?
MR. WALLACE: I thought he was going to ask for a directed verdict.

MR. KISE: That will be after he testifies, after he testifies.

MR. ROBERT: We could do it now if it makes you feel better.

THE COURT: Perfect timing. See you at 3:30.
(Continued on the next page.)

COURT OFFICER: All rise. Part 37 is back in session.

Please be seated and come to order.
THE COURT: I have a question for plaintiff, plaintiff's lawyers.

Well, let met ask the question, it may moot out.
MR. KISE: Sure.
THE COURT: I am happy to hear from you.
Do you want to -- are we through with the direct examination?

MR. KISE: We are.
THE COURT: Would plaintiff like to start the cross examination tomorrow in light of the late filing by defendants, and if you think you are entitled to and need, overnight to put together your thoughts.

MR. WALLACE: I would certainly appreciate that, Your Honor. If I could ask the witness just, like, two or three clarifying questions. I do think in essence he and Mr. McCarty are ships in the night. So I can have a very truncated -- I have one question about the . 25 basis points that would clarify this and let us have a truncated examination tomorrow, if that's possible.

THE COURT: Okay. Does that take care of your concerns?

MR. KISE: Yes.

THE COURT: Let's ask Mr. Unell back to the stand.

MR. ROBERT: He is five for five, Your Honor.
THE COURT: I didn't catch that.
MR. ROBERT: All Mr. Kise caressed about is he is five for five in truncating things.

THE COURT: He has a pristine record.
(Whereupon the witness resumed the stand.)
CROSS-EXAMINATION
BY MR. WALLACE:
Q Mr. Unell, just a quick question to make sure I understand the 25 basis points.

A Yes, sir.
MR. WALLACE: If we could pull up Plaintiff's
Exhibit 298 and go to page three?
Q And if we look under interest rates. It says there: L plus 1.75 or prime minus 0.75 with step-up to \(L 2.0\) percent or prime minus .5, if guaranty level falls below 10 percent.

Am I understanding that this is the calculation that led you to identify the 25 basis points as the appropriate number for the value of the guaranty in the Deutsche Bank loan?

A That was one factor, along with the testimony of the Deutsche Bank personnel which confirmed this.

Q About this section of the credit memo, correct?
A Yes, sir.

MR. WALLACE: Okay. And if we turn to the next page. And we flip up to the section on guaranty. Q I am just going to note that, if the guaranty level falls to zero percent at 35 percent or below, and so the situation where this is occurring and the guaranty burns off is where the LTV is down to 35 percent and below; is that right? A In this instance, yes, sir. Q Okay.

MR. WALLACE: That was all I needed to clarify. Thank you.

THE COURT: All right. So tomorrow at 10:00 everyone?

And I'll direct the witness not to discuss this case or his testimony or anything related to it overnight because you are still a witness.

THE WITNESS: Yes, sir.
THE COURT: Thank you.
MR. ROBERT: Thank you, Your Honor.
(Whereupon the trial stood adjourned to Friday December 1, 2023 at 10:00 a.m.)

MEMBER; TRUMP ENDEAVOR 12, LLC; 401 NORTH WABASH VENTURE LLC. TRUMPQEDPOSTOFFICE LLC: 40 WALL Defendants.

Bench Tria
December d, 2023
60 Centre Street
New York, New York 10007
B E F O R E: THE HONORABLE ARTHUR S. ENGORON, Justice of the Supreme Court
APPEARANCES:
OFFICE OF THE ATTORNEY GENERAL
OF THE STATE OF NEW YQRK - LETITIA JAMES
Aftorneys for the Plaintiff

25

COURT OFFICER: All rise. Part 37 is now in session. The Honorable Judge Arthur Engoron presiding. Make sure all cell phones are on silent. Laptops and cell phones will be permitted, but only to members of the press. There is absolutely no recording or photography of any kind allowed in the courtroom.

Now be seated and come to order.
THE COURT: Mr. Wallace, would you like to continue your cross examination of the current witness? MR. WALLACE: Yes, Your Honor. The People will continue their cross examination of Mr. Unell.

THE COURT: Let me ask you, do you feel you had enough time to prepare for this under the exigent circumstances?

MR. WALLACE: We will see how I do.
CROSS-EXAMINATION
BY MR. WALLACE:
Q Good morning, Mr. Unell.
A Good morning.
Q I want to talk first about the engagement through Ankura for the Trump Organization. I believe you testified yesterday that you are around 900,950 - your time is being billed at between \(\$ 900\) per hour and \(\$ 950\) per hour, right?

A I believe that's about the range.
Q I think you said you performed about 200 hours of

Unell - by Defendant - Cross (Wallace)
Page 5756
work on this engagement; is that correct?
A Give or take, yes.
Q You also performed other engagements for the Trump Organization while at Ankura, correct?

A Yes.
Q What have those engagements been?
A I have worked on one engagement, and that was on a potential conservation easement valuation of the Doral property.

Q And when did you begin your work on that engagement?
A Sometime probably about a year ago.
Q Okay. So would this have been before you were retained as an expert for this case?

A I am not certain of the exact timing.
Q It might have been close to the same time?
A Around then, yes.
Q Do you have an sense of how much time you spent on that engagement?

A Probably less than 10 or 15 hours.
Q And do you know what your time was billed at for that engagement?

A That's a fixed-fee engagement that is actually led by our valuation team.

Q So your time is not being charged at an hourly rate for that engagement; am I understanding that correctly?

A No, sir.
Q Do you have a sense overall --
THE COURT: Mr. Wallace. Classic negative question. "It is not" and then he says "no." Does that mean, no, it is not; does that mean, no, you are wrong?

MR. WALLACE: Fair point, Your Honor.
I think the prior answer was clear. I tried to clarify it and made it less clear. I'll leave it be.

THE COURT: Okay.
Q Do you have a sense of the total billings for Ankura to the Trump Organization over the past two years?

A No, sir.
Q So going to your expert opinions, I would like start off with the difference between your analysis of lost interest and Mr. McCarty's analysis.

MR. WALLACE: If we could put up on the screen DD-5?
Q This is the chart reflecting your --
MR. WALLACE: There we are.
Q This is the chart reflecting your analysis of the differential of interest on the Deutsche Bank loans if there was no guaranty; is that correct?

A This is a hypothetical that was done to illustrate what the difference would be, based off of the information that was derived from the Deutsche Bank testimony and the loan

Page 5758
documents utilizing the 25 basis point differential between a guaranty and a limited guaranty.

Q Okay. But it is an analysis of the difference in the pricing of the Deutsche Bank loans with the guaranty -- let me back up.

So it is a hypothetical analysis, correct?
A It is an illustrative analysis to show a hypothetical and really the differential between Mr. McCarty's analysis and the analysis that would be reflective with the 25 basis points as shown in the documentation and from the testimony of the Deutsche Bank personnel.

THE COURT: The question was whether these were
hypothetical numbers. I assume the answer is yes?
THE WITNESS: They are hypothetical, yes.
Q Okay. And I'll tell you, I think you described this in detail, I am trying to understand the pieces of it. I'll take it piece by piece. And many of the questions will be yes or no.

So, the hypothetical analysis is what the difference might be in the Deutsche Bank loans that were actually extended here with the guaranty and without the guaranty; is that fair?

A No. It is -- to some extent it is. But what it is trying to show is, is what the actual interest percentage was, and then without a guaranty, where it would go. And that is based off of the \(\mathbf{2 5}\) basis points as outlined in the loan
documentation based off of the step-down and the contractual obligations between the borrower and the lender.

Q Okay. So you took the actual loans as they existed, fully signed and executed by the Private Wealth Group at Deutsche Bank and the Trump Organization and then backed out the personal guaranty in the loan; is that fair?

A I did not back out the personal guaranty of the loan.
Q What did you do?
A I assumed an additional 25 basis points, an elimination of the guaranty in conjunction with the loan documents as prescribed, especially in the Doral loan. The loan -- the Doral loan documents state that there is an additional 25 basis points that would be added when the guaranty burned off. However, the defendants had the option of maintaining a guaranty in the limited basis for the difference of 25 basis points.

Q Okay. I'll go back to this in a minute. But I believe the 25 basis point reduction we saw yesterday was going from 10 percent guaranty to zero; is that right?

A I am not following that.
Q Well, the guaranty at the time it was written off, when the price went from 1.75 to 2.0 , the guaranty went from zero to 10 percent. Do you recall that?

A Yes, sir.
Q Okay. So the 25 basis points is the difference
between no guaranty and a 10 percent guaranty; is that correct?
A You can't look at it that way, because a guaranty at 10 percent is still \(\$ 17\) million. You have a 40 some odd percent loan-to-value. You are trying to say that there is one factor that is involved in this. As testified yesterday, there are numerous factors that go into it. And it is not just the guaranty. It is the fact that you have a warm body behind it. Whether it is 100 percent or 10 percent, it doesn't matter. The fact is that, in my experience, and in dealing with loans, a 10 percent guarantee at \(\$ 17\) million on a 40 percent LTV is what is called a comfort guaranty. It is there. It is probably never going to be called upon. It is well secured. And that 25 basis points is what they place a premium on it for.

But, you know, you are asking to make an assumption here and trying to say that today is Tuesday, when everybody in this courtroom here knows that today is Friday.

You can't make that judgment and sit here and say, the documents state what it is and I am not going to deviate from what the documents say. The documents state that with the guaranty it is 25 basis points less. Without a guaranty is 25 basis points more. And in my experience, the 10 percent, 25 percent, 50 percent or 100 percent of the guaranty based off of the other metrics with the loan, does not change that opinion.

MR. WALLACE: I move to strike the answer as non-responsive.

THE COURT: You know, yesterday not everybody could tell you it was Thursday, but today everybody can tell you it is Friday.

Denied. I think he was trying. I'll determine whether he was successful or not; maybe whether I credit what he said or not.
Q For the purposes of this analysis, you determined that the guaranty was worth 25 basis points; is that correct?

A A guaranty.
Q What is the difference you see between A guaranty and \(B\) guaranty?

A There are various levels of a guaranty that are described throughout the loan documents. A guaranty, a limited guaranty, the fact that the guaranty is in place, as I testified yesterday, no matter whether it is a limited guaranty or not, the function of a guaranty as looked at by Deutsche Bank, as looked at by bankers, as looked at in my experience and as looked at in the real world, is that no matter if it is at \(\mathbf{1 0}\) percent or if it is at \(\mathbf{1 0 0}\) percent, that guaranty to them was valuable for 25 basis points for the engagement of a warm body of a billionaire to stand behind the loan in his equity infusion and capital there. So yes, 25 basis points per the documents and my experience.

Unell - by Defendant - Cross (Wallace)
Page 5762
MR. WALLACE: I guess I asked for that one.
Q And is it your understanding that Mr. McCarty was pricing out the interest rate on a loan for the properties listed here that was only based only the collateral itself with no guaranty? Yes or no?

A I do not know because I do not know exactly what Mr. McCarty did. I have an idea of what he did, but I can't speak to what Mr. McCarty did. That would have to be in his testimony as to how he derived the 10 percent and what factors went into that. And if you are trying to state that, okay, the 10 percent is without a guaranty, that, once again, is the guaranty was in place. So it is not a -- that is not a scenario that would ever come into play into this case because the guaranty was in place at all times.

Q So your scenarios do not incorporate the idea that there could be no guaranty, correct?

A This scenario states that if there was not a guaranty, that the additional premium would be 25 basis points.

Q Okay. Did you form a view, one way or the other, as to what the market interest rate would be for a commercial real estate loan on these four properties with no guaranty at the time they were originated?

A No. Because the only person, as I testified earlier, that is able to do that is Deutsche Bank. The Deutsche Bank is the trier of the ability to set their own fees. I am not in a
position to set those fees. I don't risk write loans at Deutsche Bank, the Attorney General doesn't risk write loans at Deutsche Bank. And certainly Mr. McCarty doesn't -- I did not make any assumptions as to what the interest rate would be.

The only group that can speculate or actually state what the interest rate would be is Deutsche Bank, because they are the ones that were the users of the documents, the ones that entered into the loan agreement and the ones that offered the terms to the defendants.

Q Okay. So to the extent Mr. McCarty was pricing out the market interest rate for a commercial real estate loan on these four properties, with no personal guaranty at the time they were originated, you did not try to recreate his analysis?

A No. I tried to give an illustrative of what it would be based off of the loan documents. I am not trying to recreate what he did.

THE COURT: Let me jump in. Are you testifying that with your experience, your expertise, your knowledge of the facts in this case, you could not possibly estimate what Deutsche Bank would have charged as an interest rate in any particular situation, because it is all up to them?

THE WITNESS: Yes. I can give a range and give historical as to what has been out there and show illustrative examples of it, but at the end of the day as referenced in the Deutsche Bank documents, all of their

Unell - by Defendant - Cross (Wallace)
Page 5764
risk rating, all of their pricing is proprietary. None of us have that information. None of us have that ability. None of us understand the total relationship value. We can try to do our best to understand it based off of the testimony that has been provided, as well as the documents. But the only person that has the ability to determine the risk and the interest rate and the overall relationship value, is the lender.

THE COURT: So you said you could estimate or guesstimate within a certain range, but you just couldn't give an exact?

THE WITNESS: And I did not give an exact. I have provided data to show how the defendants -- excuse me, how the plaintiffs at 10 percent was inaccurate and also not reflective of the actual loan, because the loan contained a guaranty. And the assumption that the loan did not have a guaranty is incorrect. Because at the 10 percent level, the loan had an effective guaranty in all times. At no point in any testimony, in any deposition or any record have I seen that the guaranty was invalid. So running the estimate at 10 percent and stating that there is no guaranty, is an analysis that is worthless.

THE COURT: Well, just as a general point, and the attorneys know this, I allow in my discretion
hypothetical questions. So, if you are asked a hypothetical, to say: Oh , but that's not the fact. That's not answering the question.

THE WITNESS: So hypothetically 10 percent is unsupported, as not the way that anybody would do it. It was tied to bonds. Bonds are not loans. It was tied to Dell and Club Corp. which are corporate entities. And the support for it was unfounded and inaccurate in his report. So yes, I full-heartedly disagree with the 10 percent that Doral would have been at. And I firmly believe it would be closer, if not lower than the 25 basis points as described here and in the loan documents, and in the testimony of Deutsche Bank.
Q So let me clarify one thing. Well, let me ask then, so are you saying that actually the commercial real estate loan, no guaranty, issued by the Commercial Real Estate group at Deutsche Bank or some other Commercial Real Estate division, would have been priced even closer to the private wealth loans than your hypothetical here with the 25 basis points added?

A That's not correct.
Q So what are you saying? I don't understand what you are saying.

A What I am trying to say is that 10 percent is unfounded.

Q And you said, I think it would be closer to the

Unell - by Defendant - Cross (Wallace)
Page 5766
numbers reflected here, even more than the 25 basis points?
A Absolutely. And that's reflected in the loan documents.

Q So, sir, do you have an opinion, one way or the other, as to what the market rate would be for a commercial real estate loan with no personal guaranty for these four properties?

A It would be in the range of where I have it here.
Q So close to the private wealth amounts?
A Yes. As illustrated in the loan documents.
Q So if it is close to the Private Wealth Group -close to the private wealth amounts, why did Donald Trump agree to a guaranty? Why put his own assets at risk?

A That's a great question. I am happy you asked it. Because real estate developers that believe in their projects, that place a tremendous amount of equity in their projects, it gives credence to their plan. Especially when you are a redevelopment and repositioning assets. That's what President Trump does.

And that is part of what makes his success, is his ability to stand behind his deals, place his name behind it, place extremely large amounts of capital into the deal. And therefore it is looked upon by banks, in my experience, as Deutsche Bank did in their experience, as a well-sounded loan. And guaranties for people that stick behind their deals goes a
really long way in a bank. And as we have already said, banks love billionaires because billionaires repay loans.
Billionaires that repay loans with a guaranty makes it more secure.

Q You are telling us that Donald Trump -- when the guaranties were at 100 percent -- when the guaranty was at 100 percent on Doral, how much capital was at risk for Mr. Trump?

A Several hundred million dollars, because he had placed \(\$ 250\) million of capital in there.

Q I am asking on the guaranty. When he had the guaranty on the Doral loan and the guaranty is 100 percent, how much of Mr. Trump's capital was at risk in that guaranty?

A \(\$ 125\) million.
Q You are saying that Mr. Trump put \(\$ 125\) million of his own capital at risk unnecessarily because he could have gotten the same interest rate --

MR. WALLACE: Actually, let me strike that question if I can, or withdraw that question, if I can,
Your Honor.
THE COURT: Withdrawn.
Q Mr. Trump guaranteed the Doral loan for \(\$ 125\) million, for which he was personally responsible, but received no interest rate benefit for that guaranty; is that your testimony?

Unell - by Defendant - Cross (Wallace)
Page 5768
A No. He did receive an interest rate benefit. You are looking at it right here, 25 basis points.

Q So the --
A And actually, in actuality, he elected to keep his guaranty in place when he didn't have to for 25 basis points. That is actually what happened. So we are not even looking at a hypothetical here as to, oh, Mr. Trump didn't have his guaranty, what is it worth. We see what it is worth. And we see to him that he elected to keep the guaranty because that was important to him and was worth 25 basis points.

Q In your description of why Mr. Trump chose to have a guaranty in order to obtain a 25 basis-point benefit, what did you do -- what documents did you review in your analysis to come to that conclusion?

A The credit memos, the loan agreements and the actual what happened with the loan, in that he did elect to keep the guaranty in exchange for a 25 basis-point reduction.

Q Did you review any testimony from Mr. Trump about why he chose to have a guaranty on the Doral property?

A I did not.
Q Okay.
THE COURT: Just, the court reporter would like you to speak a little slower, generally.

MR. WALLACE: Me too.
THE COURT: You are not the first person.

Page 5770

THE WITNESS: We will slow it down a little bit.
Q Did you review any contemporaneous documents from the Trump Organization during the period of negotiation for the Doral loan explaining that these were the reasons for including a guaranty on the loan for a 25 basis-point improvement?

A At which point? That's -- I mean, the loan was originated from 2014 to 2022, had multiple iterations to it. I want to make sure we are at the right time.

Q The origination of loan in 2011 and 2012.
A No. But it was -- during that -- the loan documents state what the step-down would be and what the increase of interest would be. It is in the documents.

Q So you are extrapolating Mr. Trump's intent from the loan documents?

A What actually happened. He did decide that he was going to keep a limited guaranty in exchange for a 25 basis-point change.

Q I believe you said you were here for Ms. Vrablic's testimony on Wednesday; is that correct?

A Yes, sir.
Q And do you recall that Ms. Vrablic testified that most of her clients do not like recourse; do you recall that testimony?

A Yeah, that's -- that's correct. Most people don't like recourse.

Unell - by Defendant - Cross (Wallace)
Q And so it is your professional opinion that a 25 basis-point improvement in interest rates is sufficient for a client to put aside that dislike of recourse?

A Absolutely. If it is that -- if it is their business decision, that's their business decision. And Deutsche Bank obviously felt comfortable with it by approving it and placing it in the loan documents. I can't speak to the business decision of somebody. There is a lot of other factors that go into a decision besides that. And also, if you are a real estate developer, while some don't like it, those that are confident, that have success, they will put their name behind it.

Q In the course of preparing your reports, did you come across any evidence indicating that Donald Trump had decided by 2011 that he never wanted to do a recourse loan again?

A I believe I read some of that, but things change. Metrics change. As I mentioned earlier, within five seconds ago, there are a lot of things that can change, including what is happening with his personal life, what is happening with his professional life, what is happening with his corporate life, as well as what is happening in the overall capital markets.

THE COURT: Two things. One, slow down.
And two, the question was, did you come across a
certain statement. Not your interpretation of what then
happened. The other side could redirect you on what your
interpretation was.
Q Mr. Unell, if I could hand you a document. It is already in evidence. I think it is easier for everyone.

MR. WALLACE: It is Plaintiff's Exhibit 1251. (Handing)
Q This is an e-mail chain between Ivanka Trump, Jason Greenblatt, Allen Weisselberg, and David Orowitz from December of 2011. Mr. Unell, did you review this document in the course of preparing your report?

A I don't recall.
MR. WALLACE: If we turn to page two of this document.
Q At the bottom there is an e-mail from Rosemary Vrablic. She is forwarding an attached summary of terms, the proposed acquisition of the Doral resort.

Ivanka Trump responds -- forwards this on to Mr. Weisselberg, Mr. Greenblatt, Mr. Orowitz. And writes: It doesn't get better than this. Let's discuss ASAP. I want to call Rosemary and thank her, but if there are any asks I would like to give her an indication. I am tempted not to negotiate this, though.

Do you remember reviewing that e-mail from Ms. Trump?
A I have seen that before, yes, sir.
Q And if you look at the response from Jason Greenblatt above, page one. Do you know who Jason Greenblatt is?

Page 5772
A No, sir.
Q He is an attorney at the Trump Organization, I'll represent that to you.

He writes: I will review. But not immediately -- I am sorry. I will review but not -- it is supposed to be "note" -- immediately that this is a full principal and interest and operating expenses personal guaranty. Is DJT willing to do that? Also, the net worth covenants and DJT indebtedness limitations would seem to me like a problem.

Do you know if you determined why Mr. Greenblatt felt the net worth covenants and indebtedness limitations would be a problem?

A I can't speak on behalf of Mr. Greenblatt.
Q If we look at the next e-mail in the chain from Ivanka Trump, she writes: That we have known from day one. We wanted to get a great rate, and the only way to get proceeds/term and principal where we want them is to guarantee the deal. As the market has illustrated, getting leverage on resorts right now is not easy. (i.e. 125 plus an equity kicker for another 25 percent or Beal with full cash flow sweeps and steep prepayment penalties).

Did you review that e-mail in preparation?
A Yes.
Q Okay. So, Ms. Trump believes that the only way to get a great rate and the terms and principal they wanted, were

1 guarantee the deal. Is that indicative of the benefit that

Page 5774
they were going to be able to obtain by guaranteeing the deal? Is that fair?

A Yes.
Q If you look at the response from Mr. Greenblatt. He states: Obviously this is not my decision, but this is completely inconsistent with what he told me he would ever do again when we had the Chi and Vegas issues, and the magnitude of this is much bigger. He was so angry that he got himself "into the Chi/Vegas mess" and told me he never wanted to do this again. I understand that he has changed his mind. And that's fine. But he has to recall that banks do sue under payment guaranties and he may have to write a check north of 125 million if there is any default on the loan.

I think we can agree though, that despite these concerns of Mr. Greenblatt, Mr. Trump agreed to guarantee these loans, correct?

A Yes. He was the ultimate decision maker as the guarantor.

Q It is your opinion that he did this to obtain a 25 basis-point improvement in the interest rate on the loans; is that right?

A No, that's not it. That's not what I stated.
Q What are you saying?
A I am stating he did it to obtain a preferential rate
that go with an interest rate. It is not just, oh, guaranty or no guaranty 25 bits. You can't put this in a square box in a vacuum. You are ignoring multiple other facts that go into the pricing of a loan.

Q So, I am going to represent to you that what is happening is an effort to figure out how much disgorgement, how much benefit the Trump Organization obtained, and we are just trying to obtain a reasonable approximation.

So, let me ask, is there -- what -- I'll withdraw.
I'll restate the question.
Can you state what the interest rate benefit was from having a guaranteed loan as opposed to a non-guaranteed loan on the Doral property?

A I cannot state what the exact benefit is. However, there was a benefit.
Q Okay. And so I take it -- and I apologize if I did cover this one. You did not reach an independent opinion on what the market rate for a commercial real estate loan with no personal guaranty for these four loans would be, right?

A No.
Q Okay. So Mr. Unell, I will represent to you that as part of the assignment Mr. McCarty received, he was asked to assume that Mr. Trump did not have access to the Private Wealth Management group because Mr. Trump had engaged in fraud in the preparation of his financial statements.

Does your interest differential calculation include that assumption?

A No, because that's not what my assignment was, because there was a guaranty in place.

Q So putting aside the fraud piece. Does your interest differential calculation include an assumption that Mr. Trump does not have access to the Private Wealth Management group at Deutsche Bank?

A No, because he did have access to it.
Q And so if that was Mr. McCarty's assignment, you two aren't really measuring the same thing, are you?

A I can measure that his rates --
Q That's not my question.
My question is, you and Mr. McCarty were not measuring, if that was Mr. McCarty's assignment, you and Mr. McCarty were not measuring the same thing.

MR. KISE: Objection, Your Honor. I think
Mr. Wallace's hypothetical presumes facts contrary to the evidence. This is an improper hypothetical.

MR. WALLACE: It is a hypothetical, so.
MR. KISE: You can't pose a hypothetical that is squarely contrary. That's like saying assume today is Tuesday. It is not Tuesday, it is Friday.

THE COURT: Okay. I am not sure he is doing that.
Unell - by Defendant - Cross (Wallace) Page 5777

MR. KISE: But he is. If you want to excuse the witness, we can, but that's definitely what he is doing.

His hypothetical -- his hypothetical presumes in the first instance that President Trump wouldn't have qualified for the private wealth bank. He did. You already heard testimony, 10 million and 100 million, that's it. 10 million liquidity, 100 million net worth. Once you are there, you are in the private bank. That's it, you are in. Period. It doesn't matter beyond that. So it is like assuming that he didn't qualify.

MR. WALLACE: Now we should excuse the witness. MR. KISE: That's fine. I offered.
(Whereupon the witness stepped down from the stand and exited the courtroom.)
(Whereupon the following proceedings were stenographically recorded by Senior Court Reporter Michael Ranita.)

THE COURT: Mr. Kise, do you need to finish or -MR. KISE: Yeah, no, it's -- it's like going back and debating whether the world is round or whether the world is flat. I mean, the evidence in the record demonstrates he qualified for the Private Wealth Bank; 10 million liquidity, 100 million in net worth. I mean, that's just undisputed. So once you are in the Private Wealth Bank, and maybe this is where the disconnect is. Once you are in the Private Wealth Bank, your interest rates are different, period, full stop. They are different. And they are different because, as you heard the testimony, they are different because the bank wants you as a client. He's a whale of a client. He's a billionaire. He is one of -- so they are willing to give him rates because they are going to get deposits; they are going to get access to his assets; they are going to write other loans. You heard all this testimony. So they are willing to do things for this client that they are not going to do for just somebody who comes in off the street.

So, yes, you have to give a personal guaranty, but the pricing to on the personal guaranty is not the pricing between the regular world and Private Wealth. The pricing is within the Private Wealth parameters. And that's exactly what this witness is saying is, okay, there's a range you heard -- you heard the witness, Mr. Williams, testify to it, 2 percent to 2.5 percent. So that's 25 basis points. So
that's what the guaranty is worth. Once you are in the private bank, you are in this sort of rarified air and you get access to these rates. So it's a flawed premise. It's an improper hypothetical to say, well, no, no, we have to compare it to the outside world, and this witness has to accept that premise. I mean, yes, if I assume that today is Tuesday not Friday, then tomorrow will be Wednesday and not Saturday. I mean, right --

MR. WALLACE: This is - your Honor, this is not an evidentiary objection. Mr. Kise --

MR. KISE: It is an evidentiary.
MR. WALLACE: - he does this all the time. You argue your case. I would say it also shows, Mr. Kise, something you never talk about, that the Court found Mr. Trump committed fraud to get into the --

MR. KISE: No.
MR. WALLACE: To get into Private Wealth Group, he committed fraud.

MR. KISE: No.
MR. WALLACE: He did.
MR. KISE: No.
MR. WALLACE: The Court has found that.
MR. KISE: No. The Court has found that he violated 63(12), which expressly means only that he violated the statute and not fraud; that's what we are here about.
R. Unell - by Defendant - Cross (Mr. Wallace)

Page 5780

This is the problem with the Attorney General's view. They haven't proven -- in order to establish fraud, intent, materiality, reliance and damage. I mean, that was what you have to establish; that's what is at issue with these remaining counts. They wanted a trial on these remaining counts. That's what this trial is about.

MR. WALLACE: I believe.
MR. KISE: 63(12) violation, as your Honor has held, a 63(12) violation doesn't require those elements. So to call it fraud in the generic sense because we use that term in association with 63(12), doesn't mean that it's fraud in the sense of what's at issue in this case.

MR. WALLACE: Your Honor, your Honor.
THE COURT REPORTER: I can't hear when you are both --

MR. KISE: I'm not arguing a case. It's an evidence objection. A hypothetical, it's an improper hypothetical.

THE COURT: Mr. Wallace, do you have anything to say?

MR. WALLACE: Are you about to strike my examination of this witness?

THE COURT: Your what?
MR. WALLACE: My examination of this witness. Mr. Kise is saying I shouldn't be allowed to because they

1 are improper hypotheticals.
MR. KISE: It was one question. It wasn't the whole examination. I liked most of the rest of it.

THE COURT: Would you like to explain --
MR. WALLACE: No, I don't want to rephrase my question.

THE COURT: I'm --
MR. WALLACE: I'm sorry. I interrupted you.
THE COURT: I'm not asking you to rephrase. Im asking for you to defend it.

MR. WALLACE: It is completely consistent with our disgorgement theory, which also relates to 63(12) fraud, that he lied to the Private Wealth Group to get these loans, and therefore, we are looking as to what the interest rates would have been if he had not had access to the group that he lied to. That is the simple measure, and the Court will be free to decide whether it likes that measure or it prefers Mr. Unell's measure at the end of the day.

MR. KISE: We are right back to circuitous again.
MR. WALLACE: It's less circuitous if 1 just finish the exam.

THE COURT: Objection overruled. We could argue all day. Let's get the witness back. You could ask him hypotheticals. I don't see a problem with that, and I accept Mr. Wallace's explanation.
R. Unell - by Defendant - Cross (Mr. Wallace) Page 5782
(Whereupon, there is a brief pause in the proceedings as the witness enters the courtroom and steps into the witness stand.)

THE COURT: I should explain "I accept his explanation." I think so his explanation is correct. Thank you.

Okay. Next question.
Q Mr. Unell, I think you said that you did not accept --
MR. WALLACE: Why dont we put up DDS and PDX4 side by side.
(Whereupon, the exhibit was displayed on the screen.)
Q So this is your analysis, and it should hopefully be Mr. McCarty's analysis, both which are very hard to view on this screen, but I can say that -- we talked about this, but Mr. McCarty uses a ten percent rate for Doral; correct?
A Yes, sir.
Q And I believe you, yesterday, criticized Mr. McCarty for using a fixed rate rather than a flat rate; is that correct?
A Yes, sir.
Q And that's because the DB loans had floating rates; is that correct?
A Yes, sir.
Q You reviewed Mr. McCarty's trial testimony; is that right?
but he doesn't account for when it goes down to 1.8042 percent, which is below the origination at 1.9035 .

THE COURT: Slower, still.
Q I believe Mr. McCarty testified that he did do that, and it was more conservative, but you didn't actually run an analysis whether fixed or flat was more conservative?

A I have not, and I have not seen any indication or evidence to support Mr. McCarty's claim that it was conservative.
Q Well, I mean, it's math. Somebody can just run it tomorrow and figure it out.

A But it hasn't been provided to me, so I'm sure it could be done, and it could've been done beforehand, but it hasn't.

Q Mr. Unell, I'm going to hand you a document that's been marked Plaintiff's Exhibit 2658. This is the Realty Rates Investor Survey for the fourth quarter of 2011.

Do you see that?
A Yes, sir.
Q And this is one of the reports you reviewed in the preparation of your report; correct?
A Yes, sir. And it was also utilized in the deposition.
Q Okay.
A I recognize the --
Q You see that.
So if we could go to page six of this document, if we
could pull up -- focus on the chart, I think. Well, just the chart is fine.
(Whereupon, the exhibit was displayed on the screen.)
Q This is the table that you utilized in preparing your analysis of the increases -- the flow of interest rates -- let me rephrase that.

This is the information you used in preparing your
tables showing the changes in interest rate spreads over time; is that right?
A Actually, I believe that it was taken from the various individual pages throughout here that, for instance, when you would look at page 23 of 41 where it says "lodging facilities, full-service", that that would provide that information.

I'm not certain that it ties back out to the overall on this page. So it -- no, it was not. It was more so both this, and it ties back to 23 .

Q We could pull up --
A 11 and 23. I want to make sure I'm saying that all the data was. This was a portion of it, but 23, also.

Q So let's pull up page 23.
A Yes.
THE COURT: One at a time, and slower. MR. WALLACE: Apologies.
A Mr. Wallace, I'm not saying it wasn't. I want to make

Page 5786
sure this was also placed out there, too.
(Whereupon, the exhibit was displayed on the screen.)
Q Presumably the information, the two tables, correlates.
A I believe so. This is the more detailed table, yes.
Q Why don't we just go to the broad table then. I'm not going to get into too much detail.
A That's fine. I want to make sure we are working off of the same numbers.

MR. WALLACE: Okay. So if we go back to page six, the table.
(Whereupon, the exhibit was displayed on the screen.)
Q So your analysis, you are using the first row at the top, correct, which is spread over base?

A We've used several of these. We've used the loan-to-value, we've used interest rate.

THE COURT REPORTER: im sorry, weve used interst rate and --
A Spread over base, interest rate and loan-to-value.
MR. WALLACE: Why don't we pull up DD4, page one, if we could.
(Whereupon, the exhibit was displayed on the screen.)
Q For this chart --

1 A Yes.
Q -- you looked at yesterday, is this using the spread over base?

A Spread over base for office. Yes, because this is based off of the average, yes, sir.
Q And if we look at the notations, the two stars next to spread over base, at the bottom it says this is a spread over base over the ten-year treasury rate.

Does that mean that it's measuring the interest spread for these categories over the ten-year treasury bond?

A It would mean the ten-year treasury would be the base rate.

Q And the Doral loan was priced as a spread over LIBOR; is that correct?

A Yes.
Q And these -- the data presented here, and we could open up, are Class A, Class B properties; is that correct?

A Yes.
Q And I believe you testified at your deposition that Doral, at this time, was a Class B property; is that correct?

A It was a full-service lodging facility. I'm not certain if it was a Class B, but it would have been factored into Class A based off the renovations that were going to be undertaken by the defendants.

Q I guess that's my question. Is the plan at the time of

Page 5788
the Doral loan being initiated was for Mr. Trump to do extensive renovations to the resort; is that correct?

A Yes.
Q I believe he had said that the brand had been
misaligned and that it had been miss run by the Marriott group; is that correct?

A I believe so, yes.
Q So he eventually spent more than \(\$ 200\) million renovating the property; is that right?

A That's correct.
Q But it's your position that at the time they're initiating this loan, with all that renovation still to come, it was appropriate to price it as a Class A property?
A Absolutely. It was a first-class facility, and just because it needs renovation does not mean that it is not a Class A facility.

There are multiple examples and items or projects that I've worked on throughout my career that are renovation projects that are treated as Class A.

Class A not only has to do with the condition. It has to do with the location, the actual asset itself in its competitive set. You cannot just state the condition. The condition was not really a factor in determining whether it's a Class A asset or Class B asset at the time.
25 Q So -- I apologize.

1 Just to set some ground rules, some ground work, Mr. Trump paid 150 million to purchase the resort out of bankruptcy; correct?

A Correct.
Q And he was then going to invest more than \(\$ 200\) million of his own funds in the property?

A Correct.
Q So the fact that the property was going to need
\(\$ 200\) million of renovation over several years, to your professional view, did not add any risk to the loan for the Doral property?

A Additional risk over what?
Q That the project would be successful; that the project would be repaid?

A It's what banks do. They analyze the risk on a construction loan. That's what they do.

Q And --
A So it's no more risky than any other, you know, repositioning loan that's out there.

Q My question is, these are for operating properties.
Was the fact that Doral was going to require extensive renovations, \(\$ 200\) million, did that add any risk that should be considered in pricing the loan for that property?
A Add any risk to what? I'm trying to figure out what we are adding risk to.
R. Unell - by Defendant - Cross (Mr. Wallace)

Page 5790
\(1 \quad\) Q You said that banks set interest rates based on their assessment of the risk in the loan.

A Okay. And that was factored in to their analysis of the project in the plan.

Q I'm asking -- the "they" you are referring to is Deutsche Bank?
A Deutsche Bank, yes, sir.
Q I'm not asking about Deutsche Bank at this point. My question is whether the Doral loan is more risky because the property needed to be renovated, over an operating property that is not planning on extensive renovations?

A If you are trying to compare it between a property that needs renovation and doesn't need renovation, it could. However, there are many examples of luxury properties that go through a renovation that are accretive and do not create additional risk. So to measure that risk, you would have to dive into the actual details of what the plan was, the timing of it, the impact on ADR, how would it affect occupancy, how it affects cash flow, the timing of it. So in order for seasonality, there are multiple factors that go into that that I did not evaluate that were evaluated by Deutsche Bank in that analysis of the project.
Q Let's go back to the sort of market rate information you were talking about. If we look at golf, Doral also had a golf element; correct?

1 A Correct.
2 Q That's why you included the golf courses and country club number in your chart; correct?

A Yes, sir.
Q If we look at the spread for golf, the minimum is 1.2 , 6 the maximum is 11.5 , and the average is 5.84 . Actually, why
7 don't we look at the interest rate instead, because I believe
8 the two percent number that -- the two point -- the two plus
9 number that you were using was the actual interest rate, so that
included the spread plus whatever the base rate would have been; correct?

A Um, we looked at it from multiple different angles, so happy to look at it however you like.

Q So since Mr. McCarty, in his chart, and you, in your chart, include natural interest rate, let's look at the interest rate column. For golf, the minimum is 3.5 ; correct?

A Correct.
Q And so that's higher than the two plus rate that Mr. Trump actually obtained; correct?

A It is.
Q And the maximum is 13.8 ; is that correct?
A Correct.
Q And the average is 8.14 ; correct?
A Correct.
Q So that eight percent -- so the ten percent used by

Unell - by Defendant - Cross (Mr. Wallace)
Page 5792
Mr. McCarty is between the maximum and the average; is that correct?

A Yeah.
Q Okay.
Why don't we take a look at another document. Let me ask, Mr. Unell, did you consider any contemporaneous documents about the potential commercial real estate loans, without a personal guaranty, that were being offered on Doral?

A I reviewed nonbinding term sheets.
Q And you decided not to use those documents; correct?
A They were nonbinding.
Q So you didn't rely on them.
A They were not binding and not relied in my opinion. They were not to be relied on.

Q And so you, in fact, did not rely on them; correct?
A In my expert opinion, in my experience, a nonbinding term sheet is not an indication of terms, so therefore, I did not include it.

THE COURT: All you had to say was no, or no, I didn't rely on it. He didn't ask for a reason. Please, we'll save a lot of time if you answer yes or no questions with yes or no answers.

As long as I have -- I just wanted to follow up on the last topic. I think what Mr. Wallace was asking -maybe I'm wrong -- all other things being equal, because

1 Mr. Unell, you like to bring in all these various factors,
which often are very important about the pricing of a loan, but if all other things are equal, is there more risk to a lender in lending to a fully built Class A property worth approximately \(\$ 350\) million as opposed to a potential Class A property that's being purchased for \(\$ 150\) million and there's an estimate of \(\$ 200\) million to bring it up to Class A? Wouldn't there be more risk? I could ask leading questions I hope.

THE WITNESS: There is, but there is also more reward there. And the upside is more. So you're initial investment of \(\$ 150\) million for the lender is less than the \(\$ 350\) million loan that they would make. So with the equity infusion of the \(\$ 200\) million, the guarantor and borrower had more money invested into this asset than the lender did. And so I would have to say with -- it's not all things equal. You would have to look at everything there. So you are trying to say a \(\$ 350\) million stabilized loan or \(\$ 150\) million stabilized loan with \(\$ 200\) million of equity in it, that's not an apples to apples comparison. And there is no way to compare that without doing extreme analysis that was conducted by Deutsche Bank to determine where the risk profile is.

Those are two completely different animals that -you are talking about different amounts of leverage; you are

Page 5794
talking about a different amount of equity contribution; you are talking about a different future value. And more importantly, you are talking about a different principal amount of 150 versus 350 million.

THE COURT: What if the principal amount of the loans was equal?

THE WITNESS: Well, if it was 150 million and 150 million, you wouldn't be able to -- how would you come up with the \(\$ 200\) million of equity to purchase a \(\$ 350\) million loan. Nobody is going to go out and buy a \(\$ 350\) million operating stabilized hotel and only take out \(\$ 150\) million of debt. They would leverage it up to 65 to 75 percent, as is done and shown in the investor survey, that the average LTV was 70 percent. So you can't compare \(\$ 150\) million loan to a \(\$ 150\) million loan that is at a completely different loan-to-value with a different profile in equity contribution. It's not -- it's not fair to for anybody to do.

It would be impossible to do, as I sit here today, without having all of those factors in front of me, and to underwrite them side by side and tell you what that would be. It's not an equal comparison. They are two different loan products.

THE COURT: All right. Next question.
MR. WALLACE: We are going to hand the witness a
R.
document that's been marked as Plaintiff's Exhibit 369.
(Whereupon, the exhibit was displayed on the screen.)
(The witness was handed the exhibit.)
THE WITNESS: Thank you, sir.
Q Mr. Unell, you reviewed this document preparing your report; is that correct?
A Let me make sure this is it. Yes, sir.
Q And this is a transaction overview of a proposed loan
by Doral for the CRE Group in Deutsche Bank, dated November 21, 2011; correct?
A Yes, sir.
Q This proposal does not include a personal guaranty,
does it?
A No, it doesn't.
MR. WALLACE: Turn to page five of the document.
(Whereupon, the exhibit was displayed on the screen.)
Q Under the bar marked "Facility", it states the amount of the loan would be 130 million dollars, and the transaction would be LIBOR 800 -- LIBOR plus 800, with a LIBOR floor of 200 BPS, or two percent; is that correct?
A Yes, sir.
Q And so this rate matches the ten percent rate that Mr. McCarty used; is that correct?

Unell - by Defendant - Cross (Mr. Wallace)
Page 5796
A Yes, it does.
Q And it is your opinion that this proposal from Deutsche Bank does not reflect the market rate; is that correct?
A Yes, it does not reflect market rate -- it does not reflect market rate.

Q So your opinion of the rate of LIBOR plus 800 with a
floor of 200 BPS would not have been standard in that time?
A That is my opinion.
Q You reviewed the deposition testimony of Donald J.
Trump in this action, in the process of preparing your report; is that correct?

A Yes, sir.
MR. WALLACE: Could we pull up the excerpt of his testimony, starting page 307.
(Whereupon, the exhibit was displayed on the screen.)
Q If you see there is -- I'll represent to you this is a discussion of the same document we are looking at. It states:
"Mr. Trump, we've handed -- the court reporter has handed you a document that has been marked at Exhibit 22. It's a golf resort -- Doral Golf Resort and Spa, Miami, a set of discussion materials from Deutsche Bank." There's the production number, and it says, "I don't know if you saw
-- I don't think you saw this document."
He says, "No."

\section*{Commercial Real Estate Group at Deutsche Bank; is that} correct?"

> "No, I didn't."

So Mr. Trump is stating that two plus 800 BPS is pretty standard; correct?
A I mean, he says it was sort of standard. He doesn't say that. He said it was sort of standard. If you would scroll back up, he is actually talking about the floor is sort of standard, not the 800 over that.

Q Well, we could each interpret --
A Could you please scroll up so that I could read into the whole thing so that I can have my answer correct, please. My reading of this in the opinion is that the floor was standard, not the 800 BPS was standard.

Q Well, he then says:
"So it would be -- no it would mean the two plus 800 BPS, okay. And I think this was pretty standard."

That was after the discussion of ten percent. Your interpretation of this is it's only the two -- LIBOR floor of two?
A That's correct.
Q If Mr. Trump was, in fact, saying that LIBOR floor of two plus 800 , or 10 percent was standard, you would disagree with that?
A Yes, based off of my experience.

Q Okay.
MR. WALLACE: Your Honor, I would move to admit Plaintiff's Exhibit 369 into evidence.

THE COURT: Granted. It's in.
(Plaintiff's Exhibit 369 was deemed marked and admitted in evidence.)

MR. WALLACE: If we could tum to another document, Plaintiff's Exhibit 3232.
(Whereupon, the exhibit was displayed on the screen.)
(The witness was handed the exhibit.)
THE WITNESS: Thank you sir.
Q Mr. Unell, I'll give you a second to look at it, but did you review this document in the process of preparing your opinions.
A Yes, sir.
Q Okay.
It's an e-mail dated November 15th, 2011, from Steve Harvey, at CSG Investments, to Ivanka Trump and Dave Orowitz. Do you see that?
A Yes, sir.
Q Are you familiar with CSG Investments?
A I am not.
Q So I will represent to you that is the investment advisor for Beal Bank. Are familiar with that entity?

Page 5800
A I am familiar with Beal Bank and have worked with them in the past.

Q As you could see, he is sending an attachment that is entitled Doral term sheet.

A Yes.
Q If we could turn to the second page of this document, there is a set of terms that start with "The borrower, Trump Endeavor 12, LLC," that is the borrower for Doral; correct?

A Yes, sir.
Q Okay.
And the loan amount here, you could see there is a change from 80 million to 95 million. Do you see that?
A Yes, sir.
Q Okay.
And it states that the interest rate is LIBOR plus 550; is that correct?

A Yes, sir.
Q And so, it's your opinion that even this would be above market; is that correct?
A Yes, because Beal Bank is not a traditional lender.
Q And if The Trump Organization were to have accepted this loan, I believe it would mean they would have had to add another \(\$ 30\) million of their own equity to the project; is that correct?
A To be determined, because they would already had gone
above and placed the 250 above --
THE COURT REPORTER: Im sorry, to to detemined,
because they already had gone above --
A They already gone above 250 million, and the plans could've changed based off of the financing.
Q But to use a turn of phrase, all other things being equal, this loan, as opposed to the Deutsche Bank loan, they would have had to have \(\$ 30\) million of their own equity added?

A If the development plan would have stayed the same, yes, sir.

MR. WALLACE: If we could do another document,
Plaintiffs Exhibit 3243.
(Whereupon, the exhibit was displayed on the screen.)

MR. WALLACE: It's in evidence.
(The witness was handed the exhibit.)
THE WITNESS: Thank you.
Q So this is an e-mail between Ivanka Trump, Ronnie Levine, Ralph Herzka, and Dave Orowitz, dated November 1, 2011.

Mr. Unell, did you review this document in the course of preparing your report?
A I don't believe so.
(Continued on the next page.)
- by Defendant - Cross (Wallace) Page 5802

Q Do you know who Ronny Levine at Meridian Capital is?
A No, sir.
Q If you look at the e-mail from Mr. Levine to Ivanka Trump he writes: Heard back from Blackstone a little while ago and they are a pass on the deal. Didn't get a definitive answer as to why. But Peter mentioned to me this morning they over weighted on hotels in the debt fund.

Do you know if the Trump Organization approached Blackstone about financing for the Doral resort?

A I am not aware if they did or not.
Q A little further down he writes about following up with Jeff Weissman from Macquaire.

Do you know if the Trump Organization approached Macquaire for the loan?

A Macquaire is an investment bank. I am not certain what their ability to finance that is or not.

Q The next paragraph he mentions a reach-out to Chuck Rosenzweig at Criterion Partners. Do you know if Trump Organization approached Criterion Partners about financing for the Doral project?

A I do not.
Q If you look down he writes: He has been trying to reach out to Todd Sammann at Colony.

Do you know if the Trump Organization approached Colony about financing for the Doral transaction?

A I am not aware of that.
Q At the end he says: We have lunch with HSBC tomorrow and will be discussing the deal with them.

Do you know if the Trump Organization approached HSBC about financing for the Doral transaction?

A I am not aware.
Q If we go to the top e-mail from Ms. Trump she writes: I actually spoke to Tom Harrison at Colony today. I know Todd through Jared as well, as we are partners on another deal together. He said that we wouldn't want to do a deal with them on the debt side, as they are too expensive for what we would be looking for (low teens).

Do you have a view as to whether or not a rate in the low teens would have been a market rate for debt on the Doral project?

A Perhaps from a non-bank lender such as Colony or these other firms that are out there from a debt fund.

Q I think we have heard Mr. Suarez say the Trump Organization could have approached thousands of banks about these loans. First of all, do you know how many banks the Trump Organization approached to finance these transactions?

A I do not.
Q Do you know how many non-banks they approached to finance these transactions?

A I do not.

MR. WALLACE: I think we can put that document aside.

To further continue a theme, Your Honor, if we want to take a slightly early break I may be able to condense.

THE WITNESS: You would be one for one overall.
MR. ROBERT: As long as he has the same batting average, we have no objection.

MR. WALLACE: I think we can shorten things.
THE COURT: You are taking a page from Mr. Kise's playbook.

MR. WALLACE: As often as I can, Your Honor.
THE COURT: All right, so 20 after we will see you then.
(Pause in the proceedings.)
COURT OFFICER: All rise.
Part 37 is back in session.
Please be seated and come to order.
(Whereupon the witness resumed the stand.)
THE COURT: Mr. Wallace, are you ready to continue?

MR. WALLACE: I am, Your Honor.
Q Mr. Unell, just a couple of quick questions to close out the Doral loan. I believe you said that the offers from the Deutsche Bank CRE group had not been fully negotiated, they
Unell - by Defendant - Cross (Wallace) Page 5805
didn't have as detailed an understanding of the property, and that that's some of the reasons you didn't consider those to be market estimates of value; is that fair?

A Yes, sir.
MR. WALLACE: If we could pull up Plaintiffs
Exhibit 3111. This is already in evidence.
Q I apologize, I don't have a hard copy. But this is an e-mail chain from November 2011 between Dave Orowitz and Allen Weisselberg and others at Deutsche Bank. The top e-mail Mr. Orowitz writes: Mark, it was good speaking with you earlier today.

Please find a link to a folder containing the due diligence materials that you requested.

I'll just note that the cc also includes David
Goodman. Do you know if the people on this e-mail chain were
in the CRE group of Deutsche Bank or the Private Wealth Management group of Deutsche Bank?

A I do not, no.
Q I'll represent to you that Dave Goodman is in the CRE group at Deutsche Bank.

MR. WALLACE: If we could go down to, I believe,
page two of this document?
\(Q\) This is after Ivanka Trump has written an introductory e-mail and she writes: Thank you for providing us with the investment memo and projections for the Doral Golf

Page 5806

Resort and Spa in Miami, Florida. We at Deutsche Bank are very familiar with the asset, as we have financed this loan several times over the years for previous ownership.

Then it states: The Commercial Real Estate group in conjunction with the Leverage Finance group are giving immediate attention to your request.

Do you know what the Leverage Finance group at Deutsche Bank is?

A No, sir.
Q You will see that there is an attachment of a due diligence file. Do you know how far the due diligence went between the Commercial Real Estate group and the Trump Organization on the financing of the Doral transaction?

A I have seen no evidence to indicate one way or the other.

MR. WALLACE: We can put Doral to the side.
Q I just want to clarify one point, actually, in the affidavit that you submitted two nights ago.

MR. WALLACE: So if we could put up on the screen Defendant's Exhibit 1061.
\(Q\) This is the affidavit you prepared that, among other things, updated your opinion. And I believe was the basis for the table we looked at calculating a potential interest differential. Is this correct?

A Yes. This was a portion of that basis, yes.

Q And I just wanted to check on one thing on page 11, on the last page. I am sorry, paragraph 11.

A I was going to say, I am missing part of it. It is Friday.
Q Paragraph 11, page four. You write that given the testimony and documents presented at trial that show 1) Deutsche Bank relied on adjusted financial numbers for approving loan origination and reviews. 2) Step-downs on Doral and OPO were in place that decreased or eliminated Trump's financial covenants.

I just want to make sure that the reference to OPO was an error and it should be Doral and Chicago. Is that correct?

A Yes, sir.
MR. SUAREZ: It also says President Trump and not Trump's financial covenants?

MR. WALLACE: I thought I said President, I apologize.
Q I want to talk briefly about 40 Wall Street.
MR. WALLACE: If we could put up DD-5 and PDX-4, again?
Q Again, it is all very difficult to see.
A It is easier on this little monitor up here.
Q So, Mr. McCarty estimates a market rate for 40 Wall Street of 5.71 percent, correct?

Unell - by Defendant - Cross (Wallace)
Page 5808
A Yes, sir.
Q And you estimate a fixed rate of 3.9150 , correct?
A Yes, sir.
Q And that's because the 40 W all loan, in all instances was a fixed-rate loan, correct?

A Yes. Representing this was an illustrative example of the differences.

Q And can I ask you a question about the \(\$ 6\) million swap breakage fee? First of all, you testified yesterday that's an estimate, correct?

A Yes, sir.
Q And the -- that fee was paid by the Trump
Organization to get out of its existing loan with Capital One, is that correct?

A It was paid to get out of the existing swap agreement, not the loan.

Q Fair enough.
Are you aware that there was a \(\$ 5\) million capital contribution due on the 40 Wall loan in November 2015?

A Yes.
Q And so there was going to be at least some payment by the Trump Organization, even if they maintained the loan with Capital One; is that correct?

A Yes.
Q And if we look at your analysis, your illustrative
interest rates, are both outside the existing loan with Capital One, correct?

A I am not following that.
Q Well, my point is just that for either the 3.6650
rate or the 3.9150 rate to come into effect, the Trump Organization would have had to pay the swap breakage fee, correct?

A I am not following that -- what you are asking.
Q Well, your point, I believe, was that to get to this rate there was a cost to the Trump Organization of \(\$ 6\) million. So if they wanted to get this 3.6650 fee -- rate, they had to pay a swap breakage fee. Right?

A It was factored in. I am still not following how the 6 million -- how you are trying to or what you are trying to ask as related to the \(\$ 6\) million and where it went.

Q Any transaction where they were no longer in the Capital One loan as of 2015, there would have had to have been a swap breakage fee, correct?

A Not necessarily. It depends on the loan documents in the ISDA agreement. So without knowing that, the agreements, the swap agreement and the loan agreement could have not been tied together. There could be an opportunity for the borrower to keep the swap in place if it wasn't directly tied and secured by that, without having the underlying documents to review that. But it was a cost of doing business, so it would

Page 5810
not have been necessarily tied to that. Borrowers can sometimes keep a swap in place because if it is not directly tied to an asset, it is an instrument that is utilized to fix an interest rate, where essentially you pay a fee in order to fix a rate. And it is -- the risk is taken on for that fixed rate by somebody else. So the counterparty to that may not have been Capital One, so I can't say with certainty, Mr. Wallace, that that would not have been one way or the other.

THE COURT: Mr. Unell, I often say something but
I don't know that you have ever heard it. The person with
the hardest job in this entire room, not me, not you, it is the reporter. Please slow down.

THE WITNESS: Yes, Your Honor.
THE COURT: She just asked you to do so, and I have asked you to do so several times.
Q So the 3.9150 rate does not include any separate analysis of whether the swap breakage fee would have had to be paid; is that correct?

A That's correct, yes.
Q I believe that in your testimony yesterday you criticize Mr. McCarty's use of the 5.71 percent interest rate because it reflected an assumption that the 2005 interest rate would still be applicable today, and conditions have changed since that time. Do you recall that testimony?

A Yes, sir.
Q And I think your testimony was today, I assume that you mean that at the time of the swap of the breakage or the change in the loan in 2015; is that fair?

A Yes, in 2015 . Yes, sir.
Q Now, that 5.71 percent interest rate was from a loan that was in existence in 2015 and continued into the future; is that correct?

A Yes.
Q So in fact, just staying in place with the 5.71 percent interest rate going into the future, if the Trump Organization had maintained that loan they would not have had to pay the swap breakage fee; is that fair?

A It would have been a business decision. The swap breakage fee, depending on what market rates do, they may have decided if it was in the money or out of the money to have broken it or not. It could have gone one way or the other. They are not directly tied to each other.
\(Q\) It wouldn't have been necessitated by refinancing the loan?

A Correct.
Q And I take it you have an independent view that a 5.71 percent interest rate was not market in July of 2015 ; is that correct?

A I have seen nothing to indicate that it is.

Unell - by Defendant - Cross (Wallace)
Page 5812
Q I thought you -- well, I believe that you - when you testified about the Ladder Capital loan, your testimony was that much of that was driven by the underlying collateral and the LTV on the transaction; is that fair?

A Yes, sir.
Q Okay. And that was based on a loan of \(\$ 160\) million and an appraised value of \(\$ 540\) million; is that correct?

A I believe so, yes.
Q Did you review any contemporaneous documents from other market participants concerning the market rate for a loan on 40 Wall Street?

A No, sir.
MR. WALLACE: If we could take a look at
Plaintiff's Exhibit 268.
(Handing)
THE WITNESS: Thank you, sir. I got two. It is Friday.
Q Mr. Unell, did you review this document in the course of preparing your expert report?
A Yes, sir.
Q And what is this document?
A This is the annual review from Capital One of the 40 Wall Street loan. And the date is September 9, 2005 is the origination date and the --

Q I'll direct your attention to the current review date
\begin{tabular}{c|r} 
of October 31, 2014 in the middle of the page. & 1 \\
A There it is, I see it. Yes, sir. & 2 \\
MR. WALLACE: Your Honor, we move Plaintiffs & 3 \\
Exhibit 268 into evidence. & 4 \\
THE COURT: Granted, it is in. & 5 \\
(Whereupon, the document referred to was deemed & 6 \\
marked for evidence as Plaintiff's Exhibit 268 by the & 7 \\
Court.) & 8 \\
Q So if we look at the summary underneath the heading & 9 \\
"Appraisal dates," you see that on the third row is listed an & 10 \\
Internal value of \$257,729,000? & 11 \\
A Yes. & 12 \\
Q And that generates an LTV/LTC of 62.1 percent. Do & 13 \\
you see that? & 14 \\
A Yes, sir. & 15 \\
Q And so this would be a difference of \$283 million & 16 \\
over the valuation of the 40 Wall appraisal that was part of & 17 \\
the Ladder Capital transaction, correct? & 18 \\
A Yes. & 19 \\
Q And would a difference of \(\$ 283\) million in the value & 20 \\
of the underlying building impact how a banker would price a & 21 \\
commercial real estate loan for that property? & 22 \\
A Yes. & 23 \\
MR. WALLACE: If we could turn to page 14 of & 24 \\
this document? & 25
\end{tabular}

Unell - by Defendant - Cross (Wallace)
Page 5814

Q If you look underneath the table that is at the top of the page, there is a box entitled refinancing scenario. And underneath it it states that there is a five-year extension available if the following are achieved: One, a 1.25X DSCR. Two, a 75 percent LTV. And three, if the aggregate dollar amount of all principal reductions by borrower plus the amount of all funds in the cash -- excess cash flow collateral accounts during the internal term equal or exceed 20 million. I'll actually stop there.
Do you know if any of those conditions were met?
A I do not.
Q If you look at the next paragraph it says: Based on a projected 2017 NOI of 18.7 million and a minimum DSCR of 1.35X per UW guideline, the loan can support maximum proceeds of 179.3 million assuming a sensitized 6 percent interest rate and a 25-year amortization.

First of all, do you understand the notation UW guideline to mean underwriting guideline?

A Yes, sir.
Q Okay. And so the terms listed here are roughly consistent with the existing loan terms at the time of the credit report in October of 2014; is that fair?

A I am looking to tie it out here.
Q Sure.
A Yes, it is consistent.

MR. WALLACE: We can put that document down.
Q The Ladder loan on 40 Wall Street was securitized; is that correct?

A I believe so.
Q And can you just explain to the Court, what does it mean to securitize a loan?

A A securitized loan is a loan that is the cash flow streams are essentially sold to investors within the market.

Q And in the course of preparing your reports, did you review any analysts reports concerning the securities that included the 40 Wall Street loan?

A I did not.
Q I am going to hand you a document that has been marked as Plaintiffs Exhibit 3186. It is 135 pages. So I think we can just go through it on the screen.

A Absolutely.
Q I think it is a little easier.
I'll state that this is a Morningstar report with preliminary ratings on a Wells Fargo commercial mortgage trust as of September 9, 2015. Are you familiar with Morningstar? MR. SUAREZ: Objection, Your Honor.
THE COURT: What's the ground of the objection?
MR. SUAREZ: Outside of the scope of my direct and outside of the scope of the witness's testimony to talk about the securitization of the loans and the ratings

Unell - by Defendant - Cross (Wallace)
Page 5816
by outside agencies. He is not being offered as an expert in that area.

MR. WALLACE: I think it is relevant regardless of whether -- but I am going to tie it into LTVs and things that this witness has talked about. So I am happy to have you reconsider it once I have shown where we are going with this.

THE COURT: All right. Let's see where we are going with this.
Q I believe the question pending that was objected to was, are you familiar with Morningstar?

A I am aware of Morningstar, yes.
Q And I will represent to you that the securities covered in this report include the 40 Wall Street loan?

MR. WALLACE: And if we could go to page 33 of the document.
Q Again, it is probably easiest to do it up on the screen here. You will see this is the section of the report that addresses the 40 Wall Street loan by Ladder Capital. And I want to walk through the metrics very quickly.

MR. WALLACE: Since we are not looking at the full thing, if we can go down one more page.
Q I don't want to be accused of misleading you. If you look at the top under the Morningstar perspective, it says that Morningstar has a favorable opinion
of the loan to 40 Wall Street, primarily due to the positive loan metrics, the granular rent-roll and amortization through the loan term.

So, I will let you know, they have a positive view of the loan.

\section*{A Yes.}

MR. WALLACE: If we can go back to the summary
page. If you zoom in on the Morningstar analytics.
Q You can see that Morningstar states that the value of the building is \(\$ 262,270,494\). And that Morningstar calculates an LTV of 61 percent. Beginning LTV.

This was an amortizing loan correct?
A Yes.
Q So the beginning LTV would be higher than the ending LTV?

A That's correct.
Q Okay. So Morningstar calculates a higher LTV than Ladder Capital did in their analysis, correct?

A Yes.
Q And these amounts of the value of the building and the LTV might affect how a banker would underwrite the loan if they came to a different conclusion?

A It is difficult to tell, because without the backup to know where this valuation came from, I don't know what it is based off of. So I couldn't tell you because rating agencies

Q Mr. Unell, yesterday you testified about a discrepancy in the reporting of the size of Mr.-- President Trump's triplex. Do you recall that?

A Yes, sir.
Q And that discrepancy involved an inflation of the value of Mr. Trump's triplex apartment by at least \(\$ 200\) million; is that correct?

A I am not certain of the exact amount.
Q If the -- well, it was your testimony yesterday that the discrepancy would not be material based on the other information and the amount of assets and liabilities that are included on the Statement of Financial Condition; is that correct?

A Yes, sir.
Q So if the overstatement was \(\$ 200\) million, is it your position that it is okay for a guarantor to intentionally inflate their net worth as reported to a bank by \(\$ 200\) million?

A No, it is not okay, because it was subsequently corrected; and was immaterial.

Q I am not asking about a correction. I am asking about if a guarantor intentionally inflates their assets by \(\$ 200\) million in a representation they are making to their banker, is that acceptable under -- is that acceptable?

A If it was intentional, it is not acceptable.
Q Okay. Are you aware that Mr. Trump has acknowledged

Unell - by Defendant - Cross (Wallace)
Page 5818
in my experience do different ways that they look at it. They also look at it from a loss perspective versus whether or not they are a independent agency. It is outside of my scope to be able to speculate on the value and compare it to anything and how Morningstar calculated value.

Q I'll say that it mentions that they had a site visit. As you can see it says: Morningstar site visit, yes.

But my question -- let's step back from what
Morningstar did. If a banker came to a different conclusion about the LTV of the property and the value of the property that would affect how the banker would underwrite the loan. Is that fair?

A A banker would rely on an appraisal report commissioned by them, not a Morningstar number without any backup behind it.

Q I am asking about using this. I am saying if a banker -- if someone comes to a different analysis of the asset value and the LTV, that's going to affect the pricing per loan? A It could.

MR. WALLACE: We can put that down. THE COURT: Objection overruled. MR. WALLACE: Oh. Thank you. THE WITNESS: I was following you. MR. WALLACE: To borrow a phrase from Mr. Unell, it is Friday.
- by Defendant - Cross (Wallace)

Page 5820
that his estate at Seven Springs was also inflated by \(\$ 200\) million?

A I am not aware of that.
Q So you didn't consider that information in forming your opinions, correct?

A No.
THE COURT: That was a negative question with an ambiguous answer.

MR. KISE: I would just, for the record, object to the characterization. I am not exactly sure that President Trump said it was inflated by \(\$ 200\) million. I think he said it was a higher -- it was higher than it should have been. I don't know that he put a precise number on it. I could be wrong about that, but I don't think so.

\section*{THE COURT: Okay.}

Q So any inflation - did you consider any inflation in the Seven Springs property in preparing your report?

A No, I did not do any valuation work.
Q You testified that you had read some of the Court's summary judgment decision; is that correct?

A Yes, sir.
Q I would like to ask if you happened to read a portion of his opinion that appears on page 19 when he writes: OAG has submitted conclusive evidence that between 2014 and 2021,
defendants overvalued the assets reported in the SFCs between 17.27 and 38.51 percent. This amounts to a discrepancy of between \(\$ 812\) million and \(\$ 2.2\) billion.

Did you review that section of the summary judgment decision?

A Yes, sir.
Q And in your professional opinion, is it acceptable for a guarantor, like Mr. Trump, to intentionally inflate his assets as reported to a bank by \(\$ 2.2\) billion?

A If it was intentional, then it would not be acceptable.

Q You testified yesterday that the net worth covenants on the Deutsche Bank loans are solely determined by the guarantor's stated assets. In your professional view, is it acceptable for a guarantor to fraudulently inflate their assets to meet a net worth covenant?

A It is not acceptable to fraudulently inflate assets.
MR. WALLACE: If we could pull up DD-4, page;
seven.
\(Q\) This is your chart showing the number of billionaires in the United States and the world between 2010 and 2020.

Mr. Unell, would it have been acceptable under the bank regulations, as you understand them, for the 492 billionaires in the United States as of 2015 to lie about their asset values in seeking lending from a bank?

Page 5822
Unell - by Defendant - Redirect (Suarez)

A I am not certain I follow the question.
Q Is there anything special about the 492 billionaires that United States had in 2015 that would make it acceptable for them to lie about their asset values when seeking financing from a bank?

A No, as I just testified, it would not be acceptable for anybody.

MR. WALLACE: Nothing further, Your Honor.
THE COURT: Okay. Any redirect?
MR. SUAREZ: Briefly, Your Honor. THE COURT: Okay.

\section*{REDIRECT EXAMINATION}

\section*{BY MR. SUAREZ:}

Q Mr. Unell, good morning.
A Good morning. We are almost at the afternoon.
Q Almost.
MR. SUAREZ: If we could please pull up what has
previously been admitted as Defendant's Exhibit 62, and turn to page five.

First let's put up page one.
Q Are you familiar with this document, Mr. Unell?
A Yes, sir.
Q What is this document?
A This is the new Private Wealth Management U.S.
Lending Product Commercial Real Estate Finance Guidelines.

Q If I could direct your attention to page five of this document? The section that says Client Segmentation and Coverage.

A Yes, sir.
Q It says: Our target client base for this initiative will have the following general characteristics.

And the first bullet says: Individuals or families actively investing in U.S. commercial real estate properties, with proven, successful track records in this sector. As a private wealth management business, we will view the principals and their families as our primary clients.

How, if at all, did President Trump fit in this criteria?

MR. WALLACE: Objection, asked and answered. Cumulative. Beyond the scope of cross.

THE COURT: I got the gist, but read back of the question, please.
(Whereupon, the record was read back by the court reporter.)
(The following proceedings were stenographically recorded by Senior Court Reporter Michael Ranita.)

THE COURT: Objection sustained for the three or four reasons given. We've already been over this.

MR. SUAREZ: Your Honor if I may ask yes or no questions, I could cut 30 questions into three. They are not leading questions. They are simply yes or no questions. I'll try it that way.

THE COURT: I don't think the objection was leading.

MR. SUAREZ: No, I know, but I was doing it that way in order to avoid the inevitable leading question when I ask a yes or no question. But if I could just cut to the chase, I'll cut to the chase.

THE COURT: You can't ask a question that goes beyond the scope of cross examination, especially since you discussed this ad nauseam yesterday.

MR. SUAREZ: I'll try it this way.
Q Did President Trump meet this criteria to qualify for a commercial real estate loan in the private bank?

MR. WALLACE: Same objection.
THE COURT: Same ruling. Sustained.
MR. SUAREZ: All right. Let's put up Defendant's Exhibit 205.
(Whereupon, the exhibit was displayed on the screen.)
A I don't need it. I could look at it on here. Save the
R. Unell - by Defendant - Redirect (Mr. Suarez) Page 5825

\section*{walk.}

Q What, if anything, did President Trump have to do to qualify for this pricing grid?

MR. WALLACE: Same objection.
THE COURT: What did he have to do -- let's take a simple ground. Is this -- are you claiming, Mr. Wallace, it's outside the scope of the cross?

MR. WALLACE: Outside of cross, was covered yesterday extensively.

THE COURT: That's enough. Sustained.
MR. KISE: Your Honor, I don't see how it's outside the scope of cross, because what Mr. Wallace was talking about was the whole differential in interest rates. It was a whole colloquy with the witness about the differential in interest rates, and what Mr. McCarty did, and the CRE rates versus these rates.

And what Mr. Suarez is doing is simply going back and pointing out why this witness believes that the range, his range is the appropriate range.

Well, I mean, you challenged this witness -- the government challenged this witness's opinion that the range that point -- the two 25-basis points was incorrect. And the presumption behind that was that Mr. McCarty was more correct because his CRE rates, his ten percent rates, were the better way to go; that was the more acceptable method.
R. Unell - by Defendant - Redirect (Mr. Suarez)

Page 5826

1
2
3

So what Mr. Suarez is doing is simply going, on redirect, over those same -- over those issues, and it's certainly within scope. And we are certainly entitled, even if we covered it some yesterday, we are certainly entitled to focus, now, on exactly what the Government brought out this morning, and demonstrate, or at least attempt to demonstrate for the Court why this witness has the right view.

So I think it's fully within the scope of the cross examination, because they've spent a good deal of time on that very issue, and that's all we are doing. We are not going to go through back through the entire litany of it. It's just focusing on the precise pieces that were covered this morning.

MR. WALLACE: Your Honor, I will just say Mr. Kise is, again, telling the witness what he would like him to present through this redirect.

I believe what Mr. Kise is, at base, saying is that they are going to go back through certain portions of yesterday's testimony to reiterate things that have been established; that is cumulative, that is repetitive, it is not appropriate. And I will also say that the focus of my examination was that Mr. McCarty and Mr. Unell were doing completely different things.

So I retain my objection to this as cumulative,
R. Unell - by Defendant - Redirect (Mr. Suarez)

Page 5827
repetitive, asked and answered, and beyond the scope of my cross.

THE COURT: I changed my mind. Overruled, for the reasons Mr. Kise stated.
Q Once President Trump was admitted into the private bank, would he have had access to this pricing group?
A Yes.
Q And do you see the spread of 2.0 to 2.5 percent?
A Yes, sir.
Q Would he have had to negotiate between that spread,
what interest rate he and the bank ultimately settled on? MR. WALLACE: Objection. Leading. THE COURT: Sustained.
Q How, if at all, would the commercial real estate range of 2.0 to 2.5 percent have resulted in the interest rate used on the specific bank transactions?

A It would have provided the guidance for Deutsche Bank to appropriately price the loan once President Trump was admitted into the Private Wealth Management Group.
Q And in order -- what, if anything, would President Trump have had to do to qualify for pricing within that range?

A He would have had to have been a client of the Private Wealth Management Bank. And in order to qualify for that would have needed to have had a minimum amount of assets, which he clearly qualified for.

Q And if he didn't have the minimum amount of assets required to qualify for the Private Wealth Group, would he have had access to this pricing grid?
A No. This pricing grid is reserved for clients in the Private Wealth Management Group.
Q And have you seen anything in the record or the testimony that you've reviewed that suggests that President Trump, under any measure, would have failed to qualify for the Private Wealth Management Group?
A I have not seen or heard any evidence that would indicate that President Trump was not qualified to be in the Private Wealth Management Group.
Q And in your real world experience in banking, would President Trump have qualified for the Private Wealth Group under any measure of his net worth?

\section*{MR. WALLACE: Objection. Leading.}

THE COURT: I was expecting asked and answered. We knew the answer to that question. We know the witness's answer, not necessarily the answer.

MR. WALLACE: These are all asked and answered. I thought I've been overruled on that, your Honor.

THE COURT: My philosophy -I don't know how other judges do this -- if the witness, on direct, says " X " and on cross examination there's evidence of anti \(X\), I will let redirect say, okay, but \(X\), even if it's asked and answered,
R. Unell - by Defendant - Redirect (Mr. Suarez) Page 5829

1 even if it's cumulative, so let's just move along.
R. Unell - by Defendant - Redirect (Mr. Suarez)

Page 5830
billion"?
A Yes, sir.
Q Does the word "intentional" appear anywhere there?
A No, sir.
Q Can we pull up Defendant's Exhibit 312 and put it side by side to the summary judgment order?
(Whereupon, the exhibit was displayed on the screen.)
Q Have you reviewed this e-mail prior to today? A Yes, sir.

MR. SUAREZ: If we could turn to page three of this e-mail.
Q Do you see where it says --
MR. SUAREZ: Actually, let's start at page two.
(Whereupon, the exhibit was displayed on the screen.)
Q Do you see where it says "DJT financial profile"?
A Yes, sir.
Q And here where it says "net worth" at the bottom of page two.

A Yes, sir.
MR. SUAREZ: And then if we could scroll to the next paragraph.
(Whereupon, the exhibit was displayed on the screen.)

Q It says, "Reported 4.2 billion and adjusted based on DB due diligence of 2.4 billion."
A Yes, sir.
Q Is Deutsche Bank's adjustment to the President's net worth of - more or less what the Court has concluded in its summary judgment order to be a difference between what the OAG submitted in evidence and what the bank concluded was --

MR. WALLACE: Objection. Leading, foundation.
MR. SUAREZ: It's a math question.
MR. WALLACE: It's a leading question.
MR. SUAREZ: Okay.
MR. WALLACE: And you haven't given him all the math.

THE COURT: It's leading, and I could do the math, too.

MR. SUAREZ: Okay.
Q Having concluded, according to DB due diligence that the President had a net worth of 2.4 billion, is that adjustment within the range that the Court determined the OAG had submitted evidence to adjust the value of assets in the Statement of Financial Condition?

MR. WALLACE: Objection. That mischaracterizes the evidence that has gone on since summary judgment, that there was, like, an adjustment.

THE COURT: I'll say again, I could do the math. I
R. Unell - by Defendant - Redirect (Mr. Suarez)

Page 5832
don't need him to say that \(X\) is within the range of \(Y\) to \(Z\). Q Is an adjustment in that range to the net worth of the sponsor, in this case President Trump, unusual in your experience in the banking world?

MR. WALLACE: Objection. There's two documents on the screen right now. It's not clear which one he is referring to.

MR. SUAREZ: They really don't want this to come out.

MR. WALLACE: If you could ask a proper question it can come out. The Judge understands what you are getting at.

THE COURT: I don't think the question relied on the documents. It was just a standard question. Overruled.

Is it unusual to have that kind of adjustment? Was that the question?

\section*{MR. SUAREZ: Correct.}

A No, sir, it would not be unusual.
Q Why is that?
A Because after based off the analysis and the way that banks review things and take their approaches, that that is customary in the commercial real estate finance world. Q Now, after having adjusted the President's net worth by -- do you see the last sentence, it says, "Defendants have failed to identify any authority for the notion that the
discrepancy of the magnitude demonstrated here could be considered immaterial"?

A Yes, sir.
Q Do you agree with that?
A No, sir.
Q Why?
A Based on the evidence that I've received, the reports that l've reviewed, the testimony l've heard, that it would be
immaterial, in my opinion, as evidenced by the adjustments done by Deutsche Bank in and my own analysis and experience.

THE COURT: I will just point out that I'm -- he is certainly entitled to that opinion.

This opinion is law of the case, and I believe it's under appeal. So it is what it is, to repeat what I said yesterday.

MR. SUAREZ: And if we could turn to the first page of Defendant's Exhibit 312.
(Whereupon, the exhibit was displayed on the screen.)
Q I would like to draw your attention to the sentence that says, in the e-mail from Thomas Bowers to Marcus Mitchell, "Mentioned that it is among the strongest personal balance sheets we have seen, and totally unlike any of our major real estate developer clients in that we observe an absence of personal debt, with huge asset base and diversified CF." Do you

Page 5834
see that?
A Yes, sir.
Q Based upon your experience in the real world, is that a statement that you agree with?
A Absolutely, that the analysis that they were looking at is an analysis that I would look at in my experience. Personal debt, liabilities are something that is of most importance because of the ability for -- to carry that debt. And also, a diversified cash flow allows for a changes in market to perhaps be offset by different asset classes.

And it is different than most other real estate developers because most real estate developers stay in one lane, whether they are industrial developer, multifamily developer, hotel developer. Very few successfully have a diversified cash flow stream such as President Trump and The Trump Organization. THE COURT: Hold on.
Mr. Wallace, is that question and answer beyond the scope of your cross examination?

MR. WALLACE: I think all of this is beyond the cross examination, with the possible exception of asking him about the same passages that I asked him about in the summary judgment decision.

But I understood we were sort of letting them continue with these lines of questions. It is beyond the scope of my -

THE COURT: I'm not going to strike the answer. There is no -- or question. There is no jury here. When I said that I'll allow, on redirect, things covered on direct, I'm hoping that they'll be a lot less of that.

And I think -- I don't remember any cross examination about whether Mr. Trump was one of the richest people in the world.

Mr. Kise?
MR. KISE: You made your ruling. I'll stop there.
THE COURT: Wise move.
(Counsel conferred with his colleagues off the record.)

\section*{MR. SUAREZ: No further questions.}

THE COURT: Okay. Any recross.
MR. WALLACE: Just one.

\section*{RECROSS EXAMINATION}

BY MR. WALLACE:
Q I believe, Mr. Unell, you testified yesterday about the qualifications for the Private Wealth Management Group and the
loan chart we saw, and it was \(\$ 50\) million of assets for a borrower; is that correct?

A I believe it was 50 . We've seen different numbers. Between 50 and a hundred.

Q And the hundred is the ultrahigh net worth category; is that correct?

A That's my understanding, yes, sir.
Q In your professional experience, have you seen any individuals with \(\$ 50\) million of net worth obtain \(\$ 378\) million of credit from a lending institution?

A Yes, sir.
Q And in what instances have you seen that?
A When I was at Bank of America and there were multiple instances of individuals with guarantees in the 10 to \(\$ 15\) million range that had facilities that were guaranteed upwards of 500 plus million dollars. And they were syndicated facilities run across multiple banks with similar collateral.

Q And did the individuals guarantee the entirety of the debt, or was the guarantee limited to the full amount of their net worth?
A It varied based off of the different deals.
MR. WALLACE: Okay.
THE COURT: Any other questions from this witness
from anyone? The witness is excused.
THE WITNESS: Thank you, your Honor.
THE COURT: Thank you.
(Whereupon, the witness stepped down from the witness stand.)

MR. KISE: Could we just have five minutes to make sure the witness's transportation --

THE COURT: Sure. And then I'll address motions.

1 MR. KISE: Yes, your Honor.
(Whereupon, there is a brief pause in the proceedings.)

THE COURT: Did Mr. Unell have a successful departure?

MR. KISE: He did.
THE COURT: Okay. We are up to housekeeping, motions, and anything else that we can accomplish in the next 35,40 minutes.

MR. WALLACE: So, your Honor, I guess we are the movant, so I will start with our motion to strike the testimony of Mr. Shubin.

I'll state this very basically. He is offering illegal opinions. He is offering illegal conclusions about the interpretation of the various easement donations and restrictions on the Doral -- on the, I'm sorry, Mar-a-Lago property. And that is improper expert testimony.

You've already found this twice in this case when the defendants have submitted judicial opinions as expert's affidavits for various legal issues. It's the same principle. Mr. Shubin's testimony is not helpful to the Court because the Court is the one who finds the law.

MR. KISE: I didn't know he was done. Sorry, your Honor.

So, briefly, your Honor, you have our submissions.
demeaning of a determine in a statute. So if a witness comes in, a lawyer witness, or any expert comes in and says that, you know, best efforts means X, well, that's a legal conclusion. But here, Mr. Shubin's testimony addresses facts. They are complex facts. He identifies the relevant documents, and then the application of those facts to the subject property. That subject matter is unquestionably beyond the knowledge or understanding, or will dispel misconceptions of a typical finder of fact. And that's cited in the Guide to New York Evidence rule. I'm still getting used to the fact that you all don't have an evidence code here. It's all done by case law.

But importantly as well, Mr. Shubin doesn't opine on the seminal legal issue to be decided in the case. His testimony would be admissible, even if it did embrace an ultimate issue, but I would say, your Honor, it does not. To the extent it would, or could, then that should be decided when Mr. Shubin is here. And if there is a particular question asked, or series of questions asked that your Honor finds that invade that province, then that can be addressed then, but to wholesale discard his testimony isn't supported.

We've cited the Court to case where expert witnesses may offer opinions as to the applicability of documents and regulatory schemes. The Zohar case,
\begin{tabular}{|cc|}
\hline Proceedings & Page 5838 \\
1 & Mr. Shubin's testimony is both material and necessary for \\
2 & the defendants case. He will provide critical evidence as \\
3 & to the scope of and application of the documents, not legal \\
4 & conclusions. And I will get to that. \\
5 & It's uncontested, still, that Mr. Shubin possesses \\
6 & the requisite experience, training and knowledge. I mean, \\
7 & there's no challenge there. \\
8 & So Mr. Shubin does two things. First he identifies \\
9 & the relevant universe of documents, of governing documents \\
10 & that apply to the situation. That exercise alone requires \\
11 & expertise. That's not something that the average person, \\
12 & the average fact finder could do, and, in fact, the average \\
13 & lawyer couldn't do. Land use and zoning is very insular, \\
14 & unique, specialized, I'm sorry, area of the law. And so it \\
15 & requires expertise to go look at the public record, and of \\
16 & the 500 documents in the public record, pick out which ones, \\
17 & actually, are important to look at for purposes of whatever \\
18 & analysis you are doing. So that's the first thing that he \\
19 & does. \\
20 & And then he explains which provisions of those \\
21 & documents are pertinent to the Court's ultimate \\
22 & determination, focusing the Court on the specific provisions \\
23 & of those documents. \\
24 & So it's not a legal conclusion. A bare legal \\
25 & conclusion is demeaning of a specific contract term, \\
\hline
\end{tabular}

1 Z-O-H-A-R, the Lurie case, L-U-R-I-E, the Loscalzo, 2 L-O-S-C-A-L-Z-O -- I won't cite them. They are in our 3 papers.

1 testimony is properly admitted. We cited the Court to one

MR. KISE: He is an expert witness. He is the not a fact witness.

THE COURT: You keep talking about how he is going to give facts.

MR. KISE: No, he is not going to give facts. He's going to advise the Court as to the facts. He's going to explain the facts that are relevant. He is going to take facts that are there, but it takes his expert opinion to identify what those documents are. What the provisions are.

I mean, you or I -- well, I don't want to speak for the Court. I know that if I took a stack of land use and zoning documents, it would take me a long time just to figure out which one relates and which one doesn't.

So to the extent that the Court finds that he is offering some conclusion, legal conclusion to be drawn from the those documents, that's a very different matter than saying he can't come in and explain how the system works. It's a fairly complicated regulatory structure. And the cases that we cited say that same thing.

So explaining to the fact finder how all that works and what these facts mean is purely within the province of expert testimony. And he's not drawing legal conclusions, even though he happens to be a lawyer.

THE COURT: Any reply?
MR. WALLACE: Yes. What Mr. Kise is eloquently and

1 in great length describing is a legal opinion where you take
2 the facts, you understand the legal restrictions as they 3 apply to those facts, and analyze them.

Mr. Shubin testified that the analysis he performed for this case was the same that he would perform for a client, but in actually less detail. He cites one case that says you have to interpret the plain meaning of an easement -- of restriction document on a piece of property. I think the Court is capable of analyzing any legal issues that it needs to, but I certainly think the plain meaning of an easement on a piece of property is certainly within the Court's ability, and, in fact, is the Court's responsibility.

So he's a hundred percent an expert on legal analysis of an easement on the property in Doral. It is not a specialized area. It is not an area that is beyond the pen of the Court. It is a waste of our time. He can -- his analysis can be incorporated into the briefs that the defendants prepare. They can have him, I don't know, try to file an amicus, but it is not appropriate for expert testimony.

THE COURT: No more argument, but, I want to ask, if I would allow him to testify in some limited capacity, when would he do so and for how long?

MR. KISE: I think he is on the schedule for

\section*{Proceedings}

Page 5844
Tuesday. And it probably would not take half a day. I mean not a long --

MR. WALLACE: Half a day?
MR. KISE: I don't think it's a lengthy
examination, depending on what they have on cross. It's pretty abbreviated.

THE COURT: Although, I have already ruled, twice, that expert testimony on the law is not allowed, and defendants' Counsel have acknowledged this solid rule, I will allow Mr. Shubin to testify as to his expert opinion about the arguably complex interrelationships, well described by Mr. Kise, between and the practical meaning of the various deeds, covenants, restrictions, easements, zoning rules and local and state statutes, et cetera, governing use of the Mar-a-Lago property. Although, I will not allow his opinion on the law. I will do my best to draw the line between what is practical and business experience and what is a legal conclusion.

So consistent with what both sides said, if the AG wants to object that something is just a pure question of law, I will allow it.

THE COURT REPORTER: Im sorry, Judge, "If the AG wants to object that something is just a pure question of law..." did you say, "I will allow it"?

THE COURT: I will allow him to testify subject to
the limitations I've just indicated.
(Continued on the next page.)
Proceedings Page 5846

THE COURT: Okay. So, motion granted only to the extent --

MR. WALLACE: Motion is denied I thought? Our motion was to preclude Mr. Shubin, I believe. It has been denied.

THE COURT: I am precluding him from testifying as to certain areas.

MR. WALLACE: I'll move on to Mr. Moens, although it seems like anything an expert wants to say is going to at least be heard.

Mr. Moens, in particular, provides no formal basis. He is an ipse dixit expert. He has said his calculations cannot be recreated. He says that he used his gut feeling; that he didn't verify information; that it would not be possible for another person to reproduce his analysis. His testimony stated that he did not, his testimony did not depend on whether the property could be used as a private residence, only a social a club. A fact which this Court has already found.

He has stated that he has not reviewed any of the data showing how Mr. Trump actually prepared his valuation of the Statements of Financial Condition, so he is offering nothing that is relevant to the Court's analysis of whether what the Trump Organization did contemporaneously throughout the Statements of Financial

1 Condition was accurate. He literally said that he came up 2 with the price for Mar-a-Lago based on a fantasy list that included, quote, "anyone from Elon Musk to Bill Gates and everyone in-between, kings, emperors and heads of state." He is purely just offering an opinion with no re-creatable process, no re-creatable values.

The defendants take the position that he is not bound by Frye because he is offering just is professional experience. He is extremely different from a doctor talking about how he would conduct a surgery. He is providing a valuation advice.

And I believe is our case, The Matter of New York Central, it is 106 AD3d 1152, struck an expert on valuation who was, in fact, an appraiser who could not disclose facts, figures or calculations underlying his determinations. That is Mr. Moens to a tee. There are no facts. There are no figures. There is no re-creatable process. He is a real estate broker, friendly with Donald Trump, who is going to come in and say I think it is worth 1.5 billion with no analysis that can be recreated or tested.

THE COURT: Mr. Kise?
MR. KISE: So, I don't know where to begin.
I think the government raises two separate questions.

THE COURT: I am not sure the microphone is picking you up.

MR. KISE: Sorry, Judge.
First of all, the government raises two separate questions. One, whether the Frye analysis applies. And two, some form of Mr. Moens isn't qualified. I don't hear him saying that, but that to me is built into their analysis.

So with respect to the first, and we cite this in our cases. The Oddone case and the Wernick case. As well as the Guide to New York Evidence. Frye requires an expert witness to demonstrate that the theory or opinion he or she is espousing follows generally accepted principles and methodologies only where such testimony is not based on the witness's personal training and experience.

And so it is very clear that where a witness is testifying based on their experiences, their personal training and knowledge and experience, that Frye doesn't necessarily apply. He doesn't have to have a re-creatable process. In fact, what makes Mr. Moens successful, is that other people can't recreate his process. And you will hear him testify to that. To say that an individual, who has been in the real estate industry, the preeminent broker in Palm Beach, who has been doing this for 40-plus

1 years and closed billions of dollars of transactions in

Again, it is a bench trial. The Court can weigh it and determine it. If they want to challenge the credibility of Mr. Moens and the foundation for his opinion or whether or not it squares with someone else, someone else's opinion or an appraised opinion, that's fine.

Also importantly, Judge, ASC 274, which you know I like to talk about, ASC 274, it expressly provides for reliance on this type of information. As we cite in papers, ASC 274-10-55-6, provides specifically that information of this kind, estimates of selling prices and selling costs obtained from independent real estate agents or brokers familiar with similar properties in similar locations; estimated current values based on sales of similar property in similar circumstances. That's what Mr. Moens is going to testify about. He is going to testify about sales with similar properties and similar circumstances.

As to the point about valuation, and he is not going back to what we did before, well, none of us are really doing that. We are all looking here in 2023 with the benefit of hindsight. We are all backward looking. And so Mr. Moens is providing his view of the market. A market that he has been in. That he has been fully immersed in for 40-plus years.

And so there is no basis to exclude his testimony simply because he doesn't meet the Frye standard. He is certainly qualified.

Mr. Robert may have more CPLR based analysis than me. But, issues relevant to his qualifications and competency aren't -- I just don't think that there is a plausible basis to argue that he isn't, given his vast experience.

We have a right to present a complete defense and the denial of critical expert testimony is, as Your Honor I think has recognized when you have said it over and over again, a fundamental basis for reversal.

You can accord whatever weight that you deem appropriate to the testimony. And any purported lack of experience or any purported lack of merit of his opinions can be well brought out on cross examination. But none of that rises to the level of excluding Mr. Moens testimony.

He is an expert in this industry. And I think Your Honor will be very satisfied that he has the requisite qualifications.

MR. ROBERT: If I may briefly, Your Honor?
And I think Mr. Kise is learning the CPLR just great. So that's actually not what I am going to talk about for the moment.

Mr. Moens qualifications are world renowned, and

\section*{Proceedings}

Page 5852
you will see. I just want to talk about a factual issue. In the government's own case when they called Mr. McArdle to the stand from Cushman \& Wakefield, one of the things they asked him about is to how he valued certain property. And he talked about bringing in a local expert to help him value property. And it is at page 1986 of the trial transcript, line nine to line 16 :
"QUESTION: Who was that expert?
"ANSWER: The local expert was, I selected, was a gentleman named David Turner from a highly regarded large residential brokerage firm in the Westchester area called Houlihan Lawrence. So David was one of the top producers in the luxury marketplace that would include home sales and land. I approached him and asked him if he would be interested in helping me with my understanding of land values in Bedford, and he quickly agreed.

So, their own witness affirms the fact that local real estate brokers who are highly qualified and top producers, and it is beyond any dispute that Mr. Moens is a top producer and he works in the luxury marketplace, and Palm Beach is his specialized area, that he could certainly provide information that would be relevant and information that would be necessary for this Court to hear.

Thank you, sir.
Page 5853
THE COURT: Thanks.
Mr. Kise, when this trial is over, not until
then, but when it is over, I will accept an offer to
condense everything you ever write or say.
MR. KISE: Most people that know me would.
THE COURT: You should follow your buddy there
THE COURT: Of course, in a second.
Let me try to condense things right now. Okay?
So, am I correct, and there are a lot of
point.
MR. WALLA left, Mr. Robert. He is very succinct and to the
witnesses here, this potential expert witness is going to
basically come in and say, I am an expert, and I can,
based on my experience, and I'll tell you what the
property is worth, I'll opine what the property is worth.
MR. KISE: Loosely speaking, I think that's

> THE COURT: Thanks. Mr. Kise, when this trial is over, not until then, but when it is over, I will accept an offer to condense everything you ever write or say. MR. KISE: Most people that know me would. THE COURT: You should follow your buddy there on your left, Mr. Robert. He is very succinct and to the point. MR. WALLACE: Can I be heard on one point? THE COURT: Of course, in a second. Let me try to condense things right now. Okay? So, am I correct, and there are a lot of witnesses here, this potential expert witness is going to basically come in and say, I am an expert, and I can, based on my experience, and I'll tell you what the property is worth, I'll opine what the property is worth. MR. KISE: Loosely speaking, I think that's right. Loosely speaking, yes. THE COURT: Mr. Wallace, any quick response? MR. You write that: It is well settled that where an expert's ultimate assertions are speculative or unsupported by any evidentiary foundation, however, the
\begin{tabular}{|cc} 
Proceedings & Page 5854 \\
\(\mathbf{1}\) & opinion should be given no probative force and is \\
\(\mathbf{2}\) & insufficient to withstand summary judgment. \\
\(\mathbf{3}\) & You have already decided the issue of whether \\
\(\mathbf{4}\) & the easement donations and the easement deeds restrict the \\
5 & use of the Mar-a-Lago property. The defendants rare now \\
6 & proposing to spend a full trial day valuing, establishing \\
7 & that, in fact, you are wrong, and the easement does not \\
8 & restrict the use of the Mar-a-Lago property. And that in \\
9 & turn, it should be valued at \$1 billion because Elon Musk \\
10 & might want to move to Palm Beach. That will be a full day \\
11 & of this trial. \\
12 & THE COURT: And that's what we are going to do. \\
13 & Motion to preclude denied. \\
14 & And if I am being inconsistent -- what is it? A \\
15 & foolish consistency is the hobgoblin of little minds. \\
16 & Let him testify. It seems sort of \\
17 & straightforward. \\
18 & Any other housekeeping or motions? \\
19 & MR. KISE: We wanted to address briefly the \\
20 & Judge Jones testimony you asked us -- I don't think you \\
21 & asked us, you allowed us. \\
22 & THE COURT: That's a more accurate word. \\
23 & MR. KISE: That's a better statement. \\
\hline 24 & THE COURT: I read some or all of your \\
25 & submissions on this issue; and the others to a certain
\end{tabular}

1 extent.
So, go ahead. And you know I am very reluctant to allow this. But make your best case.

MR. KISE: But I think that we have to start from the foundational premise. The foundation premises is the public has a right to everyman's evidence. We didn't cite this in our papers but Branzburg v Hayes 408 US 665. A Supreme Court of the United States case which stands for a fundamental foundational proposition that we are entitled to evidence unless there is some constitutional or privilege, you know, some reason to exclude.

None of that applies here. All adults are competent to testify. The evidence is highly relevant and probative. Under the CPLR, material and necessary as used in section 3101 must be interpreted liberally to require disclosure.

THE COURT: Mr. Robert probably gave that to you.

MR. KISE: He did, as a matter of fact.
And we have cited cases on this. Judge Jones can certainly testify as to the specific issues addressed in her reports, her observations and conclusions to date as to the defendant's business practices, accounting, compliance practices, et cetera, are extremely probative, we would submit, to certainly the issue of the need for
ongoing injunctive relief and the scope of any such relief.

And the reports, respectfully, are hearsay. And so to the extent that the Court has or intends to rely on the reports, then, as with all hearsay, this isn't a situation, respectfully, where we are talking about the interpretation of a contract or a legal document. It is an interpretation of a factual record. And the witness is readily available. There has already been disputes between the parties as to what these various reports mean. And so we should be entitled to at least the benefit of having Judge Jones here to respond to those questions about any ambiguities that might exist in her reports.

So, for those reasons and the reasons stated, in the interest of brevity, for those reasons and the reasons stated in our papers, we think Judge Jones can and should be called as a witness.

THE COURT: Time goes fast when you are having a good time.

MR. AMER: If I may be heard on this?
THE COURT: Sure, Mr. Amer.
MR. AMER: So the challenge that the Court laid down was to have defendants find a case that said that the court-appointed monitor can be compelled to testify. I don't believe they found such a case in their letter.

And certainly this Court has broad discretion when looking at relevance and prejudice. And of course Your Honor already identified one point of prejudice, which is a potential conflict that could arise.

But we actually have found cases that go the opposite way of your request to defendants that demonstrate that a court-appointed monitor cannot be compelled to testify. And there is really two bases in these cases, and it all comes down to immunity.

New York State recognizes the Doctrine of Judicial Immunity extends to non-Judges in the cloak of quasi judicial immunity where they perform discretionary acts of a judicial nature. And in the Clapper v Guria case 153 Misc2d 726. That's a 1992 New York County Supreme Court decision. The State defendants on behalf of the disciplinary committee performed a judicial function in their investigation of plaintiff's alleged misconduct and commencement of the petition. And in this case the Court recognized that the defendants there were cloaked with quasi judicial immunity.

It has also been recognized in the decision Pertilla v Genetic Design Inc., that's 166 Misc2d 843. Generally the doctrine of judicial immunity extends to those parties acting in a quasi judicial capacity in the course of their performance of court-appointed duties.
subpoena was served on our office, Office of the Attorney General, where we were a non-party in a 1983 case. And the Court held that that subpoena was invalid and struck the subpoena because our office enjoyed sovereign immunity. And the same holds here. Any effort to subpoena Judge Jones in her role as a court-appointed monitor, and therefore an arm of the state, would not be valid because of sovereign immunity. And so, because she is immune from process, that would be a subpoena to compel her to come here to testify. The defendants request to compel her should not be allowed.

THE COURT: Very quick reply, partly because we are running out of time.

MR. KISE: Yes, Your Honor.
First of all, a monitor is not --
Well, let me start with, you asked us to come up with a case that said the monitor is subject to testimony. Yes. Branzburg v Hayes, we are entitled to everyman's evidence --

THE COURT: That doesn't do it. Come on. MR. KISE: No, it isn't. It isn't. There are only 17 cases in the system that can be located that even use the word monitor. And five of the references in the case law are to this case. So that only leaves like 12 others.
\begin{tabular}{|c|c|}
\hline & gs Page 5858 \\
\hline 1 & THE COURT: But wait a minute. Immunity from \\
\hline 2 & what? Is this -- \\
\hline 3 & MR. AMER: My next case. \\
\hline 4 & THE COURT: Okay. \\
\hline 5 & MR. AMER: Just to finish quoting from Pertilla: \\
\hline 6 & This privilege is based upon the public policy that expert \\
\hline 7 & witnesses must being encouraged to perform public services \\
\hline 8 & ithout fear of harassment or threat of litigation. \\
\hline 9 & And then finally the First Department, to \\
\hline 10 & address Your Honor's point in Alvarez v Schneider that's \\
\hline 11 & 264 AD2d 27 at page 34, noted that: As with other forms \\
\hline 12 & of immunity, judicial immunity is an immunity from suit, \\
\hline 13 & not just from ultimate assessment of damages. And suit is \\
\hline 14 & recognized as a judicial proceeding that compels someone \\
\hline 15 & to act or refrain from acting. So the act of compelling \\
\hline 16 & Judge Jones to come to this court and testify would be a \\
\hline 17 & suit within the meaning of these immunity doctrines. \\
\hline 18 & Then there is a second separate immunity that \\
\hline 19 & applies here, Your Honor. And that's sovereign immunity. \\
\hline 20 & Judge Jones, because she is an arm of this Court, is a \\
\hline 21 & state actor who is entitled to broad state sovereign \\
\hline 22 & immunity. State immunity applies to both states and their \\
\hline 23 & agents. And she would be an agent of the state. Recently \\
\hline 24 & in an Eastern District decision by Magistrate Judge Lock. \\
\hline 25 & It is Felix v County of Nassau, 2023 Westlaw 5978189, \\
\hline
\end{tabular}

The Court itself, this Court itself drew a distinction between a monitor, which is undefined, and a receiver, which is defined as an arm of the court, specifically in its order. And we cite that in the November 3, 2022 decision, where you state that they, in fact, perform two different functions. And that a limited function of a monitor is entirely different from the functions of a receiver. So the receiver case law and the case law that applies to immunity is inapposite here.

Even if a receiver were an arm of the court, we cited the Court the cases, the Continental case, the Urinski case, and other cases where receivers have been called to testify. As I mentioned to the Court last week, in the bankruptcy and other context, SEC context, they are called frequently to testify. And the notion that a monitor in this context enjoys some broad sovereign immunity, I don't think that enjoys any support in the case law.

For those reasons and the reasons in our papers, we think she is a qualified witness that should be called.

THE COURT: Just putting my thoughts together here quickly.
(Pause in the proceeding)
THE COURT: The request to subpoena Judge Jones is denied.

\section*{Proceedings}

Page 5861

1
2

First of all, as has already come up, there is no authority for subpoenaing a monitor to testify. And I'll just use the word "monitor" as opposed to "independent monitor." I don't think there is a difference in this case.

Secondly, as argued by Mr. Amer, I think it would be a dangerous infringement on court immunity and prerogatives.

Third of all, I basically appointed her to assist me in making sure that everything was correct -- I will use that bland word -- in the defendant's business practices or documents. I appointed her to assist me. What she has -- her reports have already generated all sorts of criticisms, I assume that will continue, or at least commentary. The post-trial briefs can discuss whatever they want about those reports.

I am not afraid go out on a limb, but I am not going to be the first Judge to say that a monitor can be subpoenaed.

And by the way, my research assistant, who is sitting alongside me, claims to have found 472 cases, state and federal, just searching for the character string "independent monitor." So, not that this is dispositive, but there seems to be dispute about how many cases there are that talk about independent monitors.

And that's the ruling.
Any other business we can finish today?
Have a great weekend everybody.
MR. ROBERT: Thank you, Your Honor.
THE COURT: See you Monday at 10:00 as usual. MR. KISE: Yes, Your Honor.
THE COURT: I would admonish the witness but there is no witness to admonish.
(Whereupon, the trial stood adjourned to Monday December 4, 2023 at 10:00 a.m.)

New York, New York 10007
BLE ARTHUR S. ENGGORON,

```
16

THE COURT: Good morning, everyone.
Defendants, would you like to call your next witness?

MR. FIELDS: Good morning, your Honor.
THE COURT: Good morning, Mr. Fields.
MR. FIELDS: The Defendants call Frederick Chin.
FREDRICK CHIN, called as a witness, having been first duly sworn by the Clerk of the Court, was examined and testified as follows:

THE COURT OFFICER: Please state your name and either home or business address for the record.

THE WITNESS: Frederick Elliott Chin.
I reside at 16046 North 113th Way, Scottsdale, Arizona.

THE COURT: Mr. Fields, please proceed.
MR. FIELDS: Thank you.

\section*{DIRECT EXAMINATION}

BY MR. FIELDS:
Q Good morning, Mr. Chin.
Could you please state your education background after high school?
A Certainly. I attended the University of Arizona, and graduated in 1984 with a bachelor's in a concentration of finance and in real estate.

Q And moving on to your professional background, where

Chin-Defendant Direct-by Mr. Fields-
Page 5866
did you begin your professional career?
A My career began in Tucson, Arizona, with a firm called
Solot \& Associates in 1979. I was a real estate researcher and essentially an apprentice appraiser.
Q Were what were some of your responsibilities at Solot \& Associates?

A I would do title searchs. I would measure properties when we were valuing real estate. I would gather sales information and later then perform the valuation of various types of property.

Q And about how long were you there?
A From 1979 until 1981.
Q Where did you go next?
A In 1981 I left with one of the gentleman from Solot and he formed a company called Greenberg Consultants. We were a real estate appraisal and market research firm.

Q What were some of your responsibilities at Greenberg?
A My responsibilities continued. I was a real estate, continued as real estate appraiser. I was also responsible for reviewing the reports of others that were members or employees of the firm.

So between 1981 and through 1984 the firm grew considerably. I became a named partner in 1984 and we had, I believe, six appraisers that were performing all sorts of real estate valuations and I was responsible for, if you will,
quality control of reviewing those appraisals as well as performing my own appraisals.

Q Approximately how many appraisals did you perform with Greenberg, do you have any idea?
A Probably a few thousand.
Q All right. And do you have a general sense of when you left Greenberg, approximately?

A Yes, it was, I believe, it was in 1988.
\(Q\) And where did you go next?
A I moved to Los Angeles to work at Kenneth Leventhal \& Company.

Q And what was Kenneth Leventhal \& Company?
A At the time part of the Big Ten accounting firms in the country. Kenneth Leventhal was very different, it provided accounting, tax and consulting services specifically for the real estate industry.

Q All right. I think your testimony was that while you were at Greenberg you had been a partner. Why did you choose to leave your partnership and go to Kenneth Leventhal?

A For me, I wanted to expand my use and application of real estate appraisals tools that I had. So while I had the real estate appraisal tools, I always believed they could be used in different capacities.

So my perspective is that real estate valuation is a tool that is used in many different regards and I needed a
-F. Chin-Defendant Direct-by Mr. Fields-
Page 5868
larger platform to use my tools in different regards and the accounting firm environment, particularly with a firm that specialized in real estate, I believe I would be able to expand my use of those tools.
Q How did you use the tools, to borrow your phrase, at Kenneth Leventhal?
A They were used in many different regards. So I was brought in and Kenneth Leventhal had somewhat of a unique operating style unlike the other Big Four firms. Usually, meetings would involve an audit tax and consulting partner, I would be considered consulting person and decisions would be made in that context. Because if a valuation or real estate analysis was done it had impacts on how a structure might be or transaction might be structured and what the tax impacts might be and what the resulting accounting impacts would be.

So I was the real estate side of that evaluation and analysis. And it afforded me the ability to work on many different things that were well outside the appraisal realm. Instead of doing single asset properties, I was advising and part of the team that was working on tax respinoffs of companies, divestitures, restructurings of debt and restructurings of company, the dispositions of portfolios and assets.

So I was part of that team and that gave me a much broader perspective than doing single asset individual property

Page 5869

\section*{appraisals.}

Q Did you have some exposure to financial statements while at Kenneth Leventhal?

A Yes.
Q And to what extent?
A The firm often did Statements of Financial Condition for various of its clients. I was usually asked by an accounting partner to meet with the client, talk about their real estate holdings and talk about what they might be doing with their real estate and then provide feedback to the accounting people who would then use that however they might in their accounting reports.

Q At some point did Kenneth Leventhal merge with another entity?

A Yes, they did.
Q What entity was that?
A That was Ernst \& Young.
Q Did you remain employed by Ernst \& Young after the merger?

A Yes.
Q In what capacity?
A I was a partner at Ernst \& Young when we had merged into Ernst \& Young.

Q So you would have been a partner at Ernst \& Young after the merger?

Chin-Defendant Direct-by Mr. Fields-
Page 5870
A Yes.
2

Q Do you have to be an accountant or CPA to be partner at an accounting firm?
A No. Ernst \& Young had many partners. There were non accountants. The accounting firms were broadening their business scope into, a lot time at that time was information technology consulting, real estate consulting and all sorts of process improvement, performance improvement initiatives that were undertaken by accounting firms. They admitted a lot of nonCPA partners and I was among one of them.

THE COURT: Just a moment. The question was do you have to be accountant to be partner at Ernst \& Young? If there's yes or no question, please just answer it yes or no.

THE WITNESS: My apologies, your Honor.
THE COURT: Okay. It takes a lot to get the hang of this.

THE WITNESS: Thank you.
Q How, if at all, did your responsibilities change in terms of your work after the merger?
A I took on many managerial roles. Mainly, I was still based in the Los Angeles office and that was the largest real estate consulting office of Ernst \& Young. The reason why Kenneth Leventhal Group was a specialty group in Ernst \& Young. At that time I oversaw a department of 75 people including eight partners. We provided all sorts of services,
including the birth, if you will, have residential
mortgage-backed securities, restructuring, capital formation, capital access for real estate clients, repositioning and process improvement type of services all were within that domain conducted out of the Los Angeles office and I offer saw those activities.
Q Did you ever testify as an expert during your time at Ernst \& Young?
A Yes.
Q About how many times and what subject matters?
A My testimony was all real estate based. So relating to real estate valuation, damages, contract disputes, inverse condemnation, regular condemnation situations and \(I\) actually was a subject matter expert for real estate nationally as well as lead their real estate litigation practice while at Ernst \& Young.
Q Do you have a sense for approximately how many times you testified as an expert while you were at E\&Y?
A It was over 25 times.
Q What were some of the more notable cases that you testified as an expert about while at Ernst \& Young?
A A few notable ones. I was involved in a dispute involving the Mall of America, it was the largest mall in Minnesota. There was a dispute between the partners and I was brought in to testify on that regard.
-F. Chin-Defendant Direct-by Mr. Fields-
Page 5872
Another situation notable in my career, I was the expert witness involving the State of Arizona condemnation of land through a master plan community. It was the states's largest condemnation matter, the damage claim was over \(\$ 100\) million. This is going back to the early 90 's. The property owner had claimed that the properties were damaged because of the construction of the roadway improvements.

I was representing the State and their Attorney General rendered the opinion that there was no damage to these particular properties partly because the highest and best use of those properties hadn't changed as well as the acceleration of demand that would occur as a result of the construction of those improvements. It was a jury trial. And I had rendered basically no damage other than the physical land being taken. But there was no extenuating damages and the jury ruled at my opinion.

Lastly, another notable one was, which was the -- in Los Angeles was the Mid-Wilshire construction of an underground subway. There was -- the Metropolitan Transit Authority was in the process of constructing an underground subway underneath Wilshire Boulevard. All the property owners who had not had their properties condemned filed an inverse condemnation action against the MTA that their property values had diminished. Because of that subway construction even though their properties were not physically taken.
-F. Chin-Defendant Direct-by Mr. Fields-
Page 5873
-F. Chin-Defendant Direct-by Mr. Fields-
Page 5874
fees payable to those operating partners were triggered by appraisal values. I did that for several years, every quarter reviewing appraisals performed by others of properties that were held by Calpers.

Another notable one I was involved in, purchase price allocation of Pebble Beach, which was home of the U.S. Open. But there was a group of investors, Peter Ueberroth and Clint Eastwood who had purchased Pebble Beach in 1989 for 800-something million dollars. As part of normal subsequent acquisition purposes, usually the purchase prices are allocated for tax purposes because there's, my understanding, brief understanding there's different tax treatments for different allocations of property.

So I was involved in the purchase price allocation involving Pebble Beach.

Q To be clear, when you say Pebble Beach, are you referring to series of golf courses on the northern coast of California?

A Yes, there are several golf courses. The most iconic being Pebble Beach, but there's Spyglass, and a public one, Monterey Golf Course as well.

Q While you were at Ernst \& Young, were you also involved with the valuations of other golf courses other than Pebble Beach?

A Yes. I have appraised and also been a part of a team
F. Chin-Defendant Direct-by Mr. Fields- Page 5875
involving many golf courses on the Kohala Coast, K-O-H-A-L-A, that were proposed for construction. There was several resort hotels. We did the valuation work on the hotels as well as the golf courses there.

There was a major acquisition in the Palm Desert area, PGA West in La Quinta that was acquired in the early '90s for 250 million plus. I was involved in the valuation of that golf course.

I've done quite a bit of golf course work over my career. I have advised National Golf Investors, I forget, they owned a portfolio of municipal golf courses, probably 100 of them. I was consulting with them on ground rent payments and how to restructure some of their obligations to improve their profitability.
Q Why -- did you leave Ernst \& Young at some point?
A I did.
Q Why?
A I left in 1995. What was happening at that time, there was a federal regulation, Sarbanes Oxley, S-A-R-B-A-N-E-S O-X-L-E-Y, that came into law which effectively limited the amount of work other non-accounting work that accounting firms were doing.

Ernst \& Young was very concerned about Sarbanes-Oxley. And all the consulting businesses like information technology, management consulting, process improvement, many of the ones I

Page 5876
mentioned, including real estate became under fire. I think Ernst \& Young was very concerned about that.

So at that time I was doing quite a bit of real estate litigation work. I think the pinnacle for me was I was going to be the expert on the World Trade Center one-occurrence two-occurrence situation. I had developed a damage theory regarding the two occurrences.

As we normally do before we accept litigation assignments, we run a conflict check sadly, Ernst \& Young audits most of the reinsurers that were insuring the loss and said there's no way you could do this.

I had repeatedly run into situations where the conflict of interest was precluding my ability to do litigation work.

In the context of expert witness litigation work it is usually the individual that gets hired and then the firm comes along with it. And that was probably the final straw that caused me to leave.
Q Where did you go next?
A After that, and actually prior to that I was consulting with a private home builder and land developer in Las Vegas. I had approached the subject of actually being on the other side of the table, being on the operating side instead of the consulting side and I joined him as chief operating officer.

He had large growth plans, a lack of liquidity and needed access to additional dollars to fund his growth plans.
-F. Chin-Defendant Direct-by Mr. Fields-
Page 5877
So I believed I could help him in that regard and I joined him, which was called Sagebrush Enterprises, which, at the time was a home builder locally known as Rhodes Homes.

Q What was your involvement -- what were your roles at Sagebrush and what did those roles entail?

A My role was to help him improve his liquidity so that he could actually realize his growth plans. He had considerable land Holdings, so he was land rich and cash poor.

In order to do so, it involved essentially a revamping of his entire organization. I had to recruit and bring in several experts in various departments. So land development, we needed much more discipline with respect to how the business was being operated. So my involvement there helped actively recruit some key people that started to build the organization.

Concurrently with that, I sought to seek liquidity for the company and located the source that would provide secured financing to the company. And started the process of essentially preparing the company and then executing raising capital for the company.

We put a credit facility together of about
\(\$ 525\) million. It was reviewed by the RAID agencies. I made all the presentations to the raid agencies, formulated -- it was in front of the RAID agencies and other investors who were funding this 525 million.

It was a significant key to the success of the

Chin-Defendant Direct-by Mr. Fields-
Page 5878
organization because at the time the company had no more than \(\$ 10\) million of liquidity and lots of land holdings so now the land holdings and capital that was available was more in balance so that we could achieve the growth plans.

Subsequent to that, I then tried to acquire on behalf of the company a private, publicly registered privately traded company in Albuquerque, New Mexico, which had owned 54000 acres of land. I had essentially secured the right to acquire that on behalf of the company.

As part of that, I raised a 250 or \(\$ 275\) million credit facility to support that. That transaction did not go through. We were overbid at the final curtain and did not complete that transaction.

Q What were your actual titles at -- withdraw that.
I think you said this company that you were with was called Sagebrush Enterprises?

A Yes, that was the parent company.
Q What were your titles while there?
A I was the originally hired as the COO and then ultimately became the CEO of Sagebrush.

Q And after Sagebrush did you stay in the Las Vegas area?
A I did, yes.
Q What was your next stop for employment?
A I was -- so I left Sagebrush after I thought I had 25 completed what I needed to do. I was named as Chief

Restructuring Officer of Lake at Las Vegas Companies.
Lake of Las Vegas Companies was the owner of a 3600 acre master plan community that included three existing golf courses and two planned golf courses, built around a manmade 320 acre lake that had entitlement to construct up to 5000 residential units.

There was a default by the borrower of, I believe, \(\$ 500\) million credit facility and as part of the forbearance the lender group nominated me to oversee the activities of the borrower until the time -- at which time the Borrower was going to repay the entire debt, but I was reporting to the lender group with respect to the activities, the obligations, the situation operating-wise and otherwise that I saw at Lake at Las Vegas.
Q So you began as chief restructuring officer, did you hold any other titles at Lake at Las Vegas?
A Yes. So in October I was appointed CRO on January 2nd because the borrower failed to repay the loan. The lender group appointed me as the new owner of Lake at Las Vegas and I became the CEO of Lake at Las Vegas Company to evaluate the company, to essentially run and improve it and to handle all the operations which included the golf courses.

It also included a Ritz Carlton Hotel which we had owned as well as all the land development activities.
Q How much debt existed at this time on this property?

A I think all total it was over 600-something million. There was debt against the Ritz Carlton Hotel separately and then debt against the land holdings, golf courses and operating businesses of Lake at Las Vegas.
Q Shifting gears a little bit into your next stop. Where did you work at Lake at Las Vegas?
A So after Lake at Las Vegas, I went to Los Angels and became the chief operating officer of MPG Office Trust. We had gotten Lake at Las Vegas out of bankruptcy, so before, when I took over the ownership my recommendation was to file Chapter 11 and clean it through, to clean the company and exit bankruptcy.

Then I went to MPG Office. They had a significant liquidity problem and a balance, too much debt against assets. MR. AMER: Could we get a year, I lost track of the time.
Q When did you leave Lake at Las Vegas?
A 2010.
Q And you mentioned you started with the MPG Office Trust, would that have been in 2010, give or take?

A Yes.
Q And approximately how long were you with the MPG Office Trust?

A Until 2013.
Q So what is the MPG Office Trust?
A MPG Office was a publicly traded real estate investment
trust also known as a REIT. They owned approximately 16 million square feet of commercial office buildings, hotels and some retail. And it was a largest holdings in Southern California of an office REIT and besides that, they own most of the high rises in downtown Los Angels. They had approximately a 40 percent market share of high quality of office space in downtown Los Angels.
(Whereupon, Cheryl-Lee Lorient relieved Deborah
Rothrock as the official court reporter.)
(Continued on next page.)

\section*{CROSS EXAMINATION}

\section*{BY MR. FIELDS:}
Q. What was your title at MPG?
A. It was Chief Operating Officer.
Q. What were some of your responsibilities as COO ?
A. I was responsible and co-worked with the CEO to improve the liquidity of the company and, essentially, deleverage the balance sheet and prepare it for either a sale or continued operations.
Q. Did you become involved with a merger while at MPG?
A. Yes. It was one of the exit plans that we had discussed with the Board of Directors. And they had evaluated options and believed that a merger, after the company had been cleaned up -- we spent many years cleaning it up to prepare it for merger.
Q. Who was the merger with?
A. It was with Brooksfield Properties.
Q. And what were your responsibilities relative to that merger?
A. I was, eminently, involved in most of the aspects of that merger. So I prepared the company for sale; so for gathering all necessary documents so that due diligence could be performed on the portfolio.

We went through all of the systems, all the
people, all of the processes to, basically, display the story of what MPG was and what the opportunity was.

We went through every lease -- so, there was over
five hundred leases -- to make sure that all the information
was input correctly and that people could do their own projections and forecasts.

I worked on the investment memorandum that was sent. I did property tours with potential investors or buyers of the company, answered and fielded many questions that they had during their due diligence periods. And then, the merger was effective. There was lots of legal documents that I helped get completed.

And then, post merger, I was involved in the handoff of making sure that the systems and all of the things that we knew about our company were transferred to Brookfield efficiently.
Q. How, if at all, did you utilize appraisal information while you were at MPG?
A. We had gotten appraisals on some of our properties. Because, as I mentioned, a lot of our properties were over-leveraged.

We did have appraisal information that was either required by potential buyers -- as we did try to and we did sell several of our assets.

And appraisal information was oftentimes required

Page 5884
by the buyers or it was something that somebody wanted to see how much they might be able to borrow against a piece of property.
Q. Did you find that the appraisal information that you received was always indicative of the selling price of a particular asset?

MR. AMER: Objection, leading.
THE COURT: Sustained.

\section*{Q. How were appraisals -Withdrawn.}

How did you use appraisals in determining what the potential selling price of an asset would be?
A. I, actually, didn't. We had appraisal
information. I found from the instances we had appraisal information, it was grossly inaccurate.
Q. Are there any examples that come to mind?
A. I do.
Q. What examples?
A. We had an office building in Pasadena called Plaza Los Fuentes. It was a multi-tenant office building. I looked at the valuation. I thought it was, probably, worth around \(\$ 60\) million. We had it appraised by a national appraisal firm. They appraised the property for about 33 million. We took it to market, shortly after we got the appraisal, and we sold the property for 75 million.
Q. And you said, shortly after you got the appraisal, about how much time from the time you received the appraisal to when you, actually, sold the property, could you estimate?
A. It was, probably, within three months.
Q. Were there any other examples?
A. Yes. Two others come to mind. We had another office building. We, internally, valued it for, approximately, 110 million. Appraisals were about 80 or 90 million. And the property ended up transacting at 150 million.

All within the same time period. Usually, the appraisals were a condition of some pre-losing requirements that the buyer had wanted.

Most notably, we had U.S. Bank Tower, which, at the time, was the largest, tallest building west of the Mississippi. It was a 73 -story highrise structure; a very iconic structure for downtown LA.

There again, we had, we thought, lots of value. Appraisers did not think so. But, we, internally, valued it at somewhere around 300 million. The appraisal numbers came in about 250 . And we sold the property for \(\$ 367\) million.

So, we -- I've had many arguments with appraisers. They were very adamant that their values were right. And I believe the market test, when you put it out there, is the
F. Chin - Defendant - Direct/Mr.Fields

Page 5886
best demonstration of value.
Q. All right. So, we talked about the merger with Brooksfield.

\section*{When did you leave your MPG?}
A. In 2013 .
Q. What was your next -- where were you employed next?
A. I had my own company called CPG Advisors. Actually, I created it before MPG but, I was pretty much full-time. It was my own business. And, I started doing consulting work under that tent.
Q. What kind of consulting work did CPG do?
A. It was general real estate advisory. It varied. I looked at site selection for Sonic Restaurants.

I did an evaluation involving environmental contamination of a property in Northern California. I looked at the damages on that.

I also was involved in the city of Stockton bankruptcy. So it was a Chapter 9 bankruptcy. So I was a valuation expert on three golf courses that secured a loan that Franklin Templeton made. They were municipal golf courses.

There was a valuation dispute. The city's appraiser had valued these municipal golf courses, essentially, at zero or maybe it was \(\$ 100,000\). My opinion

\section*{was, I believe, right around \(\$ 5\) million.}

And, there was a valuation testimony a valuation, if you will, fight. And, it ended up that the creditor, Franklin Templeton received a claim at my appraised number.
Q. Was that in Federal Bankruptcy Court?
A. Yes.
Q. Were there other instances of expert testimony that you provided during this time at CPG?
A. That was -- there was another one which was a previous of fiduciary duty. One of the partners had sued the owner of a company that was involved in land development across many different states. And, there was a dispute, a valuation dispute. I was named as the expert regarding the valuation and the potential damages.
Q. Where were you employed after CPG?
A. I moved to a company called Province, which was a, generally, creditor advisory firm. They advise companies, creditor committees that are in bankruptcy, as well as just general trustee work so post Chapter 11 liquidating plans usually had a trust and province did quite a bit of trust work.
Q. What was your position and some of your responsibilities while you were there?
A. I was a senior director. I, basically, was
involved in anything that dealt with real estate. So if
there was a financial advisory role Province had that involved real estate, I was involved in that. If there was some general litigation consulting work that was involved in as well at Province.
Q. Did you provide expert testimony while you were at province? And if so, do you recall what the instances were?
A. I didn't, ultimately, provide testimony. But it was involving an involuntary bankruptcy and the appropriateness of that filing. It was involving Master planning --

MR. AMER: Can I just object, your Honor. I
think the answer was no. So, anything beyond that is non-responsive.

THE COURT: Objection, sustained.
THE WITNESS: My apologies, your Honor.
MR. FIELDS: It was a bad question. Don't worry. It is not your fault.
Q. Did you provide or any expert opinion work in instances that did not result in testimony?

\section*{A. Yes.}
Q. Okay. And, what were those?
A. It was involving the involuntarily bankruptcy of a master planning community in Henderson, Nevada.

MR. AMER: Again, can we get a year for when
he went to Providence?

THE COURT: I was wondering myself. When did you go to Providence?
THE WITNESS: 2015.
Q. Do you recall when you left Providence?
A. It was January 2018.
Q. Where did you go next?
A. I was appointed the CEO of Woodbridge Group of Companies.
Q. Who were you appointed by?
A. I was appointed by a reconstituted Board of Directors that was overseeing a company that had just filed Chapter 11.
Q. What did Woodbridge do? Can you describe that a little bit?
A. Well, Woodbridge was involved in many activities; mostly, real estate investment. However, various state and securities exchange commissions had concerns that there was a Ponzi scheme being operated by Woodbridge. It was before my arrival.

As a result of some of that and some liquidity issues, the company filed for bankruptcy in December 2017. The debtor and, alleged, perpetrator of the Ponzi scheme remained in place.

Through the Court hearings, there was actions to, basically, replace him with a Chapter 7 Trustee, which was a
liquidation. The Judge had, basically, authorized a total removal of the debtor, reconstitution of the Board of Directors.

And a new reconstituted Board was put in place. I was interviewed to be the CEO to guide the company through bankruptcy and out of it. And, I was appointed to the CEO position in January of 2018.
Q. What were some of your responsibilities as CEO?
A. Well, besides the normal Chapter 11 responsibilities of providing all the creditor constituency's information about the company, more importantly, there were 200 pieces of real estate that needed to be planned and organized in how they would be disposed of.

And, I was responsible for, essentially, formulating the reorganization plan and more specifically the action plans of how the real estate was going to be handled through the bankruptcy and after.
Q. Could you just, generally, describe what steps you took to determine what to do with these 200 or so assets?
A. Yes. I went through and looked at asset, which were concentrated in Colorado and California. I looked at what their status was. Much of the land was planned for new luxury homes.

And I went through and, essentially, established
business plans for each asset, which was either to sell as is or to develop and construct the home and then sell it later.

And then, not only devise the plan, determine what the economics might be. And then, also to implement the plan. So, have the appropriate staff and organizational structure to support that as well as manage the cost of construction during that process.
Q. What are some of the considerations that you undertook in determining whether to sell an asset as is or to develop it and sell it later?
A. In every situation I looked at what I thought the sale price might be. So I looked at "Is there the appropriateness to sell now and minimize the risk?" Or "Was there a certain amount of risk that could be undertaken that might maximize the recovery to the 9,000 victims of the Ponzi scheme."

So, many cases, I decided that the finished value, minus its cost, would yield much greater that selling the property as is.
Q. What sorts of properties were involved in these 200 or so?
A. The composition included lots, finished lots, that were available for development; land that was entitled for certain construction of larger luxury single family homes

Page 5892
F. Chin - Defendant - Direct/Mr.Fields
and homes that were under construction that were again luxury homes.

Many of the properties, namely about 50, were relocated and concentrated in LA in some of the highest value areas available. So, Bel Air, Beverly Hills, Hollywood Hills, Hidden Hills, all prime locations in the Southern California, Los Angeles area. And, many of the properties were very valuable.

The company had acquired, prior to my arrival, a property that was almost a 100 million dollars in acquisition price.
Q. How was the bankruptcy, ultimately, resolved?
A. So, we existed bankruptcy. We had sold off various assets. The plan that I had designed was a self-funding one. So, it didn't require further risk to the victims of the Ponzi scheme.

And, I managed to, essentially, monetize all its assets. So, I did 125 plus transactions that yielded or grossed about 700 plus million dollars. That was, ultimately, distributed to the trust, which, ultimately, got distributed to the victims of the Ponzi scheme.
Q. Did you continue working there after the conclusion of the bankruptcy?
A. Yes.
Q. In what role?
A. The company exited bankruptcy in --I believe it was 2019. And I continued to operate the company, as a CEO, until I left and finished my job in December of 2022.
Q. And what was your involvement?

From the exit of bankruptcy in 2019 to 2022, what were some of your responsibilities?
A. I was responsible for all the operations of the company. Additionally, we changed from private company to a public reporting company. So we had to deal with all that structure to basically be SEC compliant.

Besides that, it was the normal operations of making sure the homes were constructed in a certain style to maximize value, that we were on time and on budget and then, also negotiating all the transactions involved in the sale of the properties that were available for sale.
Q. Did your experience in the liquidation of the Woodbridge Properties include the sale of a rent stabilized unit?
A. Yes.
Q. And where was this unit?
A. Upper East Side.
Q. Of New York City?
A. New York City. My apologies. Yes.
Q. Did you, ultimately, sell the rent stabilized unit?
F. Chin - Defendant - Direct/Mr.Fields

Page 5894
A. We did.
Q. Do you recall when?
A. I believe it closed earlier this year. It was negotiated during my time at -- when I was a CEO.
Q. How were you able to execute the sale of a rent stabilized unit?
A. Well, leading up to the sale, beforehand, I evaluated our options. So, one was to sell the unit with the tenant in place.

And, we had gotten, essentially, indications of value that with the tenant in place it was worth maybe 150 or \(\$ 200,000\).

The tenant had been there for decades. And, there was indications that they were already planning to transfer it to siblings or others. So there was a concern about how long they may be in place.

At the same time, we looked at the value of the unit as if it was unencumbered. And, that number was well over \(\$ 2\) million. So we had a spread there.

We decided, with the approval of the Board of Directors, to try to buyout the tenant and then, librate the unit so it could be sold in the open market.

After some period of time, we were able to negotiate that. We, basically, negotiated a buyout of the tenant for a little over half a million dollars. We got
full releases. She left the unit. And then, we put the unit on the market.

It was immediately put into escrow. And, we ended up selling that unit for a little less than \(\$ 2\) million. So, our net was, I think, after cost, somewhere around a million three or a million five after the buyout price.

So instead of being realizing what it would have been if we just sold it as is, versus working through that process, and putting a little money into it, we were able to cover, significantly, more.
Q. At the time of the sale, was the unit still encumbered by the rent stabilization?

\section*{A. No.}

MR. AMER: You mean, after the sale closed?
I'm sorry. I didn't understand the question.
Q. Did the new owner of the property have a rent stabled or non-rent stabilized property on their hands?
A. The owner had it free and clear. And, they were going to move in.

MR. AMER: So after the close. I got it.
THE COURT: I'm sorry. Say that again?
MR. AMER: So, after the closing. That's what I understood.

THE COURT: I think we, probably, all
understand there was a buyout and the rent regulated

\section*{Providence again?}
A. I am.
Q. What kind of work are you doing for them now?
A. Province is a financial adviser to one of the creditors. It's involved -- this particular assignment involves a portfolio of real estate. I am the real estate, I guess if you will, expert or adviser regarding how the real estate is handled in the bankruptcy.
Q. All right. Are you involved in the sale process of a portfolio of properties, right now, through your employment with Province?
A. I am.
Q. Is that in bankruptcy?
A. Yes, the company is in bankruptcy.
Q. What's going on with some of those properties right now?
A. Well, this was a closure of a company. I can't discuss what the company is. But, I can give you general description. They are liquidating, approximately, 170 properties across United States.

They, as part of that -- to repay the creditors. And as part of that analysis or part of that liquidation they had gotten appraisals on all 170 assets that are located across almost all 50 states.

The appraisal was done by national firm. That

Page 5896
F. Chin - Defendant - Direct/Mr.Fields
tenant left and then it was an unregulated apartment.
THE WITNESS: Thank you.
Q. Okay. Mr. Chin, just to get my bearings here, I think you said you left Woodbridge in late last year, December of 2022?
A. Correct.
Q. And where did you go next?
A. I went back to my old personal firm CPG Advisors and was going to figure out what the next assignment was going to be.
Q. Is that where you are now?
A. Yes, it is.
Q. In terms of professional employment, not literally where you are right now. But --
A. Yes.
Q. All right. Do you also do some work for Ankura?
A. This assignment. And, I do other work, some work subcontracting work for Ankura.
Q. Just generally, what are some of your responsibilities or tasks you've taken on now with CPG?
A. Ankura had been hired to help a bank evaluate its assets for possible sale. There was a default by a borrower and they had asked Ankura to evaluate its options. And I was asked to look at one of those assets.
Q. All right. Are you also doing some work for
F. Chin - Defendant - Direct/Mr.Fields

Page 5898
national firm, I think, had 40 plus appraisers valued in its portfolio.
Q. And what were the ranges, if any, that the portfolio was appraised at?
A. It's been publically reported in -- I don't want to breach confidences. But, the appraised value was, approximately, 1.1 billion. But there was also another valuation provided by the firm which was just under 900 million, which reflected -- it wasn't characterized as this, as a liquidation value, but it was called a "go dark" value; meaning, that the owner would vacate the premises and what would be the value as if nothing was there. So it was, basically, 900 million to a billion one was the appraised value.
Q. Had there been any bids for these properties?
A. Yes, there have been.
Q. Where have the bids fallen in terms of value?
A. There have been stalking horse bidders that, initially, were, approximately, 1.3 billion and now we're up to about a billion 525 is a stocking horse Court-approved bid for the same set of assets.
Q. And the appraised value, what type of value did the appraisal appraise -- or the appraisals I should say?
A. The appraisals were all based on market value.
Q. So Mr. Chin, overall, about how long have you been
working in the real estate valuation industry?
A. Over 40 years.
Q. I'd like to talk to you, for a moment, about some of your designations.

Do you hold any professional designations?
A. I do.
Q. Can you describe some of them?
A. I hold the MAI designation. I hold the CIRA, Certified Insolvency Restructuring Adviser, designation; CTP, Certified Turnaround Professional and CRE, Certified Consultant of Real Estate.
Q. Counselor of Real Estate maybe.
A. Counselor of Real Estate. Thank you. Sorry.
Q. Let start with the MAI. What is a MAI designation?
A. It's issued by the appraisal institute of
professional organization. It's based on scope of work and experience levels, various reports that are reviewed by your peers, passing and attending classes all in appraisal and then being awarded that designation.
(Whereupon, the following proceedings was stenographically recorded by Deborah Rothrock.)

Q About how long have you been a member The Appraisal Institute?
A Since 1984.
Q You also mentioned you are certified as an insolvency and structure advisor?

A Yes.
Q What is that?
A That is another professional organization that deals solely in, generally bankrupt situations, restructuring situations. Here it is based upon their regimen of class test which deal in law, finance and management. It is based on years of experience and between the testing and the experience they accord the CIRA designation.

Q And you mentioned CTP, which I believe Certified Turnaround Professional?

A Yes, correct.
Q What is that?
A That is another designation like the CIRA that is awarded to people with experience in restructuring. I think it is, in this case, I've been doing it for the last decade or more and based upon testing.
Q And lastly, the Council of Real Estate, how did you obtain that?
A That is by invitation only and I believe the minimum requirement is at least ten years of some sort of real estate
consulting or other type of experience.
Q In terms of the appraisals that you have performed
yourself, you had mentioned it earlier, about how many have you, appraisals have you done in your career?

A Probably a couple thousand.
Q What sorts of properties have you appraised?
A All of the major property types, so that would be
industrial, office, retail, residential, several special purpose
preponderance, if you will, fire station, church or cemetery.
Some of those types, but generally all property types.
Q Have you done hotels?
A Yes, I have, yes.
Q And golf courses?
A Yes.
Q How many times, if you could approximate, have you testified as an expert witness at trial?

A Probably 25 or so.
Q And based on your time in the industry, how would you describe the importance of the interplay between real estate valuation, market analysis and market operations?

A The tools of real estate valuation is used in so many different regards of real estate. Developers use valuation tools, restructuring professionals use real estate valuation tools. As an operator you're also trying to determine whether you're maximizing value and value is measured there. It is an

Page 5902
integral tool. It's used every which way in the real estate industry done by developers, investor, lenders, all sorts of purposes for real estate valuation and having valuation tools. They're so interrelated. You could, in my opinion, you can't separate them without knowing the other aspects.

Q All right. We talked a little earlier about your time about accounting firms. I would like to ask questions regarding your experience specifically with accounting.

First of all, are you an accountant?
A No, I'm not an accountant.
Q Could you describe your understanding of accounting principles?

MR. AMER: Objection. Lack of foundation. Relevance.

THE COURT: Vague. I don't understand.
You asked him basically to explain accounting after he just said he's not an accountant.

MR. FIELDS: I asked about his understanding of accounting principles.

THE COURT: Subtle distinction.
What is your understanding of accounting? Don't you go to school for eight years to become an accountant?

MR. FIELDS: Certainly at a high level. I'm trying to establish so that the Court understands where Mr. Chin is coming from with regard to, if there's any cross-examination

1 on accounting. If there's not going to be anything, I'll

Page 5904
move on.
MR. AMER: So, I don't understand the relevance of asking someone who is not accountant what their understanding is of the field. You might as well ask: What is your understanding of neurosurgery is for all its worth.

THE COURT: I think that is a little far off.
Sustained.
MR. FIELDS: I assume there will be no cross-examination at all of accounting principles, or anything of the sort?

MR. AMER: I am not going to agree to anything in advance of hearing what the witness will testify to.

MR. FIELDS: I don't know that that's fair, your Honor. He's saying that he can't opine on -- he can't mention what he knows about accounting then I think it is not fair to be asked anything about accounting.

MR. AMER: You could make that objection if I ask him about that. I'm not agreeing in advance to anything. That is not an appropriate thing to ask.

THE COURT: Now the question is: What is the understanding of accounting? What does he understand about accounting?

MR. FIELDS: I'm asking his general understanding of the accounting world and accounting principles. He's
worked at an accounting firm. I wanted the Court to understand what he knows just generally about accounting, that's all.

THE COURT: Is there still an objection?
MR. AMER: Yes, it's incredibly vague.
THE COURT: Sustained. This is ridiculous.
MR. FIELDS: Okay.
(Continued)

\section*{DIRECT EXAMINATION:}

Q Have you worked with accountants throughout your career?
A Yes. Particularly during my time at Kenneth Leventhal \& Company and Ernst \& Young.

MR. AMER: It's been asked and answered too.
THE COURT: By the way, you asked how many times he's testified as an expert. The first time he said
"something like 25 at least, or 25 plus." The second time he said "around 25 ". So that was asked and answered.

Anyway, let's get back to the current topic.
You asked if he's been around accounting work or familiar with it.

MR. FIELDS: I asked if he had worked with accountants through his career.

THE COURT: Okay.
MR. AMER: Asked and answered. We have heard
almost an hour of testimony about his background, more than an hour. In many instances he's testified about the work he's done in accounting firms as a member of a team where an accounting partner was part of the team. We've done through this already.

THE COURT: Sustained. Objection sustained.
MR. FIELDS: May I have a moment, your Honor, please.

THE COURT: Sure.
(Whereupon, there is a pause in the proceedings.) (Continued)

\section*{DIRECT EXAMINATION:}

Q To the extent you were ever confronted with an accounting issue, who would you rely on for advice?

A I would rely on the experts and people designated in the firm that dealt with accounting matters.

\section*{Q All right.}

MR. FIELDS: Your Honor, I move to qualify Mr. Chin as an expert relating to real estate valuations, market analysis and real estate operations.

THE COURT: Let me write this down. Real estate valuations.

MR. FIELDS: Market analysis.
THE COURT: Can that be more specific? Can we say real estate market analysis?
-F. Chin-Defendant-Direct-by Mr. Fields-
Page 5906
MR. FIELDS: Yes.
THE COURT: And the third thing, real estate -MR. FIELDS: Real estate operations.
MR. AMER: I have no objection to first designation real estate valuation. I do object to the other two. I think they're incredibly vague. I don't know that his experience goes beyond just real estate valuations.

MR. FIELDS: I think, as Mr. Amer just noted, eloquently, we spent an hour talking about his experience developing properties, managing portfolios, determining when to sell or hold assets.

I think that is all covered within market analysis and operations, as well. I think that is totally appropriate for this witness to be qualified in that respect.

\section*{THE COURT: Granted.}

MR. AMER: I was going to make a suggestion. I think the two areas, real estate market analysis and real estate operations are just incredibly broad. If it's confined as to real estate valuation, I would be okay with it.

THE COURT: Deem an expert. Overruled. I deem him an expert in all three areas.
(Continued)
25 DIRECT EXAMINATION:

1 Q All right. Mr. Chin, I am going to ask any opinions you give in this case you give to reasonable degree of certainty based upon your experience in the fields that you've worked in. Okay?
A Yes, I understand.
THE COURT: You might have to talk louder. THE WITNESS: Sorry, my apologies.
THE COURT: Five-minute warning.
(Continued)

\section*{DIRECT EXAMINATION}

MR. FIELDS:
Q Did you have the occasion to review the Attorney Gencral's Complaint in this case?

A Yes.
Q When you reviewed the complaint, did you review the exhibits that are attached to it as well?

A Yes.
Q And as part of those exhibits, did you review the Statements of Financial Condition and supporting data spreadsheets that were attached?

A Yes.
Q Did you form an opinion regarding what the Attorney
General's theory of valuation was after reading the complaint? MR. AMER: Objection.
25 THE COURT: I'm not sure the theory of valuation,
-F. Chin-Defendant-Direct-by Mr. Fields-
Page 5908
does the Attorney General have a single theory of valuation? What were you going to say?

MR. AMER: I think the opinions need to be tied to the evidence that we put in on our case. And not just to what is stated in the complaint where we have not put in evidence in our case.

As the Court knows, we've truncated our case based upon the Court's summary judgment ruling.

THE COURT: I don't - this is another one of the times when I'll sustain the objection on different grounds. I don't understand.

Mr. Fields, could you explain what that question means?

MR. FIELDS: Sure. It's understanding his impression about what the allegations are with regard to valuation. That is what the question is getting at from his perspective as an expert in real estate valuations.

THE COURT: What the allegations are?
MR. FIELDS: Yes. In addition to that, citing to the evidence that is cited in the complaint, not just the words, but also the evidence that is included as part of the complaint which have now been moved into evidence in this case.

MR. AMER: That goes to the point of my objection, your Honor.

THE COURT: State it again, please.
MR. AMER: They're going to offer opinions about the complaint, not about the evidence we have put in on our case. And I think it is appropriate for the expert's testimony to address what we're putting in in terms of evidence and theories on our case in chief.

MR. FIELDS: I think it is equally permissible for an expert to testify about why the theories that are being argued to this Court are plausible, implausible, accurate, inaccurate, reasonable or unreasonable. That is what we're getting at.

THE COURT: How about if we did this, let me try for a second.

You said you read the complaint?
THE WITNESS: Yes, sir.
THE COURT: And you read the exhibits?
THE WITNESS: Correct.
THE COURT: Which were the background, backbone of the complaint, right?

THE WITNESS: Yes.
THE COURT: And do you understand what I'll call the theories of the complaint?

THE WITNESS: I believe so, yes.
THE COURT: Okay. And do you think - I think this is Mr. Fields' question but more direct: Do you feel that
-F. Chin-Defendant-Direct-by Mr. Fields-
Page 5910
the evidence sustains the theories?
THE WITNESS: No, I don't.
THE COURT: Okay. Next question.
Did that do the trick Mr. Fields?
MR. FIELDS: I suppose if I could ask why not as follow-up.

THE COURT: Yes.
(Continued)
DIRECT EXAMINATION:
Q Why not?
A It is my opinion that there are different perspectives of value. That the Attorney General has a perspective of what must be reported and the owner, Trump's financials have a different perspective of value.
Q And in terms of perspective of value, is that something you're familiar with based upon your 40 years in the industry? MR. AMER: Objection.
THE COURT: Sustained. Leading.
Q Have you encountered these perspectives of value in the past?
A Yes.
Q In your experience?
A Yes.
Q How frequently or infrequently do you encounter them?
A Frequently.

\section*{Q And why?}

A There are many, many reasons why appraisal information either lags or is incongruent with the way the market works.

Number one, most or all appraisal information is retrospective. It is based upon historical transactions that have occurred in perhaps a different market environment than as of date of appraisal.

One example would be appraisals lag when markets are going up, and they lag when markets go down. They either overstate or overvalve, particularly in those situations where market cycles are more pronounced.

The appraisal process in general is governed by a certain set of rules that appraisers must follow that often times differ than, if you will, the free market. Investors, individuals may have perspectives of value. It is not to say the appraisal process is inherently wrong, but it tends to normalize a lot of potential nuances that are influential on value estimates.

I think those two things are prominent in my mind of why there's a pretty big divergence between appraisal estimates and the actual market test of what properties are really worth.

THE COURT: Okay. See you all the 11:40. (Whereupon, a recess taken.)
THE COURT: Mr. Fields, would you like to continue. MR. FIELDS: If I may.
-F. Chin-Defendant-Direct-by Mr. Fields-
Page 5912

1

3

\section*{THE COURT: Please. MR. FIELDS: Thank you. \\ (CONTINUED) \\ DIRECT EXAMINATION BY MR. FIELDS:}

Q Okay. Mr. Chin, let me just ask you first: At what rate are you being compensated for your work in this case?
A \(\$ 550\) an hour.
Q Do you have a sense for how many hours approximately you've spent on this engagement to date?
A Probably about a thousand.
Q And is your compensation conditioned on any opinion you give in this case?
A No.
Q All right. Have you heard the terms "as is" and "as if" value before?

\section*{A Yes.}

Q Could you describe them, please?
A "As is" generally connotates to a condition that exists at the time, a specific date, generally often times referred to as market value.
"As if" is a condition that will be expected to be -expected to be completed or expected to be received either kind of a hypothetical condition that might exist in the future.
Q Could you give an example of what such hypothetical

Page 5913

\section*{condition might be?}

A One might be a partially completed home that is assumed to be completed as of a certain date, that would be an "as if" analysis. Of a land development, if there was a raw piece of land it was going to be converted with a golf course and residential lots around the golf course, looking at its future,
assuming that was completed that would be and "as if" value.
Q Is there another way to do so "as if" values?
A Yes.
Q What is that way?
A Could be considered an investment value.
Q From your review of the complaint and the exhibits, did you form an opinion with regard to "as is" or "as if" valuations with regard to the valuations that were described in the complaint?
A Yes.
Q And what is that?
A There were differences of perspective of whether "as is" or "as if" valuations would apply.
Q And what were some of those differences of perspective that you're mentioning?
A In the Trump financial statements there are many situations and instances where to be completed or expected to be received was included which would be an "as if" situation in perspective.
. Chin-Defendant-Direct-by Mr. Fields-
Page 5914
That differed many times from the perspective of "as is" values that were argued in the AG's complaint.

Q And you mentioned the term "appraisals."
From your review of the documentation, what type of value did the appraisals describe?

A Appraisals commonly refer to the "as is" value.
Q Now, there are different types of "as if" values?
A Yes.
Q What are some of those different types?
A One comes to mind would be if a building is partially completed or planned to be constructed that would be and "as if" completed value.

If a property is just opened and it is scheduled or hoped to be leased up over time, there's the "as if" occupied valuation.

If a proposed roadway was going to affect a property, one might value "as if" the roadway is completed and done. And value would be performed "as if" completed.

THE COURT: Just a second. The question was: Are there different types of "as if" values, something like that, I don't have it in front of me.

But you gave to me examples of "as if" values not different types of "as if" values, am I right?

MR. FIELDS: I think I asked what are some types "as if" values.
F. Chin-Defendant-Direct-by Mr. Fields- Page 5915

what is property is worth five years ago, am I correct that you're trying to figure out what is property is worth right now, though, two weeks later it is in the past.

THE WITNESS: You're partly right, your Honor, but at the same time it is reliant on retrospective data. Sales --

THE COURT: That is the only data we have, right?
THE WITNESS: Correct. But there's also projections and anticipation that other people prognosticate.

THE COURT: I'm in unchartered territory here but is there something called a prospective appraisal or is that what "as if" is?

THE WITNESS: Yes, many people characterize that as prospective or projected, forecasted, those types of terms.

THE COURT: Thank you.
(CONTINUED)
DIRECT EXAMINATION:
Q On that note, do -- the perspective appraisals, what are those called?

A Often times they're characterized as "as if".
Q In your career, are those frequently created by
appraisers or how often do you come across those is what I am asking?

A They come across occasionally. Particularly if a

Page 5918
building is proposed so as opposed to valuing it with partially completed steel and partially completed materials, they look at it "as if" it is finished and "as if" it is leased.

It is a relevant point for a lending institution about what its terminal value, if you will, or future "as if" value might be. Those are common in new construction, common in proposed projects, common in partially completed projects.
(Whereupon, Cheryl-Lee Lorient relieved Deborah Rothrock as the official court reporter.)
(Continued on next page.)
Q. How will you know, by picking up an appraisal, whether it's "as is" or "as if?"
A. The appraisal should be very clear. I believe even FIRREA, the Federal Institution -- I'm not sure -Reform Recovery, better known as F-I-R-R-E-A, I believe mandates that there is "as is" appraisals and there could be other variants besides "as is" that's reported.
Q. Are you familiar with the term value creation?
A. Yes.
Q. What is that?
A. It's at phrase that -- common in the development industry -- that they are or a developer is going to undertake certain activities to differentiate or create an environment or end product that may be a typical or different in the marketplace and that there is a value increment above and beyond that could be received by creating a value.

The best example, as I mentioned before, is taking a raw piece of land and proposing a golf course -- land that's for a luxury housing. And in that particular case, by developing that and believing that there's market demand, that, they created value that others may not, necessarily, see on that vacant land.

THE COURT: I just want to pindown my
understanding, the difference between "as is, as if."

1 least, construction cost, plus the value creation above 2 a land value that might be an "as if" value.

THE COURT: All right. So again, using arbitrary numbers, what's the "as is" value of the vacant lot, unrestricted lot.

THE WITNESS: So in that case, 500 million.
THE COURT: Okay.
THE WITNESS: And "as if" might be two billion.

THE COURT: Okays. That's the difference. Well, are you adding a factor -- I'll call it, the genius factor. It would be worth 500 million. But, if a genius owns, it's now worth 2 billion?

THE WITNESS: Generally, in those "as if" appraisals, it's not, per say, specific to an individual. It's based on if it were done today, what would the economics look like as if it were done. And that is that "as if" value.

THE COURT: Then why are you giving any values to the "as is?"

THE WITNESS: Well, in that situation, it could be, somebody might have a different plan for it and say, "I want to build an office building." That might yield a different "as if" number.

THE COURT: All right. So, depending upon

Page 5922
the intelligence, if you will, of the plan, it could be worth 500 million or two billion.

THE WITNESS: Yes.
THE COURT: I think we've heard investment value. Is that what the as -- you know, I think you've said that. But that's, basically, the same thing as "as if."

THE WITNESS: Yes.
THE COURT: Okay. Thanks. I understand much better now.
Q. So perhaps, as a corollary to that, just to clear it up, frankly, for myself, in a situation where there's 500 million for the vacant plot of land, that 500 million, what does it represent?

What is worth \(\$ 500\) million if that situation? A. In that case, given the appraisal lease it's the highest and best use. So, it could be used for multiple of uses subject to its zoning and other allowable things.

So it may not be just a hotel. It might be an office, it might be a retail complex, it might be a specialty convention center. It could be a variety of things.
Q. But the bottom line is, the land, itself, is the value in that situation?

MR. AMER: Objection, leading.
on that same vacant plot of land and we said that it could be worth a billion and a half or two billion dollars.

What are the differences in value reflecting for those two situations?

THE COURT: That sounds like the old joke about what's the difference between an old penny and a new dime? Nine cents.

Mr. Fields, you asked is the value in the "as is" only about just the value of the land. I would say, it can't be just the value of the land because, it wouldn't generate any income.

Isn't it assuming that there'd be some type of building or development just not a genius building?

THE WITNESS: Yes. The land is available for all sorts of types of uses based upon its zoning.

THE COURT: So, the use is what's value not the land itself?

THE WITNESS: The uses and allowances create the value of the land.

THE COURT: Okay. All right. Thanks.
Q. But the land, itself, possesses value independent of whatever use somebody seeks for it?
A. Yes.

THE COURT: So, what if there is a zoning or trust and estate's restriction middle of the city,

THE COURT: Sustained.
Q. In the situation that the Court was describing, where there's a vacant plot of land in the middle of New York City, and we threw around the term -- the figure -\(\$ 500\) million, does that figure represent with something constructed on it, if it's market value or just vacant land that could sell vacant?

MR. AMER: Objection, leading.
THE COURT: I'll let him.
MR. AMER: He could just ask "What does it represent," and let the witness tell us what he thinks it's representing as opposed to giving him two options that he gets to choose from.

THE COURT: Well, you're right. That's leading. Okay. Sustained.

You can't ask "isn't A the same as B," you can't ask "Isn't \(A\) the same as \(B\) or \(C\)." It doesn't matter how many possibilities you're giving. It's still leading.

MR. FIELDS: All right. Let me come at it from a different direction.
Q. So, we talked about the vacant plot of land, in middle of New York City, being worth \(\$ 500\) million as what we'll call market value.

And then we also talked about developing something
could be a two billion hotel, could be 500 million dollars office building but, you can't build anything on it, what's the value of that.

THE WITNESS: Well, significantly less than 500 million. One would try to see, maybe in that particular case, a hypothetical you mentioned, it might be for a park, it might be just for a parking lot. There may be a use for it and it would be valued as such.

THE COURT: So let's assume, again, arbitrarily - as a parking lot, it might be worth 100 thousand.

\section*{THE WITNESS: Correct.}

THE COURT: Something like that. As a park, it's not worth anything to the owner if the municipality is just going to let people play there, right?

THE WITNESS: Yeah. And this gets a little more nuanced. There's a value to the park or the owner -- the municipality -- but there may be an owner or that person who does own it. So there's some sort of value to him.

But in your example, yeah, in municipal use there is no public value if you will.

THE COURT: Well, there is no private value.
F. Chin - Defendant - Direct/by Mr. Fields

Page 5926

There's a public value. But, it's not measurable.
THE WITNESS: Yeah. But, if you look at this in combination, if somebody just said, "Well, just give me your park because, it's not worth anything," there's a value to it.

THE COURT: Okay.
Q. Taking the Court's question regarding the piece of land that you can't develop, how would the market value and investment values differ for that piece of property that the Court was just describing?

MR. AMER: Objection. I think it presents they would differ. Can we just ask how they would relate to each other.

THE COURT: Overruled.
A. Do you mind repeating that question.
Q. Sure.

THE COURT: Read back or you'll do it?
Q. Taking the Court's question regarding the piece of land that you can't develop, how would the market value and investment value different for that piece of proper that the Court was just describing?
A. Well, the market value, in the case, could be zero. And, to an owner, they believe it's, in their view, it's worth a lot. There could be a significant difference.
Q. Why? Why could an owner think that?
A. Could be for sentimental reasons because, it's been in the family forever and -- or there may be restrictions that I can't transfer this property no matter what. You know, the extenuating circumstances. It may be something that they had history with that property and they just cannot let it go.

THE COURT: Well, that's a whole different
kettle of fish. Sentimental value? That's not any kind of market value, right?

THE WITNESS: No, it's not, sir.
THE COURT: So, it's totally subject to
"Can't build. But, I love it. So, it's worth a lot to me."

THE WITNESS: Yes.
THE COURT: Okay.
Q. How does the -- how do the restriction is -- withdrawn.

How does whether or not the restrictions or can or will continue into the future, how can that effect a property owner's "as if" value?
A. Well, it is a limitation on the ability to, if you will, maximize the utility of that property. So, if there's a short duration, it limits the alternatives that could be used for a property; especially, if they're going to plan it and construct it and develop it.

Page 5928
Obviously, the longer period of time that's given, the more flexibility there is to consider options and alternatives.
Q. You discussed, earlier, rent stabilization restrictions.

Do you recall we were talking about that earlier?
A. Yes.
Q. Is that an example of what you were just describing with regard to restrictions and holding something for long term?
A. That would be an example. I think in the real estate market, they think of the bundle of rights -- a whole bunch of rights.

And if certain things are removed or there is encumbrances or restrictions then that takes away certain rights of a property owner that have to be considered.
Q. Going back to talking a little bit about
developers, what are some of the factors or considerations that developers look to when determining an "as if" value for an asset?
A. There are many. They might look at the market and see that there is something that is not there that they believe would have high demand, that, they could build and construct.

They may see that the market cycle is going to
improve and they believe that they want to take advantage of that situation and build something that will be in high demand when the market cycle continues, hopefilly, to improve.

They look at situations that could be an underutilized property where they might envision something that "I can do more with this than currently being done."

And, therefore, there's a creation of value that if they exercise certain initiatives that, that value could be substantial and better than what it would cost them to buy and change.
Q. How, if at all, do the interest rates effect developer's decisions to buy or sell real property?
A. Interest rates have a large bearing on several aspects that effect an owner or developer. It is a cost of capital.

Certainly, when cost or capital are higher, interest rates increase. The obligations increase. And, it may make a development less feasible. Because, it's going to cost more in interest that doesn't result in a higher property value.

Interest rates could and have effected capitalization rates, the rates of returns that are expected by buyers and sellers of property.

It does provide an indication as to the health of

Page 5930
the economy. So if it's high interest rates, there's going to be retraction, perhaps less demand, if you are a retail building owner, that might curtail your retail sales. So interest rates have a huge overall effect on the demand for supply of and the pricing of real estate.
Q. Similarly how do -- how if at all does a developer's experience or expertise effect their decisions to evaluate property and the necessary -- withdrawn. Let me withdraw that.

How, if at all, do the developer's experience and expertise in real estate development effect what types of property they invest in and the resulting values?
A. Developer's experience is extremely important, from a standpoint, if they're particularly constructing. Things don't oftentimes go as planned. And developers have to make adjustments in terms of how they respond to that market.

As commonly understood, real estate markets are very cyclical. They go up, they go down, depending upon various economic factors.

And, usually, the investors and owners who've been through many cycles, understand more where people are, where they are, in the investment cycle.

That might cause them to buy when other people are selling and disposing of assets. It may give them an
indication, when a market is peeking, that they might sell at the top of a market.

I think that the more you've been in real estate, the longer you've been in it, you're more sensitive to what impacts how you create or make money versus someone who's never developed, has a limited perspective and may not have been subject to the vagaries of market cycles or changes in demand or changes in interest rates or other things that effect their profitability.
Q. Can a developers experience or expertise effect that developers -- the manner in which a developer values their properties "as if"?

MR. AMER: Objection, leading. THE COURT: Sustained.
Q. How does a developer's experience or expertise effect how that developer values their properties "as if"?
A. They're focused on trying to anticipate and forecast where the market is headed. So, if they believe too many buildings are being proposed, they may retract their decisions to building or to undertake more construction activities.

If they believe that pricing does not allow them sufficient profit with having to take on more risks, they may decide to withdraw or temporarily hold their development activities.
F. Chin - Defendant - Direct/by Mr. Fields

Page 5932
So, they're, usually, attuned to what they think their projections are of the future and how that my impact real estate demand and prices.
Q. How, if at all, do the projections you just described effect assumptions used for "as if" values?
A. The assumptions are highly influenced by their perspectives of the market.
Q. In your 40 years of experience, did you project "as if" values for different types of property?
A. I have.
Q. How did you use those "as if" values?
A. Well, most notably, like in the Woodbridge example, I had to project what the selling price of a finished luxury home would be in the future, knowing that it's going to take some time to construct it, build it, maybe there is COVID and supplier issues.

But, I had to project what I thought the prices were because, I had to disseminate that information to, essentially, the victims of the Ponzi scheme. So they knew what sort of recovery might be possible from a sell out of these homes.

So, in all those cases -- and, there were fifteen luxury homes that I had built in LA. As of 2018, I had to project them in 2022, 2021 about what I thought those houses would sell for.

Page 5933
Q. How significant, in those instances, was current market value appraisals?
A. They were irrelevant. Telling me what a property is worth when I have a business plan to build and construct a home that is underway -- I didn't care.

I was focused on how the market would respond, where the market was headed, the potential demand for these houses. So, I was very concerned about the "as if," if you will, values. And I didn't care about the "as is" because I wasn't selling. I'm not selling properties as it was.
Q. How old you describe the real estate market conditions from a developer's point of view in the 2011 to 2019 years?
A. Very strong. It was a time -- I think about it as before 2011 we had just had the greatest financial collapse that occurred. So there was a total retraction of capital for anything. And a lot of uncertainty.

I know this particular city has been hit very hard because, it was a financial capital of, essentially, the world. But, a lot of uncertainty.

Someone who understands real estate cycles would see, "Okay. We had this condition in 2008. What a great buying opportunity at some point in time." That the market cycle would go backup.
So, what happened -- and it did happen -- as

\section*{F. Chin - Defendant - Direct/by Mr. Fields}

Page 5934
uncertainty decreased from that tragic situation of 2008, markets started firming, prices started increasing, cap rates started decreasing, valuations became greater and higher as we moved on from 2011. Up until 2019, when we hit kind of a high point in terms of the strength of the market and we started entering an era of uncertainty.

That combined with a buildup of inventory that happened, essentially, between 2016 to 2019, a lot of new construction came on board. And it presumed that everything would continue forward.

But then COVID hit. No one really knew how that would effect demand. And then, now, we're in this situation where we have massive uncertainty. We have an oversupplied commercial real estate market and we're in another cycle.
Q. What type of value do developers generally rely on when assessing a project's economic potential?
A. They -- and, I put myself in the same boat. They are clearly focused on the future value, the "as if" value. And, myself and others are hopeful that the market will continue to be strong and bolstered but, we could be wrong.
Q. And how common is it for developers to use "as if" values to project economic potential for a project?
A. Very common.
Q. How do developers differ from passive real estate owners and investors in perceiving and managing risks?
F. Chin - Defendant - Direct/by Mr. Fields Page 5935
A. A couple of things. One is, if they have to. Sometimes for tax reasons. Or if they feel that market pricing is so high that they need to take advantage of the cycle; that, we're at top of market, they may project that the market is not going to be as strong and, therefore, they should say, "Wow, we can take our chips off the table and then maybe wait for the next cycle."
Q. In your experience, do developers build, sell or liquidate assets at a discount?
MR. AMER: Objection; leading.
THE COURT: Sustained.
Q. How, if at all, does bulk selling or liquidating
ssets, at a discount, effect a developer's decision to
Q. How, if at all, does bulk selling or liquidating
assets, at a discount, effect a developer's decision to sell?
A. I'm not sure I get the clarity. I didn't understand your question.
Q. Sure. How, if at all, do developers consider --
let me withdraw that.
Are you familiar with the terms bulk selling or liquidating assets at a discount?
A. Yes.
Q. How often, in your experience, have you seen developers do that; and if they do, do it, why?
A. There's a significant difference between passive owners and developers. It is all premised on construction risks.

So you have construction risks which is the taking on the risk of building something -- excuse me -- on time, on budget. And, hopefiully, the market will be strong enough to demand the product you're building. That is risky.

A lot of times things do not go as planned. Costs are overrun, the time it takes to build is too long or some other factor happens.

Notwithstanding that during that construction process, the market cycle could change, that, it could go from being very strong to very weak as you're still under construction.

Contrast that with a passive owner, which would, generally, buy it today. They know what they have, they don't have to undertake any sort of construction risk and start producing income right off the bat if they own an office building.

So, that construction period. And then, there's the lease up, that, I have to fill my building once I build it. So, massive risks in this "as if" scenario. But, they're rewarded if they, essentially, bet right.
Q. What considerations go into a developer's decision to sell an asset?

MR. AMER: Compound question.
THE COURT: Let makes one question at a

MR. FIELDS: Sure.
THE COURT: These are tough questions.
(Whereupon, the following proceedings was stenographically recorded by Deborah Rothrock.)

Q How often do you see developers both selling or liquidating assets at a discount?
A Not frequently, unless they're under substantial pressure to do so.
Q And in your experience, what examples of substantial financial pressure come to mind?
A I've seen it in the debt restructuring world that I am in where there's an impasse between the lender and the borrower and the properties need certain work, need monies invested and the bank wouldn't do it. The borrower owes a lot of money and sometimes they decide, let's just liquidate the portfolio.
Q I would like to shift gears and talk to you about enterprise value.

Are you familiar with that them?
A Yes.
Q What is an enterprise?
A An enterprise is typically a collection or a grouping of real estate assets that are owned, operated, managed similarly under one umbrella.

So the best example would be like a Four Seasons is an enterprise or Four Season Hotels. Ritz Carlton Hotel Group, its an enterprise. They are lots of interrelated parts that are leveraged off of a single brand name.
Q Is there value associated with an enterprise?
A Definitely.

Page 5940

\section*{Q Could you describe that?}

A Let's use a Ritz Carlton.
There are certain systems, reservation systems, operating protocols, financial reporting, reservation systems that are all tied together that affect \({ }^{\wedge}\) all those properties.

So they kind of perform under one umbrella, they move in one group. There's a standard for purchasing the same glassware, the same uniforms, everything. They operate as a group with a specific brand. They're marketed and merchandised as a brand.

Therefore, this is an enterprise that includes all those parts which were all tied together to this brand.
Q What types of properties do enterprise value generally apply to?
A Enterprise value usually associates with several properties. So a single property doesn't -- wouldn't have an enterprise value. The more properties that are operating similarly or under a same type of name would be more considered a part of that enterprise.
Q In terms of the use of the property, you mentioned Ritz Carlton. What types of properties and their uses do enterprise value generally apply to?
A Generally operating type of businesses, so obviously hotels, you can consider motels as well. Golf courses, private clubs, could be maybe marinas if they're operated similarly. In
some cases, apartment complexes if they're dominating a certain area. Could be office buildings, a collection of office buildings that are dominated by a single owner. Those would be some examples.
Q What are some of the key indicia for a real state professional such as yourself to determine whether there's enterprise value associated with a certain subset of properties?
A I consider the commonalities of the market. The commonalities of the systems, if you call it, the back of the house. How people are supposed to operate, how they price things, how they purchase items to operate a property. The people that they all march, if you will, kind of to a similar type of beat, that they have certain standards.

Those are elements that I consider contributors to an enterprise type of value.
Q What, if any, shortcomings in terms of valuation could exist when valuing a real estate portfolio but not accounting for enterprise value?
A Well, there are several situations that happen when one looks at the just the individual assets. Unless someone takes out the benefit or the effect of that association with marketing, then it is missing this increment of value that is attributable to the property that is the result of the association with the enterprise.
Q How does supply or leverage and purchasing power affect

\section*{enterprise value?}

MR. AMER: I will object to the line of questioning. I don't think enterprise value is relevant to the case. It is not anything that was valued in the Statements of Financial Conditions. So I don't see how it is relevant.

THE COURT: I see your point. I will allow it. The Appellate Division might not see the point. It is overruled.

\section*{Q So I'll reask it.}

How does supply or leverage and purchasing power, if at all, affect enterprise value?
A As I mentioned, it is one component of maybe an indicia of how an enterprise might exist.

In an example, if someone is purchasing, let's say, dishes, Ritz Carlton dishes. They can negotiate probably stronger as a group as a Ritz Carlton than an individual property owner can go and say I will buy a thousand cobalt-looking glasses. That purchasing power and leverage of the organization or enterprise is much greater when negotiating contracts and others.

THE COURT: Wouldn't that be called economies of scale?

THE WITNESS: Yes, sir.
THE COURT: Thank you.

Q From the perspective of a buyer of an enterprise, why would a buyer of an enterprise care about these indicia that you just described?
A They will care about it because it's easy to make decisions about changing the organization. So if one day someone decides at an enterprise we want to change our pricing policy, it can be done very quickly and implemented very quickly versus if it was disbursed assets you have to tell this general manager and that property person and that and see how it unfolds.

So the benefits of existing systems that can respond generally quickly to changing events, is the strength of an enterprise.

To give an example would be a security threat. So that can be disseminated very quickly through an enterprise. They can say here is what needs to be done, it is crisis management, you need to have the following protocols in place, here is how you respond to the public.

If you own 50 different assets with different owners it would be difficult to implement that on a system-wide basis.
Q In your experience have you found that enterprise value positively or negatively affects the ultimate value of the selling price of a property?

MR. AMER: Note my continuing objection. I know your Honor has overruled me, but for the record.

Page 5944

\section*{greater than if its individual value.}

THE COURT: The whole is worth more than the sum of
the parts?
THE WITNESS: Thank you.
THE COURT: There we go.
(CONTINUED)
DIRECT EXAMINATION:
Q Do you have any experience with managing and selling individual assets and also selling assets as part of an enterprise?

A Yes.
Q What experience do you have in that?
A The MPG Office was certainly both selling individual assets and then selling the entirety of the company.

Q In your experience how does the number of properties in a portfolio affect whether enterprise value exists or could exist?

A In general, the greater the number of the properties the larger the enterprise, potentially the higher the valuation.

But it really depends if they're of similar ilks. Some properties are not as contributory to or benefit from being associated with the enterprise.
Q And same question for operating entities or operating companies?

A Same answer.

Page 5945

Page 5946
Q Why?
2 A Depends on what the criteria is. So if I were to say market value that would be willing buyer willing seller normal time no duress as contrasted to liquidation value, which might say we need to sell this in a certain time period perhaps as is, with as it sits. So that could be a very different value.
Q Are you familiar with lender-ordered appraisals?
A Yes.
Q What type of value do lender-ordered appraisals generally predict?
A Market value is common for lender appraisals.
Q And for what period of time does the appraisal predict a market value?
A It is very specific as of a specific date.
Q From an appraiser's perspective, what function do lender-ordered appraisals serve?

A It provides a lender information about what the collateral may be worth. If they have to -- if there's a default, if there is a foreclosure it provides them the amount they believe they could recover. And it also provides them a basis for their own internal analysis, so usually lenders have loan-to-value ratios they try to comply with and that value sets what they believe the maximum loan amount could be.

Q And when doing lender-ordered appraisals what sort of data are appraisers looking to?
today, how does that effect values in real estate, if it does at all tomorrow and then going forward.

They're crystal balls, they have them but it is probably murky. Everybody, like everybody in this room could have a different perspective of what the next day and the future holds.

THE COURT: Five-minute warning.
MR. KISE: I'm going to go out on a limb. If we take our break now, there's a pretty good likelihood we that could turn this up for this afternoon.

MR. FIELDS: Okay.
THE COURT: Everybody okay with that? Okay. See you 2:15.
I'll direct the witness please do not discuss your testimony or anything related to it during the lunch break.

THE WITNESS: Yes, sir.
(Lunch recess taken at this time.)
(Continued next page.)
A Usually they're looking at comparable sales, sales that have been transacted and consummated. Looking at the case lease, leases that have been executed. There's some consideration to listings or offers to purchase that might be pending on a property although they're given less weight because they have not occurred.

But generally looking at the economic indicators that have occurred up to that date and time.
Q How much emphasis do appraisals put on potential market changes for lender appraisals?
A I think appraisers try to, if you will, simulate what might happen. But they really make, they don't overtly state their prognostications. Again, it is more reliant on historical trend of economics, of the health of the market up to that point. Demand and supply up to a point up to the date of appraisal and they don't forecast, project overtly in a report about what they see or expect to happen.
Q Why not?
A I think a couple reasons. Number one, it is not common in the appraisal world to do that. And I think much like everything there's differences of opinion about how markets may evolve.

There's no one definitive treatise about how the economy might recover after a catastrophe or after an unusual economic event or if a stock market dropped a thousand points
determinations into a "as if" appraisal?
A Any sort of restriction that might limit the possible uses would affect the value negatively usually.

Q But could an appraiser assume an "as if" appraisal that that restriction does not exist at some point in the future for purposes of an "as if" appraisal?

MR. AMER: Objection. Leading. THE COURT: Sustained.
Q What basis do developers have to plan investments based upon future zoning changes to property currently encumbered by a zoning restriction?

A They consider what might be possible based upon those limitations and they will plan accordingly in terms of usually number of lots that can be built or the size of the lots and how some of the common areas, perhaps parks and other things, might be laid out.
Q In your experience how, if at all, do developers -- how frequently do developers seek to change land use restrictions
that might currently encumber a property that they're seeking to change?
A As a developer is essentially trying to get approvals for his project for a land development as you might be referring to, there are constant changes that depending if the cities don't approve a certain element of the plan the developer has to adjust.

MR. AMER: Ill object and move to strike. I think the question was: How frequently does it happen.

THE COURT: Was that indeed the question?
MR. FIELDS: I have to go back and look.
(Whereupon, there is a pause in the proceedings.)
Q Sure. How frequently do developers seek the land use --

THE COURT: I'll strike the prior answer, prior answer is stricken. Go ahead.
Q How frequently do developers seek to change land use restrictions that might currently encumber a property that the developer is seeking to change in the future?

A As frequently as they can.
Q Did you review in this case appraisals for 40 Wall Street done by Cushman \& Wakefield for the years 2011, 2012 and 2015?

A Yes.
Q Were those "as is" or "as if" appraisals?
A Those were "as is" appraisals.
Q In the years 2011 and 2012 were there multiple values and if so, what were those values?

A There were two different values that I recall. In
2011, I believe, it was 200 million. And in 2012 it was 220 million.

MR. FIELDS: If we could pull up Plaintiffs 1573
that has been admitted.
(Shown.)
MR. FIELDS: If we could go to Page 3 at the
bottom.
(Scrolling.)
Q I'm showing you Plaintiff's 1573, Mr. Chin.
Do you see at the bottom there's \(\$ 200\) million figure?
A Yes.
Q And as of what date does that value reflect?
A As of November 1st, 2011.
Q And if we flip to Page 4, do you see the heading, "Perspective Market Value."

A Yes.
Q What is the value and what is date is it as of?
A As of November 1st, 2014, the estimated value was \(\$ 270\) million.

Q So what value is this value here reflecting \(\$ 270\) million?

A I would consider it an "as if" value based upon various assumptions that the appraiser made as of 2011.

Q And generally speaking, what were the general sentiments -- withdrawn.

From your review, did the same appraiser conduct all three of the appraisals; '11, '12 and '15 or the same appraisers, I should say?

A Yes, I believe so.
Q And generally speaking, in 2011, 2012, what were the sentiments that the appraiser was suggesting with regard to the market at the time?

A The sentiments or attitudes were clearly negative in 2011. If you recall, again, it is coming out of the great financial crisis in 2008. So there's many cautionary statements made in the 2011 valuation report that are reduced in quality and number in 2012.

So there's much more negative sentiment that is expressed in the appraisal, warning signs, uncertainty indications regarding the financial markets here and unemployment, which lessened in its quantity and I guess disclaimer amount in the 2012 report.

Q In your experience, in this timeframe, was it common for appraisers to have negative sentiments in 2011 and 2012?

A Yes, it was uncertain. It was an uncertain time coming out of 2008. And the rate of recovery at that point wasn't clear.
(Whereupon, Cheryl-Lee Lorient relieved Deborah Rothrock as the official court reporter.)
(Continued on next page.)
F. Chin - Defendant -Direct/by Mr. Fields

Page 5954
Q. We talked a little bit about this earlier. But, in the same time period, were you in -- what role were you in, in 2011 or 2012 ?
A. I was running the office portfolio and office company in Los Angeles.
Q. And from your perspective, at that time, what were the sentiments with regard to the market in '11 and ' 12.
A. I think there was a different kind of rate of recovery than, necessarily, New York. But, it was more optimistic.

There was much more investment going on, expansion of tenant spaces and more confidence that the market was recovering after 2008.

MR. FIELDS: All right. If we could -- on Plaintiff's 1573. Please, go to page 169.
Q. Mr. Chin, can you see the heading that says, "Direct Capitalization Valuation Method Perspective Mark Value as of November 1, 2014?"
A. Yes.
Q. In the top paragraph, it says, "In the direct capitalization method, we estimated market value my dividing the stabilized net operating income by an overall rate derived from our analyses of market sales and computed by dividing the net operating income from a sold property by its sale price."

What does that tell you as an appraiser? What are they doing?
A. Basically, taking an income stream, net operating income, dividing it by a rate to reflect value.
Q. And the next to sentence says, "We estimated the capitalization rate to be 7 percent."

What -- to ask an open ended question, what is the capitalization rate and what does it reflect?
A. The capitalization rate reflects the ratio of net operating income to a sales price. Appraisers will get that information either from surveys or they'll have actual transaction data where they will compare that ratio and depict it as they did here in this report.
Q. The next sentence says, "The overall capitalization rates derived from the improved property sales are between 4.21 and 6.74 percent."

What are these numbers reflecting that the appraiser is discussing in this sentence?
A. These number reflect the results of transactions that had occurred. So, there were individual transactions that occurred.

The appraiser looked at net operating income for a property and compared that to the sales price and got the overall rate or capitalization rate which is the ratio.
Q. Why are these properties important for purposes of
F. Chin - Defendant -Direct/ by Mr. Fields

Page 5956
this appraisal that are listed here between numbers one and seven?
A. The appraiser deemed that they were appropriate for comparison to the subject property being appraised.

MR. FIELDS: All right. And if we could
scroll down, a little bit, to the statistics box.
Q. What is the lowest capitalization rate selected by this appraiser for purposes of this appraisal?
A. Four point 21 percent.
Q. And what is the highest?
A. Six point 74 percent.
Q. And what is the capitalization rate that this appraiser chose to use?
A. 7 percent.
Q. What does the appraiser selection of a 7 percent capitalization rate tell you as an appraiser?
A. In light of the sales information provided, which showed a range of 4.2 to 6.7 percent, the appraiser was more conservative or had a higher cap rate, which resulted in a lower value relative to the sales information that demonstrated lower capitalization rates.
Q. And in your experience, how often do you see appraisers selecting capitalization rates or using a capitalization rate that is higher than the highest of the comparable selected?

Page 5957
A. Not common. Usually, there is some sort of explanation why. But this is -- there is no explanation.

THE COURT: Quick question. Do you mean there is no possible explanation or do you mean there is no explanation given?

THE WITNESS: There is no explanation given.
THE COURT: Are there possible explanations.
THE WITNESS: Perhaps. I'd be speculating.
THE COURT: No, we don't allow speculation.
We allow guesstimation.
I mean, isn't it just possible that the
appraisers just felt conservative to use your word and were expecting downturn?

\section*{THE WITNESS: It's a possibility. THE COURT: Okay.}
Q. From an appraiser's perspective, in 2011 and 2012, was there a concern that the real estate market could revert back to the levels that it was at in 2008, 2009?

MR. AMER: Objection, leading. THE COURT: Sustained.
Q. All right. To go through it again, how did you describe the real estate market in 2008 and 2009 ?
A. Well, at that time, specifically, very stressed. Very -- tons of uncertainty about when things might get better, if they might get better. It effected all aspects
F. Chin - Defendant -Direct/ by Mr. Fields

Page 5958
of finance.
Q. How would you compare that to 2011 and 2012?
A. Well, it varied depending on region of country. But, in general, it was firming from the standpoint the uncertainty was being weaned away; that, there was less uncertainty about how and if the economy was going to recover. There was job growth versus job losses. There was a strengthening of the economy relative to what it was in 2008 and 2009.
Q. Generally speaking, when you compare the two timeframes, was there more positive sentiment or negative sentiment in 2011 than 2012?
A. There was more positive attributes in 2012. There had already been the demonstration that the economy and the employment was coming back, that, there was a recovery. And, it was being demonstrated in real estate prices in general.

MR. FIELDS: If we could now turn to 2012, Plaintiff's 3208, that's been admitted. Page 165. Q. All right. Mr. Chin, there's a paragraph immediately above the section that says, "Terminal capitalization rate section." Do you see that?
A. Yes.
Q. All right. It's highlighted on the screen. This
is 2012.
The appraiser writes "In addition to IRR decreases" -- what's IRR?
A. It's referred to as the internal rate of return or yield rate that is commonly used to value properties.
Q. And what does a decreasing internal rate of return tell you as an evaluation professional?
A. Decreased risks, decreased yield expectations.
Q. Appraiser continues "overall capitalization rates OAR for Manhattan Office have also decreased by 127 basis points from the peak of 6.65 percent during fouth quarter 2009 to 5.38 percent as of second quarter 2012.
"Terminal capitalization rates have declined from their high achieved during second quarter 2009 open paren 7.5 percent, by 142 basis point range to its current level of 5.38 percent as of second quarter 2012."

So, generally speaking, what is the appraiser conveying about the state of the market now in 2012?
A. This demonstration, there's strong evidence that the market has improved, property prices are increasing evidenced by yield rates or cap rates coming down.

MR. FIELDS: If we could go to page 175, please.
Q. Again, Mr. Chin, the heading here says, "Direct Capitalization Valuation Method Upon Achieving Stabilized

\section*{Occupancy as of November 1, 2015."}

What is the range of capitalization rates that this appraiser selected as comparables to use in this section?
A. The range is from 3.62 percent to 6.74 percent.

MR. FIELDS: And, if we can scroll down a
little further.
Q. What does the appraiser select as a capitalization rate for this appraisal?
A. Seven percent.
Q. Is that the same capitalization rate that was used in the prior year?
A. Yes.
Q. As an appraiser, what does it tell you that the appraiser is suggesting positive sentiments about the market but keeping the same capitalization rate from the prior year?
A. It's inconsistent with what the market evidence is showing. But without speculating, there may be some other reason why he is doing that.

MR. FIELDS: If we can now go to plaintiff's
118, page 170 , please.
Q. All right. Mr. Chin you see at the top it says, "Direct Capitalization Valuation Method"?

\section*{A. Yes.}
Q. I'll represent to you this is the 2015, 40 Wall Street appraisal.

What is the range of capitalization rates selected by this appraiser?
A. The range is from 2.68 percent to 7.68 percent.

MR. FIELDS: And if we can scroll down all
the way to the bottom, please.
Q. What capitalization rate does this appraiser select?
A. Four point 25 percent.
Q. What does the selection of a 4.25 percent, given the range, tell you about this appraisal relative to the market at the time?
A. He's deeming it to be within the category or comparable set that's demonstrated by market sales.
Q. What is your opinion with regard to the estimate of value, in this 2015 appraisal, as compared to the two that we just looked at?
A. I believe that the 2015 appraisal is much more accurate and in line with the market information than the prior years.
Q. From your review of the complaint and -- from your review of the complaint, did you identify another source of valuation for 40 Wall Street in 2015 ?
A. Yes.
A. There was an investor report by Morningstar that listed out details of 40 Wall Street.
Q. What's the purpose of Morningstar's investor report?
A. Morningstar does reports on certain types of investments. In this particular case, there was mortgage backed securities that were issued that included 40 Wall Street.

So, Morningstar would, basically, do an analysis of what they see of the investment pool as well as its asset. And they perform various stress tests to evaluate what the risk factors might be for the investment and for a property.
Q. How does Morningstar's valuation methodology differ from that of an appraiser if at all?
A. The methodology is very different. There are -in general, they use the same general tools. But, the assumptions that they apply and how they look at the property is very different.
Q. All right.

MR. FIELDS: If we can pull up what has not been admitted in evidence, the Morningstar report plaintiffs 3186.
Q. Let's go to page 40. Mr. Chin, you mentioned a

\section*{moment ago that there were different assumptions relied upon} in the Morningstar report than in the 40 Wall Street appraisal.

What is one of the different assumptions that was used in the Morningstar report?
A. The Morningstar report calculates value based on net cash flow versus net operating income. As we were discussing how the appraisers were using it, they were using net operating income and applying a capitalization rate. Morningstar uses net cash flow, which is different than net operating income.
Q. How are the two different?
A. Net cash flow is lower. Net cash flow is taking net operating income minus leasing commissions and tenant improvements, reserves for replacement. And that results in a lower amount that would then be capitalized for purposes of calculating value.
Q. So, in the -- if you could look at the last sentence that's highlighted there on the -- let me withdraw that.

Under the subheading "valuation drivers," do you see that it says, "Morningstar underwrote a NCF of \(18,860,112\) and applied a direct capitalization rate of 7 percent for a term value of 270.7 million," what does the NCF stand for in your parlance?

Page 5964
A. That is the net cash flow. So, that is net operating income minus various expenses to get to net cash flow.
Q. And then, if we look at the last sentence in that paragraph -- in the middle of the paragraph. Let's start with where it says, "For the balloon value, Morningstar made a cash flow deduction of \(643,559,000\) which represents the variance between the average ground rent payments over the term of the loan and the calculated average ground rent payments for years 11 to 20.
"This deduction, through NCF, was capitalized at 7 percent for a balloon value of 261.5 million or \(\$ 224\) per square foot.

As a comparison, the appraisal concluded a capitalization rate of 4.25 percent and value of 540 million or \$464 per square foot."

So how does the use of net cash flow as opposed to net operating income, in the Morningstar report, ultimately, effect the value reached by Morningstar?
A. The deductions that they make for net cash flow, significantly, decreases the value that would, otherwise, be calculated by an appraiser.
Q. And, what capitalization rate is Morningstar using for its value?
A. Seven percent.

Page 5965
Q. And what capitalization rate does Morningstar site as one that was used for the appraisal?
A. 4.25 percent.
Q. All right. I'd like to shift gears and talk to you, for a moment, about Seven Springs.

Are you, generally, familiar with the Seven Springs property?
A. Yes.
Q. And are you familiar with conservation easement appraisals?
A. Yes, generally.
Q. How, if at all, do conservation easement appraisals take into account the identity of the property owner?
A. It doesn't.
Q. And what do you mean by that?
A. It's ambiguous. There's no defined buyer or profile of a specific owner that is used to calculate a value.
Q. Is it a hypothetical scenario?

MR. AMER: Objection. Leading.
THE COURT: Sustained. I don't see why the owner would have an affect on the conservation easement values.

MR. FIELDS: The appraisal, your Honor.
F. Chin - Defendant-Direct/ by Mr. Fields

Page 5966
We're talking about the appraisal, the conservation easement appraisal.

THE COURT: I don't see why it would effect that either. But, I'll learn.
Q. In a general sense, can the identity of the owner, in some instances, have an effect on "as if" versus "as if" -- or "as if" appraisals?

MR. AMER: I'm going to object. I think you misspoke. You said "as if" versus "as if."

MR. FIELDS: I meant "as is" and "as if."
MR. AMER: Maybe we could just get the question again.

THE COURT: You want to just give it another go.
Q. In a general sense, could an appraiser subscribe some value, whether in an "as is" or "as if" appraisal, to the property based on who owns that property?

MR. AMER: Objection, leading.
THE COURT: Sustained.
Q. How could the identity of the property owner affect, if at all, an "as is" or "as if" appraisal?
A. There's no affect.
Q. Did you review the values in the Statements of Financial Condition from 2011 to 2014 relative to Seven Springs?

MR. AMER: I'll object. I think it assumes testimony he hasn't given.

THE COURT: You want to rephrase.
Q. Mr. Chin, earlier, you testified about your experience with a rent stabilized unit, I believe, last year in New York City, right?
A. Yes.
Q. From a developer's perspective, how do developers consider encumbrances, such as rent stabilized units, when forecasting value?
A. I would, generally, say that they're optimistic. They're optimistic that, at some point in time, there is the possibility, that a tenant may vacate, that the rent could go to market. And then, they might be liberated and either rent it at a current market rate or that it might be sold.

THE COURT: Well, if it's sold, wouldn't it receive less money for the sale?

THE WITNESS: If it's sold with the rent stabilization in place?

THE COURT: Exactly.
THE WITNESS: Oh, yes. The value is, certainly, lower with rent stabilization. But, there's the opportunity, if it was removed, then the value would be --

THE COURT: Of course, yes.
A. Yes.
Q. And what is your opinion as to what type of value was used in those years?
A. Clearly, "as if" values were used in those Statements of Financial Condition.
Q. Why?
A. They presumed a situation that didn't exist; from the standpoint, while there were plans to develop a property and build houses, those did not exist and they are future conditions that were expected to be happening at the property.
Q. All right. And then, shifting gear for a moment, did you have an opportunity to review a 2010 Oxford appraisal for a Trump Park Avenue?
A. Yes.
Q. And what is your understanding of the appraisals valuation of the rent stabilized units in that appraisal?
A. There were evaluations that assumed that they were always rent stabilized. And then, there was another evaluation perspective that parts of them would not be rent stabilized.
Q. And did you have an opportunity to review -- let me withdraw that.
In your experience, why are rent stabilized units not necessarily roadblocks for a developer?

Page 5968
(Whereupon, the following proceedings was stenographically recorded by Deborah Rothrock.)

MR. FIELDS: May I have a moment your Honor. THE COURT: Sure.
(Whereupon, there is a pause in the proceedings.)
MR. FIELDS: No further questions at this time.
THE COURT: Nothing further, okay.
Will there be cross-examination?
MR. AMER: I have a few questions. THE COURT: You may proceed. MR. AMER: Thank you.
THE COURT: Please proceed.
MR. AMER: Thank you, your Honor.

\section*{CROSS-EXAMINATION}

\section*{BY MR. AMER:}

Q Mr. Chin, we have not met before. My name is Andrew Amer. I'm with the Attorney General's office. I have a couple of quick questions first on your rates.

You mentioned you were charging \$550 hour, correct?
A Yes, correct.
Q You are engaged through Ankura, correct?
A Yes.
Q They are charging for your time \(\$ 850\) per hour?
A I believe so, yes.
Q I think you said you're close to thousand hours; is that right?
A Yes.

1 Q So for your expert work in this case Ankura has charged almost \(\$ 850,000\), is that right?

A That's my understanding.
4 Q You confirm for us that you're not accountant, correct?
5 A Yes.
6 Q And you have never worked as a banker, correct?
7 A Correct.
8 Q Now, I believe in connection with preparing your May 9 expert report you reviewed accounting literature, right?
        A Yes.
        Q And among the accounting literature you reviewed was
    AASC 274 which governs personal financial statements; is that
    right?
        A Yes, correct.
        Q You agree that pursuant AASC 274 personal financial
        statements are required to present assets at estimated --
            MR. FIELDS: Objection. Outside the scope of
        direct examination. The Court limited my questions about
        accounting because of the witness' knowledge of accounting.
            So I would respectfully request that the Court also
        limit the Attorney General's ability to examine him over
        accounting and accounting standards.
            THE COURT: I think your questions were generally
        what is accounting or what do you think about accounting --
        MR. FIELDS: My question was what his understanding
-F. Chin-Cross-Defendant-by Mr. Amer-

Page 5972
was of accounting principles and the Court said I could not ask him that question. So now --

THE COURT: I stand by that one. What kind of question is that: What is your understanding of accounting principles?

MR. FIELDS: As I explained, your Honor, I was laying a foundation for what his knowledge of accounting was. And now Mr. Amer is asking him about accounting standards. After the Court limiting me from being able to ask him accounting standards, it is outside the scope of direct.

THE COURT: You want to risk reversal?
MR. AMER: The witness confirmed he viewed this in coming to his opinions. And he's giving testimony about the financial statements here. I'm asking him about the financial statements.

THE COURT: Objection overruled.
MR. AMER: Could I get read back?
THE COURT: Read back, please.
(The record was read back by the court reporter.)
Q -- present assets at estimated current value. Right?
A Yes.
Q And when you were reviewing the financial statements, you had in mind a definition of what estimated current value was, didn't you?

A Yes.
Q And let me show you from the Parties' 202 statement, Plaintiff's Exhibit 3041. It is Paragraph 31, up on the screen.

You see it says (Reading:) GAAP defines estimated current value as, quote, the amount at which the item could be exchanged between a buyer and seller each of whom is well informed and willing and neither of whom is compelled to buy or sell. And that is the undisputed fact in this case.

Is that the definition you had in mind for estimated current value when you were preparing your expert opinions?

MR. FIELDS: Objection, same objection.
THE COURT: You're comparing apples to elephants. I really don't understand. Nothing somebody could say, you keep repeating it because I can't remember your exact question:

What is your understanding of accounting? Is that the question?

MR. FIELDS: Yes, I asked basically what he knew about accounting. Now we're asking him about GAAP and he's not been qualified as an expert in accounting. So...

THE COURT: Because he said he used it, he knew this.

MR. FIELDS: But the Court prohibited me from asking those questions. Now the Attorney General is cross-examining him on it.
-F. Chin-Cross-Defendant-by Mr. Amer-
Page 5974
THE COURT: If you had asked him: What is your understanding of GAAP through 274, that might have been different. But what is your understanding of accounting? If you did not follow-up in the right way, I'm sorry.

MR. FIELDS: Could I have a standing objection to this line of questioning and anything about accounting, please.

\section*{THE COURT: Of course.}

MR. AMER: Could we get a read back.
(Whereupon, the requested portion of the record was read.)
Q You see in this paragraph it says (Reading:) Estimated current value is, quote, the amount at which the item could be exchanged between a buyer and seller each of whom is well informed and willing and neither of whom is compelled to buy or sell.

Is this the definition you had in mind for estimated current value when preparing your opinions?
A May I ask, is this the exact quotation because it is in quotes because I don't know where.

Q This is what the parties have agreed is the definition of estimated current value.

MR. FIELDS: I have an objection, that is just false. That is a definition of estimated current value. We have spent days and days with several experts here
F. Chin-Cross-Defendant-by Mr. Amer- Page 5975

1 discussing how estimated current value is applied, what

Page 5976
don't have to.
MR. AMER: Let me respond. If we have to have another round, I will excuse the witness. I think the witness should have been excused by Mr. Suarez before he gave that objection.

THE COURT: I agree.
MR. AMER: My question was whether this definition was what he had in mind. He could say yes or no if he doesn't want to agree to it.

THE COURT: That is what I say. The idea that well, this is just one definition of estimated current value. That is not what the response says. It doesn't say one definition, it says undisputed.

Do you need the question said or read again?
THE WITNESS: No, I was just, you know, it is quoted. I don't know. I don't know. It is taken out of context. I want to make sure. It would be nice to see the document where this came from.

THE COURT: You don't need to see the document. The question is: Is this the definition that you were using in your valuations?

THE WITNESS: I had many definitions in mind. THE COURT: That is the answer.
\(Q \quad\) Was this one of them?
A Yes.

MR. AMER: Let's put up Plaintiff's Exhibit 756 in evidence. This is Statement of Financial Condition for 2016.
(Shown.)
Q This is one of the statements that you reviewed, right?
A Yes.
Q Let's go to Page 5 of this exhibit. Let's look at the third paragraph. The first sentence of this paragraph says: "Assets are stated at their estimated current values." Let me stop there.

You understood when you read this that it was representing to the reader that the assets contained in this statement were estimated current values, right?

MR. FIELDS: Objection, relevance to what he understood and it was suggesting to the reader. Lack of foundation as well and speculation.

THE COURT: I just want to go back a second about something that irked me.

Mr. Amer asked the witness before: Was this the definition you were using? Something like that. All of a sudden Mr. Suarez says; well, there are several definitions.

What's the answer?
The answer is, well, there were several definitions.

Please next time let's have the witness excused.
-F. Chin-Cross-Defendant-by Mr. Amer-
Page 5978
Could we have a readback or Mr. Amer, do you want to rephrase, either way.
Q When you reviewed this statement --
THE COURT: So you're withdrawing.
MR. AMER: I'll rephrase it and with draw.
Q Mr. Chin, when you reviewed this statement of financial conditions, did you understand that the statement was representing to the reader of the statement that the assets contained in the statement were being presented at their estimated current values, yes or no?
A Yes.
Q And one of the definitions you had in mind when reviewing the statement for estimated current values, was willing buyer willing seller that we had on the screen before, correct?
A Yes, that is one element.
Q And am I correct that it is your opinion that there are various methods or techniques that can be used to value properties for a personal financial statement?

A Yes.
Q Would you agree regardless of what method or technique one uses to value properties for personal financial statement, at the end of the day, the resulting value must be the amount at which the asset would be exchanged between a willing buyer and a willing seller both well informed and neither of whom is
compelled to buy or sell; yes or no?
MR. FIELDS: Objection. Speculation. Lack foundation.

THE COURT: Overruled.
A No. Let me explain --
Q No.
Let me show you some testimony from Jason Flemmons who is another expert for the Defendants in this case. I'm going to put up page 4495 of the trial transcript, lines 4 to 11.

Again, this is one of the Defendants' own experts in this case. (Reading:)
"QUESTION: Now, if you are going to use one of those techniques that we were discussing AASC 274 , would still require that number reflect the amount at which an item could be exchanged between a buyer and a seller each of whom is well informed and willing and neither of whom is compelled to buy or sell, is that correct?
"ANSWER: That is the definition of current estimated current value, so, yes."

Do you disagree with Mr. Flemmons' response here?
MR. FIELDS: Objection, your Honor. We're now impeaching this non-accountant expert.

MR. AMER: You need to excuse the witness, I think, your Honor.

MR. FIELDS: Improper impeachment, impeaching a

\section*{-Proceedings-}

Page 5980
non-accounting expert with an accountant's opinion. THE COURT: Let's excuse the witness. (Witness exits.)
(The following the heard outside the presence of the witness.)

THE COURT: You know, Defendants, you can't object just because you don't like what is happening. It is not impeaching, it is asking him whether he agreed or disagreed with Mr. Flemmons. It doesn't make it an impeachment.

MR. FIELDS: Respectfully, how could this witness who has not been qualified as an expert in accounting be asked to render an opinion about whether he agrees or disagrees with an accounting expert. It seems widely unfair.

THE COURT: He asked whether he agreed or disagreed with this statement.

MS. HABBA: Your Honor. Sorry, I'm a little bit lost. I think if Mr. Amer could give us some direction here as to what we're doing, how much we're going into accounting, so that we don't have to go back and forth. He's not accounting expert as my collogue said. If he's going to talk about things that are within the scope of what we did on direct, that's one thing. But we're outside of the scope now.

I have to make record that this is completely
outside the scope and you did mentioned that you did not want him to be qualified as an accountant and all that, that is on the record, we checked it again. This is completely improper.

I'm not sure what the purpose is, he's not a rebuttal expert. What are we doing?

Maybe Mr. Amer could let me know while the witness is not here so what we're doing and we can finish him today.

MR. AMER: The last thing you're going to get from me is a road map to my cross-examination.

MS. HABBA: He's not here to rebut an accounting expert.

MR. AMER: You did not offer him as an accounting expert --

MS. HABBA: Thank you for recognizing THAT.
MR. AMER: So what --
MS. HABBA: Excuse me?
MR. AMER: So what.
MS. HABBA: There are court rules that I follow.
You can't ask whatever you want of an expert that wasn't qualified as an accounting expert.

THE COURT: His whole testimony was about valuing real estate. Now we're asking him how he values real estate and you don't like the answer.

MS. HABBA: I have no problem with the answers,
-F. Chin-Cross-Defendant-Mr. Amer-
Page 5982
he's our expert. Keep going. I'll keep objecting.
THE COURT: His answer is different from Mr. Flemmons' answer.

Mr. Amer asked the exact question here and he's getting totally a different answer.

At the end of the day, estimated current value is the willing buyer willing seller, et cetera, et cetera. I'm saying that without a jury, obviously.

Let's get the witness back.
Any outstanding objection is overruled.
You can have your standing objection.
(Witness enters.)
MR. AMER: May I proceed?
THE COURT: Please.
(Continued)

\section*{CROSS-EXAMINATION:}

MR. AMER: We can remove that from the screen.
Q Mr. Chin, am I correct that there are different methods that can be used to value a property some of which you've called "as if" methods and others that you've called "as is" methods.

Did I understand you correctly?
A Yes, sir.
Q Would an example of an "as is" method value of property be taking net operating income and dividing by the cap rate for commercial building?

Q Am I correct that an "as if" method would be to value a future development to build homes on an empty lot?
A Yes.
Q And that's the situation that occurred with Seven Springs, right?
A You're correct.
Q And to calculate future profit from a planned
development like Seven Springs, am I correct that you need to come up with an estimated future projection of what you can sell the homes for, yes?
A Yes.
Q And then you would need to subtract out the costs associated with building out those homes, right?
A One could. It's not mandatory, but one could do that.
Q Well, are you saying that you can do an "as if" value for future development without taking into account the costs that you incur to actually build out that development; is that your testimony?
A Yes. If one is looking at the exit value of how much I could realize from the sale of the homes, you would not deduct out costs.
Q Would you at least need to know when the homes would be built?
A There's an expectation as to timing of when that might
    discount factor to that projection, yes?
    A If you wanted to get to "as is," if you were trying to
    do that, yes.
    Q That was not my question.
            If you wanted to get to a current estimated value,
    wouldn't you have to apply a discount factor to the projected
    future profit?
    A It is one option, yes.
    Q Are you saying you don't have to do that?
    A Are we speaking about a statement of financial
    condition?
    Q For a statement of financial condition, yes, in order
    to come up with an estimated current value for future projected
    profit from a development don't you need to apply a discount
    factor to bring the future profit to present value?
    A No.
        MR. AMER: Let's pull up --
    Q You gave a deposition in this case, correct?
    A Yes.
        MR. AMER: Why don't we pull up your deposition and
        look at Page 119.
            (Shown.)

\section*{Chin-Cross-Defendant-Mr. Amer-}

Page 5984
hit the market, yes.
Q If you wanted to express the future projected profit of development as a current value you would need to apply a

A If you wanted to get to "as is," if you were trying to do that, yes.

If you wanted to get to a current estimated value,
If you wanted to get to a current estimated value,
wouldn't you have to apply a discount factor to the projected future profit?
A It is one option, yes.
A Are we speaking about a statement of financial ondition?
Q For a statement of financial condition, yes, in order to come up with an estimated current value for future projected factor to bring the future profit to present value?
A No.
MR. AMER: Let's pull up --
Q You gave a deposition in this case, correct?
A Yes.
MR. AMER: Why don't we pull up your deposition and look at Page 119.
(Shown.)

A Yes, one method.

Q I'm going to read to you from line 6 to line 13:
"QUESTION: In order to make projections with current value one would need to apply discount rate, yes?
"ANSWER: If one were to get it to -- excuse me, I'm sorry -- a current value, one would discount future estimates and projections into a current value."

That was your sworn testimony at your deposition, correct?

MR. FIELDS: Objection. He asked today about estimated current value and this is talking about current value. We're talking about two different values.

THE COURT: What difference does the word "estimated" mean? These are all estimates. That is one of your big points in this whole litigation, all estimates.

MR. FIELDS: Your Honor, the estimated current value is a term of art that I know the Court has heard ad nauseam about at this trial. And current value could be viewed as --

THE COURT: Let's excuse the witness.
MR. AMER: My question was whether this was his sworn testimony, yes or no.

THE COURT: All right. Start with that. Objection overruled. This is his sworn testimony.

MR. FIELDS: You can't impeach him with something that is not a prior inconsistent statement.
-F. Chin-Cross-Defendant-Mr. Amer-
Page 5986
MR. AMER: That's his redirect.
MR. FIELDS: He asked about estimated current value. This is not about estimated current value.

THE COURT: Was your question: Was this your testimony at your deposition?

MR. AMER: Sworn testimony at his deposition. -
THE COURT: Thank you.
Objection overruled.
If you keep objecting like this, I'll have you taken out of the room. Get that.

MR. FIELDS: I'm trying to represent my clients, I'm certainly not trying to inflame the Court.

THE COURT: The question was a simple yes or no. If you want to object to the follow-up, object to the follow-up.

Ask it again, please.
Q Was this your sworn testimony at your deposition, Mr. Chin, yes or no?

A Yes.
MR. AMER: We can take that down.
Q For Woodbridge, you gave us testimony about doing a sellout of 15 luxury homes. Do you recall that testimony?

A Ido.
Q And were those homes already built?
A No.

1 Q When -- if you were to value those 15 luxury homes for purposes of a personal financial statement, would you agree that you would need to determine how long it would take you to build those homes and then discount to present value if you were presenting in your financial statement estimated current value of that development?
A No. Let me explain.
Q I don't need you to explain, I just need your answer; yes or no?

THE COURT: The answer is no, there could be re-direct if the Defendants want to ask for the explanation. Q Now, did you review, I think you said you reviewed the supporting date spreadsheets when forming your opinion, correct? A Yes.
Q Did you review --
MR. AMER: Let's put up Plaintiff's 708 in native,
which is the 2013 Jeff supporting data spreadsheet, in evidence.
(Shown.)
\(Q\) In this one of the spreadsheets you reviewed?
A It looks like it, yes.
MR. AMER: And if we go to Row 646.
(Scrolling.)
Q You'll see that this is the section that values the seven mansions that had been approved but not yet built on the

Chin-Cross-Defendant-Mr. Amer-
Page 5988
property.
Do you see that?
A Yes.
Q It assumes a sales price for each residence of \(\$ 35\) million, correct?

A Correct.
Q And it assumes a cost to develop each residence of \(\$ 12\) million for net profit 23 million per mansion, correct? A Yes.
Q And could you tell me from this spreadsheet or any other material you've reviewed when it was projected that the first mansion will be built and ready for sale?

A It does not appear on this spreadsheet.
Q My question was little different, whether you could tell from this spreadsheet or any other material you've reviewed.

A Not that I recall.
Q And it could take a year or ten years to sell the first home, right, you don't know based on the information you've reviewed, correct?

A Correct.
Q Could you tell me from this spreadsheet or any other material you reviewed how long it was projected to take for all seven mansions to be hold?

A It wasn't evident, no, I could not.

Q So it could take a year or ten years to sell all seven homes, you don't know from any of the information you reviewed, correct?
A Correct.
Q Let me show you Mr. McConney's testimony discussing valuation of the seven mansions at Page 717 of the trial transcript beginning line 14 :
"QUESTION: Am I correct that the value of \$161 million for the seven homes in Bedford does not apply any discount factor to take into account how long it would take to construct the infrastructure, build the homes and then sell the home for \(\$ 35\) million each?
"ANSWER: That's correct.
"QUESTION: You didn't factor into the valuation whether the homes were going to be built today, tomorrow or in a number of years?
"ANSWER: Correct.
"QUESTION: If it took five years to complete the new homes and they were sold two years after that, your valuation doesn't account for that at all, correct?
"ANSWER: Correct.
"QUESTION: Can we agree that this \(\$ 161\) million attributable to these seven homes is by necessity going to be future income because the homes don't exist as of the date of these valuations?
-F. Chin-Cross-Defendant-Mr. Amer-
Page 5990
"ANSWER: Correct.
"QUESTION: You have treated for purposes of this valuation the profit of 23 million per home for all seven homes as if it were realized immediately as of June 30th in each year?
"ANSWER: Yes."
Mr. Chin, were you aware of that Mr. McConney followed this approach in valuing the seven mansions at Seven Springs?

A No, I'm not aware of what McConney thought or said or did.

Q And in your expert opinion does the method described by Mr. McConney to value the seven mansions result in an amount at which the empty lots could be exchange as of June 30, 2013, between a willing buyer and willing seller each of whom is well informed and neither of whom is compelled to buy or sell; yes or no?

MR. FIELDS: Objection.
THE COURT: What's the objection?
MR. SWAREZ: Outside the scope and he's not offered as an accounting witness.

THE COURT: Mr. Amer, go ahead.
MR. AMER: The witness has testified about Seven Springs and about valuations of properties in the Statements of Financial Condition which he has reviewed. This is perfectly proper cross-examination.
Q. Is the method, in your expert opinion, that Mr. McConney used to value the seven mansions and Seven Springs a proper method?
A. It's a method.
Q. That wasn't my question whether it was a method. My question was, is it a proper method that you, as an expert in the field, would endorse?
A. No, it would depend on the circumstances that I was being asked to evaluate.

As I mentioned before, at Woodbridge, I looked at the exit prices of houses. And, that was the only consideration.
Q. We have a context for this description. It's the seven mansions at Seven Springs.

And you've reviewed the financial statements in connection with how that valuation was done, right?
A. Yes.
Q. And you've reviewed the Jeff Supporting Data Spreadsheet on that property, correct?
A. Yes.
Q. And we've just looked at Mr. McConney's testimony as to the method he employed, right?
A. That's his testimony, correct.
Q. And so, for Seven Springs, am I correct that you, as an expert, would not endorse his method?

\section*{Yes or no? \\ MR. SUAREZ: Same objection. \\ THE COURT: Overruled.}
A. No, I would use, potentially, different methods besides that approach. That is one approach, of many, of looking at a, to-be-developed project that was proposed for homes. And it depends if you're looking at it in the future, without cost, at a different time period. There's many ways to approach it.
Q. I will ask it a slightly different way. As an expert, do you think Mr. McConney's method for valuing the seven mansions at Seven Springs was reasonable "yes" or "no"?
A. Yes. It is one method.
Q. I didn't ask if it was a method. I asked you if you thought it was reasonable. Do you think it's reasonable "yes" or "no"?
A. No. It's one of those that is of many different dimensions and perspectives evaluation.
Q. Let me ask you some questions about appraisals which you testified about on direct.

You identified a number of different types of appraisals.

Do you recall that?
A. Yes.
wouldn't it incorporate "as if" valuation to the extent that the highest and best use is a use that is not the current use of the property?
A. The highest and best use contemplates all sorts of potential uses; legal, financial, regulatory and environmental. And, it does contemplate a variety of different potential uses; nothing specific.

So, it does contemplate what possible uses are for a property. It isn't expressed specifically as "as if" and it is available to a property owner as of the date of valuation.
Q. Well, when you said that a market value appraisal is an "as is" appraisal --

\section*{A. Yes.}
Q. -- I mean, that's wrong to the extent that the highest and best use that the appraiser takes into account is a use that's not the current use of the property, right?
A. No, I disagree. The reason for "highest and best use" is to look at its potential and alternatives of use despite its current use. And that reflects the price that would be paid for that potential as of the date of appraisal.
Q. Do developers get to value a report for a use that's higher and better than the highest and best use?
A. Not always.
F.Chin - Defendant - Cross/by Mr. Amer

Page 5996
Q. What does it mean to say that a use a higher and better than the "highest and best use" as appraisers use that term?
A. So, appraisers look at "highest and best use" in two different ways. As is or as vacant or as improved. They will look at -- sometimes a situation will exist or certain improvements on the property that don't put a property to its highest and best use as a vacant.

So, for instance, if a gas station is on a corner site and there are mid rise new apartments all around it, the "highest and best use" of that site, as a vacant, would be for that type of higher and better use.

As improved, that gas station might still be economically productive. And, that could be the highest and best use as it's improved.
Q. Is "as improved" synonomous with "as if"? Yes or no?
A. No.
Q. Are you aware that there is an appraisal for Seven Springs?
A. Are you referring -- yes, there is one regarding the conservation easement.
Q. Let's go ahead and look at Defendant's Exhibit 1016 which is in evidence already.

THE COURT: Five minute warning.

MR. AMER: I'm just waiting for them to get your copy.
Q. You'll see there are page numbers on the lower left. So let's go to -- if you go to page two, you'll see this is an appraisal of Seven Springs estate as of December 1, 2015.

Do you see that?
A. Yes, sir.
Q. Have you reviewed this appraisal in connection with your expert work in this case?
A. Yes.
Q. If we go to page five, if you look at the very top line, we can agree this is a market value appraisal, right? It says "The following opinions of market value."

Do you see that?
A. (No response.)
Q. Top line.
A. Oh, yes. Thank you.
Q. So this is a market value appraisal, right?
A. Correct.
Q. And if we look at the glossary, which is page 65 , for the definition of "market value," that's a definition of "market value" and "appraisals" that you're familiar with, correct?
A. Yes. This one says, "The agency's appraisal
regulation." So, I'm not familiar with the specific agency.
Q. The definition is "the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale the buyer and seller each acting prudently and knowledgeably and assuming the price is not effected by undue stimulus."

Do you see that?
A. Yes.
Q. Is that, in your opinion, synonomous with the willing buyer, willing seller definition that -- was one of the definitions you had in mind when reaching your opinions.
A. (No response.)
Q. Yes or no?
A. No. Only from a standpoint that this is a specific agency that has its own definition. And I know various governmental agencies, banks, have different definitions of value which are very similar sounding. And similar sometimes in content but, differ slightly.
Q. Doesn't this definition of market value include "as if" evaluations?
A. No. This one is based on "as is".
Q. This one is based on "as is"?
A. It appears to be.
Q. Let's go to the prior page. You see there is a separate definition at the top for "as is" market value?
A. Yes.
Q. So, isn't it the case that there is "as is market value" and then there's "market value" in this glossary? There are two separate terms defined differently, yes?
A. It does appear that way, two different agencies have different -- this is the office of the -- Office of Comptroller of Currency and the other one says, "agency." And, I'm not sure what agency that is.
Q. And the "as is market value" says, "The estimate of the market value of real property in its current physical condition use and zoning as of the appraisal date." That's your "as is" valuation, correct?
A. Correct. That's what's defined.
Q. And market value, which is defined on the next page, which talks about buyer and seller, that includes the concept of "as is" because, it can take into account future development of the property; isn't that right?
A. Its embedded, yes. It's embedded in the "highest and best use" analysis.
Q. And if you go to the prior page, there's something known as hypothetical conditions. You know what those are correct, right?
A. Yes.
Q. If we look at that, a condition directly related to a specific assignment which is contrary to what is known
improved" and under "as improved" it says, "A subdivision of the subject parcels and development of a single family residential development, including 24 vacant residential lots."

\section*{That's "as if," isn't it?}
A. It appears to be, yes.
Q. And if we go to "highest and best use" in the definition of it on page 33, of the appraisal, that's the section that defines "highest and best use," correct?
A. Yes.
Q. And, if we look at the "highest and best use" of the property as vacant, that would apply to the vacant lots that are going to be developed into the 24 homes, correct?
A. I believe so, yes. That's what I recall.
Q. And under "highest and best use" the criteria is that it must be, legally, permissible, yes?
A. Yes.
Q. It must be, physically, possible, yes?
A. Yes.
Q. And it must be financially feasible and maximally productive, correct?
A. Correct.
Q. Mr. Chin, does a developer, in coming up with a value, an "as if" value, have to comply with those same criteria; namely, does the developer's, "as if" value need
by the appraiser to exist on the effective date of the assignment results but, is used for purposes of the analysis.

That's "as if", right?
A. Correct.
Q. So, this market value appraisal includes "as if" valuation, doesn't it?
A. No.

MR. AMER: I don't know if I'm at my five minutes yet.

THE COURT: Basically, yes. All right. See you all at 3:55.

And, I'll order the witness not to discuss the case or his testimony.

THE WITNESS: Understood. Thank you.
(A recess was taken.)
(After the recess the following occurred:)
THE COURT: Please, continue.
MR. AMER: Thank you, your Honor.

\section*{CROSS EXAMINATION}

BY MR. AMER:
Q. Mr. Chin, I want to ask you a few more questions about the Seven Springs appraisal. If we go to page seven of the appraisal, and look at the section entitled "highest and best use," you see it says "as vacant" and then "as

Chin - Defendant - Cross/Mr.Amer
Page 6002
to be based on a use that's, legally, permissible, physically possible and financially feasible and maximally productive?

Yes or no?
A. No.
Q. So a developer's "as if" value can be based on a use that is, legally, impermissible; is that your testimony?
A. No.
Q. So, a developer's "as if" value has to be based on a use that is, legally, permissible, is that your testimony?
A. No.
Q. Okay.
A. May I explain?
Q. No.

And a developer's "as if" value, in your opinion, can be based on a use that is, physically, impossible is that your opinion, yes or no?
A. No.
Q. So, a developer's "as if" value has to be based on a use that is, physically, possible, yes?
A. Yes.
Q. And a developer's "as if" value, does it need to be based on a use that's, financially, feasible and maximally productive.

Yes or no?
A. No.
Q. Now, if you turn to page 37, you'll see there is a scenario, "One approach, before donation, that envisions a subdivision sellout analysis."

Do you see that.
A. (No response.)
Q. Page 37?
A. Yeah, I'm sorry. I was looking at the Bates number versus the -- sorry. My apologies. Yes.
Q. And that's an "as if" valuation method, correct? "Subdivision sellout analysis?"
A. Yes.
Q. And, if we turn to page 51, you'll see there's a further discussion of the sell-out analysis. Do you see that?
A. Yes.
Q. And, if you'll turn to the next page, am I correct that the sell-out analysis projects, over five years, the number of homes that would be sold in each year, right?
A. Yes.
Q. And, on the next page, the appraiser does a present value analysis to come to the sell-out analysis value, correct?
A. Correct.
F. Chin - Defendant - Cross/Mr.Amer

Page 6004
Q. And is it your testimony, expert testimony, that, a developer doing an "as if" value does not need to do that calculation?
A. Yes, it is my opinion.
Q. So, they can just come to a value without projecting out over how many years it would take to build and sell the homes.

Is that your opinion?
A. Yes. In the context of the Statement of Financial Condition and that representation, yes.
\(Q\). In your view, that still gets to an estimated current value.

Yes or no?
A. Yes. According to the Statement of Financial Condition and the conditions of that.
Q. Okay. Does that get to a value that a willing buyer and a willing seller would exchange the property for in your view?

\section*{A. No, not necessarily.}
Q. And, it's your view that a developer doing an "as if' value, doesn't need to calculate the present value as of the date of the statement of financial condition; is that right?
A. Correct.
Q. And, is it your opinion that even though there's
no present value calculation done, the developers "as if" value is still an estimated current value?
A. Yes, for purposes of the Statement of Financial Condition.
Q. And, is it your expert opinion that, that value is what the property would be exchanged at between a willing buyer and a willing seller, both of whom are fully informed and neither of whom is under a compulsion to buy?
A. No, not necessarily.
Q. That's because any willing buyer, who is fully informed and not under a compulsion to buy, would calculate the present value, right?
A. They may. They may not.
Q. Can you think of any circumstances where a willing buyer would agree to pay, based on a future profit, that's not discounted to present value?
A. Yes, I could.
Q. What would that be?
A. Something that might be a staged transaction. So a price is agreed upon now, with basic hurdles, to perform and construct certain improvements over time.
Q. But, if you're valuing the property as of the date of the financial statement and you're saying that's the value that a willing buyer would pay, who's fully informed and not under a compulsion to buy, wouldn't you agree that,

Chin - Defendant - Cross/Mr.Amer
Page 6006
that buyer would insist that any future profit, that's part of the value, be discounted to the present value of the date of the financial statement?
A. No, not necessarily.
Q. Let's turn to the concept of a developers perspective of value. And we've been talking a little bit about that.

In your expert opinion, does there need to be a reasonable, factual basis for the developer's perspective of value that he puts in a Statement of Financial Condition?
A. Yes.
Q. And would you agree that it would be improper for a developer to put in a Statement of Financial Condition a perspective of value that is based on pie in the sky dreams of concocted value?
A. I would agree with that.
Q. Let's talk about Trump Park Avenue.

You testified about that on direct, right?
A. Yes.
Q. And you understand that Trump Park Avenue is one of the properties valued in Mr. Trump's Statement of Financial Condition from 2011 to 2021, right?
A. Yes.

THE COURT: A little closer to the mike a little louder; one or the other.

MR. AMER: Let's put up 708 native, which is the 2013 Jeff Supporting Data Spreadsheet in evidence that we were looking at before. And if we could go to row 166 , which is where - that's where trump@parkavenue begins.

If you look at row 172, you'll see it says, "unsold units." And, in 2013, the value for the unsold units is almost \(\$ 327\) million.

Do you see that?
A. Yes.
Q. And, can we agree that, that is nearly the entire total value of the property which is shown on row 187 at 346.1 million?
A. Yes.
Q. And, you're aware that some of the unsold units that make up the value, in row 172, are a part and subject to rent stabilization laws, right?
A. Yes.
Q. And I believe you testified that you have your own personal business experience evaluating a rent stabilized apartment in New York City, correct?
A. Or selling it, then valuing it.
Q. And that is when you were CEO of Woodbridge; is that right?
A. Correct.
Q. And the company owned the rent stabilized apartment that was located on the Upper East Side; is that right?
A. Yes, sir.
Q. Do you remember the address of the building?
A. I don't. But, I am happy to get it for you.
Q. And, am I correct that your company purchased the shares to own that co-op apartment, in 2019, on the basis of an appraisal that did not disclose the fact that the apartment was subject to rent stabilization laws? Yes?
A. No, I believe we made a loan to someone on the basis of that appraisal. And then, I believe the borrower defaulted. So then, the company received, essentially, a deed in lieu. And that's how we received the title to the unit.
Q. But the appraisal did not disclose that the unit was rent stabilized, right?
A. That was our argument when we were looking back and doing our forensic analysis of this transaction.
Q. So, you made the loan based on the appraisal believing that the apartment was a free market apartment only to later find out that it was rent stabilized; is that right?
A. I didn't make the loan. This pre-existed my
tenure at the company. It was done many years before.
Q. Well, isn't it a fact that your company considered suing the appraisers and the attorneys who were involved in the sale of the unit based on the fact that the appraisal didn't disclose that the apartment was rent stabilized, right?
A. Yes.
Q. And, I think you mentioned this but, let's just confirm. During negotiations to buyout the tenant, the tenant indicated that she had relatives, I think including grandchildren, right, who were going to come move into the apartment?
A. Yes, or had been, actually, having rooms there.
Q. And you understood, at the time, that there were succession rights to tenancy with respect to rent stabilization, right?
A. Yes.
Q. And you mentioned the terms of the buyout consisting of a payment of, approximately, half a million dollars to the tenant, is that right?
A. Correct. Might have been 525,000 . Somewhere in that area.
Q. Aren't you leaving out another component of the buyout?
A. I don't believe so.
Q. Didn't the buyout also include a profit sharing arrangement with the tenant if the sales price hit a certain point?
A. Oh, yes. You're correct.
Q. Uh-huh. Okay. So you paid the tenant a little \(\$ 500,000\) but, you also agreed to a profit sharing arrangement, with the tenant, based on the sale price, correct?
A. If a sale price exceeded a certain amount then, the tenant would participate in that amount over a hurdle rate that we had established.
Q. Do you recall if the ultimate sale price, which I believe you said was almost \(\$ 2\) million, triggered the profit sharing arrangement under the buyout deal?
A. I believe it did.
Q. And so, I think you said the net profit was somewhere between 1.3 and 1.5 million after taking into account the amount you had to pay for the buyout, right?
A. That as well as closing costs and I think we had some legal fees as well. It was the net recovery that we could get back from the sale.

So we look at all the different costs besides just the buyout; the legal cost, I think we had to replace an electric panel and a couple of other things.
Q. So I'm just trying to understand the math. If the
F. Chin - Defendant - Cross/Mr.Amer Page 6011

1
buyout was slightly over \(\$ 500,000\), and there was a profit share and you sold the unit for just under 2 million, the net profit had to be closer to the 1.3. It couldn't have been 1.5 , right?
A. I don't recall the exact closing price because, it closed after I left the company. I think there was some concession that might have been made to the buyer. So, I'm not sure what the exact proceeds are.
Q. Do you agree that if an owner of a rent stabilized apartment wanted to value the apartment, for purposes of a personal financial statement, based on what the apartment would sell for on the open market, the owner would need to include in the value calculation the cost to remove the legal restriction to the sale that exists under rent stabilization laws?
A. Yes. If you use the exit price being unencumbered as the amount you would deduct that from.
(Whereupon, the following proceedings was stenographically recorded by Deborah Rothrock.)

Q Let me ask you a hypothetical:
Consider a situation where someone owns 20 apartments in a New York City building and ten of them rent stabilized.

Would you agree if the owner values all 20 apartments
in his personal financial statement to be provided to a bank as
if they are all free market units without disclosing that half
are subject to rent stabilization laws, that would be a pretty
significant omission that should be disclosed; yes?
A In that hypothetical, I would agree with that.
MR. AMER: Let's go ahead and put up Plaintiff's
Exhibit 708, native.
(Shown.)
Q Did you review how the figure in Row 172 was derived?
A I don't recall.
Q Do you have any understanding as you sit here today as to how that value of just under \(\$ 327\) million was calculated?

A I don't recall.
Q Have you reviewed any of the testimony of Mr. McConney given at the trial about how the value was calculated?

A No.
Q Let me go ahead and show you his trial testimony at transcript Page 711, starting at line 7. And it goes over to the section on the following page as well:
"QUESTION: Mr. McConney, you were aware that Park Avenue had these rent stabilized units when you prepared the

\section*{valuations, correct?} "ANSWER: Yes."
Then we tick off the 12 units that were rent stabilized and then picking up line 17:
"QUESTION: And you valued them without any regard to their rent stabilized status; is that correct?
"ANSWER: I didn't valve them, TIR valued them, but I believe that's correct.
"QUESTION: You put them into your spreadsheet that is goes to Donald Bender; is that correct?
"ANSWER: Correct.
"QUESTION: And the values you relied on when you put them in your spreadsheet and sent them to Donald Bender were the offering plan price values knowing that these were rent stabilized units, correct?
"ANSWER: Correct.
"QUESTION: And you followed the same approach for every statement you reviewed, correct?
"ANSWER: Correct.
"QUESTION: And it was intentional, correct?
"ANSWER: Correct.
"QUESTION: And it was something you discussed with
Mr. Weisselberg, correct?
"ANSWER: I believe so, yes.
"QUESTION: And he agreed that that was the way
-F. Chin-Defendant-Cross-by Mr. Amer-
Page 6014
that you were going to do it, correct?
"ANSWER: Yes. "
Do you see in this description that Mr. McConney says that the rent stabilized units were valued based on the offering plan prices?

A That is what it appears the testimony to be, yes.
Q And would you agree that by using offering plan pricing of the units without deducting the cost to remove the legal restrictions that exist under rent stabilization laws, Mr. McConney and Mr. Weisselberg inflated the valve of those units, yes?
A No, they provided a perspective of value that was based upon their analysis that was shared with Mazars.
Q So you think it is fine for them to have valued the rent stabilized apartments based on using offering plan prices without disclosing in the statements that that is what they were doing, is that your expert opinion?

A No. Mine was if it was disclosed - I don't know because I didn't read this testimony and I wasn't there, but it was disclosed to Mazars so...
Q Well --
A I would need to look at what they might have said or didn't say in their Statement of Financial Condition.

Q Do you know if it was disclosed to the reader of the 25 Statement of Financial Condition?

Page 6016
stabilized and yet were value based on offering plan prices?
Do you see that information disclosed anywhere in this paragraph?

A No.
Q Would you agree that the failure to disclose that some of the condo units were rent stabilized and yet were valued at their offering plan prices without regard to their rent stabilization status was a pretty significant omission?

MR. FIELDS: Objection. Lack of foundation. It is an accounting question.

\section*{THE COURT: Overruled.}

A It would have been helpful to include.
Q That wasn't my question.
A That was my answer but please go ahead.
MR. AMER: Could I get a readback so that I could get an answer to my question.
(Whereupon, the requested portion of the record was read.)
Q Would you agree that the failure to disclose that some of the condo units were rent stabilized and yet were valued at their offering plan prices without their rent stabilization status disclosed is a pretty significant omission; yes or no?

A No. May I explain?
Q Let me show you some testimony from your deposition.
THE COURT: He asked if he could explain.

A Not off the top of my head.
Q Well, let's look at Plaintiff's Exhibit 707 which is the Statement of Financial Condition for 2013.
(Shown.)
Let's turn to Page 10 of 25.
You'll see that has the description of estimated current value for Trump Park Avenue on the top paragraph, you see that?
A Yes.
Q And it says (Reading:) The estimated current value of 346.1 million is based upon an evaluation made by Mr. Trump in conjunction with his associates and outside professionals of the amount that he will earn as a result of the sale of the remaining condominiums as well as the residual value of the commercial space.

Can we agree there's no mention of the fact that some of the remaining condo units are subject to rent stabilization laws but were valued based on offering plan prices?
A No, it says (Reading:) As a result of the sale the remaining condominium units.

It is not explicit as to rent stabilized or not but this would infer that it says we're selling the remaining condominium units.
Q My question simply is whether this discloses to the reader of the statement that some of the units are rent

MR. AMER: No.
Q Let me show you testimony from your deposition. It's Page 168 and it starts on line 3. And this is the part of your deposition where you were discussing with my colleague the co-op that you were selling that was rent stabilized.
"QUESTION: I mean what if I'm presenting a value of a building where \(I\) own certain units and \(I\) don't disclose that some of them are subject to rent stabilization or I value them as free market?
"ANSWER: I think that's a pretty significant omission that should be disclosed."

That was your testimony in response to those questions, right?
A Yes.
Q Let me ask you some questions about 40 Wall Street.
MR. AMER: Let's go ahead and put up Plaintiff's Exhibit 1573.

\section*{(Shown.)}

Q You testified about this. This is the 2011 appraisal for 40 Wall Street.

Do you recall testifying about this on direct?
A Yes.
MR. AMER: And let's go ahead and look at Page 3. (Shown.)
MR. AMER: If we could go forward to Page 3 of the

Chin-Defendant-Cross-by Mr. Amer-
Page 6018

2 Q And I believe the Judge asked you if you saw any explanation from Cushman in this appraisal for why they choose the seven percent. Do you recall that exchange?
A I recall that, yes.
6 Q I think your testimony was that you didn't see any explanation, right?

\section*{A Correct.}

MR. AMER: Could you go a little further down on the page.
(Scrolling.)
Q You see the paragraph that is just below the bottom box that says Statistics. I'll read it:
"The current market conditions require higher rates as a result of the recent credit market correction in the context of the direct capitalization method, a going in rate of seven percent is considered reasonable compensating the typical buyer for the risk inherent in investing in this building."

Do you see that?
A Yes, I do.
Q Isn't that explanation of why the appraiser chose the seven percent, just yes or no?

A It is not, No.
Q Now, we looked at the 2015 appraisal which is Plaintiff's Exhibit 118. If we could pull that up. And

Chin-Defendant-Cross-by Mr. Amer-
Page 6020
Page 170, there is a selection here of a cap rate that was within the range of the high and low, right?

A Yes.
Q I believe your testimony was that this appraisal was
much more accurate and in line with market information than the earlier appraisals, is that right?

A Correct.
MR. AMER: Could we go ahead and pull up
Plaintiff's demonstrative Exhibit 3 and go to the page that
has 40 Wall Street.
(Shown.)
Q By the way, do you recall what the value was for the 2015 appraisal that you said was more accurate and in line with market information?

A I believe it was \(\$ 540\) million.
Q And it is the case that the value used in the Statement of Financial Condition for 2015 was nearly \(\$ 200\) million more than that 2015 appraised value, correct?

A Yes.
Q And it was almost \(\$ 250\) million more than the value used in the 2016 Statement of Financial Condition, correct?

A Correct.
Q And the Morning Star analysis also reached a value of \(\$ 540\) million, correct?

A I believe Morning Star was more like 260 million, 267
million. It cited the Cushman appraisal of 540, but I believe
their own calculation was somewhere, if I recall, 267.5 million,
something around there.
Q That is hundreds of dollars even lower than the Cushman 2015 appraisal, correct?

A Yes.
MR. AMER: We are right at 4:30.
THE COURT: Just to get more done, I was hoping to
go to 4:45. If that is impossible. Let's keep going. MR. AMER: We can.
Q On direct examination you offered your expert opinions about the quality of the 2011 and 2012 Cushman appraisals; is that correct?
A Yes.
Q And your opinions are critical of the quality of the 2011 and 2012 Cushman appraisals; is that fair?
A Yes.
Q You expressed your expert opinion that those appraisals were underestimating the "as is" values of 40 Wall Street; is that fair?

A Yes, relative to 540 and some of the analysis that I prepared.

Q Now, Mr. Chin, I think you confirmed you are a member of The Appraisal Institute, so you are what is known as MAI for short, right?

Chin-Defendant-Cross-by Mr. Amer-
Page 6022
A Yes.
Q Am I correct that as an MAI appraiser you are required to adhere to the Uniformed Standards of Professional Appraisal Practice known as USPAP for short?

A Yes, for conducting specific property appraisals, yes.
Q Am I correct as an MAI appraiser you are required to
adhere to USPAP in the preparation, analysis and reporting of appraisal results, right?

A Yes, under the USPAP standards, correct.
Q You're familiar with something known as an appraisal review under USPAP?

A Yes.
Q And I think you testified about some notable cases that you handled and you mentioned a case involving Calpers. Did I get that right?
A It wasn't a case, it was an ongoing consulting assignment.
Q And I think you said that for that Calpers assignment you reviewed dozens of appraisals; is that right?

A Yes, every quarter.
Q Were those appraisal reviews?
A They were appraisal reviews based upon an agreement with Calpers.
Q So, you understand the standards under USPAP that apply to appraisal reviews, correct?

1 A As following USPAP, correct.
2 Q And you complied, I presume, with those standards when you did the appraisal reviews for the Calpers engagement; is that right?

A Generally, I believe we had an agreement that I was doing file memoranda, that basically, I think, mimic USPAP, but it wasn't per se. I don't know if it was verbatim how bank appraisers do an individual appraisal review for very specific property.

MR. AMER: Let's go ahead and look at Plaintiff's
Exhibit 3397 which are the USPAP standards.
(Shown.)
Q Let me ask you just to confirm something.
This says that they're effective through December 31st, 2021.

Is it your understanding that these standards have been extended through the end of this year?
A I believe so.
MR. AMER: So, your Honor, if we could, I would
distribute this exhibit. This is a new exhibit, it is not in evidence.
(Handing.)
THE WITNESS: Thank you.
Q And if we could turn to Page 5 of 34 . You'll see there's a definition of Appraisal Review.

Chin-Defendant-Cross-by Mr. Amer-
Page 6024
Do you see that?
A Yes.
Q I'm going to read it: "Appraisal review when used as a noun means the act or process of developing an opinion about the quality of another appraiser's work, i.e., a report, part of a report, a work file or some combination of these that was performed as part of an appraisal or an appraisal review assignment."

Do you see that?
A Yes.
Q Because we've established that you rendered an opinion about the quality of the Cushman 2011 and 2012 appraisals, would you agree that your opinions constitute an appraisal review as defined by USPAP in this paragraph; yes or no?

A No. There is something that --
Q I just asked yes or no. You've answered my question.
So it's your view that what you did with respect to the 2011 and 2012 Cushman appraisals was not appraisal review as defined by USPAP; is that your testimony?

A Yes. In the context of the overall statement of financial condition and as I recorded in my report which was looking at the totality of a Statement of Financial Condition and the various entries for all the different properties in all the different years.
Q When an MAI does an act or process of developing an
opinion about the quality of another appraiser's work, they need to comply with USPAP Standard 4 which relates to appraisal reviews, correct?

A Yes, if there's an assignment to do a specific appraisal review.
Q And you did not believe that your critique of the 2011 or 2012 Cushman appraisals triggered your obligation to follow those standards because in your view you were weren't doing an appraisal review; is that fair?

A Correct.
Q And so you, in fact, did not follow the standards laid out USPAP for engaging in the act or process of developing an opinion about the quality of another appraisers's work, right?

A No, that is not correct.
Q Did you -- let's look at 4.3, which is on Page 30.
You see Standard 4.3 requires a certification as an integral part of the appraisal review report; do you see that?

A Yes.
Q Can we agree you did not produce a signed certification that meets the requirements of 4.3 ?
A That's correct.
MR. AMER: If you give me a minute, your Honor. THE COURT: Of course.
(Whereupon, there is a pause in the proceedings.) THE COURT: Let's go ahead.

Page 6026
MR. AMER: Your Honor, I have no further questions. THE COURT: We can break five minutes early. MR. AMER: Well, do they have re-direct?
THE COURT: Could you start your re-direct?
Are you going to have re-direct.
MR. FIELDS: I expect so and it will probably be longer than five minutes. Could we break for the evening. THE COURT: Sure.
I'll direct the witness again not to discuss his testimony or this case.
(Witness exits.)
(Whereupon, the trial stood adjourned to December 5,2023 at 10:00 a.m.)

\hline 2 & ness? & 2 & to say about how it impacted his decisions. That's \\
\hline 3 & R. & 3 & it. But, I don't think his answer was nonresponsive \\
\hline 4 & The witness just answered as to what his & 4 & THE COURT: Well, Mr. Kise, we missed you \\
\hline 5 & understanding is, and that understanding, as he ju & 5 & rday. But, I'm not going to revisit the rulings. \\
\hline 6 & testified, inclu & 6 & our statement that the question or that th \\
\hline 7 & That's consistent with what Mr. Flemmon & 7 & tatement was simply, "Yes, that's what it says," I \\
\hline 8 & ified to. That's consistent with & 8 & don't, necessarily, agree with that \\
\hline 9 & accounting experts & 9 & Mr. Amer, do you agree with that statement h \\
\hline 10 & The only thing it's not co & 10 & made? \\
\hline 11 & misleading interpretation of the definition & 11 & MR. AMER: I don't. I think the 202 \\
\hline 12 & estimate & 12 & graph was clear. I think it was undisputed. Its \\
\hline 13 & By taking a 202 Statement and saying, "Oh, & 13 & deemed admitted for purposes of this trial. And, we \\
\hline 14 & well, you've admitted that this is the definition." No & 1 & could all read English. We know what the 202 Statement \\
\hline 15 & we admitted that that's what it says. And, given where & 15 & sai \\
\hline 16 & it & 1 & P ASC \\
\hline 17 & al statement in the ECV is what it says, then I'm & 17 & nition of est \\
\hline 18 & likely to have faced some kind of sanction. & 18 & en, it sets forth a definition. They did not dispute \\
\hline 19 & So if you look at the remainder of the 202 & 19 & that. So that has legal consequences. And they can't \\
\hline 20 & ment, it becomes apparent. If you look at the & 20 & try and redo their response to the 202 paragraph now. \\
\hline 21 & tesmon & 21 & think we all know what's going on here, \\
\hline 22 & yone, with actual knowledge of this subject, that's & 22 & ur Honor. My objection was very simple. He was \\
\hline 23 & me into this Court to say other than the government, & 23 & asked what his understanding of the definition was. \\
\hline 24 & that it's altogether & 2 & And, instead, he gave a response that \\
\hline 25 & And so, this witness is being asked what's & 25 & discussed the methods you can use to get to estimated \\
\hline
\end{tabular}
\begin{tabular}{|rl|r}
1 & current value. Those are two different things. The & 1 \\
2 & definition is one thing. And the methods you used to & 2 \\
3 & get there are another. & 3 \\
4 & So, that's why I think his answer was & 4 \\
5 & unresponsive, your Honor. So if they want to ask him & 5 \\
6 & about the methods, that's a different question. & 6 \\
7 & \(\quad\) MR. KISE: So, your Honor, as Mr. Flemmons, & 7 \\
8 & who's the only accounting expert that's testified about & 8 \\
9 & this, has testified, they're altogether. It's not that & 9 \\
10 & there's one piece and two pieces. It's all one piece. & 10 \\
11 & \(\quad\) And so, if you use any of the methods -- this & 11 \\
12 & is the part that was misleading. If you use any of the & 12 \\
13 & methods, you, by definition, get back to estimated & 13 \\
14 & current value. So, if you have a top line, then you & 14 \\
15 & have the remainder. & 15 \\
16 & \(\quad\) So the 202 Statement is a red herring. & 16 \\
17 & They're trying to isolate a response that is, & 17 \\
18 & technically, accurate and ignore the fundamentals of & 18 \\
19 & accounting principles that are in the record and & 19 \\
20 & established in the record. And they're ignoring the & 20 \\
21 & remainder of the 202 Statements which we're not going & 21 \\
22 & to get into. & 22 \\
23 & But, at all events, we're still not really & 23 \\
24 & here to debate what the actual definition is with this & 24 \\
25 & witness. We're just asking this witness "What's your & 25
\end{tabular}

He's not stuck with the 202 Statement. He has nothing to do the 202 Statement. He's not stuck with Flemmons' testimony, he has nothing to do with Flemmons' testimony.

What he's here to testify about is what his understanding is and why he derived the opinions that he derived as an appraisal expert not an accounting expert.

So, I just don't see how its possible that his answer, when he's telling the Court "This is my understanding," how anyone can disagree with that and say, "No, you're wrong." They can argue he's wrong. Fine. But, he's answering the question.

THE COURT: Well, in your posttrial briefs, you can argue about the effect of the defendant's statement on the 202 Statement.

As for the particular question that's in front of me, since the wording was "What's your understanding of" -- his understanding of how it works or how you get there and the different methods, I'll allow it.

I will agree with Mr. Kise's general point there. The plaintiff can always, you know, recross if need be. That's his understanding.

Let's get him back. I hope the rest of the

1 understanding of how it's derived."
The definition of "How do you get there?" I mean, that's it. His definition is, "You used these methods and you get to estimated current value."

And that's consistent with what Mr. Flemmons testified to. That's exactly what Mr. Flemmons testified to in that manner.

And that's the part that they didn't allow the witness to explain yesterday when he answered "no" to the question about "Is that your same definition of estimated current value?"

He said, "No, may I explain?"
And Mr. Amer said, "No, you can't."
Okay. That's cross examination. So all we're doing is asking this witness "What's your understanding?" It's fairly straightforward.

But this witness is not here to testify about what the definition is. That's the providence of the county expert.

He's just here to testify about -- so there's nothing to revisit about Your Honor's ruling from yesterday. Respectfully, I don't think there is anything to revisit. I think there's just what this witnesses' understanding is. And that's all he can testify to.
F.Chin - Defendant - Redirect/Mr. Suarez

Page 6038
1 morning is not a revisit of yesterday.
MR. KISE: Our plan was to be done by now.
FREDRICK CHIN, having been
previously sworn, testified further as follows:

\section*{REDIRECT EXAMINATION}

BY MR. SUAREZ:
Q. Mr. Chin, how are the methods used to determine estimated current value relevant to your understanding of estimated current value if at all?
A. Very relevant. Those methods were, definitely, considered and provided a guidance in terms of how individuals might be able to use it and estimate their current values.
Q. What opinions, if any, do you offer concerning the interpretation of ASC 274?
A. With respect to the statements of financial condition?
Q. Yes.
A. I believe that they were appropriately stated following the estimated current value guidance.
Q. What opinions, if any, do you offer concerning the interpretation of the term "estimated current value" under the accounting standards?
A. Do you mind repeating that question?
Q. Sure.
F.Chin - Defendant - Redirect/Mr. Suarez

Page 6039
A. Sorry.
Q. What opinion, if any, do you offer concerning the interpretation of the definition of estimated current value as provided in the accounting standards?
A. I believe it offers a pretty broad interpretation in terms of how real estate or assets could be valued.
Q. How, if at all, are the opinions you've given in this trial consistent with USPAP?
A. I believe they are different, that, the estimate the current value is different than how normal USPAP market value appraisals are done.

THE COURT: And please louder and closer to the microphone.

THE WITNESS: My apologies, your Honor.
Q. And how, Mr. Chin, are your opinions at trial compliant with USPAP?
A. Very different function. They're different. They are. My opinions are based on the totality of the statement of financial condition which has estimated current values as part of that statement of financial condition.
Q. Do your opinions comply with USPAP?
A. No, they don't; not in the strict sense.
Q. Why not?
A. Well, there are several reasons.

The first one is that my assignment wasn't to do,
F.Chin - Defendant - Recross/Mr.Amer Page 6040
specifically, an appraisal review of a property. It was to evaluate the statement of financial condition.

Number two, there's a jurisdictional exception
that is in USPAP that if there is, in this case, a
litigation or otherwise and there will be testimony then there's an allowance that strict compliance with USPAP is not necessary.

And number three, most, importantly, a lot of the time that I spent that we talked about in terms of hours, was spent reviewing the AG's appraisals of the property, which their appraisals signed as MAIs, provided almost five hundred separate opinions of value. And they were not, at all, compliant with USPAP.
Q. In reviewing the Statements of Financial Condition at issue in this case, what evidence, if any, have you identified that the valuations are based on pie-in-the-sky dreams of concocted value?
A. None.

MR. SUAREZ: No further questions on redirect, Your Honor.

THE COURT: Recross.
MR. AMER: I have just a quick couple of questions. But, I can do it from here, your Honor. THE COURT: Oh, sure.

\section*{RECROSS EXAMINATION}

BY MR. AMER:
Q. If we could just put up, from yesterday's transcript, page 6006. I just want to read to you, from line eight on it and confirm that this is -- that this is still your testimony.
"QUESTION: In your expert opinion, does there need to be a reasonable factual basis for the developer's perspective of value that he puts in a statement of financial condition.
"ANSWER: Yes.
Q. Do you standby that testimony?
A. I do.
"QUESTION: And would you agree that it would be improper for a developer to put in a Statement of Financial Condition a perspective of value that is based on pie-in-the-sky dreams of concoted value?
"ANSWER: I would agree with that.
Q. Is that still testimony that you standby?
A. Yes, sir.
Q. Am I correct that in this case, you have not
rendered any opinions of value with respect to any of the assets in the Statement of Financial Condition?
A. You're correct.

MR. AMER: That's all I have, your Honor.
F.Chin - Defendant - Recross/Mr.Amer
Page 6041
```

Page 6042

THE COURT: Any re redirect?
MR. SUAREZ: No, your Honor.
THE COURT: Okay. If there are no other questions, the witness is excused. Nice to meet you.

THE WITNESS: Thank you, your Honor.
(Witness excused.)
THE COURT: Defendant, would you like to call your next witness?

MR. ROBERT: Yes, your Honor. Defendants call John Shubin. Let's get Mr. Shubin.

COURT OFFICER: Witness entering.
Raise your right hand.
Do you solemnly swear or affirm that any testimony you give will be the truth the whole truth and nothing but the truth?

THE WITNESS: I do.
J O HN S H UBIN, called as a witness by the Defendants, having been first duly sworn, testified as follows:

COURT OFFICER: Please, have a seat. Please, state your name, business address for the record.

THE WITNESS: Yes, good morning. My name is John Shubin. My business address is 150 West Flagler Street, Miami Florida, 33130.

Page 6043

THE COURT: Mr. Robert, please proceed. MR. ROBERT: Thank you, your Honor.

## DIRECT EXAMINATION

BY MR. ROBERT:
Q. Good morning, Mr. Shubin?
A. Good morning.
Q. If you could start by advising the Court of your educational background from college on, sir.
A. I graduate Harvard College in 1983. I then went on to Oxford University, St. John's College where I received a post graduate MA in politics, philosophy and economics. In 1985, attended the University of Miami Law School graduated in 1988.
Q. And sir, are you admitted to practice law?
A. I'm admitted to practice law.
Q. And where are you admitted to practice law, sir?
A. State of Florida.
Q. And sir, can you briefly describe for the Court your professional background since you graduated law school.
A. I've been a practicing lawyer since 1988. I have tried cases in State and Federal Courts in front of jury's nonjuries.

I've participated in hundreds of legislative and quasi judicial hearings and other forms of administrative hearings.

I have argued between fifty and hundred appeals in various forum -- both in state and federal Appellate forum -- and have had a very active practice over the last 35 years.
Q. And what about your employment history since the time you graduated law school, sir?
A. I started at the Law Firm of Schultz \& Bowen in Miami, proceeded to the firm of Sterns Weaver and then started my own firm in 1993.
Q. Sir, what if any specialty are you engaged in the practice of law in?
A. For the last 20 years, in particular, l've focused on real estate as it relates to entitlement, land use, planning. Anything that relates to real estate.

The business of Florida often is real estate. And so, even as a trial lawyer, most of the matters that I handle have some aspect of real estate related to them.
Q. I'm going to talk, in a few moments, about and drilling down a little bit more about that. But what, if any, other employment have you been engaged in other than the practice of law.
A. I also own a consulting firm called the Euclid Group which advises investors and individuals and entities on strategies related to the use and development of real estate.

Page 6045
Q. And is that limited to Florida or anywhere else?
A. It's not limited to Florida. We have represented clients in multiple jurisdictions.
Q. So I want to talk to you a little bit about the areas that you said you primarily practice in. What is land use?
A. Land use is what are the rules and regulations that effect how an individual, an owner or a tenant, can utilize a piece of real estate.

What uses can occur, what structures can occur, the size, the dimensions of those structures; anything related to the use and operation of a piece of property.
Q. And what is planning?
A. Planning is the method by which government effectuate the regulation of land. They look into the future, they determine the needs, the requirements of a community and they provide long term -- they generate long term planning documents that guide how zoning, which is the implementation of planning, occurs in different jurisdictions.
Q. And what are entitlements?
A. Entitlements are commonly the approvals, the governmental approvals, usually, that run with a piece of land that are secured by the owner to allow certain uses of that property.
Q. And finally zoning?
A. Zoning is the implementation of planning. It's the rules and regulations that govern the use, the intensity, the density the shape of property.
Q. Now, you mentioned before that your practice is, primarily, limited to this over the last 20 years. How much of your practice is devoted to these four areas?
A. Probably -- it was always about 50 percent. Now, its about 80 percent.

MR. ROBERT: Your Honor, at this point, I would like to tender John Shubin as a land use, planning, entitlements and zoning expert.

THE COURT: Can you repeat that slowly.
MR. ROBERT: Sure. Yes, your Honor. Land use, planning, entitlements and zoning expert. I figured it was easier than just staying real estate which was a little too broad.

THE COURT: What has plaintiff have to say?
MR. WALLACE: I would renew our objection, that, this is, essentially, a legal expert. I would assume the witness's expertise in this area is limited to interpretations of laws, regulations and contracts that govern these areas; and hence, is an improper area for expert testimony.

I believe, though, to the extent the

| 4 | there has been a dispute. And, as a practicing lawyer, | 4 A. Yes. |
| 5 | I'm very familiar with the issues related to the | 5 Q. What were the circumstances surrounding that? |
| 6 | dispute. I've tried to tie myself to the mass so I | 6 A. I received a phone call from Chris Kise and I |
| 7 | don't know too much. But, I'm certainly familiar with | 7 think there was another individual on the line, Greg |
| 8 | the issues regarding a lawyer testifying. | 8 Coleman. And, they asked me if I would consider being an |
| 9 | THE COURT: All right. I hereby deem you, | 9 expert witness in a matter. |
| 10 | for the first time, an expert in land use planning, | 10 Q. And what was your understanding of what the |
| 11 | entitlement and zoning. | 11 assignment was that you were given? |
| 12 | And as you, l'm sure, just heard the lawyers | 12 A. My understanding of the assignment, at the time, |
| 13 | discuss, I'm not looking for -- I'm not allowing the | 13 was to ascertain what restrictions, if any, applied to the |
| 14 | testimony on the law itself but, where documents are, | 14 use of Mar-a-lago in Palm Beach, Florida. |
| 15 | how they may interact with each other, with the | 15 Q. What, if anything, did you do to -- |
| 16 | upshot -- well, I'll leave out "the upshot." I'm sure | 16 Did you come to a conclusion after reviewing |
| 17 | Mr. Roberts will keep the questioning within the right | 17 documents? |
| 18 | areas. | 18 A. I did. |
| 19 | MR. ROBERT: In about a half-hour, we'll | 19 Q. What documents did you review? |
| 20 | decide whether we agree or not. I'm hoping that we do. | 20 A. I reviewed a variety of documents all of which are |
| 21 | MR. WALLACE: I would ask for one | 21 set forth in my expert witness report. But, essentially, |
| 22 | clarification. I don't think it's relevant to the | 22 what I did was what is my common practice, I ordered a title |
| 23 | nature of the testimony Mr. Shubin is going to provide | 23 report on Mar-a-lago. |
| 24 | but, are we qualifying him as an expert to the | 24 And a title report identifies and produces all |
| 25 | jurisdiction of Florida or somewhere else. I would | 25 documents that effect the title to the property that are |

recorded and contain their legal description.
I reviewed the universe of those documents compared them to some of the documents that Mr. Kise had provided to me that he thought were relevant. And there was substantial overlap.

I then also conducted a search, a public records search, of the town of Palm Beach's records to determine what records they had in their possession that might be important for me to review prior to giving any opinion.
Q. And what opinion did you, ultimately, come to?
A. The opinion that $I$ reached is that there is,
absolutely, no prohibition on the use of Mar-a-lago as a single-family residence.

MR. WALLACE: Your Honor, we object to that
opinions. That is a legal conclusion.
THE COURT: Sustained.
Q. Mr. Shubin, is there anything in the document that you reviewed that showed that there was any prohibition of Mar-a-lago being used as a single-family residence.
A. I did not see any document that contained that prohibition.

MR. WALLACE: Objection. That's a
rephrasing of the same question.
MR. ROBERT: No. I'm asking him if there is
anything in any of the documents that I'm about to go
doesn't somehow, magically, transform what he's saying into a legal conclusion. It's still a factual determination that he's making and providing to the Court. You will then -- so, the testimony doesn't get excluded on that basis.

THE COURT: Mr. Wallace, I assume you disagree with that.

MR. WALLACE: The question is, what is permitted based on the laws, regulations and covenants which are, essentially, contracts. And he is offering his opinion as to what is permitted under that.

That's, inherently, a legal conclusion. If they want to walk through all the documents and say, "These are the ones your Honor should consider," that's fine.

But saying, "The end result of these documents is, there's no restrictions on using Mar-a-lago as a private home," that's the legal conclusion.

So no objection to him identifying what he found in his title search in terms of what the documents are but, his interpretation of those documents is, inherently, a legal conclusion.

MR. ROBERT: Your Honor, we're going to take the witness through the document -- sections of the
J.Shubin - Defendant - Direct/Mr.Robert Page 6052

1 through that shows that there was a restriction. And
there were not.
That's a factual issue. It helps the Court
with the ultimate conclusion but, it's not a legal conclusion. That's up to your Honor at the end of the day.

MR. KISE: Your Honor, I just want to point out, land use experts, land planner that aren't lawyers that work in government or in the private sector, they make these factual determinations everyday. It's not legal conclusion to say what Mr. Shubin is saying.

A lawyer can make that determination. But, ultimately, you have to decide the legal ramifications of the factual input. But, it's not a legal conclusion.

THE COURT: That's why we don't allow testimony on the law because, I make those decisions.

MR. KISE: Right. But, the testimony isn't
a conclusion. The testimony is, factually, the application of these provisions.

It's just like you said, a land -- if we brought in a land use planner, if we brought in a zoning expert, if we brought in a planning expert -which this witness is qualified to be --

Just because Mr. Shubin has a law degree,
J.Shubin - Defendant - Direct/Mr.Robert

Page 6054
document. But the question was, did he find anything in the documents that prohibited it.

Again, that's not a legal conclusion. The first question I asked is did he reach an opinion on it. And his Honor sustained the objection. I understood that sustaining of the objection. That's why I reworded the question.

THE COURT: It, absolutely, is a legal conclusion. What I think -- maybe we can agree on this. You can ask the witness what documents exist that might effect this property. And then, ask him what they say.

MR. ROBERT: That's exactly where I'm headed next.

THE COURT: That's a lot different from "Do any of the documents prohibit the use of the property as a single-family residence."

MR. ROBERT: I, respectfully, disagree. At the end, I'm going to come back to it because, I think your Honor will see that it's based on what he's giving an opinion on not as a lawyer. It's not a legal conclusion. It's based on the interlay as I said.

Mr. Shubin's testimony is based on his experience of knowing what to look for, what is relevant and where you find it.

stipulated and admitted into evidence.
MR. AMER: The People agree.
THE COURT: Great. The People agree one time.
MR. ROBERTS: We'll also asking the Court to take
judicial notice of the code ordinances of the Town of Palm Beach, Section 134-2(b) and Sections 134-786 and 134-787. Those are also two documents that Mr. Shubin had relied on as part of his report. We have that marked and put into evidence, they are sections and we just did it for the ease of the Court so that you don't have to look to Florida statutes and laws.

MR. WALLACE: No objection from the People.
THE COURT: I'm glad we have those agreements in place.

MR. ROBERTS: Thank you.
Q Mr. Shubin, turning your attention to where we left off which is D-478-5. What is the significance of what you have just read?

A Again, this accompanied an application in order to seek a private club in Palm Beach. At this point in time we've to file an application, it is uncommon to accompany these applications with a narrative. So this is a narrative that talks about what could or could not be done at Mar-a-Logo as an alternative. And one of the alternatives is a private social club, that is parentheses seven.

Page 6060
$1 \quad$ Q And who was it that had prepared this document?
A It would be someone on behalf of the owner of the property, that was Donald Trump or an entity on Donald Trump's behalf.

Q Now, drawing your attention to Page 69, D-478-69. What is this document, sir, contained within this exhibit?
A It is common in an application and maybe with the Court's permission I can talk about what a special exception is, it is what they applied for. They applied for a special exception. So they are proffering and addressing what type of conditions they would consider being applied to their application should it be approved.

Q And, Mr. Shubin, if you could read into the record the first paragraph starting "in its conversion of this document."

A It states (Reading:) In its conversion from a
so-called large residential estate to a private social club, the actual usage of Mar-a-Logo will not change. No new activity will not occur which cannot, does not, or has not taken place in the past under the existing zoning of this property. The
applicant seeks no physical change whatsoever with the property. (Such as, for instance, the addition or demolition of any improvement.)
Q And what, if any, significance does this paragraph have?
J. Shubin-Defendant-Direct-Mr. Roberts

Page 6061

1 A It is significant in that it identifies what uses
2 occurred on the property and it's a commitment as to what uses
3 will occur on the property should the application be granted.
4 Q And what is your understanding of what the property is used for today?
A It's used as a private social club.
Q And any other use, sir?
A There are other uses that occur on the club. They're recreational uses that occur in connection with a social club,
which are ordinary and customary and Mr. Trump has a residence at the club, an owner's residence.

Q That would be consistent with the fact that the actual usage of Mar-a-Logo will not change, correct, sir?

## MR. WALLACE: Objection, Leading?

THE COURT: Leading, sustained.
Q What is the significance of Mar-a-Logo not changing mean to you, sir?
A It means that and in other portions of the narrative
describe how Ms. Post, Marjorie Merriweather Post, how she used the property in the past and it describes how the property will be used in the future.
Q And how did Ms. Post used the property in the past, sir?

A She lived there, she entertained, she had opened it up occasionally to the public, to the residence of Palm Beach but
J. Shubin-Defendant-Direct-Mr. Roberts

Page 6062
she lived there and it was her residence.
Q And drawing your attention to Page 154 of that document, Mr. Shubin.
(Pausing.)
Is this what you were referring to?
A Yes.
Q If you could read the first sentence, please?
A (Reading:) Ms. Post used Mar-a-Logo as a residence during winter months of the year and was a place to entertain houseguests and other guests who were invited on a daily basis.

Q Okay. If we could show the witness Defendant's Exhibit 359 in evidence.
(Shown.)
Q Mr. Shubin, what is the document?
A This is a declaration of use agreement between the Town of Palm Beach, the Mar-A-Logo Club, Inc. and Donald Trump.
$Q$ And what does such a document signify?
A This document reflects the intention of the parties to the agreement to agree to certain conditions related to the use of Mar-a-Logo in connection with the approval of the special exception application.
Q And that is the document we just looked at before, correct?

A Yes.
Q And how do these two documents work with each other?

A It is very common particularly with special exceptions for a municipality to impose conditions on the use of what they're permitting. They're permitting a use on a property and the municipality may say that they may want to have certain restrictions, certain condition, certain limitations. In order to make those limitations enforceable they typically ask for them not only to be conditions of the approval, but to be set forth and memorialized in a written agreement than binding between the parties.
Q And drawing your attention to Page 5 of that document, Mr. Shubin, under Article 2 where it says, Club Use.
A Yes.
Q If you could read the first few lines?
A (Reading:) The use of the land shall be for a private social club in compliance with all of the information and exhibits included in the application not inconsistent with the terms set forth herein and subject to such uses not inconsistent with the terms set forth herein, set forth in the application for special exception. In the Mar-a-Logo Club a special exception use and preservation plan as amended and submitted to the town.

THE COURT: You keep saying could you read the first line, you really mean could you read the first sentence.

MR. ROBERTS: I thought I said the first few lines,

Page 6064
your Honor, I'll take the first few lines.
THE WITNESS: I didn't want to object on my own, your Honor.

MR. ROBERTS: You could have.
THE COURT: I mean, it would be much more specific to just say could you please read the first sentence, rather than the first few lines; how many are a few?

MR. ROBERTS: There are so many semicolons in terms of this document and the other -- I'll take that advice going forward.

THE COURT: All right.
Q Mr. Shubin, is this what you are referring to as the interplay between the two documents?

A Yes.
Q And what does this document mean when it says, subject to such uses not inconsistent with the terms set forth herein, but more importantly, set forth in the application for special exception in Number 11-183--

MR. WALLACE: Objection. The meaning of the contract language would be giving an opinion.

THE COURT: Sustained. By the way, some of this stuff is just so obvious.

MR. ROBERTS: I tend to think it is obvious, the Attorney General doesn't. Their position still is that Mar-A-Logo cannot be used as a single family residence that
is why we're bringing this to the Court's attention. Ms. Faherty is saying that nothing inconsistent with the document we looked at before, the application for special exception, which made it clear that the existing use at the time it was converted to the club. It always has the ability to have that use which was a private residence just as Ms. Post had done years before Mr. Trump bought it. THE COURT: You can't do it.

Q Article 9 is titled what?
A Article 9 is titled Liability Abandonment of Club Use.
Q If we could go to the top of Page 10, following his Honor's advice please read the first sentence?
A (Reading:) If the club is unintentionally abandoned for a period of one (one year) after the club has been in operation, or is intentionally abandoned at any time, the use of the land shall revert to a single family residence and the ownership of the owner.
Q Now I would like to show the witness Exhibit D360 in evidence.

## (Shown.)

MR. ROBERTS: Your Honor, for the record, to move things along. Each time a document is shown to the witness, I would have asked him what his conclusion was or his opinion was as a result of that. I'm following your direction at this point, or your order, which is he's not to

## Shubin-Defendant-Direct-Mr. Roberts

Page 6066
give those types of legal opinions in your mind. I want the record to be clear, otherwise I will have to ask each time and it will just prolong things.

THE COURT: Okay. Understood. Thank you.
Q Mr. Shubin, what is Defendant's Exhibit 360 in evidence?

A This is a deed from Donald Trump to the National Trust for Historic Preservation. It is a deed that conveys a conservation and preservation easement as to the Mar-a-Logo property.
Q And what is the significance of this document?
A This is a document that was memorialized after the approval of the special exception. So the special exception was in 1993, this deed was subsequent to that in 1995 and it is a commitment by Mr. Trump to preserve and conserve and to restore and agree to restore certain specific features of the Mar-a-Logo property.
Q I want to draw your attention specifically to Page 14 of that document under Section 5 guarantor's rights. Do you see that sir?
A Yes.
Q I would ask you to read into the record Section 5.1 with Romanette A?
A (Reading:) It is titled rights not requiring further
25 approval by grantee. The following rights, uses and activities

Page 6067
of, or by grantor, on, over, or under the property are permitted by this easement and by grantee without further approval by grantee.

Subsection (a) states, the right to engage in those acts or uses permitted by governmental statute or regulation that are not expressly prohibited or regulated by this easement.

Q I'll ask you to continue to $B$ and read that as well?
A (Reading:) Sub (b), the right to perform work,
exercise the rights and privileges contemplated by, and engage in those uses of the property permitted by the plan and by the declaration of use agreement. (The "Declaration"), dated August 10th, 1993 between the Town of Palm Beach, the Mar-a-Logo Club and grantor recorded in the public records of Palm Beach County, Florida. Official record book 7933, Page 22, as the plan and/or the Declaration may be amended from time to time provided that ( $i$, such uses are not specifically prohibited or regulated by this easement). ii, such amends to the plan and/or declaration not inconsistent of the purpose of this easement.

Q Turning your attention to page 22, D-360-22. Do you see that, sir?
A Which specific provision?
Q Paragraph 11, Limitation of 11, if you could read that into the record, sir.

A (Reading:) Limitations on amendment. If circumstances
arise under which amendment to or modification of this easement

Page 6068
were to be appropriate, grantor and grantee made by mutual written agreement jointly amend this easement provided that no amendment shall be made that will adversely affect the qualification of these easement or the status of grantee under any applicable laws, including Section 170(h) and 501 (c)(3) of the code and the laws of the State of Florida.

Q Mr. Shubin, how does the land use of this document have any interplay with the previous documents that we looked at?

A They -- it describes the circumstances under which
future uses can occur on the property, alterations to the
property can occur, essentially what can and cannot occur and what is the process for seeking an amendment to those conditions that are part are the preservation easement.

Q Now I would like to show the witness
Plaintiff's Exhibit 1013 in evidence.
(Shown.)
Q Mr. Shubin, do you recognize this document?
A Yes, I do.
Q What is this document?
A One, it is a Deed of Development Rights from the
Mar-a-Logo Club, LLC to the National Trust For Historical Preservation. Chronically it is subsequent to the previous
document that I reviewed, that was also a deed and conveyance of the easement to the National Trust.
Q Drawing your attention to Page 2 of this document, sir.
J. Shubin-Defendant-Direct-Mr. Roberts

Page 6069
(Pausing.)
If you could read that into the record.
A (Reading:) The witnesseth, the Club and Trump for good and invaluable consideration, the receipt and sufficiency of which is acknowledged by these presence do hereby transfer, grant, bargain, sell, alienize, release, convey, and confirm on to the National Trust. To the extent such rights, if not already been transferred through the Deed of Conservation and Preservation Easement and any and all of their rights to develop the property for any usage other than club usage.
Q Sir, earlier we looked at Defendant's Exhibit 360, which was the Deed of Conservation and Preservation Easement. How, if any way, is this document read in relation to that document?
A If you go to the first page of this document it makes numerous references to the 1995 Conservation Easement. I think it is also a defined term and there are multiple references in the whereas clause as to the previous document.
Q And in this document anywhere is there any conveyance to the right to occupy the premise as a single family residence?

MR. WALLACE: Objection. Calls for legal conclusion.

THE COURT: Sustained.
MR. KISE: On this point, I'll talk about legal issues but if you want to excuse the witness we could do
that in case we have any overlap.
THE COURT: Plaintiff, do you want to excuse the witness?

MR. WALLACE: Yes.
THE COURT: Why don't we excuse the witness.
(Whereupon, the following is heard outside the presence and hearing of the witness.)

THE COURT: So far I think the Plaintiff has been liberal in what they're not objecting to; but go ahead.

MR. WALLACE: If he's describing a document generally about trying to convey legal implications, I'm trying to allow it to move it through. For the most part he's reading documents that are part of the record. But...

MR. KISE: Again, without going into the characterization of liberality. His conclusions as a land use zoning planning expert are not necessarily legal conclusions.

## THE COURT: I disagree with you.

MR. KISE: I understand that. But for the Appellate purpose of this, you've stricken his answers. We need to develop some way to preserve the proffer of his testimony. If you would like us to do that it in writing so that it is preserved for the record. But your denial of an answer to the question denies the Appellate Court the opportunity to understand what this expert's opinion is in

THE COURT: So I could be reversed on not allowing him to give us his legal or other conclusions.

MR. KISE: Without having a record of what that answer would be, the Appellate Court is deprived of understanding that, which may itself be a reason for

We would submit, your Honor, that we should at least be allowed to put into the record the proffer of what his answers would have been to those questions and you-understanding it is the Court's ruling, so that it is there for the Appellate Court to know exactly what the testimony would be as a proffer. That is just simply a proffer. We will not take up time today, we can ask the questions, you can make your rulings. We need a complete record on this. We disagree with your Honor's interpretation and we need to make sure the Appellate Court is advised. That's all.

THE COURT: I understand. Plaintiff?
MR. WALLACE: I believe his opinions are contained in his expert report. The report is in the record as part of their summary judgment application. I tried to accommodate Mr. Kise and have the entire report and witness struck but I was overruled on that. Based on his proffer that this witness could talk about documents and direct the Court to the parts of the record concerning property that

## full so... <br> 1 full so...

 reversal.
## -Proceedings-

Page 6073

Page 6072

1 are irrelevant which should be considered by the judge in
making a conclusion, legal conclusion that I will note based on summary judgment is law of the case and does not need to be revisited.

If they want to -- so I don't know if there's much more of a record that needs to be established.

MR. KISE: So, your Honor, I'm noting that after 8 or 9 weeks Mr. Wallace is learning how to give my kind of speeches, there's a whole bunch of additional narratives so I'm glad of that.

Just briefly. The opinion --the reports themselves are not part of the trial record. They may be part of the summary judgment record, they're not part of the trial record. And for Appellate purposes, those are two very different -- summary judgment is a proceeding on its own Appellate track and it is not necessarily the case. In fact, it may not at all be the case that the plenary appeal from the final judgment is subsumed --the summary judgment of appeals is subsumed by the final judgment. I don't think that's necessarily going to happen.

So if there'll agree to allow us to put the
opinions in the record for purposes of preserving what they are, into the trial record so that it is there in the trial record, that is fine, and your ruling will stand as to your determination as to whether or not they're legal
conclusions, that is preferable acceptable. I don't know why they would oppose that since they are saying it is of the record. I disagree from an Appellate standpoint the summary judgment record it is traveling on its own track right now and the briefing on that may be done in a matter of weeks. That is a completely different record.

We need some way -- I'm happy to have the opinions themselves introduced as a proffer and leave it at that.

THE COURT: I could see this is all new. If the Plaintiff would agree that the Defendants could put the opinions submitted in support or, again, the summary judgment motion, into the trial record, I'm --I'm not sure if I agree with Mr. Kise because it is proceeding on separate Appellate tracts. You could not automatically use one or the other; but Plaintiff what could we do here?

MR. WALLACE: I disagree. I disagree that there's not a sufficient record based on what is going up on summary judgment. I also note that I don't believe it is an evidentiary requirement that every single piece of evidence that is excluded for evidentiary purposes, including opinions, needs to be produced so that it could then be fully studied by the Court of Appeals.

If he wants to mark Mr. Shubin's reports, it is not evidence but it is an exhibit to the trial record, that is fine, so that it could be seen by the Court of Appeals. I
think they would have it in time, there'll be a judgment at some point that will be incorporated. I think it may be angles dancing on the head of a pin at this point, but I'm happy to have it flagged so that it is in the record and if the fact is what was included in his expert report.

THE COURT: All right. Let's make sure we're all on the same page.

Plaintiff, are you agreeing that its expert reports that Mr. Shubin submitted on the summary judgment motion could be included in the appeal of the trial?

MR. WALLACE: Yes, perfectly acceptable.
MR. KISE: I'll also note that the angels dancing on the head of a pin are the province of the Appellate Court, that is why we're engaging in the exercise.

THE COURT: Sometimes I feel like I'm the angel dancing on the pin. All right. Thanks for dealing with that. Let's get the witness back.

MR. ROBERTS: Yes, sir.
THE COURT OFFICER: Witness entering.
(Witness enters the courtroom.)
MR. ROBERTS: Could I have the last question read back to see where I left off.

THE COURT: Yes.
Well, the last question I assume was an objection and I sustained the objection.

| 20 deposits shall be refunded without interests. | 20 MR. WALLACE: If we are going to read, I believe |
| 21 Q Now, I would like to show the witness what has been | 21 the document is in evidence. Is he going to read the |
| 22 Marked as Defendant's Exhibit 484 in evidence. | 22 entirety of the document? |
| 23 (Shown.) | 23 MR. ROBERTS: The first two pages. Since I'm |
| 24 Q Do you recognize this document, sir? | 24 limited in that I cannot ask Mr. Shubin to draw conclusions. |
| 25 A I do. | 25 Ordinarily I would say, did you review the document, can you |

summarize the document, what is your conclusion on it? I want to read into the record what the evidence is. It is the only way I could do it.

MR. WALLACE: The letter is in the record.
MR. ROBERTS: I know. It will help assist the Judge in understanding what it is that he reviewed and what the facts are that are in evidence.

THE COURT: I will allow the witness to read the first two pages.

MR. ROBERTS: Thank you, sir.
A (Reading:) I have previously provided you with historical documents relating to the conversion of Mar-a-Logo from a private residence to a private club, including the application, minutes of applicable meetings, the Declaration of Use agreement relating to the club, amendments to said agreement and the zoning ordinance which defines private club. These documents shed light on the conditions of approval of the club and the question of whether Trump may reside at Mar-a-Logo subsequent to it having been converted to a private club.

The application for special exception 11-93 was submitted by the Mar-a-Logo Club, Inc. on April 29, 1993, requesting a special exception to convert Mar-a-Logo from a residential use to a private club. The application was filed pursuant to that section of the town zoning code relating to District R-AA, large estate residential which allows "private,

President Trump's residing at the club. The language in the agreement pertaining only to the member's use of the guest suites. Because the Agreement is silent in regard to specific prohibition on Trump residing at the club, the Town should look to its zoning code to determine whether there's any prohibition on former President Trump residing at the Mar-a-Logo. The code prohibits living quarters within the club, except for bonafide employees.

The definition of employee in the town's code provides as follows: Employee means any person generally working on-site for the establishment and includes sole proprietors, partners, limited partners, corporate officers, and the like."

I believe this issue, therefore, hinges primarily on whether former President Trump is a bonafide employee of the club. In that regard, please see the attached letter from John Marion representing former President Trump in the Mar-a-Logo Club, Inc. This letter includes representations relating to former President Trump's residency at Mar-a-Logo, both before and after its conversion to a club, which although of historical significance, are honestly irrelevant, in my opinion, is the representations regarding whether or not former President Trump is a bonafide employee of the club. If he is a bonafide employee of the club, absent a specific restriction prohibiting former President Trump from residing at the club, it appears the zoning code permits him to reside at the club.

Page 6082
I recommend that the Mayor and Town Council hear presentations in regard to this matter from all interested parties, including, but not limited to, the neighbors to Mar-a-Logo, their representatives, representatives of former President Trump, the Mar-A-Lagos Club and other interested parties, after entertaining all of the relevant presentations, the Town Council should deliberate on this matter and determine what action, if any, should be taken.

I will be here to answer any questions the Mayor and Town Council have in regard to this matter.

MR. ROBERTS: Before I ask the next question, do you want some water?

THE WITNESS: I'm out of wasn't, I'm fine.
(Whereupon, Cheryl-Lee Lorient relieved Deborah Rothrock as the official court reporter.)
(Continued on next page.)
J.Shubin - Defendant - Direct/Mr.Robert
Q. Drawing your attention to the next document in here 429-3.

Is this the letter that is referred to in the town attorney's memo?
A. Yes.
Q. And sir, what is, if any, action did the town of

Palm Beach take at that meeting with regard to this issue?
A. At the action.
Q. Thank you very much.
A. At the meeting itself, the minutes reflect that they took no action. They took no action.
Q. And that does that mean?
A. It means they simply chose not to agree with the position of the neighbors. And I have, actually, reviewed the files of the town of Palm Beach. And there has been no action taken against Mar-a-lago subsequent too that meeting.
Q. And does President Trump, currently, reside at the Mar-a-lago?
A. Yes.

MR. ROBERT: Your Honor, if I could have a moment to speak with my colleagues?

THE COURT: Sure.
MR. ROBERT: Thank you.
(Pause in proceedings.)
MR. ROBERT: Your Honor, this may be a good

MR. WALLACE: Objection. Calls for a legal conclusion.

THE COURT: Sustains.
MR. ROBERT: No further questions. Thanks, your Honor.

THE COURT: Well done.
MR. WALLACE: Good morning.
THE COURT: I guess there will be cross examination.

MR. WALLACE: Very brief, your Honor. I promise. If we could put back on the screen
Defendant's 478.
CROSS EXAMINATION
BY MR. WALLACE:
Q. You've done such a wonderful job. I just want you to read one more piece of this document into the record. If you could turn to page six of the documents and if you could read the first four sentences at the top of the page.
A. "As to item paren one, it is impractical for a single individual to continuously own Mar-a-lago as a private estate at his or her sole expense.
"When the Post Foundation marketed the property after its return to the foundation, from the US Government, it was almost impossible to sell.
"About 80 qualified buyers, thoroughly screened,
J.Shubin - Defendant - Direct/Mr.Robert Page 6084
time to take the morning break and see if we can trim this down.

THE COURT: Okay.
MR. ROBERT: Thank you, sir.
THE COURT: Perfect timing. I'll see you
all at a quarter to twelve. And I will order the witness not to discuss this case, his testimony or anything related to this during the break.

THE WITNESS: I will not.
THE COURT: Thank you.
(A recess was taken.)
(After the recess the following occurred:)
THE COURT: Let's get the witness back and continue with the direct. Please continue.

MR. ROBERT: As usual, your Honor, the break does wonders in streamlining things. I just have one question left. I already told Mr. Wallace I'll go slow for a second because, I have a funny feeling I know what he's going to do.
DIRECT EXAMINATION
BY MR. ROBERT:
Q. Mr. Shubin, based on a review of the documents
that we went through this morning, do you have an opinion as to whether Mar-a-lago could be used as a single-family residence?

Page 6086
inspected Mar-a-lago and elected even against making an offer. H. Ross Perot was one prospect. Although, quote, everything is for sale at a price, end of quote, no one would step forward to make any offer for this so called, quote, white elephant."

MR. WALLACE: We can take that down.
Q. Mr. Shubin, are you being compensated for your testimony today?
A. Yes, I'm.
Q. How much are you being compensated?
A. I believe, for trial time, $\$ 1,595$ an hour.
Q. And for your work outside of trial time, how much are you being compensated?
A. $\$ 1,395$ an hour.
Q. I believe you testified at your deposition that your standard billing rate for South Florida, with no New York, Chicago or Los Angeles component is probably a thousand dollars an hour.

Does that sound right?
A. That sounds right.
Q. And your billing rate could go lower than that depending on the matter; is that correct?
A. Or higher, yes.
Q. It could go as low as 700 per hour?
A. I haven't charged 700 an hour in a long time.

school, correct, sir?
A. Not yet.
Q. Sir, let's talk about your professional career after high school. What, if anything, did you do after high school?
A. Let's see, during high school, I left home and washing dishes was my first job. After that, I employed some people to do work for me putting leaflets on car windshields in parking lots for advertising purposes. I think I was making three times what the principle of my high school was making at the time. I sold that company when I was 17.

And then, I went into another line of work which was furniture manufacturing; made a lot of tables, had my first plane at 19; fifty-four employees, when I sold the company at 20.
Q. What did do you after that Mr. Moens.
A. You know, Thomas Jefferson said the basis of all true wealth is in the land. You can mind it, you can farm it, you can build on it and there's only so much of it. So, I went into real estate.
Q. And what does it mean you went into real estate.
A. I went to work for a very wealthy couple of
families Sam Bronfman and Nate Cummings were my first bosses in a development in Palm Beach, Florida called the Sun \&
L.Moens - Defendant - Direct/Mr.Robert

Page 6092
Surf.
They converted two buildings that were for rental purposes into condominium apartments. So, I worked for them showing those condominium apartments.
Q. What did do you after that?
A. Opened my own office. Let's see. I started in the late 70 's. I opened my office in ' 82 and went into the general residential real estate business.
Q. Are you a licensed real estate broker, sir?
A. Yes, I am.
Q. When did you become a licensed real estate broker?
A. I think it was about the time I opened the company. I got that license, I believe, in ' 82 .
Q. And sir, what are your duties -- withdraw.

When you started the firm, what did the firm do?
A. Work very hard to try and sell rich people properties in Palm Beach.
Q. And other than selling property in Palm Beach what, if anything, did your company do?
A. Basically, just hustled to make a bunch of sales in the real estate arena of a very small island 13 miles long -- Palm Beach.
Q. And what was the name of the company that you founded in the early 1980's?
A. I couldn't think of another name. So, I just
L.Moens - Defendant - Direct/Mr.Robert

Page 6093
named it Lawrence A. Moens Associates, Inc.
Q. Sir, is that the company that you work for today?
A. I still work for them.
Q. Okay. Can you describe how things started out at Lawrence A. Moens and how it's progressed over 40 years at this point?
A. Well, it started out as "on a wing and a prayer" and it's done pretty well since then.
Q. Well, when you say it started out as "a wing and a prayer," do you remember when it was you first sold a home as Lawrence Moens Associates?
A. It was in 1982.
Q. Do you happen to remember how much that home sold for?
A. Actually, I do. It was to Irving and Doris

Morris. It was $\mathbf{1 2 7 , 6 0 0}$. And yeah, I sold it four times since.
Q. Since that time.

And sir, has your practice been mostly consisting of real estate in Palm Beach?
A. Mostly.
Q. How would you describe what has happened to the company since 1982 through today?
A. It's grown a bit.
Q. Well, Mr. Moens, I understand its grown a bit.

Tell us in a little more detail, sir.
A. Our sales now are many time exceeding a billion dollars a year in sales.
Q. Sir, since 2020, for 2020, '21, '22 combined, can you approximate how much in residential real estate in Palm Beach you have sold?
A. A lot. Maybe a couple billion dollars.
Q. And sir, to your knowledge, is there anyone in the Palm Beach real estate market that has sold as much real estate as you have?
A. They don't exist.
Q. And sir, are you aware of properties that have
sold for over a hundred million dollars over the last few years in Palm Beach?
A. I am.
Q. How many of them are there or were there?
A. Let's see. There were ten in Palm Beach, one in Manalapan and one in Miami. So there were twelve sales in the entire state of Florida.
Q. And sir, what, if any, involvement did you have in those twelve sales in excess of a hundred million dollars?
A. I sold ten of the twelve.
Q. I'm sorry. I didn't hear that?
A. I sold ten out of the twelve.
Q. And sir, as a licensed real estate broker, do you
give opinions of value?
A. I give opinions of value almost daily.
Q. What is an opinion of value?
A. It's taking a look at something and trying to come up with a valuation based on data or information that's around you.
Q. Are you a MAI appraiser?
A. No, I am not.
Q. Are you licensed to give an appraisal?
A. No, I am not.
Q. What is the distinction between an appraisal and an evaluation?
A. Well, it's semantics. I am asked every week to give an appraisal. I don't know don't always give a lesson that I don't or won't perform an appraisal to someone who just lost her husband and needs it for estate tax purposes.

I know what she means by giving an opinion of value. I know what she means by giving an estimate of a value.

I always direct them to an MAI appraiser; even though I can give her a letter giving her my opinion, I tell her the best thing to do is to hire an appraiser and submit both documents to the proper authorities when there is an opinion of value needed or even an appraisal by an appraiser.
Q. In your experience as a real estate broker, having your own business for the last 40 plus years, have you given opinions of value as to residential real estate in Palm Beach?
A. Thousands of time.
Q. And in those thousands of times, to whom would you be giving those opinions?
A. Usually, the person asking me for my opinion.
Q. I should have expected that answer. Who are the people that asked you for those opinions?
A. It ranges from appraisers, attorneys, rich people, poor people. All kind of people ask me for help and I try and give it if they cross my path.
Q. In your experience why do appraisers, MAI appraisers, ask you for your opinion of value?
A. Well, I'm on the front lines everyday of selling
properties. And I have a pretty good handle as to what's happening, currently, in the market.

Markets don't just go up. They go down. Markets go up and down; have since the beginning of time. Values change --
(Phone rings.)
THE WITNESS: Sorry, Judge. I'll get that off.

THE COURT: That's a first.
(Pause in proceedings.)
THE WITNESS: Sorry about that. I did turn it off, Judge. He's 91. I had to take the call.

THE COURT: Okay. Great.
MR. ROBERT: If I could just have the last question and answer read back.

THE COURT: Read back.
(The testimony as requested was read by the reporter.)

MR. WALLACE: Note my objection to that question. It calls for hearsay.

THE COURT: Which part?
MR. WALLACE: Why do MAI appraisers ask for your opinions of value.

THE COURT: Sustained.
Q. Do you have an understanding, Mr. Moens, as to why MAI appraisers would go to you for a valuation?
A. Because they know they'll get a straight answer and an accurate reading of where the market is.
Q. So when you say a straight answer and an accurate reading, I need to dig down a little, what does that mean?
A. It means, my numbers are, usually, right.
Q. And what do you do to come up with a number or value for a piece of property in Palm Beach?
A. It's everything from getting information on square footage, how much land is involved or how many units in a building -- if it's a multifamily situation -- data from sources -- public sources -- the Palm Beach property appraisers office to verify numbers and 45 years experience in selling billions of dollars worth of real estate.
Q. What is it that you attribute to your 45 years of success selling real estate in Palm Beach?
A. Knowing my left ear from my right elbow.
Q. Well, is there anything more than that?
A. A little luck.
Q. What, if anything, about how you treat your clients?
A. I treat everyone the same.
Q. Well, Mr. Moens, if we were to go to your website, there's no picture of you on the website, right?
A. I prefer not to be photographed.
Q. Well, why is there no picture of you on your website?
A. Because, I don't believe in self-promotion. I don't believe in egos that have to see their name or their face in a newspaper or magazine.
Q. So, notwithstanding the fact that you had ten of the twelve largest transactions in Florida, you're not out in the press that much are you?
L.Moens - Defendant - Direct/Mr.Robert

Page 6099
A. I don't speak to the media

MR. ROBERT: Your Honor, at this point, I would tender Mr. Moens as an expert in the evaluation of Palm Beach real estate.

THE COURT: I think the testimony was ten of the twelve largest sales in Palm Beach, not in all of Florida; is that correct.

THE WITNESS: I think I had nine in Palm
Beach, one in Manalapan Florida -- an exclusive enclave just south of Palm Beach where Larry Ellison bought his house. Yeah, so, nine in Palm Beach.

THE COURT: Nine of the largest twelve or ten or --

THE WITNESS: Well, there's twelve in the state of Florida that exceeded a hundred million dollars.

THE COURT: Oh, okay.
THE WITNESS: Nine were in Palm Beach, one in Manalapan and one in Miami.

THE COURT: And Mr. Robert, exactly, what do you want him to be deemed an expert on?

MR. ROBERT: In being able to value residential real estate or real estate in Palm Beach. That 13-mile island, which is highly specialized and highly particularized, the witness has testified he's

Page 6100
L.Moens - Defendant - Direct/Mr.Robert

1 given valuations thousands of times appraisers call him
because he's --

THE COURT: I just asked you what --
MR. ROBERT: Sorry, your Honor. I guess I've been hanging out with Mr. Kiser too long. I'm sorry, your Honor.

THE COURT: An expert in valuing residential property in Palm Beach?

MR. ROBERT: Yes, sir.
THE COURT: Okay. Mr. Moens, have you ever been qualified to testify as an expert before?

THE WITNESS: Not as an expert. Probably, as a fact witness in cases or trials.

THE COURT: And you realize those are different.

THE WITNESS: I realize they are different.
THE COURT: AG, any comments or questions?
MR. WALLACE: I believe Your Honor limited the qualification to residential property. So we certainly agree with that limitation.

I believe Mr. Moens' description of his valuation techniques is what, I believe, is technically called a little squishy. But, I think that's something we can deal with on cross.

MR. ROBERT: To be clear, your Honor, it's
L.Moens - Defendant - Voir Dire/Mr.Wallace

Page 6101
evaluation of Palm Beach in general, not just residential. His life has been in Palm Beach.

MR. WALLACE: That I disagree with.
THE COURT: I thought we had agreed or you had asked that. I think you said residential.

MR. WALLACE: If I did, it should be the value of Palm Beach real estate. I may have misspoke if I said, "residential." It is value of Palm Beach real estate.

THE COURT: Mr. Moens, do you deal in commercial properties.

THE WITNESS: I do.
THE COURT: Go ahead, Mr. Wallace.
MR. WALLACE: I'd appreciate an opportunity to voir dire him, a little bit, I guess, then on the scope of his expertise beyond residential real estate.

THE COURT: Sure.

## VOIR DIRE

BY MR. WALLACE:
Q. Mr. Moens, you do not have any experience brokering, selling or valuing country clubs; is that correct?
A. I haven't seen any come for sale.
Q. And you don't have any experience brokering, selling or valuing social clubs; is that correct?
A. Never have done.
Q. And you've never sold or acted as a broker in the sale of a private club; is that correct?
A. Don't know of any that have ever come up.

MR. SOLOMON: Your Honor, I think the witness should be limited to residential real estate.

MR. ROBERT: Well, your Honor, the issue
here is, he's going to be giving his opinion as to
Mar-a-lago and the surrounding homes to Mar-a-lago that are all owned by President Trump.

THE COURT: Well, you said the surrounding homes. So that means the only arguably nonresidence would be Mar-a-lago itself.

MR. ROBERT: Correct, your Honor. Our position is, obviously, it's a single family residence. That's what Mr. Moens is going to testify about. I just wanted to be clear about that with Mr. Moens.

We're not going to ask him his opinion about an office building in Palm Beach -- not that I think there is one in Palm Beach. But, we're not going to ask that.

THE COURT: We agree on -- whether or not I agree he's an expert yet, but can we agree that the request is that he's an expert evaluator of residential real estate, including Mar-a-lago, whether or not it is

facts so that I can give a clear number. That, combined with all the experience I've had -- because I'm a lot older than you -- and having done this for as many years as I have, it's kind of a formula, which is usually very accurate.

Q And Mr. Moens, what if any objective information do you need to make such an assessment?

A I need everything at my disposal to come up with a valuation.

Q What if anything did you use from the Palm Beach County Property Appraiser's Office?

A Same thing I stated. In her files, when you go in the Property Appraiser's Office, it usually gives number of dwellings. It will say how many square feet. It will say approximately, or it will state a number, whether it's right or wrong, what the number of acres is, or square feet of land.

All of those technical things do have something to do with the value. You have to know what you're valuing and how big it is. Not just the dwelling, but also the land. It's whether or not it's on the water. If it's not on the water; if it is on the water. If it's in the estate section; not in the estate section. There's -- location has a lot to do with it, but facts, real numbers and all the facts, aren't always right. Even when I look at different reports, or the property appraiser, sometimes field officers get things wrong. There are mistakes.

Moens - Direct by Mr. Robert
Page 6108
Q With regard to the tax assessor, what if anything does the assessment in taxable value have to do with the selling price of the property?

A Absolutely none.
Q With regard to the Mar-A-Lago valuation, that was one of the properties you valued; correct, sir?

A Yes, it is.
$Q$ And have you visited the property?
A Many times, since the 1980s.
Q And this is as good a time as any. How, if at all, or did you ever, meet President Trump?

A I was asked to meet him by Larry Fisher -- God rest his soul. He was a nice guy. One of the first billionaires in America -- to help guide him on a property that he was doing in West Palm Beach, Florida, and give him an opinion.

Q And when was that, sir?
A I would say somewhere in the late 1980s.
Q And how would you describe your relationship with President Trump, from that point in time to now?

A Cordial.
Q And how is it that you came to be an expert for us in this case?

A President Trump was at Mar-A-Lago, and we bumped into each other. I hadn't seen him in quite some time, and he said, Can I ask you if you would help me with something? I've got an
3
issue in New York that I'm dealing with. I would like to see if you could render an opinion for my attorneys, and that's first time I heard the name Chris Kise. And he asked if it will be all right for Chris to call me, and I said it would be.

Q And what, if any -- what was the specific assignment that Mr. Kise gave you?

A Well, Mr. Kise asked me to take a look at properties which are the subject of this trial, I guess. In Palm Beach, not the other properties that are subject to this. But, I looked at the four properties in Palm Beach, and he offered me an amount of money per hour. I think it was 975, I think it was, per hour, to take a look at and give an opinion of the values of those four properties.

Q So, let's starts with the Mar-A-Lago property, sir. You already testified that the first thing you did is you went and you got square footage and acreage; correct?

A Correct.
Q What if anything did you do next?
A I looked at anything. I've got a great office
manager, highest paid, probably, in Palm Beach. Very good at what she does. She went through all of our files. She pulled records. We did properties in the area. We did comparable sales. We looked at the facts that I told you earlier from the courthouse. We looked at, even, Les Evans' report, which is no longer published, but at the time of the years 2011 to 2021, I
think, they were published.
So, anything that was out there that I could tap into to come up with a real number, including my own experience and gut feeling correlating that information.

Q Before we talk about your experience and your gut feeling, what is the Evans report?

A It's no longer published, but it's an attorney in Palm Beach that used to report sales and their numbers and their frequency, and some of the information in there was wrong. I would know that -- he would have a recorded price on a property at, you know, 63 million, and it actually sold for 67 million. The reason there's a discrepancy is sometimes properties sell, and they are legally allowed to take things off, like furnishings, or artwork, or greedy brokers' fees. They're able to deduct certain expenses from the number, so that the recorded number is less than the actual transfer and consideration of money.

Q What else do you use to determine comparables sales?
A We try and get as close as we can to similar
properties in the area. When they sold, what was involved. You have additions and subtractions for additional reasons, based on their location, size, the proximity of the property, and it's kind of a recipe to come up with a final number.

Q What if anything does uniqueness of a property have to do, in determining value?

MR. WALLACE: I'll just note my objection, your Honor. It's a marketing video. It's got swelling sound tracks and crane shots and drone shots. It is not, I believe, relevant, and I'm not sure if it's qualifying as a demonstrative of the nature of the property, or if it's -how it's supposed to be entered into evidence.
Q Mr. Moens, that was produced for this testimony; it's not a marketing --

A It was, absolutely. I would never use that as marketing.

Q Well, how do you market --
MR. ROBERT: Withdrawn.
Q What is the typical client that you deal with, or who is the typical client that you deal with?

A They're usually very wealthy people that come to Palm Beach because so it's damn expensive to live there.

Q And would a marketing -- would the video, that Mr. Wallace is suggesting that this is a marketing video, be a way that someone like you would sell a home like this?

A I don't use videos to market my properties.
MR. ROBERT: Your Honor, I would like to show the
Court Exhibit 1063, which is the video.
THE COURT: Objection overruled. Let's see it. MR. ROBERT: Let's hope the technology works. It's all on you.

Page 6112
was turned into a club, and it's quite amazing to see, if you haven't seen it.

I invited the Attorney General's Office to come see it anytime. That offer stands, if you ever want to go in there. I'll make sure he is not there when you come, but I'll get you in there to see it, because it's something breathtaking. It's something amazing to see.

Q You mentioned a video. Mr. Moens, did you prepare a video for your testimony here today?

A I did. I thought it would be good for the judge, or --

Q And what does that video depict?
A It just gives you a flavor. It's very short. It's only seven and a half minutes, or less, and it just gives you an overview of what we are talking about with regard to that structure.

MR. ROBERT: Your Honor, I would like to put, on the board, a video, Defendant's Exhibit 1063, which is the video that Mr. Moens prepared of Mar-A-Lago. Instead of having a site visit, which I don't think is practicable, to take the Court and everyone else to Mar-A-Lago, we figured it's the simplest way to do it, and then Mr. Moens will explain after, what it is we're seeing.

THE COURT: If it gets any colder outside, I'll take him up on the offer.
L. Moens - Direct by Mr. Robert

Page 6114
(Whereupon, a video was played.)
A I'm sorry. The flag was at half mast in honor of the first lady, who had just recently passed away when we did this. Roslyn Carter.

MR. WALLACE: Who was not a member of Mar-A-Lago, I believe.

MR. ROBERT: I believe so.
Q Mr. Moens, obviously that was an impressive presentation in the video. What, if anything of great significant -- and I'll not use the word significance -- great significant, in terms of your opinion of value, would you like to specifically draw our attention to.

MR. ROBERT: Without looking at it again, your Honor.
Q Just certain specific things, Mr. Moens.
A Well, if I narrated it, I would have pointed out things like the hand-laid stones in the huge courtyard to the west of the main facade of the house. Each one was laid by an individual person, from Marjorie Post, when the house, or the castle, was built.

The winged ceilings -- it's called the room of a thousand wings -- has actual gold applied to it. At the time, millions of dollars worth of gold were used. I don't know what it would be today, but it would be far -- it would cost many times what it did then, in 1927, completed in ' 28 , to try and
replicate what's in that house.
Hand-carved stone. There were workmen there for years just doing trades, from all over the world, carving and creating what Mar-A-Lago is today. That's why I encouraged the Attorney General to come and see it, do a field view of the property, to understand what it is. That was just a seven-minute snippet of what is there. I think it's important to know that it's different from other residential, or clubs, whatever label you put on it, that exist in the world. It's unto itself. One of the most important properties.

You have got Mar-A-Lago. You have got San Simeon in California, the Hearst castle. Harold Vanderbilt's house in North Carolina. These are castles, sometimes turned in museums or clubs, but they were residences lived in by the original families, and other families that occupied, after the original family either didn't want the property anymore, or they died.

MR. ROBERT: Your Honor, at this point we move
Defendant's Exhibit 1063 into evidence.
THE COURT: Granted. It's in.
(Whereupon, Defendant's Exhibit 1063 was received in evidence.)
Q Mr. Moens, before we talk about the actual value, there came a point in time that you placed a valuation on Mar-A-Lago; correct?

A Yes.
L. Moens - Direct by Mr. Robert

Page 6116
Q And that was for the period of 2011 through 2021; correct?

A I did those years, yes. Ten years.
Q We spoke about the objective things that you looked at. What else did you add to the mix, if anything, in coming up to the value?

A Well, it's just comparing it to properties of great importance that sell in the town that I have my business, and surrounding towns like Jupiter Island, Manalapan, but primarily Palm Beach, Florida. I came up with my numbers by using all the information at my fingertips, and 45 years of doing this business in the Palm Beach market.

Q Is there an analogy that you like to use that explains how you interject your 45 years of experience into these objective numbers?

A I don't understand.
Q Okay.
MR. ROBERT: Your Honor, I would like to put, on the board, demonstrative Exhibit DD6.

THE COURT: Which is?
MR. ROBERT: We are going to hand it up. It's a chart from Mr. Moens' report that has his valuation. It's just going to be easier to take him through.

THE COURT: So, this is going to be his basic bottom line?

MR. ROBERT: Correct.
(Whereupon, a document was handed to the Court and the witness.)

THE COURT: I'm going to ask that the witness be excused for a minute. I did to discuss and address certain issues.

We'll see you back soon.
THE WITNESS: Oh. You want me to leave? Sorry. I didn't know I was being ejected.

THE COURT: We have an interrogation room in the back. We will work you over.

THE WITNESS: I hope it's sound proof.
(Whereupon, the witness was excused from the courtroom.)

THE COURT: Something that I wrestled with, this whole case, is what exactly is the Attorney General basing its case on, in this. What is the real claim, here. And I've tried to make clear in my own mind, and in the summary judgment motion, I don't see this case as -- you ask the person on the street, what's the case about. They over-valued the property. I see this case about the documents, whether the defendants used false documents in transacting business, which is what 6312 is basically about. And the other six causes of action, one of them is false documents, insurance fraud, I think somewhat similar.

Page 6118
So, I'll allow Mr. Moens' testimony, either as a demonstrative or orally, what he thinks Mar-A-Lago is worth, but that's not the bottom issue here for me, and in fact I said, and maybe in a footnote in the summary judgment motion, I'm not trying to figure out what the value is. I'm trying to figure out whether or not the defendants violated 6312 by using false documents in the transaction of business.

So, I'll let it in, with the understanding that I don't necessarily even consider it relevant. But again, sort of taking on a cue from Mr. Kise, on appeal, maybe the Appellate Division or the higher courts will think, Well, no, it is relevant, so we wanted the testimony.

MR. ROBERT: And I know better than to say anything when it's coming in, so I will keep my mouth shut.

THE COURT: Plaintiff, any comments, agreement, disagreement, anything you want to say?

MR. WALLACE: No, I certainly agree, it's irrelevant. I do think that our case is based on the use of false information and the preparation the valuations that went into the statement. We have not ever taken the position that because something is objectively wrong, or that, you know, you need to have a certain appraisal or certain piece. It is based on the information that existed, that was available to the defendants at the time

```
    they were preparing these, and the choices they made in how
    they undertook to present the values.
    So, I agree. We are not presenting -- I think
    this is actually going to be the only witness who is
    valuing a property so far, in the entire case, who is
    offering sort of any independent estimate of value for any
    individual property, and that's because I don't think it's
    really relevant to the issue, as well.
THE COURT: Did I say anything with which you disagree?
MR. WALLACE: No, your Honor.
THE COURT: You don't have to say no.
MR. WALLACE: I can go back and look, but why don't I do that over lunch.
THE COURT: And Mr. Kise, what's your philosophy here?
MR. KISE: Well, my philosophy is, it's coming in, so I'm not going to say much, but I will say that you said a lot that I don't agree with, but we'll deal with that at another time.
THE COURT: A lot that you disagree.
MR. KISE: I disagree, but that's for --
THE COURT: Another time.
MR. KISE: Another time. It's coming in.
THE COURT: Okay. Let's get the witness and see
to the witness.)
A Ido.
Q And do you recognize these numbers?
A Yes. I prepared them.
Q Okay. And where did you prepare them?
A In my office, with my office manager and bookkeeper and receptionist.

Q Are these the numbers that you determined to be THE value of Mar-A-Lago for particular years?

A Yes, they are.
Q So, looking to 2011, what was the value that you placed on Mar-A-Lago in 2011, as a single -MR. ROBERT: Withdrawn.
Q What is this value based on?
A What I could get for it in the open market in that year, 2011, if he would hire me to sell it. Which, he did not.

Q And for what would it be, as a single-family house, something else? As what?

A As a club, as a single-family residence. As what it exists in its present form today, or in 2011.

Q And what was the value you placed on it in 2011, sir?
A \(\$ 655\) million.
Q And what is the comment to the right that says, Moens value, with memberships? Explain that, sir.

A Well, I just wanted the Court to understand that
L. Moens - Direct by Mr. Robert

Page 6120
the demonstrative.
MR. KISE: Thank you.
I was just going to say, it may be, now that I've seen where we are, if we take our lunch break now, we can truncate. If I confer with Mr. Robert, we can probably -THE COURT: Let's keep going. We have got -MR. KISE: That's fine.
(Whereupon, the witness resumed the witness stand.)

THE COURT: I appreciate the offer.
MR. ROBERT: What time do you want to stop? So I keep --

THE COURT: About five to 1:00.
MR. ROBERT: Sure.
THE COURT: So, we have got ten minutes.
THE WITNESS: Can we finish me in ten?
THE COURT: He could finish you in ten, but I don't think they could.

MR. ROBERT: Even I couldn't finish him in ten. Maybe twelve, but not ten.
CONTINUED DIRECT EXAMINATION BY MR. ROBERT:

Q Mr. Moens, you have in front of you what's been marked as Defendant's Demonstrative Exhibit DD6. Do you see that?
(Whereupon, a document was displayed, and handed
there's an underlying additional thing to consider here. I'm looking at bricks and mortar. I'm looking at what it is, where it is, when I come up with my value.

In addition to my value, because it allows to be a club and has memberships that are available, there's additional monies or revenue that can be derived from selling those memberships, if one chose to sell the memberships. As Mar-A-Lago, in 2011, they were getting an average of 100,000 for a membership. Each year, it bounces around, but I was able to obtain the numbers from the club manager, Bernd Lembcke, who was able to give me the numbers of what the club collected for memberships, during the ten years that I was asked to do this analysis.
(Continued on the next page.)
Q. And what was the value you placed on the Mar-a-lago sale with membership in 2011?
A. \(\$ 705\) million.
Q. And Mr. Moens, on the left, next to the year, it says, "SOFC value" what's that?
A. I'm not really good with acronyms but, I think it's Statement of Financial Condition or something.
Q. What is the number that's listed underneath that

Statement of Financial Condition value?
A. \(\$ 426,529,614\).
Q. And moving to 2012, Mr. Moens, what was the value that you placed on Mar-a-lago without memberships?
A. \(\$ 675\) million.
Q. And the value you placed on it with memberships in 2012?
A. \(\$ 725\) million.
Q. In 2013, the value you placed on it without memberships?
A. \(\$ 660\) million.
Q. And in 2013, the value you placed on it with memberships?

\section*{A. \(\$ 697,500,000\).}

MR. WALLACE: Your Honor, I just want to take this opportunity to interpose objection on the membership amounts.

\section*{L.Moens - Defendants - Direct/Mr. Robert}

The source for this these amounts that came from the club manager was not disclosed in his report. I don't know that it is material but, I just wanted to note that this is -- the source of this data was not disclosed as the source of material reviewed.

MR. ROBERT: I believe the question was asked at his deposition.

THE COURT: Well, the exhibit is in Evidence. And I will decide how to treat it.
Q. So did I have an answer as to what the value of the membership was in 2013.
A. I'm sorry, which value?
Q. With memberships in 2013.
A. Six hundred ninety seven million five hundred thousand dollars.
Q. In 2014 what was the value without memberships?
A. \(\$ 685\) million.
Q. And the value with memberships in 2014?
A. \(\$ 735\) million.
Q. The value in 2015 without memberships?
A. \(\$ 720\) million.
Q. And the value with memberships in 2015?
A. 770 million.
Q. In 2016, Mr. Moens, your value without memberships?
A. \(\$ 760\) million.
Q. And your value with memberships in 2016 ?
A. \(\$ 835\) million.
Q. And in 2017, your value without memberships?
A. \(\$ 790\) million.
Q. And in 2017, your value with memberships?
A. \(\$ 890\) million.
Q. And in 2018, Mr. Moens, your value without memberships?
A. \(\$ 825\) million.
Q. And in 2018, your value with memberships?
A. \(\$ 950\) million.
Q. And Mr. Moens, in 2019, your value without memberships?
A. \(\$ 865\) million.
Q. And your value with memberships in 2019.
A. \(\$ 990\) million.
Q. And Mr. Moens, in 2020, what was the value placed on Mar-a-lago without memberships for 2020?
A. \(\$ 950\) million.
Q. And in 2020, the value you placed on Mar-a-lago with memberships?
A. One billion seventy five million dollars.
Q. Mr. Moens, for 2012, what was the value you placed on Mar-a-lago?

THE COURT: You don't mean 2012.
MR. ROBERT: I'm sorry, your Honor. Forgive me.
Q. Mr. Moens, in 2021, what was the value you placed on Mar-a-lago without memberships?
A. One billion forty million dollars.
Q. And the value you placed on Mar-a-lago for 2021 with memberships?
A. \(\$ 1,215,000,000\).

MR. ROBERT: Your Honor, I think this may be a good time to break for lunch.

THE COURT: That's a deal. I'm hungry. See you all at 2:15 then.

MS. FAHERTY: Can we get an admonition, your Honor.

THE WITNESS: Thank you.
THE COURT: Do not discuss this case, your testimony or anything related to it during the lunch break.

THE WITNESS: I'm honoring your wish. THE COURT: Thank you.
(A luncheon recess was taken.)
(After the luncheon recess, the following occurred:)
\begin{tabular}{|c|c|}
\hline 1 & \begin{tabular}{l}
AFTERNOON SESSION. \\
(The trial continued.)
\end{tabular} \\
\hline 3 & THE COURT: Welcome back. First order of \\
\hline 4 & business is to discuss schedule. Who's going to take \\
\hline 5 & the lead on that? \\
\hline 6 & MR. KISE: Okay. \\
\hline 7 & MR. ROBERT: To try to streamline things, we \\
\hline 8 & have decided not to call Eric Trump. We're pleased \\
\hline 9 & with his earlier testimony. \\
\hline 10 & THE COURT: Do you have any other witness? \\
\hline 11 & MR. KISE: We have Professor Bartov and \\
\hline 12 & President Trump who are the two remaining witnesses. \\
\hline 13 & Professor Bartov will be Thursday. He \\
\hline 14 & teaches tomorrow. We tried to move him up. He teaches \\
\hline 15 & at NYU. \\
\hline 16 & I'm not sure, shouldn't they be out of school \\
\hline 17 & by now? It is December 11th. It's next week. It's \\
\hline 18 & not Florida. Apparently, not. But yes, we tried to \\
\hline 19 & move him up but, apparently not. \\
\hline 20 & And then, we have one -- we have several \\
\hline 21 & documents that -- they are just corporate documents -- \\
\hline 22 & that we can present to the government. And, if they \\
\hline 23 & will agree to just admit them, fine. If they won't, \\
\hline 24 & then we can bring a witness in to admit the documents. \\
\hline 25 & But that would be the only other witness. \\
\hline
\end{tabular}
on what we hear from Mr. Bartov if we call a rebuttal expert on accounting to respond to Mr. Flemmons and to Mr. Bartov. And beyond that, I don't know if we have -- oh, Kevin Sneddon would be the other potential witness we would call, who is a fifteen-minute witness from our perspective.

THE COURT: Okay. And no comments on the schedule?

MR. WALLACE: At this point, we're almost to the end. Let's just get there.

MR. KISE: And to the extent they call -again, as Mr. Wallace said, we don't know what their accounting witness is going to say but, to the extent they call an accounting witness, that requires us then to bring Mr. Bartov and Mr. Flemmons back, we would do that.

Depending on what they're proffering this witness for -- it may be that they're -- it really depends on what they're proffering the witness for -certainly, our position is going to be that they can't bring in a witness now to testify to things that they, certainly, could have done in their case and chief. But, we don't know because we don't know exactly what the proffer of the testimony is.

But we can't have -- Mr. Flemmons and

And again, if they won't do it by stipulation, we can bring the witness in Thursday morning. It would take fifteen minutes -- if that. But that's the current plan, your Honor.

THE COURT: Plaintiff, in response?
MR. WALLACE: Well, the devil is in the details of the document. But, so far, we have been able to agree.

I think we would want to see what they are proposing. It's not our case. So, beyond that, I don't think -- if the proposal is workout some stipulation on documents or spend fifteen minutes with everyone coming to court to deal with that, I think that would not be our preference. Happy to see what the defendants have and are proposing.

And another option is always if people offer affidavits or lay a foundation for a document. Why don't we just see what the defendants have.

MR. KISE: Sure.
MR. ROBERT: Your Honor, at this point, if the prosecution could let us know if they have a rebuttal case and who they will call so that we can prepare because, that would start Tuesday morning presumably.

MR. WALLACE: I think it depends, somewhat,

Defendants - Direct/Mr. Robert
Page 6130

Professor Bartov aren't going to testify about what their expert said necessarily directly because, that's not in the trial record. The only way they would have an opportunity to do that is if they called that witness and then we would have an actual rebuttal.

THE COURT: Okay. So we're down tomorrow; is that \(i t ?\)

MR. KISE: I believe that's correct.
MR. ROBERT: I'm not going to be long with the witness this afternoon. I don't think the government is going to be long.

MR. WALLACE: We're not going to be long either.

THE COURT: I will turn the microphone over to the person who's sitting next to me.

MS. GREENFIELD: We're going to be down tomorrow. Bartov is going to start Thursday morning?

MR. ROBERT: I'm sorry. I didn't hear that?
MR. KISE: Yes, Professor Bartov is starting Thursday morning.

MS. GREENFIELD: And is he expected to go into Friday or is that going to be one day.

MR. KISE: We're certainly going to take a good amount of Thursday not the whole day Thursday I would anticipate. It depends on how much cross
\begin{tabular}{|c|c|}
\hline 1 & examination the government has. But I'm hoping it \\
\hline 2 & doesn't spill over to Friday. But, that's certainly a \\
\hline 3 & distinct possibility. \\
\hline 4 & MS. GREENFIELD: So if it does not spill \\
\hline 5 & into Friday, do you anticipate Friday being another \\
\hline 6 & down day? \\
\hline 7 & MR. KISE: It will be because, the only \\
\hline 8 & other remaining witness would be President Trump. And \\
\hline 9 & I have one other issue on that. \\
\hline 10 & MS. GREENFIELD: There's no other \\
\hline 11 & administrative tasks that can be done, that needs to be \\
\hline 12 & done? \\
\hline 13 & MR. KISE: Not that I'm aware of. \\
\hline 14 & THE COURT: Okay. We're all set. \\
\hline 15 & MR. KISE: As to President Trump, given, as \\
\hline 16 & the Court may be aware of, that we're in the process of \\
\hline 17 & seeking expedited review, by the New York Court \\
\hline 18 & Appeals, as to the gag order issues, we would ask the \\
\hline 19 & Court to postpone his testimony until after that is \\
\hline 20 & resolved. Because, at this point, he's not capable of \\
\hline 21 & fully testifying because, he's going to be subject to a \\
\hline 22 & gag order. \\
\hline 23 & So, we would ask the Court to put off his \\
\hline 24 & Monday testimony until such time as the New York Court \\
\hline 25 & of Appeals resolves, one way or the other, the gag \\
\hline
\end{tabular}
A. I do.
Q. Sir, were those opinions of value with a degree of certainty?
A. Absolutely.
Q. Mr. Moens, what went into the factors in coming up with these values?
A. Well, several factors. It's factual evidence or prima facie evidence that exists in the world to come up with what we're talking about in terms of size, not only of the land but of the structures, you know, where the economic conditions are of the market at that time that I'm asked the question. It may change, from year to year, as markets change.

Forty-five years that I've been doing this business, you develop after, over ten billion in sales, you start developing a feel for pricing if you're doing it everyday pretty much seven days a week for that many years.

So, it's an analysis, it's a gut feeling, it's factual evidence. It's like a recipe. It's, like, putting a cake together. You need the milk, the flour, the chocolate, the eggs. I make the best chocolate cake in the world by the way. It's amazing.

But, to do that cake or make that recipe work, you have to have everything. And it's not an exacting science. You have to have a feel for it. You have to know, "A little

\section*{order.}

Because, we don't think that a civil defendant should be called to the witness stand in his own case, under any, any limitations as to what he can testify about.

THE COURT: Plaintiff?
MR. WALLACE: Absolutely, not.
THE COURT: Absolutely, not. No way. No
how. Nonstarter. Not allowing that. If he's going to testify, it will be Monday. And, that's that.

MR. KISE: Thank you, Judge.
THE COURT: But, you tried. I gave it to
you. You could tell. Let's get the witness back?
MR. ROBERT: Yes, Judge.
May I proceed, your Honor?
THE COURT: Please do.
MR. ROBERT: If we can call back on the screen demonstrative KD-61.

\section*{DIRECT EXAMINATION}

BY MR. ROBERT:
Q. Mr. Moens, before the lunch break, I had taken you through this and you had set forth, for the Court, your value both with and without memberships for Mar-a-lago from 2011 to 2021.

Do you remember that?

1 pinch of this, a little coffee instead, sneak a little something else in, vanilla" things that aren't on a recipe.

So, what \(I\) do is a little different from other people. I've been doing this for a long time. It seems to work the way I'm doing it. So I'm going to keep baking cakes the way I do.
Q. What are those things that are the ingredients in the cake, if you will, for real estate valuations such as for Mar-a-lago and other properties?
A. What I said before. It's square footage, it's quality of construction. It's, with Mar-a-lago, you've gold gilded ceilings that you saw in the video, hand carved cherubs on the doors. There are, you know, dozens and dozens of these hand carved his cherubs that are attached to each door in the living room.

A single person hand carved each one of those pieces. They don't do that anymore today. Hand-painted tiles, the carved stone outside.

There were individuals that were carving the stone out of blocks and turning it into the beauty that you saw in the video. I'd encourage you to see the video again to see some of the detail in it and not just watch a short film. My first short film. I hope it's an Academy Award winner but, I don't know that I'm a film maker. But, I tried to give you a snippet of Mar-a-lago. I tried to get you there
since we're not there we're in New York.
Q. You mentioned earlier something about the estate section. Is that where Mar-a-lago is located?
A. Yes, it is.
Q. What is the estate section of Palm Beach?
A. Well, it's known as the properties that exists
between Worth Avenue and, probably, Mar-a-lago at Southern Boulevard.

It drifts a little bit south a couple blocks
south; assembled over, probably, nine years; over six hundred million dollars worth of land for one family.

And that's just the land. We're not talking about structures. Now, they're going to build for hundreds of millions of dollars a structure and have another billion dollar house that would exist in Palm Beach. It has yet to be created but, it took years and years to put together that many properties. I think it was 13.
Q. How big is the acreage of that \(\$ 600\) million property?
A. Over twenty.
Q. And is that in the estate section?
A. Well, it's in the -- it's in the estate section
but, it's the south of the southern estate section. So they say, its just south of the estate section.
Q. And what if any impact does the beach front have
A. I started in 1977. I started my own label company in 1982.
Q. In 1993, were you, actively, involved in the sale of real estate in Palm Beach?
A. Very much so.
Q. If we could draw your attention to 478-6.

Mr. Wallace asked the last witness to comment on something. I would like to show it to you. Okay.

I'm taking the Judge's advise. It's the first sentence that goes almost two lines. And it says, "As to item one, it is impractical for a single individual to, continuously, own Mar-a-lago as a private estate at his or her sole expense."

Do you see is that, sir?
A. I see it very clearly.
Q. Is that something you would have agreed was accurate back in 1993?
A. Absolutely.
Q. And is that something you agree is accurate today?
A. Not at all.
Q. Why?
A. When this was done there weren't -- there wasn't
the wealth that there is today in America. You have a lot of entrepreneurs, a lot of very wealthy multi, multi, billionaires that can afford to buy expensive housing.
on value of Mar-a-lago?
A. Well, beachfront, generally, is hard to get
anymore in Palm Beach. I fortunately have a house on the beach and bought it 21 years ago. Thank God I bought it because, I wouldn't be able to afford it in today dollars.
Q. Do you know how much beachfront area Mar-a-lago has?
A. Mar-a-lago has 365 feet on the ocean. I think it's similar on the lake. But, it might be a little different.

MR. ROBERT: Before we leave Mar-a-lago and go to the other properties, I'd like to show the witness Defendant's Exhibit 4782 in evidence.
Q. And I draw your attention, specifically, to page three -- actually, let's start at the first page for a minute or the second page actually.

Do you recognize this document, Mr. Moens?
A. I do.
Q. And what is this document?
A. Well, it's regarding the club. It's special
exception use and preservation plan.
Q. What is the year of this document?
A. I think '93, March 12 of '93.
Q. And just to orient ourselves, Lawrence Moens \&

Associates started selling Palm Beach real estate in ' 82.

Before just a few years ago, there were no homes for over a hundred million dollars. They didn't exist. They do now.

The wealth isn't, you know, a hundred million dollars anymore. I still think that's a lot of money. But now you're talking billion. And then, you're talking billion of billion. Then you talk about net worth of guys that have over a hundred billion dollars which to me is staggering. It's incredible.

If I had the right properties, like a Mar-a-lago or something of its caliber, I would have people that would want to obtain it. The problem is, it's hard to get properties like that. They don't really often come up.

They usually come up through attrition. People die. People change their mind or move to a different part of the world. But, they don't often come up.
Q. In addition to Mar-a-lago, were you asked to value 1094 South Ocean Boulevard?
A. I was.
Q. What is 1094 South Ocean Boulevard.
A. Single family home. Located just north of Mar-a-lago.
Q. And do you know how big a parcel that is?
A. I don't have the facts in front of me. But, I can
look at my notes and tell you it's probably three quarters

of an acre or less.
Q. And sir -- let's put on DT the defendant's demonstrative Exhibit DD6-2.

And just before we go into this, Mr. Moens, what would it take to recreate a Mar-a-lago today?

MR. WALLACE: Objection.
THE COURT: On the ground.
MR. WALLACE: It goes beyond the scope of
his expertise or his opinions or testimony in this

THE COURT: Well, he's been there. He's
filmed it. I will let him say in layperson's terms what it would take to recreate it.
A. May I answer?
Q. Yes. The Judge said yes.
A. I just want to make sure. I don't want to overstep.

THE COURT: Overruled.
A. Your Honor, I build homes from the ground up. I'm a developer not just a real estate broker. I know what costs are in terms of building homes or renovating homes -which I do more than I do -- I try and save landmark homes.

But to do Mar-a-lago, its almost unimaginable to think of how to get the people that would even know how to carve the stone or get the labor to hand lay each stone into
a mosaic pattern in the floor.
It can be done if you can find it I'm sure. If you can afford to pay for it. Building costs in Palm Beach range anywhere from \(\$ 900\) to probably -- one of my clients is spending 3200 a foot.

But, the norm, the average, is probably in the twelve to \(\$ 1400\) square foot range for the average house. Mar-a-lago would not be considered -- especially if you saw the video -- an average house.

There's tapestry and carved doors and carved floors and gold gilded -- with real gold -- ceilings and things that would be difficult but, not impossible, to recreate.

If you were to try and recreate it, the way it is today, and get as close as you could, I would imagine the number per foot would be into the seven, eight, 9,000 a square foot range.
Q. As a practical matter, is it even possible to recreate that today?
A. I'm not sure I know the answer to that question.

I think you could try and get close. I don't know if you could do it exactly because, some of the technology, the old world technology, labor, to do it, the knowledge of how to do it is kind of a lost art. I don't know that you could.
Q. Drawing your attention to --

MR. WALLACE: Your Honor, those answers I'm going to note, again, my objection that they are bond the scope of his opinion. And I don't know that it is anymore relevant than any of the rest of this. It is well beyond anything that was disclosed as part of his opinion.

THE COURT: Well beyond the scope of anything disclosed in --
MR. WALLACE: In his report.
THE COURT: Doesn't matter one way or the other. I saw the video. I wasn't born yesterday. I know how difficult it is to get carved stone, et cetera. Let's just leave it in. Objection noted and overruled.
Q. Drawing your attention, Mr. Moens, to demonstrative Exhibit DD6-2 for 1094 South Ocean Boulevard. Do you see that?
A. I do.
Q. Was one of the tasks that you were asked to place a value on this property as well?
A. It was.
Q. And sir, did you, in fact, place a value on this property?
A. I did.
Q. And without having to go through everything you
went through before -- and I see the Judge agreeing with me -- the methodology that you described in how you came to values for Mar-a-lago, would that be consistent, the same, for 1094 South Ocean Boulevard, 124 Woodbridge and 1125 South Ocean Boulevard?
A. It is with the exception of Mar-a-lago is a special entity that took a lot more effort, time and hours because, the others were much easier to formulate numbers with.
Q. Understood. But, the same Moens' formula, if you will, is used for all of them, correct?
A. It's always the same when I make my cake.
Q. Okay. Drawing your attention to 2011 for 1094

South Ocean Boulevard. Do you have see that?
What was the Moens value for that year for this property sir?
A. \(9,700,000\).
Q. What does this in this chart or -- withdrawn.

Was there an additional value you gave for each year 2011 to 2021?
A. There were different values.
Q. When you talk about Moens value with memberships, what does that mean?
A. I just did the same thing I did with the

Mar-a-lago that we went through earlier in adding that years

A 1125 South Ocean Boulevard.
MR. ROBERT: Okay. You can take that down and put back up DD6-4.
(Whereupon, a document was displayed and handed to the witness.)
Q And this is, in fact, the property that we were just speaking of, and I just showed you in the photographs in Defendant's Exhibit 1019-23; correct?

A That would be correct.
Q Okay. And the same methods for value you used for this property as you did for all the others; correct?

A Yes.
Q Okay. And for 2017 --
MR. ROBERT: Your Honor was ahead of me. Listed
for sale. Thank you, your Honor.
Q And you explained what that meant. What was the Moens value that you put on that property, sir?

A In 2017?
Q Yes, sir?
A 19,250,000.
Q And that was without membership; correct?
A I'm sorry.
Q That was without a membership correct?
A That was without a membership.
Q And what was the value with membership for 2017, sir?
proceedings.)
MR. ROBERT: Thank you, your Honor. THE COURT: Okay.
Q Mr. Moens, you spoke a little while ago about the collection of parcels that you put together that were south of where Mar-A-Lago is. Do you remember that?

A I remember speaking about that with you.
Q And that was south of the estate sections; correct?
A It's two blocks south of Mar-A-Lago.
Q And was that a piece -- how many years did it take you to put those pieces together?

A It took little over nine years.
Q And what, again, was the price for just the land?
A In excess of \(\$ 600\) million.
Q Okay.
MR. ROBERT: I'm going to put, on the board, a demonstrative. What is the number of it? DD7?
(Whereupon, a document was displayed and handed to the witness.)
Q Do you see this, Mr. Moens?
A Ido.
Q What do you recognize this to be?
A Bunch of land. Bunch of houses.
Q Okay. Fair point. Does this map demonstrate the parcel that you were just speaking of here, of those parcels you
L. Moens - Direct by Mr. Robert

Page 6152
A Slightly higher, at \(19,450,000\).
Q And in 2018, what was the Moens value of 1125 South
Ocean Boulevard?
A 24,500,000.
Q And the Moens value with membership?
A 24,750,000.
Q And in 2019, the Moens value without membership?
A \(\$ 29,300,000\).
Q And the Moens value with membership, for 2019?
A \(20-29,550,000\).
Q And in 2020, Mr. Moens, what was your value for the property, without memberships?

A \(\$ 35\) million.
Q And the value with memberships?
A 35,250,000.
Q And in 2021, Mr. Moens, the value that you placed on that property?

A 42,500,000.
Q And the value with memberships for that year?
A 42,850,000.
I was low. I got an offer. Much higher.
MR. ROBERT: Your Honor, if I can have a moment to speak with my colleagues, please?

THE COURT: Sure.
(Whereupon, there was a pause in the
put together for that person, south of Mar-A-Lago?
A Yes.
Q Is that what's reflected in just the red, or the whole thing in the picture?

A Well, it's not the whole thing in the picture. It's most of the picture.

Q Okay. And is that a parcel that goes from Intracoastal to ocean?

A In the assemblage, there were properties that were direct ocean. There were properties that were direct lakefront. There was one property, not pictured here to the south -- I don't know if you can move the picture. It's further down, toward the bottom, that had -- there you go.

So, if you look at the word boulevard, or the abbreviation of the word boulevard, below that there's an estate with a tile roofed, and across from that there's a vacant parcel on the Intracoastal. That house is still there, on that, and that vacant parcel looks like the picture. That was owned by one person, so it was two actual sales in one. So, it was one family, two sales. So, that was the only one that you could say could have been called ocean to lake, but it was two separate parcel numbers. So, it was really two separate properties, but they were contiguous. If I'm answering that accurately.

Q In the estate section of Palm Beach, where Mar-A-Lago is located, how many properties are there that go from -- you

\section*{call it lake?}

A Well, the Intracoastal waterway is also known, synonymously, as the lake.

Q So in the estate section of Palm Beach, how many properties are there that go from lake to ocean?

A Two.
Q And what are those two properties?
A Mar-A-Lago, and one that's owned by a gentlemen by the name of William Koch.

Q And how big is Mr. Koch's property, if you know?
A It's probably four plus, or minus acres.
Q So the only two properties in the estate section of Palm Beach that go from lake to ocean are Mr. Koch's 14 acres and Mar-A-Lago's 17-plus acres. Is that fair?

A That would be correct.
Q Finally, Mr. Moens, throughout the course of this case, at your deposition, you had -- you were quoted as having said you were a dreamer. Do you remember that?

A You may say I'm a dreamer, but I'm not the only one.
No, you have -- it's true. I mean, you have the likes of great Americans like Thomas Jefferson, or John Fitzgerald Kennedy, or Martin Luther King, or any of these people. Donald J. Trump. He is a dreamer, for sure. If you have a dreamer, and a great American, I don't think that's a bad thing. You can call me a dreamer, any time.
L. Moens - Cross by Mr. Wallace

Page 6156
MR. ROBERT: I have no further questions for this witness. Thank you.

MR. WALLACE: Just want to note, on the record, an objection on the last demonstrative. That was actually one of the requests. That was not disclosed last night. I understand the defendants just posted that at the lunch period. I will ask that the defendants honor our commitment to exchange demonstratives the night before they come into testimony, before they come about with a witness.

MR. KISE: That may have been inadvertent.
That's what I was trying to discover. That's what took us all the time -- we have honored the commitment, and I apologize, your Honor. That was the confusion at the momentary pause. But, I do apologize for that.

THE COURT: Okay. Cross examination?
MR. WALLACE: I have a couple of things, your Honor, so just give me a moment.
(Whereupon, there was a pause in the proceedings.)
CROSS EXAMINATION
BY MR. WALLACE:
Q Good afternoon, Mr. Moens. My name is Kevin Wallace. I'm an attorney with the Attorney General's office. I would like to go over a few more things that you talked about at your deposition.

First, I believe that at your deposition you testified that someone who lacked your specific expertise would not be able to reproduce your evaluation of these properties. Is that fair?

A I think it's fair. I don't think the numbers would ever be the same.

Q And you doubted that anyone else had the experience that you have in the industry to be able to come up with these valuations; is that fair?
A They didn't sell as much real estate as I have.
Q Okay. And I believe you said that in order to understand your valuation methodology, someone would actually have to go inside your head; is that correct?

A It would help them to get to the number, I'm sure.
Q But it would be difficult for anyone else to recreate the analysis that you performed. It's sui generis.

A They can do the same technological things that I did, or take the same steps. It's just rare, if you have three MAI appraisers, let's say, and you hire them to analyze the value of a certain property, with the same address, usually you are going to get three different numbers. Even though they have the same qualifications and they have the same data, they formulate some of their own opinions which don't always correlate to the same end number.
Q But you are not running a process that's re-creatable.
L. Moens - Cross by Mr. Wallace

Page 6158

You are not doing a discounted cash flow analysis, or some other kind of equation, to come up with these numbers. Is that fair?

A That's fair.
Q Okay. And I think we may be -- Mr. Robert, to coin a phrase, talked about the Moens formula. You didn't use, actually, any specific equations in coming up with these numbers; is that fair?

A That's fair.
Q Mr. Moens, you talked about some of the facts that you looked at in the course of preparing your opinion. Some of the data might be from the Appraiser's Office. It could come from other sources. I think you mentioned your own collection of data that you have gathered over the years. Is that a fair summary of some of the areas that you looked at?
A Yes.
Q Okay. And do you agree that easements and deed restrictions are relevant to a property's value? Is that correct?
A In most cases, yes.
Q And in your process, you would consider any easements on a piece of property to come up with a valuation; is that correct?
A I always do.
Q And you would consider any deed restrictions on a piece of property in coming up with a valuation; is that
correct?
A I would.
Q And easements that negatively impact a property would take away from its value; is that correct?

A If they are negative, they will take away. If they are positive, they would add to.

MR. WALLACE: If we could put back up on the screen Defendant's Exhibit 360.
(Whereupon, a document was displayed and handed to the witness.)
Q This is the deed of conservation and preservation easement from Donald J. Trump to the National Trust for Historic Preservation of the United States.

Mr. Moens, did you review this document in preparing your opinion?

A I did.
MR. WALLACE: If we could turn to page nine of this document.
Q If we look at the second sentence, under Grantor's
Covenants, item two is covenants to maintain. Item 2.1 says, In general -- and there's a small A. I'm going focus on the second sentence here, which states, "Grantor's obligation to maintain shall require replacement, rebuilding, repair, and reconstruction by grantor, whenever reasonably necessary to preserve the critical features in substantially the form and

Page 6160
condition, with substantially similar materials, and as appropriate, with substantially similar plantings, vegetation, and natural screening, to that existing on the date -- on the effective date of this easement."

Mr. Moens, did you undertake any analysis to determine the cost of maintaining the critical features of Mar-A-Lago, consistent with this deed of conservation easement?

A Yes. I mean, I know it's very expensive to maintain it. It would be smart to make it a private club and charge the members, and use that money to maintain it. I'm glad it's a club being maintained properly.

Q And you talked about some of the other facts that are in the Appraiser's Office. Mar-A-Lago is currently being taxed as a club; correct?

A To my knowledge, the Tax Appraiser is taxing it as a club.

Q And it's currently operating as a club?
A Well, I understand it's being operated as a club, and as a personal residence for the President.

Q Are you a member of the club?
A Iam.
Q You are still able to use the club, consistent with your standard membership that you have, and had, since you --

A I don't go too often. I don't like clubs.
Q When did you join?

A '95 or \(\mathbf{- 6}\), I'm guessing.
MR. WALLACE: If we could put, just, back up on
the screen for a moment, DD6.
(Whereupon, a document was displayed.)
Q You talked a little bit with the judge and with
Mr. Robert about the SOFC values. Did you actually review
Mr. Trump's Statements of Financial Condition in preparing this report?

A I saw the statements of financial condition after I prepared my valuations.
Q So you saw, for each year, the actual document that contains this Statement of Financial Condition; is that correct?

A It's -- you are talking about the numbers on the left?
Q I'm talking about the actually document. Are you familiar with it?

A If you show it to me, I'll confirm that.
(Whereupon, there was a pause in the
proceedings.)
MR. WALLACE: Why don't we pull up Plaintiff's Exhibit 730.
(Whereupon, a document was displayed and handed to the witness.)

MR. WALLACE: I don't know if he needs to flip through it.
Q Do you recognize the cover, up on the screen?
(Whereupon, a document was handed to the witness.)
A Well, they were provided to my office.
Q Okay. And who, in your office, put them into the chart?

A Christine Curry, my office manager.
Q Okay. So, you didn't look at the, I'll represent to you, a bunch of pages talking about how the property was valued. You didn't look at this in preparing your report?

A I didn't think it was relevant.
Q And you did not review any supporting spreadsheets that showed the calculations that went into Mr. Trump's Statement of Financial Condition; is that fair?
A That's fair.
Q I believe you were shown the supporting data spreadsheet at your deposition, though. Does that sound familiar to you?

A It does. They were very thorough in providing just about everything for me.

MR. WALLACE: Why don't we pull up, on the screen, a copy of Plaintiff's Exhibit 719.
(Whereupon, a document was displayed.)

Page 6164
there.
Q And does he work in the same field that you do, generally?

A Pretty much so, yes.
THE WITNESS: Sorry. I apologize. It was really
low.
MR. WALLACE: If we could pull up Plaintiff's Exhibit 2310.
(Whereupon, a document was displayed and handed to the witness.)
Q This is an email from Paul Rampell to Jeff McConney at the Trump Organization with the re: line, Houses. This is the email that's referencing the supporting data. If I can direct your attention to point one, at the top, it says, 1094 South Ocean Boulevard, Palm Beach, and the text under it reads, "The Palm Beach County Appraiser valued this residence at \(\$ 7,140,343\) as of January 1, 2012. I suggest that this is the low end of the range of its current value. In speaking with Lawrence Moens, the most successful broker in Palm Beach, he would value it at \(\$ 7,000,500\) [sic]. I suspect that this -- that this may still be low. My guess is, on the high end, is 8 or even 9 million, given its proximity to the Mar-A-Lago club, the Trump pedigree, and the club privileges the owner would enjoy."

I believe at your deposition you said you had no recollection of having such a conversation with Mr. Rampell, but
that if he said he spoke to you, you agreed that it probably happened. Does that sound fair?

A That is fair.
Q Okay. And the next property, for 124 Woodbridge, Palm Beach, states the value from the PBC Appraiser at \(\$ 2,323,412\). He then writes "Again, this is the low end of the range. Moens values it at about \(\$ 2,750,000\). Since the house itself is mediocre, the land is where the value lies. I tend to think Moens is accurate in his estimation."

First, let me ask, is it in fact the case that the house itself at 124 Woodbridge is mediocre, and that the land is where the value lies?

A At that time. Since then, I believe there's been renovations to make it less mediocre.

MR. WALLACE: If we could put this email up, side
by side with Defendant's Demonstrative Exhibit 6, page 2.
(Whereupon, a document was displayed.)
Q So, this is the valuation of South Ocean Boulevard. I'll just direct your attention to the 2013 valuation. The email states that you informed Mr. Rampell that the value was \(\$ 7,500,000\), but your valuation in the chart is \(\$ 9,600,000\). Is that correct?
A That's what it says.
Q Okay. And if we flip to the next page of the demonstrative DDX-3, for 124 Woodbridge Road, the email values
the property in 2013. It says that you advised a value of \(\$ 2,750,000\), and that matches the reported value in the SOFC, but your value now is \(\$ 4,950,000\). Do you see that?

A I do, but that's easily explained.
Q That's okay. My question is actually, did you have a more detailed understanding of the Palm Beach market as it stood in 2013, at the time of the email, August 14, 2013, or August -August 2013 or today, a decade later?

A The email left two important things out.
Q That's not the question. My question is simply, was your knowledge of the market, as it existed in 2013, better in August 2013, or ten years later, in 2023?

A I would say it's the same.
Q So there's been no loss of knowledge over the ten years?

A I hope not. I think I still got my marbles. (Continued on the next page.)
Q. Did anyone ever ask you -- let me go back to one other point. I believe you said that Mar-a-lago, unlike some of these other properties, was a special entity that took much more time and effort to value.

Is that a fair summary about what you said about Mar-a-lago?

I'm happy to restate the question, Mr. Moens. I believe you said that Mar-a-lago was a special entity, more so than the other properties, and it took much more time and effort to value that property; is that fair?
A. With the elements of carved stone and hand laid pieces and all of the things that I had mentioned earlier, it took a little bit more effort.
Q. Okay. And, at no time, from 2011 until 2021, did anyone, from the Trump Organization, ask you to help them in valuing Mar-a-lago for the purposes of Mr. Trump's Statement of Financial Condition; is that correct?
A. Wait. Could you repeat the question.
Q. Sure.

MR. WALLACE: Could we get a read back please?

THE COURT: Read it back, please.
(The testimony as requested was read by the reporter.)
A. That would be correct.

MR. WALLACE: Yes. We just want to show that they received this information.

MR. ROBERT: So then the answers that the witness -- fair enough. I will deal with it on redirect.

THE COURT: So, it is to a defendant.
MR. KISE: The notice also extends to then Mr. Rampell's communication and his estimate as well. I mean, we're all -- I just want to make sure we're clear if we're talking about notices, it's notice of all numbers in there, not just the notice of what Mr. Moens, allegedly, provided.

MR. WALLACE: The entire content of the e-mail has been -- the Trump Organization has notification of everything that's in the e-mail.

MR. KISE: I want to be sure. That's not always the case with the Government. Okay. That's fine.

THE COURT: Okay. So notice of the entire e-mail chain.

THE WITNESS: Who's Jeff McConney.
MR. WALLACE: We can take these down.
Q. Mr. Moens, just one more topic. If we could put back up Plaintiff's Exhibit 719 and go to row 207.

I think you said in your evaluation that you were
Q. Mr. Moens, if we go back --

MR. WALLACE: Your Honor, I need to move Plaintiffs 2310 in Evidence.

MR. ROBERT: It's an e-mail that's not to or from witness. It is from Paul Rampell to Jeff McConney.

MR. WALLACE: It's to Jeff McConney. It's authenticated because it's from the defendants. It's notice to them.

MR. ROBERT: I'm sorry. But it can't be admitted for the truth of the matter asserted. This is a conversation from Paul Rampell saying something to Jeff McConney. That's clearly hearsay.

MR. WALLACE: I can clear it up for everyone if you want to ask me to ask it.

MR. ROBERT: Just a moment.
MR. WALLACE: Your Honor, it's notice to the Trump Organization that they had this report from Mr. Rampell. Whether or not it's for the truth of the matter asserted, it should certainly come in.

MR. ROBERT: Notice of what to who? This is an e-mail from Paul Rampell to Jeff McConney making certain -- you want to make it that there is a e-mail from Rampell to McConney but, not for the truth of the matter asserted.
adding back in the value of the memberships at Mar-a-lago because, that's something that the future owner -- a future owner could monetize, that, they could sell the memberships and get the benefit of that. Is that a fair summary of how you added back in that value.
A. Yes.

THE COURT: Five minute warning.
MR. WALLACE: Yes.
Q. If we take a look at row 240 , here, you will see the Trump Organization -- and this is their valuation of Mar-a-lago -- has a line that says, "less member deposits" where they deduct a little over \(\$ 37\) million from the overall value of the property because, for it to be sold to a private individual, the members would have to get their money back.

That's not consistent with your evaluation technique, is that fair?
A. In that, some get paid back and some are nonrefundable is what I understand.
Q. But their deducting the value of memberships, whereas you added it back in.
A. I don't know what their methodology is in those numbers.

MR. WALLACE: Nothing further, your Honor. THE COURT: Any redirect?
\begin{tabular}{|c|c|c|}

Min-U-Script® with Word Index

1 that.

MR. WALLACE: No, that would be, potentially, a new opinion. But, it was not disclosed during the period in which the Court ordered the parties to provide their expert disclosure.

THE COURT: So, I don't think being in the affidavit, on a summary judgment motion would -- I don't know.

MR. KISE: Respectfully, your Honor, it is because with summary judgment, we are responding to their summary judgment just like they submitted things in response to our summary judgment.

So the experts -- I can't predict, with certainty, exactly, what it is that the Government is going to say in their summary judgment.

MR. WALLACE: We presented no experts in our summary judgment motion.

MR. KISE: And, if I could finish.
THE COURT: Right.
MR. KISE: But I know I do that to them all the time. So, I'm only kidding, Mr. Wallace.

So, in affidavit paragraphs 27 and 28, I will point out that Professor Bartov referenced his report.

There is nothing really new in his affidavit, with respect to these issues, that wasn't in his

He's offering an opinion. He's not making the ultimate determination. That's what you would do. But, he's providing input that would go to the ultimate determination as to the counts that remain at issue here. These determinations must include the governing accounting standards.

I don't think it's a secret. No, we don't believe that your summary judgment ruling, in this regard, actually, took into account the full GAAP Standards and the Governing Accounting Standards. Be that as it may, we are where we are.

But, the defense cannot be precluded from introducing expert testimony regarding the appropriate standards and expert opinion as to whether, based on those standards, there is evidence of a material misstatement.

The Attorney General's complaint is replete with claims that the SOFC's violated GAAP. You heard the witness say that yesterday.

But, as Professor Bartov testified, no GAAP violations were identified. The Attorney General's response to that is, simply, "Oh well, the complaint was a long time ago."

That is, respectfully, an untenable and absurd position. The governing standard is the
report. I'm just pointing out that this is another source of notice -- a word that we hear a lot about.

An expert testimony that helps clarify an issue calling for professional or technical knowledge, possessed by the expert, is properly admitted.

That's the DeLong, D-E-L-O-N-G, case, Court of Appeals 60 NY2d 296.

As the Court knows, Professor Bartov was qualified as an expert in accounting, credit analysis, valuation and financial reporting misconduct; clearly entitled to provide an opinion about whether the documents he reviewed support his opinion as to the SOFC's compliance with GAAP or any violations of GAAP.

This opinion includes whether he determined there was any evidence of a material misstatement in the SOFCs. That's, verbatim, allegations of material misstatements from his June 30th report.

It also includes his opinion, disclosed, that not all accounting errors or departures from GAAP have a significant impact on financial statement users.

His views on what the documents provide, respectfully, Judge, is no different than what you did on summary judgment. You looked at the SOFCs. You looked at documents and made determinations about those documents based on the evidence.

Proceedings
Page 6365
governing, whether it was in the complaint a long time ago or whether we talk about it here, GAAP is the standard. It's not different because that referenced it last year.

So Professor Bartov is entitled to opine on the preparation and presentation of the SOFCs, their compliance with GAAP and whether under governing accounting standards there was any material misstatement under those standards, based on that review.

And I'll cite the Court to the Hudson Insurance case. It is found at 31 misc -- M-I-S C -3d 1203(A) where, in that case, the defense called an accounting expert to testify regarding his review of the documentary and other evidence and offer an opinion as to whether or not there was any indicia of fraud.

The plaintiffs argue, similarly to here, that the issue of whether evidence of fraud exists was not properly within the expert's purview but, is instead an issue to be decided by, in that case, the jury -- a much higher standard, as you know, for admission of expert testimony when there's a jury present.

This is a bench trial. So the opportunity for confusion and misleading is limited, if it, at all, exists.

The Court in that case held that the expert may opine, as he hads, regarding his opinion on the defendant's activities.

He may testify as to how the defendant's activities compared to accepted accounting practices; and in doing so, the expert may thus provide a standard against which the fact finder may judge the defendant's activities.

Further, the expert may state his opinion upon whether fraud occurred. He may not broach the next step and state that fraud occurred as a matter of law. It is up to the Court to make that determination.

I would say that, that case is about as close to on point as you're going to find in this context. The Attorney General cases, that they cited yesterday -- as I mentioned yesterday but, I'll be more specific today -- are wholly inapposite.

The SEC case involved testimony as to a specific state of mind of the defendant. The Kincey, K-I-N C E-Y, case involved testimony as to whether the defendant, quote, intended to seriously injure or kill the victim. I don't think that there's anything, at all, that we could borrow from that analysis in this case.

Most particularly, Professor Bartov is not
offering an opinion on, as I said yesterday, on the intent or state of mind of anyone -- the defendants or anyone else.

His testimony is directly related to disputed issues at trial. He's testifying as to whether he found evidence of material misstatements in the SOFCs and other documentation based on his understanding of GAAP and other governing accounting standards.

The question of misstatement, with respect to these counts -- and frankly, we think the whole case, must be considered in the context of GAAP and the governing accounting standards.

And, the defense cannot be precluded from introducing expert opinions as to the compliance with those standards and or whether, in the opinion of the expert, there was any indicia of material misstatement or fraud pursuant to those standards.

It is then up to the Court to take that evidence and do what it will with it. But, we're entitled to put on that defense because, that's meeting the allegation that's been made against us as defendants.

So, for all those reasons and based on the cases that I cited, we would ask the Court to revisit the ruling and allow Professor Bartov to testify about

1 matters that were disclosed in his report.
THE COURT: Mr. Kise, I admire your thoroughness. I'm open to or I will revisit -especially because the witness is still available. Sometimes less is more. But that's not your style. I understand.

What I would like to do is ask you, as simply as possible, what you want the witness to say. He's not here, obviously, so I don't think there's any prejudice. However, that's what I would like to know.

But, if the Attorney General would rather weigh in first, go ahead.

MR. WALLACE: I'm eager to hear what this testimony would entail. So, I will wait until Mr. Kise answers the question before I weigh in.

THE COURT: Are we talking about ten questions and answers, three questions and answers thirty?

MR. KISE: Two things on that. Number one, to the extent the testimony from yesterday isn't stricken, if you lift that ruling -- you revisit that ruling and don't strike that testimony, number one, that solves a lot of issues because, then, the testimony is already in the record. We don't have to revisit those questions.

THE COURT: I'm not going to do that. But, I'm giving you the chance to say what you want him to be able to say.

MR. KISE: Okay. What we want him to be able to say is ostensibly what he said yesterday; that, based on my review of the SOFCs, the relevant supporting documentation, the relevant testimony, that, that I saw in indicia of material misstatement or fraud. And that's the short of it.

And I would think that, that can be accomplished -- I mean, I'm not going to speak for my colleague, Mr. Suarez. But, I would think that that's a half a dozen questions or so. I mean, it's not a complicated proposition. But, the point is, he's done a review, he's looked at the --

THE COURT: Okay. To me, that's one question. Having reviewed everything -- you don't have to repeat what he reviewed -- did you find any indicia of fraud -- except that's leading but, something like that.

MR. KISE: Well, something like that. I mean, you asked me in sum and substance.

THE COURT: That's what I wanted to know. You want him to be able to say I examined the SOFCs, blah, blah, blah and I didn't see any indicia of fraud.
\begin{tabular}{ll}
1 & \multicolumn{1}{c}{ MR. KISE: The only caveat to that, in terms } \\
2 & of the numbers of question is, there would just be a \\
3 & series of questions. \\
4 & As you know, we have to go year by year. \\
5 & It's the same question, like, in 2016, you examined the \\
6 & SOFC, did you determine any -- based on your review of \\
7 & these records, was there any indicia of fraud or what \\
8 & did that reveal to you. But, '16, '17, '18. \\
9 & THE COURT: He's going to say "no" for every \\
10 & year. Why do we -- \\
11 & MR. KISE: Because it's important; \\
12 & particularly, when we get to the statute of limitation \\
13 & question that we have in the record that this is \\
14 & segregated out because, I do think that is going to \\
15 & become very important on appeal -- without question it \\
16 & is. \\
17 & THE COURT: *Fine. You can ask that \\
18 & question. \\
19 & MR. KISE: You asked me "that's it?" That's \\
20 & it on what we want to ask. I don't think I'm leaving \\
21 & anything out unless Mr. Robert has anything to add. \\
22 & MR. ROBERT: I don't. \\
23 & THE COURT: So, Attorney General, would \\
24 & you -- do you object -- \\
25 & MR. WALLACE: I do.
\end{tabular}
particularly, when we get to the statute of limitation
question that we have in the record that this is
segregated out because, I do think that is going to
become very important on appeal -- without question it is.

THE COURT: *Fine. You can ask that
MR. KISE: You asked me "that's it?" That's

He has not really reviewed much of the testimony. He hasn't reviewed the testimony of -- or he, certainly, doesn't rely in his reports on the testimony of Mr. Weisselberg or Mr. McConney or Mr. Birney or any of the people who actually prepared the reports.

So this is a reason why you disclose, in your report, what your opinions are and the foundation for those opinions. So, we could have investigated that at the time we were doing expert discovery.

So this fraud opinion is new. It is not disclosed in his reports. And, I will note, I'm looking at the first citation Mr. Kise gave us, paragraph 25 to 32 of his report.

Paragraph 25 says, clearly, the original financial statement information serves as the -- it doesn't relate to fraud. It relates to the process for preparing financial statements. It relates to standard credit analysis theory which is in paragraph 27.

Paragraph 28 begins, "To what extent do lenders rely on financial statement information in their credit risk analysis?"

So I don't know if Mr. Kise is citing to the wrong paragraphs but, any proprietary or academic analysis that Professor Bartov performed in order to
\begin{tabular}{|c|c|c|c|}
\hline Proc & dings Page 6371 & \multicolumn{2}{|l|}{Proceedings Page 6373} \\
\hline & THE COURT: -- to what you judgment heard? & 1 & determine whether or not there was fraud, was not \\
\hline 2 & MR. WALLACE: Yes, I still object. I think & 2 & disclosed in his report and is, therefore, not an \\
\hline 3 & we're confusing the issues. Yesterday we objected to, & 3 & appropriate grounds for him to be testifying now. \\
\hline 4 & indeed, questions that would have Professor Bartov talk & 4 & I will just add that Professor Bartov has \\
\hline 5 & about intent of defendants. & 5 & been granted broad latitude to testify about how \\
\hline 6 & That is the reason we cited the cases we & 6 & Deutsche Bank should have done credit analysis, what \\
\hline 7 & cited. We were not citing that as the basis to exclude & 7 & his thoughts are on the quality of Statements of \\
\hline 8 & his testimony about some investigation he conducted and & 8 & Financial Condition -- they're not tethered to much \\
\hline 9 & the determinations as to whether or not there was fraud & 9 & except "I look at the documents and it's obvious." \\
\hline 10 & in this case. & 10 & This witness has been given broad latitude to \\
\hline 11 & Those questions we objected to because, as a & 11 & go, well beyond, the scope of his core expertise. We \\
\hline 12 & new opinion, it was not included in his original & 12 & would posit he, actually, has demonstrated very little \\
\hline 13 & disclosures. And if he -- I believe the introductory & 13 & to no expertise to someone doing a credit analysis. \\
\hline 14 & question to that was, do you have some process that you & 14 & But I think letting him now bootstrap and \\
\hline 15 & follow for determining whether or not there is fraud in & 15 & bring in a new opinion about fraud, they should have \\
\hline 16 & the financial statement. & 16 & disclosed it in his report. And he's not allowed to \\
\hline 17 & I believe this was going to go to some & 17 & testify to it now. \\
\hline 18 & econometric or academic analysis he performs when he & 18 & MR. KISE: So, I am just going to read from \\
\hline 19 & looks at statements. And that's how he knows -- just & 19 & page 36 of the June 30, 2023 report. Allegations of \\
\hline 20 & by looking at the face of the statement -- whether or & 20 & material accounting misstatements -- otherwise known as \\
\hline 21 & not there's fraud. & 21 & fraud in this case -- allegations of material \\
\hline 22 & So he is applying some sort of professional & 22 & accounting misstatements and use of inappropriate \\
\hline 23 & nique to determine there's fraud. Because, I will & 23 & valuation methods in the compilation reports, due to \\
\hline 24 & posit, Professor Bartov has not read the supporting & 24 & GAAP violations, are based on invalid premises and \\
\hline 25 & data. He testified to that in his deposition. & 25 & incomplete and flawed analysis of relevant facts. \\
\hline
\end{tabular}

So the invalid premises would be the interpretation of GAAP and the GAAP violations.

No, we did not disclose every word of what Professor Bartov was going to testify to. The trial testimony of the witnesses that he's referencing was not available at the time he prepared his reports.

The subject matter, though -- to say that the subject matter of material accounting misstatements and his testimony and his views on whether or not the SOFCs contain material accounting misstatements is disingenuous at best. And far worse, from a different perspective, for the Government to argue that they weren't on notice of these opinions, I mean, they there.

The subject matter that I referenced earlier is in the broader sense subject matter. But if the Court is concerned about the use of "misstatement" versus the use of the word "fraud" as I said yesterday, fine, then he can say material accounting misstatements if that's going to satisfy the notice requirement then -- I don't see a different because, that's really what's at issue in the case.

Fraud is judged based on whether or not there are material accounting misstatements. Frankly, a 6312 Violation is judged based on whether or not there are
\begin{tabular}{|ll|}
\hline Proceedings \\
\(\mathbf{1}\) & material accounting misstatements. And that's why I \\
2 & say that the GAAP considerations were relevant for \\
3 & purposes of summary judgment. \\
4 & So, I don't see there's any disclosure issue. \\
5 & And, it appearances as though we're in violent \\
6 & agreement on the idea that he can testify to this \\
7 & subject matter. It's just they're claiming it wasn't \\
8 & disclosed. Just that one quote from page 36 of this \\
9 & June 30th report places him on notice. \\
10 & MR. WALLACE: I will be, exceedingly, brief. \\
11 & It doesn't say, "fraud." He was asked a question about \\
12 & how you detect fraud in the financial statement. \\
13 & If he was asked questions about material \\
14 & misstatements, we would, probably, have a different \\
15 & response but, judge the questions as they were asked. \\
16 & I will just also note, I'm not suggesting the \\
17 & problem with Professor Bartov is that he didn't review \\
18 & trial testimony. The problem is he didn't review \\
19 & investigative testimony from any of those people. \\
20 & The issues with reliability of anything on \\
21 & this count and the failure to disclose on this subject \\
22 & matter remain. And there was no disclosure of any \\
23 & fraud analysis that Professor Bartov performed. \\
24 & THE COURT: And that's the short response. \\
25 & I'm going to speak freely and maybe subjectively.
\end{tabular}

1 Mr. Wallace, you're as loquacious as Mr. Kise. I mean,
2 I, specifically, said I wasn't going to revisit what
3 happened yesterday. And then, you go into a whole
4 speak about yesterday. No harm done. I'm just 5 pointing that out.

And also, what really surprises me is, I got Mr. Kise to limit what he wanted to do so narrowly and you open a whole can of worms about what expert reports say or don't say. But, all right. I don't want to be more loquacious than the attorneys. I stopped being that a long time ago.

How about this? Here's my suggestion. I like to, you know, have compromise and agreement. We'll let Mr. Suarez ask Mr. Bartov, whether having read -- and, you can list the things he read -- for the year -- each year as Mr. Kise wanted -- whether he found any indicia of material accounting misstatement.

Mr. Solomon is happy. And let's keep in mind we only have this morning.

Mr. Wallace, do you agree with your colleague there?

MR. WALLACE: If Professor Bartov is answering the questions and not providing speeches, than yes.

THE COURT: Who would give speeches?

And defendants, are you okay with that? MR. KISE: Yes, your Honor.
THE COURT: Okay. Any other housekeeping matters?

MR. KISE: One other item -- which now that I've looked at it, I know we said we were going to converse with the AG about the issue of Professor Bartov's supplemental disclosure relative to the monitor reports, once I had an opportunity -- through no fault of theirs -- to, actually, review everything and their position, I realized that while they're nice to talk to, negotiation wouldn't go anywhere because, they have \(\mathbf{a}\)-- their position is " A " and ours " B ". And, I don't see any compromise.

So in that regard, I'll just state briefly, that, this supplemental disclosure is necessary because the items about which Professor Bartov is opining, number one, most particularly the August 3rd and November 29, 2023, reports of the monitors were not available to Professor Bartov prior to him issuing his reports.

Number two, the reports that predate that don't contain much of anything. But they needed to be reviewed by him. But there wasn't a basis to draw -- there wasn't a need to draw any conclusion
prior to this Court's issuance of the summary judgment quite frankly.

Number three, because of this Court's issuance of the summary judgment and its apparent reliance on the August 3, 2023, report of the monitor -- which I'll note for the record, nowhere contains the words "fraud, indicia of fraud, suspected fraud or suspicious activity;" nonetheless, the Court went on to conclude that somehow or another the August 2023 letter was evidence of ongoing fraud. I believe that's the words in the order.

The defense needs to meet that assertion somehow. You have precluded our ability from calling the actual author of the letters -- which, for the record, we have disagreed with and continue to.

But, nonetheless, Professor Bartov is the only option the defense has to meet those allegations and that concern.

I fully anticipate that the Attorney General will argue, again, that these letters, somehow, indicate that there's a need for ongoing monitoring or there's some other problem. And so, the defense is, certainly, entitled to meet that allegation.

It's new evidence that wasn't available
before. There's no prejudice to them. They've had the
estate company. I don't even know -- they literally said -- he just said he's the last witness and that's why they're going to have him do this.

So it's not anything that requires expertise. And, it's not an appropriate subject for expert testimony.

\section*{MR. KISE: Your Honor -- \\ THE COURT: Briefly.}

MR. KISE: Your Honor, it clearly requires expertise. It clearly requires -- if someone -- if the fact finder is going to take the letters from the monitor and make determinations that there's persistent fraud when the word "fraud" isn't even used, that tells me, respectfully, that there's expertise required, that, someone with an accounting background needs to address the issues.

Professor Bartov is not opining on the ultimate issue. Professor Bartov is saying, based on the accounting issue -- it says it right here. Based on the minor accounting issues identified in the reports, he's got vast experience in evaluating financial statements. He's got vast experience in making determinations about whether or not there's financial reporting misconduct. That's been established.
\begin{tabular}{|c|c|c|c|}
\hline & dings Page 6379 & \multicolumn{2}{|l|}{Proceedings Page 6381} \\
\hline & letters the same time we've had the letters. And, if & & And so, he can look and see the types of \\
\hline 2 & they want to rebut it somehow or they want to cross & 2 & issues that were identified and opine as from an \\
\hline 3 & examine Professor Bartov, that's fine. & 3 & accounting perspective "Does this indicate that there's \\
\hline 4 & But, the idea that we can't meet evidence & 4 & a problem, that, there's fraud, that, there's suspected \\
\hline 5 & that is clearly going to be used or considered in a & 5 & fraud?" \\
\hline 6 & manner that might result in prejudice to the defense, I & 6 & So, I don't think it's -- with all due \\
\hline 7 & think would be -- not only is it objectionable but, I & 7 & respect to my colleague, I don't think it's \\
\hline 8 & think it would be, respectfully, reversible. & 8 & something -- particularly, given the history of the use \\
\hline 9 & THE COURT: And plaintiff? & 9 & of these letters -- that can be decided in the absence \\
\hline 10 & MR. WALLACE: Does your Honor have -- I'm & 10 & of someone who has this expertise. \\
\hline 11 & not sure how much background you need on the proposed & 11 & And, it's not because he's the last witness. \\
\hline 12 & affidavit, again. But, it's, basically, Professor & 12 & It's because he's a qualified witness and because we're \\
\hline 13 & Bartov reads the reports from the monitor, reviews & 13 & not allowed to speak to the authors of the letters. \\
\hline 14 & Mr. Hawthorn's testimony and says, "It's my conclusion & 14 & (Whereupon, the following proceedings were \\
\hline 15 & they have been cooperating and there is no fraud." & 15 & stenographically recorded Shameeka Harris.) \\
\hline 16 & If they want evidence to meet this challenge, & 16 & \\
\hline 17 & those are the pieces of evidence; the actual reports & 17 & \\
\hline 18 & from the monitor and the testimony from Mr. Hawthorn. & 18 & \\
\hline 19 & And that's a legal argument to say, "These & 19 & \\
\hline 20 & don't use the word fraud," as Mr. Kise just said. And & 20 & \\
\hline 21 & that's it. This isn't anything that requires & 21 & \\
\hline 22 & expertise. & 22 & \\
\hline 23 & This isn't anything that Professor Bartov has & 23 & \\
\hline 24 & a particular expertise in. He's never been a monitor. & 24 & \\
\hline 25 & He's never been in the oversight function of a real & 25 & \\
\hline
\end{tabular}

Page 6383

THE COURT: That testimony is absolutely precluded. I read every monitor report. I don't need an expert to tell me what they mean. To the extent that the monitor did not use the word fraud and I did, somewhat based on what was written, maybe that was my interpretation. Maybe, I should have chosen a different, slightly different word. In terms of appeal, Defendants, you have the reports. You have -you'll -- you have what the summary judgement decision said. You'll have what the post-trial decision say. You can appeal but there is no way I am going to let Professor Bartov expertly opine on reports written for my benefit.

I appointed her as an honor of the court, and I found her reports very, what's the word, easy to digest. That's more than one word. So, that's the ruling.

MR. KISE: So then, Your Honor, the only other ask we have is, I believe, that as we did with Mr. Shubin, that we put this into the record as a proffer just so that it's there in the record for appellate purpose. Otherwise, the appellate court will not see what's there. We did this the other day with the witness with Mr. Shubin. You allowed us to just mark it and include it as part --

THE COURT: I understand. What's the harm in that?
MR. WALLACE: Purely as a determination as a matter to go into the record that Your Honor has decided not to allow in, that's fine. It's hearsay. There are other

1 AL 2 of the Defendant, upon being previously duly sworn, was examined and testified as follows:

THE COURT: As usual, I will remind you you are still under oath. We are trying, and I'm sure I hope the attorneys will agree with me, to finish your testimony, your cross-examination, your -- any redirect this morning. So, I would appreciate answers that are short and to the point. Do you think we can finish this morning?

MR. SOLOMON: If Mr. Suarez has another 40 minutes for direct, it will be unlikely we will finish.

THE COURT: Witness, we may need you Tuesday or Wednesday.

MR. KISE: Tuesday. He teaches on Monday. I know he is not available in addition to the other witness.

MR. WALLACE: Sometimes things happen. Why don't we discuss this after the break.

MR. KISE: It's their cross. If they want to waive it on Monday --

MR. WALLACE: I am going to ask about other witnesses. Let's do it on the break.

THE COURT: Mr. Suarez, why don't you continue now.
MR. SUAREZ: Thank you, Your Honor.
DIRECT EXAMINATION
BY MR. SUAREZ:
issues. It's not evidence. It's actually in the record. Just as notice for the basis of your decision that you reviewed that proposed affidavit and said you are not going to allow it, that's fine by our -- that's fine from our end.

THE COURT: The bottom line is you agree as with the Shubin proffer that this can go into the record but it won't be part of the testimony.

MR. WALLACE: And it won't be evidence, correct.
THE COURT: Okay. Great. Let's - and let me just make sure.

Mr. Suarez, I'm sure you have been listening
intently and you understand basically for every year for everything he read, you want to ask him did he -- again, this is sort of leading but let's just call it preliminary matter. Did you find any indicia of material accounting misstatements, right?

MR. WALLACE: Not to be too loquacious, Your Honor, I will add going through having the witness explain exactly what he reviewed to reach those conclusions is one of the things we also wanted to hear. If he wants to put the testimony in as the foundational basis for the testimony.

THE COURT: All right. Let's get the witness.
And, Mr. Suarez, about how long will your direct continue, just trying to balance the morning?

MR. SUAREZ: About 40 minutes.

Q Good morning, Professor Bartov.
A Good morning.
Q In connection with your review of materials in this case, have you identified any indicia of material accounting misstatements in President Trump's Statements of Financial Condition?

MR. WALLACE: Objection, lacks foundation.
THE COURT: You would like the documents.
MR. WALLACE: What exactly did he review that is going to lead to the opinions that we will hear.

MR. SUAREZ: We went through it yesterday. I am happy to do it again. I am happy to --

THE COURT: He will tie it more closely to this particular response.

MR. SUAREZ: If I can get an answer, then I can walk him through everything and then I'll get it out.

THE COURT: I will have to walk him through, then get the answer I think.

\section*{CONT'D DIRECT EXAMINATION}

\section*{BY MR. SUAREZ:}

Q Okay. In that case, Professor Bartov, I'd like to show you what's been premarked Plaintiff's Exhibit 34, 39.

A Yes.
Q What is this document, Professor Bartov?
A This is Conceptual Framework of Financial Reporting

Chapter Three Quantitative Characteristics of useful financial information.
Q And what does this conceptual framework provide?
A Conceptual framework is the foundation based on which
FASB, the Financial Accounting Standard Board, developed the accounting standards.

Q And if I could please turn your attention to page eight of this document to a section entitled materiality. And I'd like to specifically draw your attention to QC-11 which states, "Relevance and materiality are defined by what influences or makes a difference to an investor or other decision maker; however, the two concepts can be distinguished from each other. Relevance is a general notion about what type of information is useful to investors, materiality is entity specific.

The omission or misstatement of an item in a financial report is material if, in light of surrounding circumstances, the magnitude of the item is such that it is probable that the judgment of a reasonable person relying upon the report would have been changed or influenced by the inclusion or correction of the item."

Do you see that, Professor?
A Ido.
Q What does that mean?
A This is the definition of materiality according to the 25 accounting literature.

\section*{Professor Bartov - by Defendant - Direct (Mr. Suarez)}

Page 6387
Q And in order to assess materiality in connection with a statement of financial condition, what information would you need to review?
A Well, in order to decide materiality, I need to review the information from the user perspective. So through the lens of the user, what information user used and whether a
misstatement, had it been corrected, the correction would change the -- would change the judgment of the user.

Q And in performing your analysis in this case, what information did you review in order to conduct the materiality analysis?

A So a good question is what information was used by the user. So the starting point is what information was used by the user and then the question is what was the true information, the information that should have been reported based on the correct application of GAAP. So, this is the question.

So if Deutsche Bank used -- used a net worth of 2 billion or 2.4 billion and the true net worth, based on the correct application of Generally Accepted Accounting Principle, is around this number -- because there is a lot of uncertainty around the estimation of the items on the statement of financial condition. So, obviously, you don't -- you don't expect the number to be accurate but -- but the point is that if -- if the user arrived at a correct information, then, then there is no -then from the perspective of the user, there is no misstatement.

1 So the analysis is from the perspective of the user what information the user relied on when they made the decision.

MR. WALLACE: Objection, Your Honor. The answer was not responsive. The question is what information did you review.

MR. SUAREZ: He is describing broadly the information that he needed to review.

THE COURT: No. Sustained. Clearly. Let me just say, common sense, I find that completely clear. I don't need an expert to tell me what that means. Your explanation went here, there, everywhere. Sometimes less is more. It seems to be the phrase of the day. So, but to get back to the basics, the question was what did you review not what this means, right?

\section*{CONT'D DIRECT EXAMINATION}

\section*{BY MR. SUAREZ:}

Q In order to conduct this analysis, Professor, what specific information did you --

THE COURT: No, the question was what documents you reviewed, right?

MR. SUAREZ: Not just documents. It could be trial testimony. It could be deposition testimony.
A The key information is the credit reports because the credit reports show you the -- the credit report show you what information, credit to be used when they make their decision so
that's what the key information for me to - to analyze when I consider whether there was a material misstatement in the statement of financial condition.

Q And was there any other information that you reviewed in connection with that analysis?
A Yes. I obviously reviewed also the information in the statement of financial condition. And I want to make sure that there was no violation of GAAP. And as I said yesterday, every
financial statement, especially an audited financial statement where you contain an error, but the fact that a financial statement contain an error, if the error is -- if the error was inadvertent and then the error is inadvertent and they would not effect, would not change the judgment of the - of the user. Had the user had the correct information then it's -- then the financial statements are not - are not a - materially misstated.
Q And just to give a complete picture as to everything that you looked at, can you please walk us through all of the different categories of information that you looked at?
A Yes, I looked on the statement of financial condition. I looked on the -- I looked on the credit reports. I looked on the manuals to understand better the process that DB used in order to come up with the information. I looked on some trial testimony, before that deposition testimony, and before that even I looked on -- on very briefly -- I didn't spend much time
on it but if memory serves, this was like 7 or 8 years -- 7 or 8 months ago, I think that I reviewed quickly, I think, that I reviewed quickly a few -- very few work papers that were -- that were provided to Mazars.

I didn't focus on it. But if memory serve, I
definitely reviewed them through the report of Dr. Lewis because
Dr. Lewis cut and paste some of the -- some of the work papers used by Mazars. So it was eight months ago so I don't remember -- so I can't tell you accurately but I look on testimony. I look on the reports of also the other experts, Dr. -- Mr. Haigh and Mr. Korologos. That's about it.

MR. WALLACE: Your Honor, since this is proceedings subject to agreement, can the witness expand on the trial testimony and deposition testimony that he actually reviewed?

THE COURT: Please, let's get that out in the open.
Q What trial testimony did you review from the trial from these proceedings?
A From the trial, I reviewed -- I reviewed the testimony
of McConney, the testimony of Mr. McConney, the testimony of Mr. Flemmons. I reviewed a couple more, the testimony of Mr. McCarty. And I reviewed the testimony of Mr. Bender. You know, I can't remember right now all of them, but I think this is the most important ones.

Q Did you review the testimony of any of the Deutsche

Professor Bartov - by Defendant - Direct (Mr. Suarez)
Page 6391
Bankers?
A Oh, yes, sorry. Thank you. I reviewed -- you know, sorry, you know --

THE COURT: That's okay.
A I didn't know I come to a memory test. To my students are allowed to bring material to the exam. So I don't give them memory test. So thank you. I looked on Mr. Williams and Mr. Haigh, and Miss Vrablic.

MR. WALLACE: I don't want to put the witness through a deposition test. I definitely interrupted. I apologize for that. For the deposition testimony, was that all disclosed in your reports or is there any additional deposition testimony?

MR. SUAREZ: This strikes me as stuff for cross-examination.

MR. WALLACE: We agreed to this as a compromise which is the reason I am acting out of order. I acknowledge and I apologize.

MR. KISE: As the compromise allows them to get into an examination in the middle of a direct? I don't see how that matters.

MR. WALLACE: It is akin to voir dire.
THE COURT: It seems to me axiomatic. If the witness is going to offer an expert opinion and the other side is entitled to know what he relied on when he formed
his opinions.
MR. KISE: He is testifying about it on direct. If they want to followup on cross like they normally can, did you review anything else, did you review this or that as opposed to this other stuff.

MR. WALLACE: I apologize. Your Honor had said the witness should explain what trial and deposition testimony that he reviewed. I was trying to offer a means, since I didn't want to offer it as a memory test, for everything he may have done. That's why I suggested that as an option.

THE COURT: Let's just continue.

\section*{CONT'D DIRECT EXAMINATION}

\section*{BY MR. SUAREZ:}

Q Are there any materials that you reviewed that you can think of right now?

A Other materials?
Q Yes.
A No. Right now, I don't remember. If you remind -- if
you ask me specific questions, then I can maybe, maybe I can respond more specifically.

Q In connection with preparing your reports, did you review any deposition transcripts?

A Deposition transcripts? I did. I did review -- I actually attended -- I attended the deposition of Dr. Lewis. And I -- I reviewed the depositions. You know, I think I -- I

Professor Bartov - by Defendant - Direct (Mr. Suarez)
Page 6393
think - I also look on the deposition of Wisselberg. I -- and I look on a few of the deposition testimony too but I can't remember now what they are.

Q And in your report, did you include a list of the documents that you relied on in coming up with your opinions?

A I did, yeah. I didn't list everything that I reviewed.
I list only the material that I relied on in my report.
Q And in connection with the materials that you reviewed in this case, have you identified any indicia of material accounting misstatement in President Trump's Statements of Financial Condition?

MR. WALLACE: I am just going to note our objection. We don't think this witness has laid a foundation for this opinion.

THE COURT: Read back, please.
(Whereupon, the requested testimony was read back by the court reporter.)

THE COURT: Overruled.
Q You can answer.
A As my report clearly indicate, I did not find any
evidence of material misstatement in any of the statement of financial condition.

Q And how was this standard QC11 relevant to that analysis?
A Well, given the definition of materiality that you have
to -- so materiality is a test and this definition tell you how to -- how, from the accounting standpoint, you need to perform this test. You need to perform this test based on this definition.
Q And then QC11A says, "A decision not to disclose certain information or recognize an economic phenomenon may be made, for example, because the amounts involved are too small to make a difference to an investor or other decision marker, (they're immaterial)." Then it says, "However magnitude by itself without regard to the nature of the item and the
circumstances in which the judgment has to be made, generally is not a sufficient basis for a materiality judgment."

How does this section of the guidance of -- apply to your analysis?
A Well, the section -- this section actually makes two points. Point one is actually a -- it's actually mentioned in ASC 105 Generally Accepted Accounting Principles, principles when it says that GAAP need not be applied to immaterial items which means that if you deviate from GAAP but the deviation does not arise to material deviation, then you're still within GAAP. So GAAP does not require that every single item will be prepared according to GAAP. Only material items must be prepared according to GAAP. This is the first sentence.

The second sentence says, what I think I already said before, which is that when you judge whether an alleged

Page 6395
misstatement is material, you cannot look on the magnitude by itself. The magnitude by itself is -- the magnitude mean the difference between the correct number and the stated number. The difference by itself is insufficient to decide whether there is material or not. You have to apply additional consideration which in accounting they're called qualitative analysis. You have to perform qualitative analysis that will guide you whether the omission of the misstatement is material or not.

Q And the following section QC11B, Professor, it says, "No general standards of materiality could be formulated to take into account all the considerations that enter into judgments made by an experienced reasonable provider of financial information. That is because materiality judgments can properly be made only by those that understand the reporting entity's pertinent facts and circumstances. Whenever an authoritative body imposes materiality rules or standards, it is substituting generalized collective judgments for specific individual judgments, and there is no reason to suppose that the collective judgments always are superior."

Do you see that?
A Ido.
Q How does this section apply to your analysis if at all?
A So this section is talking about the second step. So
there are two steps in materiality test. Step number one is to quantify the misstatement. Step number two is to apply
qualitative analysis to decide whether the misstatement that was quantified in step one is material or not. And all this tells you is, number one, you have to be an accounting expert to do this analysis and number two that this analysis is to a large extent subjective and require a lot of knowledge about the details of the company and the surrounding circumstances.
Q And if we can pull up Plaintiff's Exhibit 290. Do you recognize this document, Professor?
A I do, yeah. Yes, I do.
Q What is it?
A It is a credit report prepared by the commercial real estate group of DB on July 24, 2013, as opposed to the Private Wealth Management Group.

Q And do you see, Professor -- if I could -- is it the CRE mean Commercial Real Estate or Commercial Real Estate Group. I think it is the CRE report for the Private Wealth Management Group?

MR. WALLACE: Objection. Leading. He just gave the witness the answer.
A You know what, sorry. Go to the bottom of the -Q I withdraw the -- I just want to --

THE COURT: That's stricken.
MR. WALLACE: The damage is done.
A Sorry.
Q Do you see --

Professor Bartov - by Defendant - Direct (Mr. Suarez)
Page 6397
MR. KISE: Your Honor, I think Mr. Wallace's cynicism is continuing over from yesterday, and I don't understand it. I really don't. He didn't give him the answer. The document is up there on the screen.

MR. WALLACE: If the witness wants to leave, I'm happy to discuss it. I don't think we need to discuss it.

THE COURT: Let's just move on.
MR. SUAREZ: We can put the whole document up.
\(Q\) Do you have a copy of it in front of you?
A Yeah. Sorry. This is Deutsche Bank Private Wealth Management Group.

Q Does this refresh your recollection?
A Yes. On the bottom, yeah. That's what I -- sorry. Yeah. So, yes. So I -- it's definitely there. Other reports that I reviewed actually are from the Private Wealth Management Group. So, yeah, it says on the bottom. That's why I asked you to look on the bottom of the document.
Q And what conclusion, if any, did you reach about whether Deutsche Bank relied on the president's statements of financial condition in 2013?

A So -- so, you can see, and this is common to all the credit reports, you can see that in page seven and page eight they have the Donald J. Trump valuation and they have DB valuation. And you see that the numbers used by DB for their purpose are substantially different than the number used by

yesterday, which is why we're going through this exercise today.

THE COURT: To the extent there was an objection, I overruled it. I let him say his conclusion about these credit reports. As is often the case, let's just move on. Okay? The record says what it says.

\section*{DIRECT EXAMINATION}

BY MR. SUAREZ:
Q. Professor, within the context of a material accounting misstatement, what conclusion, if any, did you reach about Deutsche Bank's reliance on the Statements of Financial Condition?
A. Yes, you know when --
Q. In this year in particular.
A. I just want to make a comment. When people don't understand me, it's my fault. It's on me. So, I have a continuous communication problem with Mr. Wallace. So let me just explain the language. So maybe it will save a lot of time of objection.

When I say, "obvious," it's obvious to someone -an accounting expert. When I say, "fraud," if there's no misstatement -- if there's no misstatement, there is no fraud. These are interchangeable.

In order to qualify for a fraud, you first have to

Page 6403
have a misstatement. So if you like me to say there is no misstatement, I'll say there's no misstatement here. There is no material misstatement here. There's to evidence here of material misstatement.
Q. Thank you.

MR. WALLACE: Objection. That wasn't responsive to a question, your Honor. And I don't think the witness is supposed to be addressing me. He's supposed to be asking you.

MR. KISE: You keep asking raising objections.

THE COURT: We can't keep doing this as a short question and a long answer and then it wasn't responsive. I have to get a read back.

Mr. Wallace, is it important? If it is, I
will get a read back.
MR. WALLACE: It is not important.
THE COURT: Let's move on.
MR. SUAREZ: Can you pull up Plaintiff's
Exhibit 300.
Q. Do you recognize this document, Professor?
A. Yes. This is the review for July 20 -- this is the review for July 20, 2016.
Q. And again in the context of accounting -- excuse
me of a material accounting misstatement, what conclusion,
if any, did you reach about Deutsche Bank's reliance on President Trump's Statement of Financial Condition in the year 2016?
A. So, I see here a detailed analysis of a few pages just like before. And, this analysis is summarized on page 11; when again, they show a chart that compare Deutsche Bank valuation to the DGT valuation.

They show that they are aware of DGT valuation. In this case, the total portfolio, according to the DGT valuation is 5.7 billion. According to their own analysis, it's 2.5 billion.

So again, consider the entire report. And particularly, the summary on page 11, clearly indicate, to a reasonable expert, that, Deutsche Bank performed their own analysis of valuation before they make their lending decisions.
Q. And what conclusion, if any, did you reach concerning their reliance on the Statement of Financial Condition in this year?
A. So there is no evidence here of a material misstatement.
Q. And, if we turn to Plaintiff's Exhibit 3137, I'd ask you if you recognize this document Professor? And they will hand you a paper copy just now.
A. Yes. So again, this is Deutsche Bank Private

Wealth Management Risk Management Group analysis of debt from July 20, 2017.
Q. What conclusion, if any, did you reach about

Deutsche Bank's reliance on President Trump's Statement of Financial Condition in July of -- in the year 2017? Excuse me.
A. So again, the recent report -- the credit report is very detailed. They did a number of different independent analysis. And the conclusion, again, from all of this report -- this report contain a lot of analysis, just like the other report.

And based on this analysis -- sorry. Just give me a second. so based on this analysis, this data and analysis, page twelve they show you the results which they say the valuation is 2.5 billion, where Donald J. Trump says the valuation is 4.3 billion which indicate that the financial statement - the Statement of Financial Condition were not, materially, misstated.
Q. If we can turn to Plaintiff's Exhibit 302, I will ask you professor if you recognize this document.
A. Yes, the same thing. It is a document but, different date. The date here is July 20, 2018. It was produced by the risk management group of Deutsche Bank Private Wealth Management.
Q. And what conclusion, if any, did you reach about

Deutsche Bank's reliance on President Trump's Statement of Financial Condition in the year 2018?
A. Again, there is a very detailed independent analysis, just like in all the other ones. And, at the end of this analysis, on page -- let me just find the page. So there is a very detailed analysis here of many different type of analysis as you would expect from a bank.

And, again, if you look, for example, on page ten, they summarize the detailed analysis that they performed and they show that the total portfolio, based on the Statement of Financial Condition, was 4.39 billion. According to their end analysis, it was 2.515 billion.

The evidence will show that they did not rely on the Statement of Financial Condition numbers but, they relied on their own numbers that were almost 50 percent or 40 percent lower than the number in the Statement of Financial Condition.
Q. From credit analysis perspective, as with the other years, what does this tell you Professor?
A. It tell you that they rely -- that, they did a very detailed analysis, independent analysis, using information in the footnotes and using additional information that they received directly from Mr. Trump. And, they based their conclusion on their own analysis, not on the numbers -- not on the raw numbers -- that were
property, for example, in the Statement of Financial Condition, it was reported at value of two billion. They arrived to the conclusion, on their analysis, that, the value, for their purposes, is one point 1.16 billion, almost 50 percent lower than the number reported in the Statement of Financial Condition.

So, they did not -- to me, as an expert, it's obvious that they did not rely on the raw numbers that are reported in the Statement of Financial Condition but, instead, they do a very extensive independent analysis derived, completely, different numbers and rely on this adjusted numbers in their lending decisions.
Q. Was that consistent with the analysis that Deutsche Bank performed in each year of the credit relationship?
A. Yes, they -- in each year, they perform, in spirit, more or less the same type of analysis. And the analysis relies, substantially, on information that is not even available in the Statement of Financial Condition.

As I said yesterday, the information of financial condition, does not provide income statement, does not provide statement of cash flow and there is no way that any bank can rely on the statement when they make their lending decisions.
Q. And if we could move on, I'd like to show you
A.Bartov - Defendants - Direct/Mr. Suarez
1
reported in the Statement of Financial Condition.
2 Q. And, if I could show you Plaintiff's Exhibit 498.0407 .
A.Bartov - Defendants - Direct/Mr. Suarez

Page 6409

\section*{Plaintiff's Exhibit 519.}
A. Thank you.
Q. Do you recognize this document, Professor? If you turn to the second page of the hard copy.
A. Yes, this is the credit report dated July 30, 2020.
Q. What conclusion, if any, did you reach about Deutsche Bank's reliance on President Trump's Statement of Financial Condition in 2020?
A. Again, you see a very detailed analysis here of a different type of analysis. And, based on this analysis, on page 11 of this document, they provide a table that contrast, just like they did in other statement -- other credit report, they contrast the valuation on the Statement of Financial Condition with the valuation that will develop by DB independently.

And you see that the total portfolio value, based on the Statement of Financial Condition is 4.7 billion, approximately. But, the DB valuation is only 2.7 , approximately, billion. So, you see there's another differential of 43 percent.

Now, you see also that every year the differential in percentage is not the same. Which tell you that they did not use a mechanical, automatic discount to the asset.

And you see also that each asset -- the difference
\begin{tabular}{|rc|r|r|}
\hline A.Bartov - Defendants - Direct/Mr. Suarez & Page 6410 & A.B \\
1 & between the valuation on the Statement of Financial & 1 \\
2 & Condition and the valuation of the DB, each asset get a & 2 \\
3 & different discount; which again, show you that they did not & 3 \\
4 & use a standardized haircut when they computed their own & 4 \\
5 & valuation. & 5 \\
6 & Q. And in connection with Plaintiffs Exhibit 561 if & 6 \\
7 & we could pull up plaintiffs 56. & 7 \\
8 & MR. WALLACE: Your Honor, I just want to & 8 \\
9 & note an objection to the testimony about the last & 9 \\
10 & document. That document did not appear in either of & 10 \\
11 & the disclosures that Professor Bartov issued. & 11 \\
12 & \(\quad\) So, I don't know when he, actually, reviewed & 12 \\
13 & these documents. But, it appears not to have been as & 13 \\
14 & part of his preparation of the two reports. & 14 \\
15 & \(\quad\) THE COURT: Overruled. & 15 \\
16 & Q. Do you recognize Plaintiffs Exhibit 561? & 16 \\
17 & A. Yes. So, this is the credit report for July 30, & 17 \\
18 & 2021. & 18 \\
19 & Q. What conclusions, if any, did you reach about & 19 \\
20 & whether Deutsche Bank relied on President Trump's Statement & 20 \\
21 & of Financial Condition in the year 2021? & 21 \\
22 & A. Again, if you review -- if you go page by page, & 22 \\
23 & you see that they perform an extensive analysis using & 23 \\
24 & information not only from other sources as well information & 24 \\
25 & from the footnotes of the Statement of Financial Condition. & 25 \\
\hline
\end{tabular}

So, in accounting, we determine fraud by objective criteria. And the objective criteria are, as I said before, falsified documents, concealment of facts, faked transaction, forged document are provided to the accountant.

If it would be helpful for the Judge, I can give couple of examples that would demonstrate what is the difference between accidental error and fraud in accounting.

THE WITNESS: If I give you real world example, would that be helpful?

THE COURT: How about start with one example.

THE WITNESS: One example. So let's take an example for Computer Associates. Computer Associates is a company that quarter was in Long Island.

What they did, they took revenues, in January, and they booked them as if the revenue was earned in December. So they take revenues that were earned in January and they book them --

THE COURT: They took earnings from December and put them in the later year.

THE WITNESS: They did transaction in January and they book it as if it is December in order to reflect the revenue in December.

Now, this maybe -- as I describe it so far -it may be an accidental error or a fraud. What make it
\begin{tabular}{|ll|}
\hline A.Bartov - Defendants - Direct/Mr. Suarez & Page 6411 \\
1 & And you can see here, on page 11, that total portfolio, \\
2 & according to the Statement of Financial Condition, was 3.8 \\
3 & billion and DB valuation was only 2.2 billion. \\
4 & And again, you see, that for each asset the \\
5 & difference between the DB valuation and the Statement of \\
6 & Financial Condition valuation, the difference in percentage \\
7 & is different. \\
8 & Again, inconsistent with the claim that they use \\
9 & standardized haircut to arrive at the suggested numbers and \\
10 & not detailed independent analysis. \\
11 & Q. Is there anything in the materials that you \\
12 & reviewed that demonstrate the Statements of Financial \\
13 & Condition were altered or manipulated to conceal a material \\
14 & accounting misstatement? \\
15 & A. So concealment is a major criterion for fraud in \\
16 & accounting. So, in accounting, we have objective criteria \\
17 & to identify fraud. Concealment is one of them. \\
18 & Falsification of material that is provided to the accountant \\
19 & is another one. Fake transaction is a third one. \\
20 & So, there is a number of indicators that indicate \\
21 & fraud. Because, otherwise, how would you distinguish \\
22 & between accidental error and fraud? \\
23 & Fraud is an error. An accidental error is also an \\
24 & error. Fraud is an intentional error. But, in accounting \\
25 & we don't do -- I am not psychiatrist.
\end{tabular}

1 a fraud was that when they provided the documents about this transaction to the auditors, they white out the date of the contract, which was January 15th, and they replace it with December 5. So this make it fraud rather than accidental error.

If, for example, they did not forge the document then, it would be considered an accidental error. Accidental errors occur all the time. But, if you've deceived your auditor, if you provide your auditor forged documents, if you provide your auditors documents that conceal the true evidence, then the accidental error become fraud.

THE COURT: That one example is fine.
Let's move on.
MR. SUAREZ: You Honor, I'm at a helpful point in my outline to take a morning break if possible.

THE COURT: How much longer is your direct?
MR. SUAREZ: I don't think I have got a whole lot left. But, it would be helpful to review that over the break. And, I also need a break.

THE COURT: Okay. Let's break. I will see you all at 11:45. Let's make is 11:40-- a quickie.

Professor, as usual, I always say, you can leave everything just take your wallet. And don't
\begin{tabular}{|c|c|}
\hline A.Bartov - Defendants - Direct/Mr. Suarez Page 6414 & Proceedings Page 6416 \\
\hline 1 discuss the case, of course, during the break. & 1 Professor Lewis and Mr. Sneddon. \\
\hline 2 THE WITNESS: Sure. & 2 THE COURT: That's all the information you can \\
\hline 3 (Whereupon, the following proceedings were & 3 give? \\
\hline 4 stenographically recorded Shameeka Harris.) & 4 MR. WALLACE: Correct. \\
\hline 5 & 5 MR. KISE: He certainly can narrow it down. They \\
\hline 6 & 6 have, like we had, dozens of witnesses on their list. He \\
\hline 7 & 7 certainly can narrow it down to, okay, if it's somebody, it \\
\hline 8 & 8 can be these handful of people. I am not asking them to do \\
\hline 9 & 9 it right this moment, but the idea that we are going to get \\
\hline 10 & 10 to Monday afternoon or Tuesday morning and say, oh, we have \\
\hline 11 & 11 to add this person or that person it would just be \\
\hline 12 & 12 extraordinarily unfair. \\
\hline 13 & 13 THE COURT: I will make sure they won't abuse the \\
\hline 14 & 14 privilege. \\
\hline 15 & 15 MR. KISE: With respect to Mr. Sneddon, and \\
\hline 16 & 16 Mr. Robert may be the better person to do this but I'll \\
\hline 17 & 17 introduce it, we would like a proffer as to what exactly \\
\hline 18 & 18 Sneddon is going to testify about and what that would be in \\
\hline 19 & 19 rebuttal to. \\
\hline 20 & 20 MR. WALLACE: What basis? He's been on our list. \\
\hline 21 & 21 He worked at TIR. He was a Trump Organization employee. \\
\hline 22 & 22 They have his documents. \\
\hline 23 & 23 MR. KISE: But what issues is he rebutting in our \\
\hline \[
24
\] & 24 case. They could have called him in their case. What issue \\
\hline \[
25
\] & 25 in our case is he rebutting? \\
\hline Proceedings Page 6415 & Proceedings Page 6417 \\
\hline 1 (Whereupon a recess was taken.) & 1 THE COURT: You feel obligated to answer that? \\
\hline 2 COURT OFFICER: All rise. Part 37 is back in & 2 MR. WALLACE: I don't think I'm under an obligation \\
\hline 3 session. Please be seated and come to order. & 3 to answer that. \\
\hline 4 MR. KISE: Your Honor, just one brief housekeeping & 4 MR. KISE: He is clearly under an obligation to \\
\hline 5 matter. At this point, Monday is occupied with President & 5 answer that. It is a rebuttal case. Unless we are going to \\
\hline 6 Trump's testimony. I did confirm with Miss Greenfield that & 6 have this fight next week when he shows up and he starts \\
\hline 7 Professor Bartov will be available at 10 a.m. on Tuesday & 7 asking questions, it would be for more efficient to \\
\hline 8 ready to go to finish his testimony. And then I just want & 8 determine in advance if he's an appropriate rebuttal \\
\hline 9 to be sure from the government because I got an answer but & 9 witness. We didn't call Mr. Weisselberg in our case. The \\
\hline 10 I'm not sure it's a complete answer. As of -- we have & 10 only relevance we can see in his testimony relates to some \\
\hline 11 Professor Lewis and Mr. Sneddon are the two that they've & 11 purported communication between Mr. Sneddon and \\
\hline 12 identified as potential rebuttal witnesses. I just want to & 12 Mr. Weisselberg that should have been introduced on their \\
\hline 13 be sure. It is Friday and these witnesses are going to come & 13 case-in-chief. They can't use rebuttal to backfield their \\
\hline 14 next week. If there is anybody else they have in mind, & 14 case-in-chief. What issue is it that he is being called to \\
\hline 15 theoretically, we are entitled to know that. We can at & 15 testify about? \\
\hline 16 least be prepared, not wait until we get to Monday or & 16 THE COURT: I don't know the answer to what extent, \\
\hline 17 Tuesday. Is there anyone else? & 17 if any, somebody has to announce the subject matter of a \\
\hline 18 MR. WALLACE: I am going to tell Mr. Kise the same & 18 rebuttal witness. So I'll accept any advice. You can send \\
\hline 19 thing I told him at sidebar. Those are the people we are & 19 it to me at midnight tonight. So, I just have to leave it \\
\hline 20 planning to bring. This witness is saying a lot of things & 20 at that at this point. So, okay. Let's get the witness \\
\hline 21 about Deutsche Bank. Maybe, I want to recall a Deutsche & 21 back. \\
\hline 22 Bank witness. I don't know. President Trump can say any & 22 (Whereupon, the witness resumes the witness stand.) \\
\hline 23 number of things on the stand as we are all aware. I may & 23 THE COURT: Okay, next question. \\
\hline 24 want to call those people. They would be on our list. & 24 MR. SUAREZ: Thank you. Your Honor, just a \\
\hline 25 Right now, the only people we are planning to call are & 25 housekeeping matter, Plaintiff's Exhibit 34 and 39, which we \\

\hline 6 Q And then it goes on in the third paragraph to say, "It & 6 they're getting all of their theories into the case. I \\
\hline 7 should be noted that the subject reports were prepared for & 7 don't know what expertise he is providing on this. It is \\
\hline 8 Deutsche Bank trust company Americas and/or its affiliates, & 8 not available to the Court to just read a document and make \\
\hline 9 successors or assigns for a specific purpose and should not be & 9 an assessment of it \\
\hline 10 relied on by you for any other purpose." & 10 THE COURT: For some or all of those reasons, \\
\hline 11 Do you see that? & 11 sustained. \\
\hline 12 A Ido. & 12 MR. SUAREZ: Okay. \\
\hline 13 Q And with that in mind, would it be appropriate to use & 13 THE COURT: Let's get the witness. \\
\hline 14 appraisals commissioned by a bank for other purposes when & 14 (Whereupon, the witness resumes the witness stand.) \\
\hline 15 valuing property on a statement of financial condition? & 15 CONT'D DIRECT EXAMINATION \\
\hline 16 MR. WALLACE: Objection. What is the basis for & 16 BY MR. SUAREZ: \\
\hline 17 this witness offering an opinion on this? He is not a & 17 Q I'd like to pull back up Plaintiff's Exhibit 293 an \\
\hline 18 appraisal expert. I'll also note this document was not & 18 I'd like to direct the witness to page 6 of 293. And, again, \\
\hline 19 reviewed by the witness in the course of preparing his two & 19 pull up the tower, the Trophy Property valuation chart there in \\
\hline 20 reports so this is new. & 20 the middle. \\
\hline 21 THE COURT: Sustained for various reasons. & 21 Do you see the column for the Deutsche Bank valuations \\
\hline 22 MR. SUAREZ: I am asking the witness what the & 22 in 2011 of the 4 Trophy Properties? \\
\hline 23 utility of that report would be in placing a value on an & 23 A Yes, I \\
\hline 24 asset in a financial statemen & 24 Q If you could take a second just to review the document. \\
\hline 25 THE COURT: What utility would an appraisal be in & 25 It says 2011? \\
\hline
\end{tabular}

1 A Yeah, it's December 20, 2011.
2 Q Okay. Do you see the Deutsche Bank values Trump Tower at 308.2 million that year?

A Ido.
Q The New York Attorney General values Trump Tower that year at \$369.2 million?

MR. WALLACE: Objection. What is the evidentiary foundation for how the Attorney General valued this property?

THE COURT: It's not on that sheet, is it? Am I missing something?

MR. SUAREZ: Do you deny that that's the value you assigned to the property?

MR. WALLACE: Based on what? It is a big record.
MR. KISE: We can ask as a hypothetical.
THE COURT: Hold on. You can ask it as a
hypothetical. I don't know that it's going to mean much but go ahead. If the New York Attorney General valued Trump Tower at 369 million.
Q If the New York Attorney General valued Trump Tower at 369 million that year, what would that tell you about the New York Attorney General's analysis?
A To me it would be -- to me it would be very surprising because the NY Attorney General was supposed to value the Trump Tower based on the definition of estimated current value.

1 hypothetical questions but that hypothetical, what would 2 that tell you if the Attorney General valued it, the witness wouldn't -- wouldn't have any basis to say what would that tell you. I don't understand. That whole answer was a cockamamie --

MR. KISE: On the hypothetical, the witness would have a basis to determine in his opinion -- the witness would have a basis to opine as to what conclusion he would draw from the number being lower than the Deutsche Bank number and he's answering a hypothetical. If the number is -- if the number were higher -- he's just provided the testimony that if estimated current value is going to result in a higher valuation, then he said it, liquidation value or fair value.

THE COURT: For one thing, there was -- I don't think -- I don't know that he could say because the number was low, oh, that must have been a liquidation value.

MR. KISE: That's in the record already. They are using fair value and liquidation value. Mr. Haigh testified to that.

THE COURT: Is that the case?
MR. KISE: Mr. Haigh testified to that. That's what they're doing, yes.

MR. WALLACE: I think he said adverse scenario.
MR. KISE: He's basically -- what Professor Bartov
\begin{tabular}{|c|c|}
\hline Professor Bartov - by Defendant - Direct (Mr. Suarez) Page 6423 & Professor Bartov - by Defendant - Direct (Mr. Suarez) Page 6425 \\
\hline 1 Deutsche Bank value their -- the building based on liquidation & 1 is testifying to is from an accounting perspective that the \\
\hline 2 value. Liquidation value is the lowest value. The definition & 2 valuation estimated current value is always going to be \\
\hline 3 of liquidation value would get you the lowest valuation. And & 3 higher than liquidation value or fair value. So that's the \\
\hline 4 you can see that consistently every time every comparison DB & 4 proposition that he is responding to in the hypothetical. \\
\hline 5 valuation is lower than Donald Trump valuation. This is & 5 That's certainly fully relevant because the Attorney General \\
\hline 6 expected because by definition they're using a measure that will & 6 is challenging our numbers. \\
\hline 7 give you much lower number. & MR. WALLACE: Your Honor, I think I can clarify \\
\hline 8 AG was supposed to value this asset not by liquidation & 8 that they're apparently referring to a recalculation that \\
\hline 9 value, which is not recognized by GAAP as a legitimate & was run by Constantine Korologos, an expert we have not put \\
\hline 10 methodology. They were supposed to value it based on estimated & 10 into evidence. We are not seeking to run values on these \\
\hline 11 current value. So you would expect their valuation for each and & 11 properties for years. So I think that is the height of the \\
\hline 12 every asset to be higher than the valuation of Deutsche Bank & 12 relevance. He is now rebutting an expert who has not \\
\hline 13 If their valuation is even lower than the valuation of Deutsche & 13 testified and is not in front of the court and we're \\
\hline 14 Bank, it tells you that something is -- that their valuation & 14 definitely not planning on calling Mr. Korologos on Tuesday. \\
\hline 15 is -- it's an indication that their indication is unreliable to & 15 So, I'll also -- the witness is here, but he did something \\
\hline 16 me as an expert in valuation. & 16 different than just do estimated current value. He was \\
\hline 17 Q And if the New York Attorney General in the year 2011 & 17 rerunning the same numbers provided by the Trump \\
\hline 18 valued Nike Tow & 18 Organization. \\
\hline 19 THE COURT: Hold on. Would there be an objection & 19 THE COURT: I mean, my issue, objection, is still \\
\hline 20 to that last answer? & 20 hypothetically, if they did this, would they have done this \\
\hline 21 MR. WALLACE: None of this is relevant. I don't & 21 because. Well, they didn't do it so how does he know \\
\hline 22 know why we need hypothetical questions about what the & 22 what -- why they would have done it if they didn't do it or \\
\hline 23 Attorney General has valued things as. All of this is & 23 assuming they didn't do it \\
\hline 24 irrelev & 24 MR. KISE: The allegation in the complaint, which I \\
\hline 25 THE COURT: As you've all heard me say, I allow & 25 know they don't want to talk about the complaint anymore, is \\
\hline
\end{tabular}
that we overvalued our properties and the correct value should be something different. So we're just using hypotheticals. We are using actual evidence. We're responding to that allegation. Just because they chose not to call an expert doesn't mean that we're limited in the presentation of our defense. These are very simple questions and had the Attorney General not objected we would be done by now.

MR. WALLACE: These are asinine questions.
THE COURT: I was the one who objected to them to set the record straight. Since the Attorney General didn't object, let's move on.

MR. WALLACE: I objected to the next round of questions as a relevance. Why don't we get an actual question in front of the witness.

MR. SUAREZ: Your Honor, I'd like to -- I have three more questions on this.

THE COURT: Go ahead.
CONT'D DIRECT EXAMINATION
BY MR. SUAREZ:
Q If the New York Attomey General had valued Nike Town at 136.5 million what would that tell you about the valuation?

MR. WALLACE: Objection, irrelevant.
THE COURT: Objection, irrelevant. Sustained.
MR. KISE: So then, Your Honor, how is it possible,
way, this gets us back to something that I had said and you disagreed and we never really discussed it. To me, the case isn't about valuation. It's about statements and financial condition. Section 6312 in the Executive Law basically says you can't use false statements in business. That's what the summary judgement motion was -- decision was all about. I think it is pretty much what the rest of this case is about. So whether a particular property is worth "X" dollars or "Y" dollars, that's not what the case is about.

MR. KISE: So how then -- so then, respectfully, this is a completely rudderless ship. You are just going to determine on your own whether the right values, whether there is a misstatement of values based on your own determination. That's why we have experts.

MR. WALLACE: We are rearguing summary judgement.
THE COURT: I'm not determining values.
MR. KISE: The only way to know if there is a misstatement is to know whether the value is correct. The statements contain values. That's it. If the value of Trump Tower is acceptable and accurate under accounting principles and it's done correctly, then by definition there can't be a misstatement. We just can't make up misstatements like the Attorney General wants to do and say it's wrong because I say it's wrong. I have been saying since the beginning and now this is what's bearing out in

\section*{Professor Bartov - by Defendant - Direct (Mr. Suarez)}

Page 6427
1 if they are not introducing any evidence that our values
aren't accurate, they haven't called anybody to dispute our values, how is it then possible that they've proven their case? I'm back to directed verdict. I know you didn't want to hear it. I was going to put a sign up here so every time I open my computer it says directed verdict, but I don't see -- we have to meet the allegations in the complaint. This is meeting the allegations in the complaint. It's four questions. And I frankly think it's highly relevant and highly probative of the claims that they have made in this case. They are given to extraordinary hyperbole in their arguments, in their analysis and so we are meeting everything that we can possibly meet given the constraints that we have been provided. But they can't tactically box us out by saying, well, I am going to save my expert for rebuttal. We will get to that argument next week about Professor Lewis but that's a whole different set of arguments.

So I think this witness can clearly testify and respond to hypotheticals. If they want to ask him about different hypotheticals, they can as well. But it is highly relevant and probative to the issues that are in the case.

THE COURT: Again, the question was if the Attorney General had valued the property at a certain amount what would that tell you. I don't see the point. And by the

Professor Bartov - by Defendant - Direct (Mr. Suarez)
Page 6429
the record. This is exactly what's going on here. They are just basically saying, oh, I don't like 490 . Why don't you like 490 . It's wrong. Why it wrong? If we don't get down to the value and why the value is wrong, there's no way to determine it. You can't just say it is a misstatement because we feel like it. There has to be a standard. Otherwise, it's completely --

THE COURT: The standard is truth.
MR. KISE: Truth. What's truth? The truth based on -- the truth based on the Attorney General? The truth based on the Court? The truth based on the person on the street? This has to be -- it has to be more to some sort of standard. Otherwise, I mean, otherwise, this entire thing -- I really don't want to be back here trying this again, but if it is not worth to a standard, that's exactly where we are going to be.

MS. HABBA: I agree with my co-counsel's sentiments. I just want to be heard on where I think there is a major problem in faimess and commonly. We have heard now for a second day a witness who is an expert on accounting, accounting, which is the core of the AG's complaint. It's a GAAP violation. It is. We can't have fraud. We can't have misstatements without some violation of the rules.

So, I think what my co-counsel is saying is that if

1 you are going to argue that DJT's valuations had to be

1 I can echo everything that my colleagues have said,
\[
2
\]
materiality, all of those things have to be proven. That's why we have laws, 6312. Whether they want to use it in this cockamamie way or not, fine, but they still have a case to prove. And I think we are sitting here wasting time and money from looking at your responses and looking at their objections because they are not accountant experts. They are lawyers. And we have experts here to teach us what happened.

Accountants did this, not lawyers. Accounting firms, not lawyers. So, quite honestly, Your Honor, I also echo that we should have a directed verdict. We should have had a directed verdict ten weeks ago. They haven't proven their case and now they are -- frankly, I also have to address Mr. Wallace, who likes to giggle and be disruptive and I find it highly offensive, frankly. I think this is not a joke. You are talking about a company. We have to take this seriously, and we have to apply law to facts and that is what is not being heard.

All that's being heard is commotions and he gets all worked up. I've never seen anything like it, quite honestly. But we have to stop what we're doing if we are not going to seriously listen to these experts and take what they are saying as expert opinion. We are not experts on accounting. Nobody in this room is. He is. I also move

1 for a directed verdict again. Quite honestly, Your Honor, 2 this case -- they have not proven their case. They have 3 not. Thank you.

THE COURT: Denied. Would the plaintiff like to respond about anything that has been said?

MR. AMER: Just briefly, Your Honor. We had an extensive briefing on summary judgement which the CPLR allows voluminous exhibits including affidavits from all of the experts we have been hearing from. The Court issued its decision and resolved the issues against defendant that are relevant to valuation. We didn't put on any valuation experts because it was unnecessary.

Their arguments about valuation are for appeal because the issues have already been decided. This is a very narrow trial about intent to defraud, about the equitable relief we're seeking and about disgorgement. They want to put on their experts. It's the one thing I agree with Miss Habba about it's a complete waste of time. The issues that their experts are speaking to other than their banking expert, who addressed the disgorgement question, is simply irrelevant to the case. Those issues are no longer here. They had been decided and so I don't know why they are constantly rearguing things that they lost on summary judgement and make those arguments on appeal. That's fine. We're wasting a huge amount of time in this courtroom on

Professor Bartov - by Defendant - Direct (Mr. Suarez)
Page 6433
issues that have already been decided. That's all I want to say, Your Honor.

MR. KISE: So, Your Honor, Mr. Amer just contradicted you because he said you decided values. You just told us that you didn't decide values. The --

MR. AMER: I said valuation issues.
MR. KISE: Valuation issues. And it's not possible to decide valuation issues without deciding values at least not in the world that I live in so that's first.
Secondly --
THE COURT: I disagree with that. It almost sounds commonsensical but how you got to those values. We see documents that show how certain individuals got to certain values. Whether or not the absolute number is right is not the main issue here.

MR. KISE: How they got to the number is exactly the issue and it's certainly the issue irrespective of summary judgement, irrespective of summary judgement. In summary judgement, there was no question of intent. There was no question of materiality. There was no question of reliance. No question of damages. So we threw all of that out the window and now what the Attorney General wants to do, and it's clear, is say, no, no, we are going to take a statute that doesn't require any of the elements of fraud and then use that to prove elements of statutes that clearly

1 require elements of the actual elements of fraud, intent,
materiality, reliance.

And so you can't just collapse it all in one analysis. That's preposterous that you could do that on a legal basis. The issue of the propriety of the valuation derivation, they're propriety under GAAP. Whether or not the statements were prepared in accordance with GAAP, that all goes squarely to intent. It is not possible to determine that someone had an intent to defraud if they followed every rule that Professor Bartov says they needed to follow. It's not possible.

It is highly relevant and probative in this case irrespective of the summary judgement. The summary judgement is a whole nother set of issues but certainly with respect to this proceeding all of the issues that we're dealing with now goes squarely to intent. They go squarely to materiality and they go squarely to disgorgement including Professor Bartov's testimony. So I don't see where the Attorney General is coming from in that regard at all.

THE COURT: Just one very small slice of what you just said. I still believe the law is that expert testimony on intent is not admissible.

MR. KISE: He's not testifying about intent, Your Honor. He is testifying about what happened. He's telling
Q. Professor, after reviewing this credit report, assume a student walked into your class, with respect to Niketown, in 2011, and told you that they had valued it at \(\$ 136.5\) million, what would you tell that student?
A. I would ask the student "What is the definition of value that you used."
Q. If the student told you "estimated current value."
A. If he told me "estimated current value" I would say, "Listen, this is impossible because, liquidation value must be much lower than estimated current value. If you find the estimated current value is much lower than liquidation value, this is simply impossible."
Q. If that same student walked in, in 2011, and told you that 40 Wall Street, after having reviewed this credit memo, was worth \(\$ 200\) million, what would you tell that student?
A. Again, I would tell them the same thing. I will say, "This is impossible."
Q. And in 2011, if that same student walked in and told you that, after reviewing this credit memo, they had concluded that the Trump Park Avenue was worth \(\$ 95.7\) million, what would you tell that student?
A. Well, at that point, I'll give up on him.
Q. If that student was the New York Attorney General -- I'll withdraw the question.

Page 6435
you whether or not it satisfied the rules of accounting.
THE COURT: Well, the specific thing that got us
off this was assume that the Attorney General had done
something that we don't know that they actually did. So, enough. Let's move on.

Witness.
(Whereupon, the witness resumes the witness stand.)
THE COURT: Okay. Continue, please.
(Continued on next page)
A.Bartov - Defendant -Direct/Mr.Suarez

Page 6437
A. No. These are good people.
Q. Professor --

MR. SUAREZ: Your Honor, may I confer with Mr. Kise for a moment?

\section*{THE COURT: Sure.}

MR. SUAREZ: Thank you.
(Pause in proceedings.)
MR. SUAREZ: Can we please pull up the 2015 supporting data, which is Plaintiff's Exhibit 731.
Q. You see there, Professor, where it says, "PBC?"
A. Yes.
Q. Does that mark indicate that it was provided by the client to the --

MR. WALLACE: Objection, leading.
THE COURT: Sustained. He knows. We all know at this point.
Q. What does that mark indicate Professor?
A. Provided by client.
Q. If we turn to the Trump National Golf Club in

Colts Neck, which is at page ten of my hard copy but, that reference might not work.

Do you see that calculation of estimated current value for the Trump National Golf Club at Colts Neck?
A. Hold on a second.
Q. If you are having trouble with the screen I can --

                GAAP?
                GAAP?
            fo, Mr. Trump says, that those went to GAAP.
```

            fo, Mr. Trump says, that those went to GAAP.
    ```
                A.Bartov - Defendant -Direct/Mr.Suarez
                Page 6441
            Following GAAP, he does not recognize the brand value of the
                Trump name on the Statement of Financial Condition as a
                                standalone asset. Following GAAP he doesn't do that.
            GAAP limit the ability -- as I discussed
        yesterday, GAAP limit the ability of companies to recognize
        internally developed intangible asset as a standalone asset
        on the balance sheet.
            GAAP does not limit the ability of companies to
        include the effect of brand name on the value of tangible
        assets.

Tangible assets are subject to a completely different valuation rules than intangible asset; and therefore, and actually, as I explained in my report, GAAP require companies to include, as part of the valuation of intangible asset, any intangible asset that is related to them.

I put it in my report. I also cite opinion from
Price Waterhouse Coopers, one of the leading accounting firm in the U.S., that says the same thing.

So, when Mr. Trump included the premium associated with his grand name in the valuation of tangible asset, there's no GAAP violation here.

Now, when I say that I'm not doing valuation here, it means that I'm not opining whether the 30 percent is the right number or maybe it should be 27 or maybe it should be
\begin{tabular}{|l|l|}
\hline A.Bartov - Defendant -Direct/Mr.Suarez & Page 6442 \\
1 & 32. I'm not doing expert analysis in term of valuation. \\
2 & But, I do opine on the methodology. I do say -- I \\
3 & did opine in my report and I am able to opine now whether \\
4 & methodology, in general, is consistent with GAAP or if it is \\
5 & inconsistent with GAAP. \\
6 & This was also, according to the accounting rules, \\
7 & this was also the responsibility of the external accountant \\
8 & that performed the compilation. \\
9 & ARC 80 clearly states that the accountant that \\
10 & performed the compilation -- and it's also in my report. \\
11 & The accountant that performed the compilation must review \\
12 & the methodologies used by the preparer. Moreover, they also \\
13 & must inform themself of the methodologies that are used in \\
14 & the industry. \\
15 & And if they find that the methodology used by the \\
16 & preparer violated GAAP or inconsistent with the position in \\
17 & the industry, they have to flag it as a GAAP departure. \\
18 & Q. What, if anything, about this valuation here -- \\
19 & withdrawn. \\
20 & How, if at all, does this valuation method \\
21 & disclose this supporting data? \\
22 & A. You know, to be honest with you, if I were to do \\
23 & this compilation report, I would ask maybe -- it's also \\
24 & not -- it is not the responsibility of the person performing \\
25 & the compilation report, it's not his responsibility to check \\
\hline
\end{tabular}
A.Bartov - Defendant -Direct/Mr.Suarez Page 6443
whether the 30 percent is the correct number or not.
But, there is no details here how the 30 percent and 50 percent was computed. If I want to be extra careful and I perform this evaluation, perhaps I would ask for some information that will help me understand how this 30 percent or 15 percent was derived.

But again, this is -- formerly, it's not the responsibility of the company. This is an audit. In audit you have to do this. When you do compilations, you don't have to do it.

MR. WALLACE: Objection, your Honor. That answer was not responsive. And this is also an area that this witness has already said he didn't focus on. So, I'm not sure what the foundation is for this testimony.

THE COURT: Overruled. I thought it answered the question.
Q. Professor, how are you being compensated in this case?
A. My billing rate is \(\$ 1,350\) per hour.
Q. How many hours have you spent working on this engagement?
A. About 650 hours.
Q. Is your compensation, in any way, contingent on
the opinions that you've expressed?
```

A.Bartov - Defendant - Cross/Mr.Solomon
Page 6444

## A. No.

MR. SUAREZ: No further questions on direct examination.

THE COURT: And, I'm sorry, the per hour was $\$ 1000$.

## THE WITNESS: 350.

## THE COURT: Fifteen.

THE WITNESS: Fifty. One three five zero.
THE COURT: Okay. Will there be any cross examination?

MR. SOLOMON: Yes, your Honor.
THE COURT: Can we start now?

## CROSS EXAMINATION

BY MR. SOLOMON:
Q. Good afternoon, Professor.
A. Good afternoon.
Q. Following up on the last couple of questions that you were asked, who is paying your fees in this matter?
A. So, I submit the bills, my invoices, to the Trump Organization. And, on the -- some of it get paid by the Trump Organization and some of it is paid by Save America.
Q. That's the Save America PAC, Political Action Committee, is that correct?
A. I have no idea. I can tell you just what I see on my bank statement. On my bank statement, some number say
"Trump Organization." And some number says, "Save America." I got no additional detail that I can share with you.
Q. Other than -- let's just go through some background if we can.

Other than for yourself, have you prepared a personal financial statement, for anyone else, in the last 30 years.
A. The last time I prepare it, I think it was 1984 or 1985. So you do the math. If it was 30 years ago or longer. But, the last one I think it was around 1984 or 1985.
Q. Other than for yourself, have you valued real property, for inclusion, on a financial statement in the last 30 years?
A. No.
Q. Other than for yourself, have you valued any property, for inclusion, on a personal financial statement in the last 30 years?
A. No.
Q. Prior to issuing your reports in this case and providing your testimony, yesterday and today, did you perform any valuation of any of the assets on Donald Trump's Statements of Financial Condition for any year?
A. No.

MR. SOLOMON: Could we please pull up PX

|  | rtov - Defendant - Cross/Mr.Solomon Page 6446 | A.Ba | - Defendant - Cross/Mr.Solomon Page 6448 |
| :---: | :---: | :---: | :---: |
|  | 3439 and go to page eight. | 1 | basically? |
| 2 | It might be in front of the witness. It was | 2 | I want to ask about the second step there, |
| 3 | used on his direct examination earlier. | 3 | qualitative analys |
| 4 | THE WITNESS: No, this is not it. | 4 | THE WITNESS: Yes. |
| 5 | MS. FAHERTY: It is PX 3439. | 5 | THE COURT: What I remember from the |
| 6 | A. Thank you. | 6 | document was "Well, it's -- it was all very vague." It |
| 7 | Q. Professor, do you recall being asked several | 7 | was, you had to look at the particular reporting |
|  | questions about the materiality section, beginning on page | 8 | entity, et cetera. |
| 9 | eight of this document QC11? | 9 | Wouldn't one of the main elements of |
| 10 | A. I do. | 10 | materiality be the relative -- the discrepancy relative |
| 11 | Q. And in rendering your opinions, had you previously | 11 | to the absolute number? |
| 12 | reviewed the materiality section from this document? | 12 | THE WITNESS: So, you know, I am instructed |
| 13 | A. I did. | 13 | to give short answers. |
| 14 | Q. Did you rely on the material amount section from | 14 | THE COURT: To give -- |
| 15 | this document? | 15 | THE WITNESS: I am instructed to give short |
| 16 | A. I rely on this and other references. | 16 | answers. So I didn't tell you the whole story. If you |
| 17 | Q. My question was, did you rely on this document. | 17 | want to tell me the whole story about materiality, I |
| 18 | This will go a lot faster if you just listen to my | 18 | can tell you the whole story. |
| 19 | questions and answer my questions, please. You'll have an | 19 | THE COURT: I'm not looking for the whole |
| 20 | opportunity to explain anything you need to on redirect. | 20 | story. I am just looking for an answer to my question. |
| 21 | So did you rely, in any way, on the materiality | 21 | Wouldn't relative difference between |
| 22 | section contained in PX 3439? | 22 | THE WITNESS: So, as I said, there are two |
| 23 | A. I did. | 23 | steps. You can't see it from here because, this is |
|  | Q. And does that include QC11, 11-A and 11-B? | 24 | just a general framework. You have to look to the |
|  | A. Yes. | 25 | accounting literature. |
| A.Bartov - Defendant - Cross/Mr.Solomon Page 6447 |  | A.Bartov - Defendant - Cross/Mr.Solomon Page 6449 |  |
|  | Q. Did the information contained in QC11, 11-A and | 1 | So, the idea is, if accounting question is |
|  | 11-B provide the framework for your opinions about | 2 | ot answered by the codification, then in order to |
|  | materiality? | 3 | answer the question, you refer to other sources of the |
|  | A. General framework, yes. | 4 | accounting literature. |
| 5 | Q. As an accounting expert, sir, are you aware that | 5 | So there is a source in the accounting |
|  | the Statement of Financial Accounting concepts are not, | 6 | literature that lists potential -- that lists potential |
| 7 | actually, part of the SAB Accounting Standards Codification, | 7 | ement that must be considered when you do the |
|  | presently, in effect. | 8 | qualitative analysis. |
| 9 | A. Of course. | 9 | It is very clear from this guidance, that, |
| 10 | Q. Did you disclose that in your direct testimony | 10 | the absolute value of the discrepancy may affect your |
|  | that you were aware that this was not part of this existing | 11 | decision or conclusion whether it is material or not. |
|  | codification? | 12 | But, this is just one of many other consideration. |
| 13 | A. I don't remember. Maybe I didn't. | 13 | For example, what are other consideration? |
| 14 | Q. Isn't it true, sir, that these concepts are merely | 14 | One consideration will be, according to the accounting |
|  | concepts that will be considered in developing future | 15 | literature -- and again, if you want me to emphasize, I |
| 16 | financial reporting standards. | 16 | will say, this is not in the codification but, it's |
|  | "Yes" or "no," question, si | 17 | still in the accounting literature; and therefore, it's |
| 18 | A. Yes | 18 | a guidance that people are using. So, one element, for |
| 19 | MR. SOLOMON: Can we, please, mark PX3437? | 19 | example, would say, you have to consider -- |
| 20 | THE COURT: Before we get there -- sorry to | 20 | THE COURT: No. No. I asked a simple "yes" |
| 21 | backtrack a bit. Professor, I appreciated your two | 21 | or "no," question. |
| 22 | step test for materiality. | 22 | THE WITNESS: Yes. |
| 23 | THE WITNESS: Yes. | 23 | THE COURT: Should I ask it again? I don't |
| 24 | THE COURT: Quantitatively having a | 24 | want a speech. I just want an answer, "yes" or "no." |
| 25 | difference between the realty and the report, right, | 25 | THE WITNESS: This is one of many element |

| A.Bartov - Defendant - Cross/Mr.Solomon | Page 6450 | A |
| ---: | :---: | :--- | :--- |
| 1 | that need to be considered when you determine |  |
| 2 | materiality. |  |
| 3 | THE COURT: Okay. And I think my specific |  |
| 4 | question was, is it one of the important -- is it a |  |
| 5 | fairly important factor? |  |
| 6 | THE WITNESS: According to literature, no. |  |
| 7 | THE COURT: Okay. |  |
| 8 | THE WITNESS: If you want, I can give you an |  |
| 9 | example. |  |
| 10 | MR. SOLOMON: Your Honor, I am going to | 1 |
| 11 | explore this issue on my cross. I don't know if it | 1 |
| 12 | would be beneficial to see if we cover that during the | 12 |
| 13 | cross or if you want to have the witness continue on. | 1 |
| 14 | I want to volunteer that as a possibility. | 1 |
| 15 | THE COURT: He answered my question. I want | 1 |
| 16 | you to ask the next one. | 1 |
| 17 | MR. SOLOMON: I will, Your Honor. | 1 |
| 18 | CROSS EXAMINATION | 1 |
| 19 | BY MR. SOLOMON: | 1 |
| 20 | Q. Sir, are you familiar with what's been marked as | 20 |
| 21 | PX 3437? | 21 |
| 22 | A. I am. | 22 |
| 23 | MR. SOLOMON: Can we offer it into evidence? | 23 |
| 24 | Your Honor, can we offer it into Evidence. | 24 |
| 25 | THE COURT: Sorry. Granted. It's in. | 2 |

```
    you determine
    THE COURT: Okay. And I think my specific
    question was, is it one of the important -- is it a
    THE WITNESS: According to literature, no.
    THE COURT: Okay.
    ple.
        explore this issue on my cross. I don't know if it
        would be beneficial to see if we cover that during the
        cross or if you want to have the witness continue on.
        THE COURT: He answered my question. I want
        MR. SOLOMON: I will, Your Honor.
        BY MR. SOLOMON:
        Q. Sir, are you familiar with what's been marked as
        3437?
            MR. SOLOMON: Can we offer it into evidence?
        THE COURT: Sorry. Granted. It's in.
```

        A.Bartov - Defendant - Cross/Mr.Solomon
            Page 6451
            MR. SOLOMON: Thank you.
            If we could turn to the fourth page of the
        document.
        Q. The very top, first sentence. The conceptual
        framework is intended to set forth fundamental concepts that
        will be the basis for development of financial accounting
        and reporting standards. "Will be" future tense, correct?
            "Yes" or "no," sir?
        A. This is not a "yes" or "no," question. I will
        tell you why not. Because --
            Q. Sir, is the word will --
            A. Listen, you are going to mislead the Judge. This
        document --
            Q. I am not --
            A. Let me explain. This document is not relevant to
        this case. I'm sorry. This document is not relevant to
        this case. And the reason is, look at the top of the
        document what it says. Go to the top -- please, go to the
        top of the document and see what it says.
            MR. SOLOMON: Your Honor, move to strike as
        non-responsive.
            THE COURT: Stricken as non-responsive.
            We have certain rules here. And the rule is,
        he asks the question, you answer the question. Not to
        make a speech. Your attorneys can ask you about that
    on redirect.
MR. ROBERT: Your Honor, the witness said, "It is not capable of being answer 'yes or no'." Under the way we've been proceeding here, that would be acceptable to his.

THE COURT: Was that his response?
MR. ROBERT: He was trying to explain. And Mr. Solomon said "yes or no" pointing at the witness.

MR. SOLOMON: I was pointing at the document. I wasn't pointing at the witness. Would be?

MR. ROBERT: It didn't look way.
MR. KISE: You've already harassed him. You had him on the stand fifteen minutes and you're already being insulting. It is obvious what --

MR. SOLOMON: Your Honor, I object to this characterization. Mr. Kise is here wasting time now. We already have to bring this witness back on Tuesday. If I can proceed with my cross I'd appreciate it. Any claims I'm harassing the witness are wholly without merit.

MR. KISE: His tone and demeanor are extraordinarily harassing. I've wasted fifteen months of my life in this courtroom because of these folks and so has my client. He needs to ask proper questions and not be so hostile to a person who has earned with
A.Bartov - Defendant - Cross/Mr.Solomon

Page 6453

## respect.

MR. SOLOMON: I provided witness respect number one. Number two, every question was proper. There hasn't been a single objection from your table. So let's not characterize the record.

THE COURT: How about, rather than a read back, can you just ask the question again.
Q. Sir, the word "will" shows up in the first sentence there.

Do you see that, yes or no?
A. I do.
Q. Is the word "will" future?
A. Yes.
Q. Thank you.

MR. SOLOMON: Can we go to the paragraph beginning with concept statement. It's the next to last one on this page.
Q. Quote, concept statements are not part of the FASB Accounting Standards Codification which is the source of authoritative GAAP recognized by the FASB to be applied by nongovernmental entities (topic 105 of generally accepted accounting principles).
A. Yes.
Q. Were you aware of that statement when you provided your opinions in this case and gave your testimony, on
direct examination, in the courtroom?
A. Okay. So I did not review the statement because this statement was issue on December 2021. So look on the date when it became effective.

This issue, this statement, was effective after the period that I discussed in this. So this is hindsight using document that was not available to anyone that prepare the financial statement during this time.
Q. Sir, my question wasn't whether this document --
A. You are using document that was not available during the time. Can you do that?

MR. SOLOMON: Your Honor, move to strike as I was in the middle of a question so, it could not have been responsive.

THE COURT: Stricken. And I'll direct the witness just answer the questions. If the statement didn't exist, then I guess he didn't rely on it.

MR. SOLOMON: Your Honor, that wasn't the testimony. I believe the statement existed in 2021. And if I'm correct -- and I'm not trying to testify for the witness -- the issue had to do with the SOFCs that the witness was addressing. My question was different.

My question was, was the witness aware of and did he consider this statement, that existed in 2021, when you submitted your expert reports, in 2023, and
and introduce those standards into the case as well and say that these standards is what apply. It is a rudderless ship, your Honor. This is totally improper cross examination.

THE COURT: The question was, totally, proper. Objection overruled. Please stop the speeches. Please stop the ad hominem.
A. Okay. Sure. So what's the question.
Q. Did you consider the limitation or statement
that's contained in the paragraph that we read, when you prepared your expert reports in this case, in 2023, and gave testimony in this courtroom in 2023?
A. So, when I do --
Q. It is a "yes" or "no," question.

THE COURT: It is a yes or no question.
A. No, I didn't rely on this statement. I didn't rely on this statement. I didn't rely on this statement at all.
Q. Now, sir, you address that it was, as amended, December 2021. Correct?
A. Yes.
Q. When was it first adopted?
A. I used the -- you know, I -- if it was amended in December 2021, it could not be effective before this date.
Q. Was there a version of this that was similar, in

| A.Bartov - Defendant - Cross/Mr.Solomon |  |
| :--- | :---: |
| 1 | testified here in court on December 7, 2023. |
| 2 | That was my question. 6455 |
| 3 | THE COURT: Okay. Sorry. I misinterpreted. |
| 4 | MR. KISE: If that was the question, it is |
| 5 | an improper question because, the scope of cross is |
| 6 | limited to what he talked about on direct. |
| 7 | So, it's not to pull in something now that |
| 8 | wasn't -- just like the witness said, to pull in |
| 9 | something that's available now - these statements were |
| 10 | prepared 2011 through 2021. So, if this wasn't |
| 11 | available, it is an improper -- |
| 12 | THE COURT: But it was. |
| 13 | MR. KISE: -- cross examination. He |
| 14 | couldn't have relied on it. It is like asking him if |
| 15 | he relied on the physics calculation on Mars. |
| 16 | MR. SOLOMON: I'm asking if this witness |
| 17 | relied on this in connection with his report not in |
| 18 | connection with the Statements of Financial Condition. |
| 19 | This witness didn't prepare the SOFCs as far as I am |
| 20 | aware. |
| 21 | MR. KISE: The report relates to the |
| 22 | governing standards applicable at the time of the |
| 23 | preparation of the Statements of Financial condition. |
| 24 | Every time I think their position can't get |
| 25 | more ridiculous it does. Why don't we wait until 2024 |

A.Bartov - Defendant - Cross/Mr.Solomon

Page 6457
form or sustenance, that was adopted in 2010 to your knowledge?
A. Yes, there was.
Q. And did it contain, in form or substance, the same limitation that concept statements are not part of the FASB Accounting Standards Codification. Yes or no?
A. Yes.
Q. That was in 2010, correct?
A. Correct.
Q. Okay. Thank you.

Will you agree, sir, with me that there is no defined materiality test contained in the codification?
A. Yes, I do.
Q. In your testimony, yesterday, you made reference, I believe, to the SEC.

Am I recalling that correctly?
A. To what?
Q. The SEC, the Securities and Exchange Commission?
A. Remind me. What did I say?
Q. Are you aware that the SEC publishes staff accounting bulletins?
A. I do.
Q. And do you rely on those in connection with your work?
A. Absolutely.

| A.Bartov - Defendant - Cross/Mr.Solomon Page 6458 | Professor Bartov - by Defendant - Cross (Mr. Solomon) Page 6460 |
| :---: | :---: |
| Q. And do you rely on those in connection with the various papers that you write? <br> A. Absolutely. <br> Q. And the articles that you write? <br> A. Absolutely. <br> Q. Do you believe them to be authoritative? <br> A. I do. <br> MR. SOLOMON: Could we please mark PX 3446? <br> Q. Do you have a copy of the Exhibit? <br> A. I do. <br> Q. Have you had a moment to review it? (Whereupon, the following proceedings were stenographically recorded Shameeka Harris.) | 1 the one who prepares the compilation. So I want to understand. <br> 2 When you use the term preparer, you are talking about in this <br> 3 case Donald J. Trump; is that correct? <br> 4 A Yes. <br> 5 Q Thank you. Could you please turn to page five? <br> 6 A Okay. <br> 7 Q The title is Aggregating and Netting Misstatements. <br> 8 A Yes. <br> 9 Q The very first paragraph. "In determining whether <br> 10 multiple misstatements cause the financial statements to be <br> 11 materially misstated, registrants and the auditors of the <br> 12 financial statements should consider each misstatement <br> 13 separately and the aggregate effect of all misstatements." <br> 14 A Yes. <br> 15 Q Were you aware of that direction or interpretation from <br> 16 the SEC with respect to financial statements? <br> 17 A Yes. <br> 18 Go down a little bit to the paragraph beginning even. <br> 19 "Even though a misstatement of an individual amount may not <br> 20 cause the financial statements taken as a whole to be materially <br> 21 misstated, it may, nonetheless, when aggregated with other <br> 22 misstatements, render the financial statements taken as a whole <br> 23 to be materially misleading." <br> 24 Were you aware of that part of the interpretation <br> 25 before today? |
| Professor Bartov - by Defendant - Cross (Mr. Solomon) Page 6459 | Professor Bartov - by Defendant - Cross (Mr. Solomon) Page 6461 |
| MR. SOLOMON: Your Honor, Friday we go until one, correct? <br> THE COURT: We go to 5 of 1 . Is that all right with everyone? <br> MR. SOLOMON: I know during the week we break at 12:45. I just want to get through an area and not leave it over the weekend. <br> THE COURT: Let's be simple. When would you like to break? <br> MR. SOLOMON: If you said 5 to 1 , we will. I will make that work. <br> CONT'D CROSS-EXAMINATION <br> BY MR. SOLOMON: <br> A All right. I refreshed my memory about it, yes. <br> Q Have you seen this -- first off, what is an SEC staff accounting bulletin? <br> A This is opinion of the SEC about a question that preparer may have and they want to clarify. And they clarify for preparer interpretation of accounting practices. <br> Q And when you say preparer, I think there was --I had a little confusion yesterday. Who are you referring to as a preparer? Is that the issuer, the actual company whose financial statements are being published? <br> A Yes. <br> Q Because I think we also heard the term preparer is also | A I was. <br> Q Did you consider that in connection with any of your opinions in this case? <br> A Absolutely. <br> Q And your opinions looked at aggregating any potential misstatement to determine materiality? <br> A Absolutely. <br> Q And you did a materiality test after you aggregated any individual misstatement? <br> A Absolutely. <br> Q We can turn to the second page. Excuse me, page six, the next page. Immaterial misstatements that are intentional. Now, here, it's a little bit different, Professor. It gives you facts, then a question, and an interpretive response; do you see that? <br> A Yes, I do. <br> Q Is that common in an SEC bulletin? <br> A Yes. <br> Q And could you explain what the purpose is of putting it in that format in an SEC bulletin? <br> A They are trying to answer -- interpret the accounting rules by raising a question and give the facts and give the answer so preparer will know how to address a problem that is <br> 24 similar to the question that was asked given the fact pattern <br> 25 that is up here. |

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

$1 \quad$ Q And given the fact pattern the question presented to the SEC which, again, you said is helpful guidance when doing financial statements, correct?
A Absolutely.
Q In the staff, a registrant make intentional immaterial misstatements in its financial statements, the first word no?

A Of course not.
Q Do you agree then that a registrant or someone
preparing their SOFC's, in this case, Mr. Trump, may not make intentional immaterial misstatements in his financial 10 statements, correct?
A Correct.
Q Let's go back one page, please, to the paragraph beginning if the misstatement.
"If the misstatement of an individual amount causes the financial statements as a whole to be materially misstated, that effect cannot be eliminated by other misstatements whose effect may be to diminish the impact of the misstatement on other financial statement items."

Did I read that correctly?
A Absolutely.
Q What does that mean?
A It means that you -- if you exaggerate value of one
asset and you underreported the value of another asset, this
does not mean or if you consider the overall, you consider the

Q Okay.
MR. SOLOMON: Your Honor, this would be a convenient point to take a break. I'm sorry, for the day, for the day. I said break.

THE COURT: Monday $10 \mathrm{a} . \mathrm{m}$. We will pick up this case. And, Professor Bartov, again, please do not discuss the case or do not discuss the case or your testimony or anything related thereto between now and Tuesday. I'm sure you have better things to talk about.

THE WITNESS: Have a good weekend.
(Whereupon, the witness was excused from the stand.)
(Whereupon, the trial is adjourned until Monday, December 11, 2023, at 10 o'clock a.m.)
overall, the error may cancel out. But when you -- but this is not -- this is not -- this is not the reason to say that the financial statement are not materially misstated.
Q So --
A By cancelling error does not reduce the consideration.
Q Okay. Thank you. Have you completed your answer, sir?
A What?
Q Have you completed your answer?
A Yes, Idid.
Q I asked a question why so I wanted to give you an opportunity to finish. Let me see if I can give you a real world example. Let's assume, just for purposes of this case, that I own a building in lower Manhattan, 60 Wall Street, and the true value -- the true estimated current value is $\$ 1$ but I put it down on my financial statement as $\$ 100$ million. If I have another building in midtown that is worth $\$ 100$ million and I put it down as $\$ 1$, in both instances, in that instance, my net worth is still one hundred million and one dollar.
Notwithstanding that, that would still be a GAAP violation, correct?

MR. KISE: Objection. Where is he getting these values from? Where are they?

THE COURT: They are hypothetical, overruled. MR. KISE: Okay.
A Hypothetical, yes, you're right.

# In The Matter Of: <br> PEOPLE OF THE STATE OF NEW YORK v. DONALD J. TRUMP 

## ELI BARTOV, KEVIN SNEDDON \& ERIC LEWIS December 12, 2023

Cheryl-Lee Lorient

| Proceedings | Page 6469 | Pro |
| ---: | :--- | ---: |
| $\mathbf{1}$ | reason why you're not producing the original. I think that | 1 |
| 2 | rule goes back centuries to when we didn't have | 2 |
| 3 | photocopiers, digital reproduction. We had scribblers so | 3 |
| 4 | they can make errors. That's why you wanted the original | 4 |
| 5 | but the rule still exist but that's its limitation. | 5 |
| 6 | $\quad$ It is not some sort of catch all, well, we think | 6 |
| 7 | they could have introduced better evidence so this isn't the | 7 |
| 8 | best evidence. No. I would say there is no general | 8 |
| 9 | prohibition on introducing evidence that may not be the | 9 |
| 10 | best. You could have trials on what's the best evidence, | 10 |
| 11 | trials within trials. So, I reject that particular | 11 |
| 12 | assertion. I see no reason not to allow these two purported | 12 |
| 13 | experts to testify subject to objections on the particular | 13 |
| 14 | questions being offered. | 14 |
| 15 | $\quad$ MR. WALLACE: May I just offer one correction, Your | 15 |
| 16 | Honor. One is a fact witness, that's Mr. Sneddon. And one | 16 |
| 17 | is an expert, that's Professor Lewis. | 17 |
| 18 | $\quad$ THE COURT: Most of the letter was about Lewis so. | 18 |
| 19 | Anything else before I turn to defendants? I see no reason | 19 |
| 20 | to allow -- not to allow these experts, but if you want to | 20 |
| 21 | reargue the letter, which I read very carefully, go ahead. | 21 |
| 22 | MR. KISE: I won't reargue the letter. Thank you, | 22 |
| 23 | Your Honor. I am not going to reargue the letter, but I am | 23 |
| 24 | going to point out that this is clearly -- the Government | 24 |
| 25 | has held these witnesses back. They could have called these | 25 |
|  |  |  |

| Proceedings |  |
| :---: | :--- |
| 1 | witnesses, particularly Mr. Sneddon, on their -- in their |
| 2 | affirmative case. The case law from the Court of Appeals is |
| 3 | quite clear that rebuttal is limited to just that rebuttal. |
| 4 | If we didn't introduce the issue in our case, they can't now |
| 5 | say, oh, well, I'm rebutting your case by calling a witness |
| 6 | that was fully available to them. They called Allen |
| 7 | Weisselberg. They cross-examined Allen Weisselberg. They |
| 8 | called Jeff McConney. They cross-examined Jeff McConney. |
| 9 | When Jeff McConney took the stand in our case, they also |
| 10 | cross-examined Jeff McConney. |
| 11 | $\quad$ None of the issues that Mr. Sneddon -- at least |
| 12 | from what we can see. Again, we have no proffer which I |
| 13 | tried to get out of the Government last week and that was |
| 14 | rejected -- but none of the issues that Mr. Sneddon can |
| 15 | possibly speak to relate to anything that happened in our |
| 16 | case. They may relate to testimony that they elicited in |
| 17 | their case but the time to have dealt with that has passed. |
| 18 | THE COURT: Okay. I do -- plaintiff, do you agree |
| 19 | with what was just said? |
| 20 | MR. WALLACE: I do not agree. And, I believe, when |
| 21 | Mr. Sneddon testifies, it will be obvious that he is |
| 22 | rebutting evidence that came in during the defendants' case. |
| 23 | THE COURT: And I completely agree with you, |
| 24 | Mr. Kise, as a general proposition. You can't just hold |
| 25 | back on your case-in-chief and then say, oh, by the way, we |

1 misnomer because they were all exchanged at the same time. 2 So the experts were designated in most cases as both. They 3 are not really one or the other. Professor Lewis put on an

4 affirmative -- provided an affirmative report. He also provided what we are calling our rebuttal report in this case which responds to our experts, but in the nature of the timing, the way the case, according to the case law, should have laid out is if the Government wanted to introduce Professor Lewis testimony, they would have called him in their case-in-chief and introduced that testimony.

Then we would have rebutted it in the ordinary course. We would have had the opportunity to challenge that testimony in the ordinary course. And then to the extent that new issues were raised or issues requiring rebuttal along the lines of the case law that Your Honor is acknowledging, they would then be able to, perhaps, recall Professor Lewis. But to come along now and introduce Professor Lewis opinions -- and I'll put that word in quotes because we are going to renew our challenge -- to the extent the Court is going to allow him to testify, we are going to renew our motion in limine. We can take that up after Professor Bartov is done so we don't waste court time at this moment. But there has to be some opportunity for the defense then to meet whatever evidence they've held back.

They don't get to, like, through some sort of
have this surprised witness that we could have called earlier. So it would be limited to rebutting but go ahead.

MR. KISE: The same is true of Professor Lewis. If the Court is going to ignore the Black Letter Law and allow Professor Lewis to testify under these circumstances where he clearly is their expert, should have been called, could have been called and should have been called in their case-in-chief to present affirmative evidence, evidence that we're not able to meet now because our experts can't testify about what they think Lewis is going to say on the stand or any other expert that hasn't testified. Mr. Wallace made a big pitch on that last week when we even talked about hypothetical numbers.

Mr. Wallace said, oh, well, those numbers aren't in the record and they can't talk about this and they can't talk about that. It's all in the record. So, okay, if our expert can't talk about anything because it's not in the trial record, they don't get to tactically now say, all right, now, we are going to bring in Lewis and deprive you of any opportunity to rebut -- to provide a sur-rebuttal to Lewis.

I mean, in the first instance, any of his testimony should have been provided on direct. They had full access to the experts. As you know, from prior conversations, our initial and rebuttal reports are really somewhat of a

| Proceedings |  |
| ---: | :--- |
| 1 | parlor tricks -- this is exactly what the case law from the |
| 2 | Court of Appeals speaks to, that the two reasons for not |
| 3 | allowing this sort of practice is, one, to preclude |
| 4 | gamesmanship which there's -- |
| 5 | MR. WALLACE: I apologize for interrupting |
| 6 | Mr. Kise. Mr. Lewis will testify in response to evidence |
| 7 | that Mr. Flemmons put in. That would be the scope of his |
| 8 | testimony so that is rebuttal testimony. Flemmons offered |
| 9 | testimony about what GAAP says concerning some of the |
| 10 | compilation and the standards applicable. Professor Lewis |
| 11 | will testify to that. He's not testifying as to valuations. |
| 12 | He's not doing other work. Flemmons said "X". Lewis will |
| 13 | say not "X". That will be the scope of the testimony. |
| 14 | MR. KISE: So with that proffer -- that's certainly |
| 15 | helpful and I appreciate that and ordinarily I don't |
| 16 | appreciate the interruption but in this case it is helpful. |
| 17 | If I am understanding clearly, nothing that is contained in |
| 18 | Professor Lewis initial report will be the subject of his |
| 19 | testimony today; is that right? |
| 20 | MR. WALLACE: It could be issues that are |
| 21 | responsive to -- he has a view of ASC 274 that is different |
| 22 | from Mr. Flemmons. It may have been included in his |
| 23 | original report. We are not relying on ASC 274 as part of |
| 24 | our case-in-chief, but the defendants have presented |
| 25 | evidence on it. He is going to respond to that evidence. |

1 parlor tricks -- this is exactly what the case law from the 2 Court of Appeals speaks to, that the two reasons for not allowing this sort of practice is, one, to preclude gamesmanship which there's --

MR. WALLACE: I apologize for interrupting
Mr. Kise. Mr. Lewis will testify in response to evidence that Mr. Flemmons put in. That would be the scope of his testimony so that is rebuttal testimony. Flemmons offered testimony about what GAAP says concerning some of the compilation and the standards applicable. Professor Lewis will testify to that. He's not testifying as to valuations. He's not doing other work. Flemmons said "X". Lewis will say not "X". That will be the scope of the testimony.

MR. KISE: So with that proffer -- that's certainly helpful and I appreciate that and ordinarily I don't appreciate the interruption but in this case it is helpful. If I am understanding clearly, nothing that is contained in Professor Lewis initial report will be the subject of his testimony today; is that right?

MR. WALLACE: It could be issues that are responsive to -- he has a view of ASC 274 that is different from Mr. Flemmons. It may have been included in his original report. We are not relying on ASC 274 as part of our case-in-chief, but the defendants have presented evidence on it. He is going to respond to that evidence.

1 our directed verdict motion, we had no choice but to put 2 Mr. Flemmons on to testify to make sure that the record was 3 clear from the defense standpoint. We couldn't waive that 4 opportunity but that doesn't now give them license to come 5 back in afterwards realizing that there is a hole, realizing 6 that they haven't established what they needed to establish 7 under ASC 274, whatever it is that Professor Lewis purports 8 to testify about, those were matters that must and should 9 have been taken up in their affirmative case.

And, respectfully, I would suggest to this court to reconsider. This is reversible error respectfully. Letting this in under these circumstances where they had clear notice of what the issues were, they had the clear burden of proof. They failed to meet that burden of proof. And I'm not being disrespectful to the Court. I'm just laying this out. They had the clear burden of the proof and now to allow them to come along and backfill their case and then later deprive us of any responsive opportunity on top of that, I just don't see how that is supported under any of the cases that we've cited or any of the case law in New York.

And I don't think that the Government can cite a single case where this can be allowed to happen where they could lay and wait, not prove their case, wait to see what we put on and then now come in and attack it as rebutting. 11

1 They are not rebutting anything. This is part of their 2 affirmative case and that's what the case law speaks to as 3 well. It's not really rebuttal evidence when it is -4 directly corresponds to an affirmative element in their 5 case. There is nothing new here. So we would object to 6 Your Honor allowing either of these witnesses to speak even
given the limitation that Mr. Wallace has so kindly provided. That still demonstrates that the testimony goes to their affirmative burden.

And if they haven't met their affirmative burden before that witness takes the stand, then -- then there's no basis for rebuttal before our case is closed and our directed verdict motion should be granted on the basis that they have admitted they've left out a key element of their case.

THE COURT: So now that the specter of reversal has been raised again, do you still want to call these witnesses?

MR. WALLACE: Yes, Your Honor. This is in sane that we are spending 20 minutes, 15 minutes discussing this issue. This is -- he is going to respond to points, as I said, defendants chose to put in their case. It doesn't go to our bread. It is classic rebuttal. It is pure rebuttal. They can object to individual questions, but we should move. And we have witnesses waiting and start taking the
witnesses.
MR. KISE: The only other thing I'll add to that, Your Honor, I would, again, direct the Court's attention to the cases we cited particularly the Reinoso, R-E-I-N-O-S-O, recent First Department case.
"The plaintiff's failure to offer expert testimony as parts of case-in-chief, deprived her of the right to make use of it as affirmative evidence."

And that's clearly what's taking place here. They did not offer Professor Lewis testimony as part of their case-in-chief. Simply because the evidence is evidence that -- that contradicts our evidence, that doesn't make it rebuttal evidence. But what you have to look to is whether or not it was part of their initial burden. And this evidence that Mr. Wallace is describing was clearly part of their initial burden. They clearly had the burden to establish that if there were any GAAP violations or any ASC 274 violations this is in their complaint.

Their complaint alleges these types of violations. They are bound to prove the claim that they have asserted in their complaint and part of that would be to call an expert and to testify about whether or not there were GAAP violations, accounting violations, violations of ASC 274, etc. The failure to do that doesn't mean that now they can come along and bring in evidence that contradicts -- that
case-in-chief.
So, apparently, there is some discretion even in the defendants' case. Mr. Kise, as usual, you're the soul of reasonableness. I agree with a good portion, I wouldn't try to put a percentage on that, of the basic principles you're citing. I just totally disagree with your application. I know we got facts and we got law. And you're not applying your reasonable correct law to the procedural history of this case in my view.

And, finally, I just want to mention that you refer to Mr. Wallace's something like gracious limitation of what rebuttal will be. Well, that's not Mr. Wallace. That's what the law is. A rebuttal witness is there to rebut. So we wasn't really limiting plaintiff at all. Let's get the witness in, okay. Thanks Mike.

COURT OFFICER: Witness entering.
ELI B ARTOV, a witness called by and on behalf of
the Defendant, upon being previously duly swom, was examined and testified as follows:

THE COURT: I'll remind the witness as usual that he's still under oath.

And, Mr. Solomon, please continue.
MR. SOLOMON: Thank you, Your Honor.
CONT'D CROSS-EXAMINATION
5 BY MR. SOLOMON:

## Proceedings

Page 6478

1
contradicts our evidence. It's not a rebuttal. It's filling a hole. It is classic backfilling and clearly within the purview of the cases from the Court of Appeals on down and the First Department that say that this gamesmanship is not to be -- not to be allowed.

Mr. Robert may have something to add.
MR. WALLACE: Your Honor, we have been talking about this for 20 minutes. We already had your ruling.

THE COURT: Well, Mr. Kise likes to rebut my rulings.

MR. ROBERT: If it makes you feel better, Mr. Wallace, I'll be brief. Your Honor, based on your ruling, are you then denying the application for a sur-rebuttal witness being called by us?

THE COURT: Most likely but I'll see.
MR. ROBERT: Then I will reserve argument on that until you make a decision on it. Fair enough. Just wanted to check.

See, Kevin, it was quick.
THE COURT: This was from Reinoso versus New York City Transit Authority. My research department has come up with a quote, moreover in civil cases, the trial court has discretion to allow rebuttal testimony that wouldn't have been, I guess, that would have been more -- would more appropriately have been adduced as part of the parties'

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6480
Q Good morning, Professor.
A Good morning.
Q Do you recall that the SOFC, Statements of Financial
Condition, at issue in case are complications?
A Ido.
Q Would Donald Trump free to have order audited SOFC's if he chose?
A If he chose to, of course.
9 Q Do you recall that Mazars at first and then Whitley
Penn were the external accountants?
A Yes.
Q With respect to the SOFC's in this case and the
external accountants in this case, do you agree with the following statement, quote, importantly, since the external accountant that prepared the SOFC's has not audited the SOFC's, it is in no position to express an opinion on whether the SOFC's are GAAP compliant.

Do you agree with that statement?
A Absolutely.
Q Do you agree with the statement that Mr. Haigh Trump was responsible for the preparation and fair presentation of the statements in accordance with GAAP and let me limit that beyond that quote to the years 2011 through 2016, the June 30, 2016, SOFC?
25 A Yes.

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

Page 6481
1 Q After Mr. Haigh Trump became president, did you -- do you understand that the trustees were then responsible for the preparation and fair presentation of the statements in accordance with GAAP?

A Yes.
Q Can we please pull up PX519. It's already in evidence, I believe.

Do you recognize this? Do you recognize this document, Professor?

A Give me a chance to review it. Well, I review it at one point not recently but this is the credit report prepared by Deutsche Bank Private Wealth Management, Risk Management.

Q If we could please turn to page 11. At the top, it carries over from the bottom of ten, Financial
Analysis-Guarantor. So pages 10 to 11 Financial Analysis Guarantor. Do you see that, Professor?

A Mine is page nine. Mine version is page 9 and 10, I think.

MR. ROBERT: Mr. Solomon, I think he is looking at the document number as opposed to how much produced at the bottom.
Q If you look at the bottom PX519 and --
A Yes, I see that.
Q So, the carryover paragraph, the last two sentences
"based on the results of this due diligence, we made certain

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6483

1

A Well, in practice, you can say, hey, here are the numbers. They reported a hundred million dollars cash. I'll take a 50 percent discount, and I just consider it to be 50 million. They reported $\$ 1$ billion of asset. I take 50 percent off, and I consider it as 500 million, etc. So there is no economic consideration whatsoever. It is completely arbitrary.
Q So I understand the process, it could work that the lender here, Deutsche Bank, takes an amount that's stated on the financial condition, say a million dollars, gives it a
50 percent reduction or haircut then values it at 500,000 , right?
A Only if they -- if the $\mathbf{5 0}$ percent is the determined arbitrarily without any economic analysis.
Q In my example, I would say they take 50 percent. I want to make sure I understand how the math works. You take the million dollars from the stated number on the SOFC, 50 percent of that Deutsche Bank decides that's the number they want to use so the Deutsche Bank adjusted value for that asset would be $\$ 500,000$ ?

MR. KISE: Is he stating that this is what Deutsche Bank or he is making up a hypothetical?

MR. SOLOMON: Your Honor, can I finish my examination or we excuse the witness.

MR. KISE: There is no excusing the witness. The question is whether he is mischaracterizing the evidence

## Professor Bartov - by Defendant - Cross (Mr. Solomon) <br> Page 6482

assumptions that resulted in adjustments to reported values.
Details on such adjustments are included in the analysis that follows. Pardon me. It's three sentences. Additional details are included in the guarantor financial statements."

The we in the first sentence, do you understand that to be Deutsche Bank?
A It sounds like it, yeah. I didn't read the whole document, but it sounds like due diligent -- due diligence was prepared by Deutsche Bank, yes.

Q Do you recall testifying on your direct that when you reviewed credit memos, you came to the conclusion that Deutsche Bank did not perform a mechanical automatic discount to the value of the assets on the statements of financial condition? A Well, to be accurate, yeah. That's true. That's true. Yes, that's true. Okay.

Q That was your testimony on direct?
A That was testimony. I provided explanation why but this was my testimony, yes.

Q What did you mean by a mechanical automatic discount to the value of assets on the statements of financial condition?

A Mechanical adjustment means that it doesn't base on economic analysis. You don't care about economic analysis. You care about arbitrary with the percentage, you take it off of the reported numbers without economic considerations.

Q So how would that work in practice?

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6484 that comes before or whether he is stating a hypothetical. THE COURT: I believe it is a hypothetical.
MR. SOLOMON: For the moment, Your Honor, it is a hypothetical.

MR. KISE: If it is a hypothetical, it is an improper hypothetical because it fully contradicts the evidence in the record.

THE COURT: Totally disagree. Overruled.
Q I am asking the mechanics of it. Thank you. If I understand your testimony is that the mechanical automatic discount was not done for the assets identified in Mr. Trump's statement of financial condition?

## A That's true.

Q Can we please look at PX302 which is the 2018 DB credit memo.

THE COURT: I just want to add, I understand your point, Mr. Kise, and I shouldn't have shut it down like that but it was just a hypothetical. If you're going to use this type of method, it is sort of automatic haircut, that's how you would do it.

MR. SOLOMON: Yes, Your Honor. That question at that the time was a hypothetical.

THE COURT: Okay. So it's not assuming that that's what Deutsche Bank did. That's just if they did that that's what it would have --

MR. SOLOMON: At that time, the question was a hypothetical, that assumption, yes.
Q If you could please turn to page ten -- withdrawn. Do you recognize this document, Professor?

A I do. I do recognize it, yes.
Q And what do you recognize it to be?
A This is the credit report, again, just like before different date.

Q And this is one that you looked at on your direct examination, correct?

A Idid, yeah.
Q Could you please turn to page ten and if you look under 4 Trophy Properties.
A Yes.
Q Was that the analysis you were looking at on your
direct when you said that DB did its own valuation and did not rely on the valuations in the statements of financial condition?

A Yes, I did.
Q Do you recall testifying on your direct examination in
response to questions from counsel that this analysis
demonstrates to you that Deutsche Bank did not use the numbers in the SOFC's but rather did its on valuation?
A This analysis means not only the table also the amount of the language, the comment above and below. The -- you have to consider the entire document not just the table in order to

|  |  | Page 6486 |
| :--- | :--- | :--- |
| 1 | figure out that the analysis was based independently and not on, |  |
| 2 | yeah, if you read the entire document, that's the conclusion. |  |
| 3 | Q | So your conclusion is that Deutsche Bank did not use |
| 4 | the numbers in the SOFC's but rather did its own valuation? |  |
| 5 | A | Based on the entire document. |
| 6 | Q | Based on? |
| 7 | A | The entire document. |
| 8 | Q | The entire document? |
| 9 | A | Yes. |
| 10 | Q | Thank you. |

## CROSS EXAMINATION

## BY MR. SOLOMON:

MR. SOLOMON: Let's go back to page nine of
25 on this document.
Q. Professor, if you look at the bottom of PX 302, it will tell you page nine of 25 .
A. I see.
Q. Are you on this page that's on the screen?
A. I am.
Q. Here, again, the last three sentences are the same or similar to the ones we saw in the earlier credit memo, correct?
A. Yes.
Q. I want you to look at the chart below now.
A. Okay.
Q. Please, focus on the third row "real estate net equity."
A. Okay.
Q. If you go to the column "DJT 6/30/2014 client reporting" do you see that?
A. I do.
Q. That is - is this $3,000,000,867$ or $3,867,000$ ?
A. My reading it is three billion.
Q. $3,000,000,867$. If you look right to $i t$, to the right, "DB adjusted."

| E.Ba | tov - Defendant - Cross/Mr.Solomon Page 6488 |
| :---: | :---: |
| 1 | Do you see that? |
| 2 | A. I do. |
| 3 | Q. 1,933, 000,500 , right? |
| 4 | A. Yes. |
| 5 | Q. You can check my math if you want. But, I get |
| 6 | that that's, exactly, fifty percent of the reported value, |
| 7 | right? |
| 8 | A. Yes. Maybe. I trust your -- that's okay. Yes, I |
| 9 | accept that. |
| 10 | Q. Don't accept it. Is that, exactly, fifty percent |
| 11 | of the client to credit -- |
| 12 | A. Yes, it is. |
| 13 | Q. Okay. Now, look for the years 2015, client |
| 14 | reported 4,390,000,000, DB adjusted $2,000,000,195$; fifty |
| 15 | percent again? |
| 16 | A. Yes. |
| 17 | Q. 2016, fifty percent again? |
| 18 | A. Yes. |
| 19 | Q. For the DB adjusted amount as compared to client |
| 20 | reported, right? |
| 21 | A. Yes. |
| 22 | Q. 2017, fifty percent? |
| 23 | A. Yes. |
| 24 | Q. That's the adjustment Deutsche Bank did again? |
| 25 | A. Yes. |

Is that your testimony, sir?
Yes or no?
A. This is my testimony because, you distorted the mechanism. They didn't do it in a vacuum. They first did an analysis of a number of assets, very detailed analysis, and they have the Valuation Services Group, a specific group that does the analysis.

Once he satisfied their needs for the collateral for the guaranty then, as I explained, clearly, yesterday, banks do not burn cash for nothing. They do not take analysis that give them no benefit.

So, once they perform the analysis and they figure out that the four trophy asset valuation is about one billion dollars -- that is well, well, below the 125 million-dollar loan -- then, to save money -- and, I think that in some places they did -- in some areas of the credit record, they say in consultation with the Valuation Services Group "We take fifty percent of the remaining asset" because, it won't make a difference either way. So, they just want to save money.

So this fifty percent that they took on several assets -- actually, in one asset, they took 75 percent haircut -- they did it after an economic analysis. This is economic analysis based is not mechanical haircut.

MR. SOLOMON: Move to strike, your Honor.

## Do you see that?

A. Yes.
Q. Did you review Mr. Haigh's trial testimony?
A. I have.
Q. Were you aware that Mr. Haigh testified, in form or substance, that, in instances the reported value was adjusted in their financial analysis by fifty percent, which was, he thought, a standardized number for commercial real estate assets?
A. I do remember this testimony, yes.
Q. So you are aware of Mr. Haigh's testimony that DB, Deutsche Bank, reduced certain of the categories, by fifty percent, from the amounts reported on the Statements of Financial Condition, yet you testified, on direct, that Deutsche Bank, at no time, relied upon the amounts in the Statements of Financial Condition.
A. Absolutely, there is no contradiction here at all.

THE COURT: "There is no contradiction at all," is that what you said?

THE WITNESS: Yes, there is no contradiction at all between these two statements.
Q. If I take the number from the Statement of

Financial Condition and apply a haircut to it, I'm not relying on that number in the first instance to get to my final number?

1 It was a "yes" or "no," question.
MR. ROBERT: He started out with a question. He didn't like the answer. Then he tried to change it to "yes or no." It was, totally, responsive.

MR. SOLOMON: The answer was "yes or no."
MR. ROBERT: No. I do what it says there.
But that's not how the question came out. You stopped it after Professor Bartov started to answer the question.

THE COURT: What was the question that was "yes or no?"

MR. SOLOMON: If I take the number from the Statement of Financial Condition and apply a haircut to it, I'm not relying on that number in the first instance to get to my final number.

Is that your testimony, sir, yes or no?
THE COURT: That's a "yes or no." The answer is stricken.

MR. ROBERT: Your Honor, I would ask if the Court reporter check her records. Because, there was another question before that.

The witness started to answer the question then, Mr. Solomon rephrased it into a "yes or no" once Mr. Bartov was a sentence in.

THE COURT: So?

| Page 6493 |  | E.Bartov - Defendant - Cross/Mr.Solomon |  |
| :---: | :---: | :---: | :---: |
| $1$ | MR. ROBERT: It wasn't a "yes or no." He |  | take a high school dropout and have him apply the fifty percent haircut. |
| 3 | reflected in the transcript but, that's what I heard. | 3 | MR. SOLOMON: Again your Honor, move |
| 4 | THE COURT: I don't have the transcript in | 4 | everything after the "yes or no" type response |
| 5 | front of me. I'm not disputing that there might have | 5 | to my question. |
| 6 | been some interruption to the question. | 6 | THE COURT: Was it "yes" or "no?" |
| 7 | MR. SOLOMON: Your Honor, the question | 7 | MR. SOLOMON: I believe it was, of course. |
| 8 | before that, it say -- | 8 | And then, context dependent. Then, I asked if he was |
| 9 | HE COURT: There is no contradiction a | 9 | re. And, he said, "I was aware it was context |
| 10 | all? Is that what you said? | 10 | dependent, " and then, went on to explain. |
| 11 | MR. SOLOMON: Witness answered, "Yes, there | 11 | THE COURT: After that -- |
| 12 | is no contradiction at all between the two statements." | 12 | MS. HABBA: Your question was not "were you |
| 13 | And then, I asked the question that I | 13 | aware. Let's read the record accurately. That was not |
| 14 | ously read. | 14 | your question. Your question was: |
| 15 | THE COURT: That prior question has nothing | 15 | "My question was that Deutsche Bank had a |
| 16 | to do with this which is a simple, straightforward | 16 | standardized adjustment of fifty percent for commercial |
| 17 | independent "yes" or "no," question. | 17 | real estate." |
| 18 | Mr. Solomon, do you want to repeat it? You | 18 | He said, it applied to context. |
| 19 | want a read back? | 19 | That was your question. You just misstated |
| 20 | MR. SOLOMON: So, is your Honor striking the | 20 | your question. |
| 21 | answer. | 21 | MR. SOLOMON: The next question was, that |
| 22 | THE COURT: Yes | 22 | as my question, was that Deutsche Bank had a |
| 23 | MR. SOLOMON: Thank you, your Honor. | 23 | ndardized adjustment of fifty percent for commercial |
| 24 | TH | 24 | real estate. |
| 25 |  | 25 | The witness responses "I was aware of it but, |
|  | eedings Page 6494 |  | tov - Defendant - Cross/Mr.Solomon Page 6496 |
| 1 | CROSS EXAMINATION | 1 | applied -- depends on the context." |
| 2 | BY MR. SOLOMON | 2 | And then, he goes on. |
| 3 | Q. If I take the number from the Statement of | 3 | Question was, "Was he aware of it?" |
| 4 | Financial Condition, take that number exactly as it appears | 4 | THE COURT: The objection was overruled. |
| 5 | there and apply the haircut to it, is it your testimony that | 5 | The answer is stricken after and what Mr. Solomon just |
| 6 | I'm not relying on that number in the first instance to get | 6 | said. |
| 7 | to my adjusted value? | 7 | R. SOLOMON: Let's go to page 11, again, at |
| 8 | Yes or no? | 8 | the bottom 11 of 25 |
| 9 | A. In this context, no. In this context, no. In | 9 | THE COURT: The part about "context |
| 10 | accounting -- | 10 | dependent" that could have been stricken too. I'm not |
| 11 | THE WITNESS: Judge, I want to tell you if I | 11 | doing that because, you didn't ask for that. |
| 12 | may. | 12 | MS. HABBA: Your Honor, while we're stopped, |
| 13 | THE COURT: No, you can't. You can be | 13 | I'm not sure what's going on with -- it says, "my |
| 14 | redirected | 14 | notes" now. If you look, line -- |
| 15 | Q. Were you aware, as Mr. Haigh testified in this | 15 | (Pause in proceedings.) |
| 16 | case, that, Deutsche Bank had a standardized adjusted of | 16 | THE COURT: Mr. Solomon. |
| 17 | fifty percent for commercial real estate? | 17 | Q. Did Mr. Haigh testify, to your knowledge, that, it |
| 18 | A. Of course; context dependent. |  | was context dependent as to the haircut to be applied to the |
| 19 | Q. That wasn't my question. It was that, Deutsche | 19 | assets? |
| 20 | Bank had a standardized adjustment of fifty percent for | 20 | A. I don't remember these details. You know, I read |
| 21 | commercial real estate? |  | it a few days ago and I read so many other trial testimonies |
| 22 | A. I was aware of it but, it applied -- depend on the |  | that I don't remember whether he did or did not. I don't |
| 23 | context. They don't make it -- if they don't apply fifty | 23 | remember if you asked this question to him or not. |
| 24 | percent haircut, they don't need the valuation services. | 24 | MR. SOLOMON: Can we please put up |
| 25 | They don't need Mr. -- they don't need Mr. Haigh. They can | 25 | Mr. Haigh's trial testimony page 1016 lines three |

MR. ROBERT: It wasn't a "yes or no." He cut him off in the middle of his answer. It's not reflected in the transcript but, that's what I heard.

THE COURT: I don't have the transcript in front of me. I'm not disputing that there might have been some interruption to the question.

MR. SOLOMON: Your Honor, the question before that, it say --
"THE COURT: There is no contradiction at all? Is that what you said?

MR. SOLOMON: Witness answered, "Yes, there is no contradiction at all between the two statements."

And then, I asked the question that I previously read.

THE COURT: That prior question has nothing to do with this which is a simple, straightforward independent "yes" or "no," question.

Mr. Solomon, do you want to repeat it? You want a read back?

MR. SOLOMON: So, is your Honor striking the answer.

THE COURT: Yes.
MR. SOLOMON: Thank you, your Honor.
THE COURT: It is pure "yes or no."
E.Bartov - Defendant - Cross/Mr.Solomon

Page 6495

```
    through 16?
    "QUESTION: Do you know why, for purposes of
    the analysis, in the credit report, the $1.3 billion in
    reported value of the club facilities was reduced by
    fifty percent for deriving an adjusted value?
    "ANSWER: The value, the reported value was
    adjusted in our financial analysis by fifty percent
    which was a, I think, standardized number for
    commercial real estate assets. And the purpose of
    doing that was just to have a broad sense of what those
    assets might be worth.
    "If we were in bad market conditions and we
    needed to seek repayment from the client and the
    client's asset had fallen in value, fifty percent
    represented a number which would be significant and yet
    we could still look at those assets and see whether
    there was any equity in those assets; meaning" --
        And that's the end of the answer. Do you see
    that?
        A. I do.
        Q. Do you see anything about it being context
        dependent?
        Yes or no, sir?
        A. Implicitly, yes.
        MR. SOLOMON: Let's go back to page 11 of
```

Q. Again, you can read the entirety of the paragraph if you need. But the last sentence, "For purposes of our analysis, the $\$ 1.3$ billion in reported value has been reduced, by fifty percent, for deriving an adjusted value."

## Do you see that?

A. I do.
Q. Were you aware of that statement in the credit report before you testified on your direct examination?
A. Absolutely.

MR. SOLOMON: Can you turn to page ten of
26 -- excuse me -- ten of 16 . Actually, you know what?
Let's pull that down for a moment. We'll come back to that.
Q. Before we leave this area, I have a fairly simple math question for you?
A. Hold on a second. He didn't qualify me as a mathematician.
Q. I'm sorry?
A. He didn't qualify me as a mathematician, so is it okay.

THE COURT: Did you pass high school math?
Q. It shouldn't pose a problem.
A. Okay.
Q. I would like you to assume for a moment --
assumption, hypothetical. Let's be clear -- that a stated

PX302 please.
Q. If you look at the entry for "real estate
licensing" do you see?
A. I do.
Q. You can read the entire of the paragraph. I would like to focus here on the last sentence. "For purposes of deriving an adjusted value, we assumed a fifty percent haircut of this asset." Were you aware that have statement in the credit report before you testified on direct examination?
A. I was.

MR. SOLOMON: Would you please pull up PX293.
Q. Do you mean recognize this document, Professor?
A. I do.
Q. What do you recognize it to be.
A. Same documents as before, different date;

December 20, 2011.
Q. It's the Deutsche Bank credit report credit memo that we were talking about?
A. It is. Yes.
Q. Could you turn to page six. That's on the bottom six of sixteen.

And if you look under "club facilities" --
A. Yes.
E.Bartov - Defendant - Cross/Mr.Solomon

Page 6500
value on the Statement of Financial Condition for an asset is not the estimated current value. Okay? Assume that for the moment.

If Deutsche Bank takes a fifty percent haircut of that number, is it fair to conclude that, that Deutsche Bank adjusted number is not fifty percent of the estimated current value?

Yes or no?
A. You know, can you repeat the question. It's --

MR. SOLOMON: Can I have a read back, your Honor?

THE COURT: Read --
THE WITNESS: Because, it's a very confusing question I find it.

THE COURT: I passed high school math and I understood the question.

THE WITNESS: You did?
THE COURT: Let's have a read back.
(The testimony as requested was read by the reporter.)
A. Yes, I understand now. Yes, sorry. You're right
it's a simple question. I make too much of it. Thank you for your inquiry. Thanks.

THE COURT: Sometimes the simple approach is the best.

THE WITNESS: That's true. MR. SOLOMON: If we could please pull up PX293.
Q. Do you have it in front of you, sir?
A. I do yes.
Q. Okay. The date of this report is December 20, 2011, correct?
A. Yes.
Q. And you reviewed this credit memo on your direct testimony; do you recall that?
A. I do.
Q. Please turn to page six of 16.

You reviewed the valuation for Trump Tower on your direct testimony.

Do you recall that?
A. I do.
Q. Am I correct that you testified that Deutsche Bank must have received information from the Trump Organization as to NOI, net operation income?
A. I couldn't find NOI -- unless I missed it. I
don't remember finding it on the Statement of Financial Condition. So I assume they got it from Mr. Trump directly. If it is on the Statement of Financial Condition then, it's oversight on my part.
Q. Is it your understanding, though, assuming there
A. I would say it is a most likely explanation.
Q. Here you see the NOI is 26.2 million. Do you see that?
A. I do.
Q. Remember that number if we can. Just keep in mind. I believe 26.2 is the distance for a marathon if I recall correctly.

THE COURT: Is the what?
MR. SOLOMON: Distance for a marathon. THE COURT: I am sure it is 26 point something.

A rare concession by Mr. Robert.
MR. SOLOMON: Now that we have done this, we'll agree it is 26.2.

Did you review any documents to confirm whether any of the NOIs provided by the Trump Organization to Deutsche Bank were accurate?
A. I didn't perform any audit. I didn't audit any of the document to verify their accuracy.

MR. SOLOMON: Can we please pull up PX 1573 which was already admitted.
Q. Do you recognize this as an appraisal of 40 Wall Street?
A. I do.

MR. SOLOMON: Actually, let's just take a
E.Bartov - Defendant - Cross/Mr.Solomon Page 6502
was no oversight, that, the net operating income for Trump Tower, that's on the Deutsche Bank credit report, came from the Trump Organization?
A. Either from the Trump Organization or from other sources. My assumption is that most likely source would be the Trump Organization.
Q. Now, if we look further down on this chart, can we agree that Deutsche Bank conducted a similar analysis when it calculated the adjusted value for 40 Wall Street?
A. Similar to what?
Q. Similar to the analysis that was done for Trump Tower that you testified to on your direct?
A. Well, I have to read the --
Q. Please read the analysis as to what they did for 40 Wall Street.
A. Can you go down? Can you scroll down, please? Okay.

Yes, let me just read.
That's okay. Thank you. Thank you. Thank you. Yes, it looks similar.
Q. Assuming you didn't miss something or it wasn't in the Statement of Financial Condition, am I correct that the only place that Deutsche Bank could have received the information as to the net operating income and the cap rate, used by the Trump Organization, was the Trump Organization? it along.

Can we go to row 118.
Q. Do you recognize the format of this document, sir?
A. Yes, this is the -- I believe the raw paper that was provided to Mazars.
Q. It was prepared by someone at the Trump Organization, correct?
A. Yes.

MR. SOLOMON: Can we please turn to row 118 for 40 Wall Street?
Q. Do you see the NOI on this document is 26.234 -excuse me, $\$ 26,234,400$ for 40 Wall Street?
A. I do.
Q. That matches with the 26.2 number we saw on the DB credit memo, right?
A. Yes.

MR. SOLOMON: Let's take that down and go back to the appraisal.
Q. And this is as of November 1, 2011, correct?
A. Yes.
Q. And it's done by Cushman \& Wakefield, correct?
A. Yes.
Q. And they are a well respected firm?
A. Not in the business but, I have no reason to disagree with you.
Q. You're saying you're not in the appraisal business?
A. I'm not in the appraisal business. Yeah, I have my limitation too.
Q. Have you seen this document before, Professor?
A. You know, I don't think so. I don't think so.
Q. This was about fifty days -- November 1st -roughly, fifty days before the date of the credit memo that we were just looking at, correct?
A. Yes.

THE COURT: Yes.
THE WITNESS: Yes.
Q. Can we turn it page 140 of the appraisal? This is a chart showing revenue and expenses, correct?
A. Yes.

MR. SOLOMON: If we scroll down to the bottom, the last line, "net operating income."
Q. Do you see that?
A. Where? Can you highlight it?

MR. SOLOMON: Please?
A. Yes, I see it.
Q. The net operating income, according to this appraisal for 40 Wall Street is $\$ 6,236,273$.

Do you see that?
A. I do.
Q. But as you recall, the number given to Deutsche Bank, by Trump Organization and as reflected on the supporting spreadsheet, was 26.2 million, correct?
A. Correct.
Q. Before I show this to you, were you aware that the

Trump Organization provided a different number for the net operating income, for 40 W all, that was more than four times greater than the NOI contained in the appraisal?
A. I didn't review the appraisal. So --
Q. Is that a no?
A. I didn't review the appraisal. There is no way for me to know about it.
Q. Assume that the Trump Organization provided a grossly inflated number to Deutsche Bank for the net operating income, then the DB adjusted valuation, for 40 Wall, would be inflated as well, correct?
A. I didn't -- I don't agree with your premise. So, your question doesn't make sense to me.
Q. I am asking you -- okay.

You don't agree with the premise that the Trump
Organization provided inflated number to Deutsche Bank for
E.Bartov - Defendant - Cross/Mr.Solomon
1
1
the net operating income at 40 Wall?
3 $\quad$ A. Absolutely, no. $\quad$ Page 6507

Page 6507
A. Absolutely, no.
Q. Let's assume they did.
Q. Assume that the number was inflated?
A. Okay.
Q. Would the Deutsche Bank adjusted number for 40 Wall be inflated?

Yes or no?
A. Yes.
Q. Do you recall being asked, on direct examination, some questions about 40 W all Street and what you would do if a student walked into your class and told you they valued 40 Wall at 200 million?
A. Yeah. Yes.
Q. If you don't remember the testimony, I can put up the testimony.
A. I think, I remember.
Q. What did you say you would do?
A. I said that my definition -- "By definition, estimated current value must be higher than liquidation value. So if a student come with a estimated current value that is well below liquidation value, this valuation must be
Q. Did you say that if the student came to you with
Q. So, it could apply to real estate.
A. Hypothetically, yes. But, expert accountants would not use it. They would use a paragraph that directly relate to real estate; that say, "For real estate this is the guidance."

If I have a direct guidance for real estate, why would I use guidance that does not, directly, relate to real estate?

I'm just telling you how expert accountants works. That's all.

MR. SOLOMON: Move to strike anything after the yes, your Honor?

THE COURT: Please reread the question and the first word of the answer.
(The testimony as requested was read by the reporter.)

THE COURT: Stricken after that. Could apply to real estate. Than could be redirected. Q. Sir, in your opinion, looking at this provision if recent sales information, involving similar assets, is available, is someone preparing a personal financial statement, in accordance with these guidelines, free to use any of the other methods?
A. I think so. We talk about real estate. When we take about real estate, yes. Because, the guidance for real
estimated current value," correct?
A. Yes.
Q. "This implementation guidance addresses estimated current value. Recent transactions involving similar assets and liabilities in similar circumstances ordinarily provide a satisfactory basis for determining the estimated current value of an asset and the estimated current amount of a liability.
"If recent sales information is unavailable, other methods that may be used include any of the following" --

And then, it goes on to list five other methods, correct?
A. This is not related to real estate. For real estate, there's a different paragraph.
Q. Is it your testimony that you -- that one cannot use this particular provision, 55-1, for estimating the current value of real estate?
A. I am saying that --
Q. Yes or no?
A. Context dependent. 7 7 8 9 109
02
Q. Do you recognize this document, Professor?
A. Yes, it seem to be ASC 274.
Q. If we could please turn to page 13 of 21 . So the number 13 on the bottom. If you look at 55-1.

That's under "Implementation guidance for
I
estate is different than this guidance. It is different than this guidance.
(Whereupon, the following proceedings were stenographically recorded Shameeka Harris.)

## CONT'D CROSS-EXAMINATION

 BY MR. SOLOMON:Q Can we please pull up - is it your testimony that the specific section with respect to real estate trumps $55-1$ when it comes to valuing real estate assets for estimated current value?

A That's my opinion, yes.
Q And is that because you have to ensure, when looking at 274, that all of the guidance is considered when reaching a conclusion?

A No, because in accounting when a specific provision about the transaction, this specific provision trumps general provision. That's the rule in accounting.

Q Is there anywhere in this general provision that says you cannot apply it to real estate?

A That's not the question. You can do whatever you want but that's not how accountants do it.

THE COURT: It is --
A Accountants look for the best solution not the worst solution.

THE COURT: That does not answer the question.
That's what we call nonresponsive. Do you want the question read back?

MR. SOLOMON: Please.
MR. KISE: Your Honor, that's responsive in his field.

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

THE COURT: It was not. Overruled. Read back.
(Whereupon, the requested testimony was read back by the court reporter.)
Q Yes or no question, sir?
A No, it's impossible to answer. I'll say, no, you can't. If you want a misleading answer, I'll say no.

THE COURT: Okay. That answers the question. The answer was no. It was obvious just from looking at the guidance.
Q Can we please pull up 787 --
MR. KISE: Now, we want misleading answers. That's what we are encouraging in the courtroom. The witness said he can't answer the question. If you want a misleading answer, I'll say no. That's acceptable? It's preposterous.

MR. SOLOMON: With all due respect, the witness should have stopped with I can't answer the question. I don't think that's anywhere in any of my questions.

MR. KISE: Every one of your questions is asking for a misleading answer. This whole thing is just a gotcha game. That's fine. Objection noted. I don't think that we should possibly be allowing misleading answers. The witness says he is being mislead and the Court is just going to allow that to continue then, then that alone should be a basis for a mistrial. You can't have evidence come in that isn't -- I know it's funny to the Government because they

Page 6514

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

1 don't really care about evidentiary rules or anything else.
2 So that's fine. I know they want to chuckle and laugh like they are in grade school so...

MR. SOLOMON: Your Honor, do we actually need this. The witness has given an answer. Counsel has made his objection on the record as to the situation.

MR. KISE: Fair enough. My objection is on the record.

MR. SOLOMON: The record is clear.
THE COURT: You know, this trial is complicated enough. When the question is is this language include certain -- does this statement include certain language and it doesn't, the answer is no. I don't see what we are arguing about here.

MS. HABBA: Your Honor, I'm sorry. I am reading his answer. He says it is impossible to answer. Then we are cornering the witness to give a yes or no answer when he's saying it's impossible to answer.

THE COURT: How could it not be possible to answer the question whether certain language is in a statement that is on the screen.

MS. HABBA: Your Honor, we can't force the witness to give a yes or no answer when he can't give a yes or no answer. That's completely improper. I join Mr. Kise in his objection.

THE COURT: Mr. Solomon, what would you like to do? MR. SOLOMON: I would like to note when the witness said it is not possible I didn't ask a followup question. I didn't force him to answer yes or no. If I tried to pursue that, they would have said I was harassing the witness. I asked. He said it is impossible to answer yes or no and then he proceeded to say if you want a misleading answer. I am satisfied with the answer it's impossible to say yes or no.

THE COURT: We will interpret it as we see fit. Let's move on.

## CONT'D CROSS-EXAMINATION

## BY MR. SOLOMON:

Q We have pulled up on the screen PX787. That's the June 30, 2011, statement of financial condition. If you turn to page six. That's on the bottom, $\mathbf{6}$ of 22 . Under basis of presentation, the second paragraph, do you recall being asked questions on direct examination about the paragraph beginning such valuation methods include?
A I do.
Q If an issue includes this paragraph in a statement of financial condition, is it free to misrepresent valuations or other information in its statement of financial condition?

A No.
Q If an issue include this paragraph in its statement of

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6516
financial condition, is it free to knowingly misrepresent facts within its knowledge in the statement of financial condition?

A What do you mean? Can you give me an example of knowledge and facts specifically here what are you talking about?

Q We've talked about dates in this trial. So today is Tuesday, right?
A Yes.
Q If a statement of financial condition it -- the person who's issuing the financial statement knows it's Tuesday but puts in the statement of financial condition that today is Wednesday, that's a knowing misrepresentation, right, with that example? Is an issuer, if they include this paragraph, free to knowingly misrepresent facts in its knowledge in the statement of financial condition?
A No.
Q Do you recall testifying on direct examination in form or substance that you tell your students every day in class that every word matters, every single word matters?
A Ido.
Q Can we pull up his affidavit from August 31, 2023.
$\mathrm{Sir}, \mathrm{sir}$, it's on the screen. If we can turn to paragraph 24 of your affidavit. Actually, before we do that, do you recall signing this affidavit in this case?
A Ido.

Professor Bartov - by Defendant - Cross (Mr. Solo

Page 651
Q Let's go to paragraph 24. Quote, Mr. Trump's SOFC's for 2011 through 2021 did not impact significantly Deutsche Bank decisions to extend loans to defendants or to set these loans interest rate, paren, see Exhibit A at 25-32 period, close paren.

Do you see that?
A I do.
Q You chose in your affidavit to modify and limit your
statement by using the word significantly, correct?
A Did I modify from what?
Q Your statement in paragraph 24 --
A Yes.
Q -- is modified. It is not absolute. It does not say did not impact. It says did not impact significantly. You chose to use the word or add the word significantly, correct?

A Yes, I do. And maybe I should have used the word materially.

THE COURT: Stricken. If you want.
MR. SOLOMON: Yes, Your Honor.
THE COURT: Professor Bartov, the question was did you use that word.

THE WITNESS: Significant, yeah. I use it right here.

THE COURT: That answers the question. THE WITNESS: I see.

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6518
$1 \quad Q$ It was an intentional choice by you to use the word significantly; is that correct?

A I don't know what you mean.
Q Yes or no?
A I don't know what you mean by intentionally.
Q Did you write this affidavit?
A I did.
Q Did you review it before you signed it?
A I did.
Q Did you ensure that everything in this affidavit was correct before you signed it?

A I did, yes.
Q So you chose to use the word significantly?
A I did.
Q Is that correct?
A Yes.
Q Let's look at the next paragraph 25. And you can look at the entirety of the paragraph, but I'd like to focus on after the dash demonstrates that Deutsche Bank's reliance on the information in the SOFC's was marginal in deciding whether to extend the subject loans and what interest rate to charge; do you see that?

A Ido.
Q Here again you chose to limit your statement this time by using the word marginal, right?

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

Page 6519
A That's true.
Q And was that intentional on your part?
A I mean, maybe, marginal is not the best word. Maybe, there is another word that will slightly describe it better but the idea is that, yes, I choose to communicate this idea this way but, you know, if your point is marginal is not the best word then I should use maybe slightly a different word in the dictionary, that may be but the idea I definitely support the idea here.
Q Sir, I'm not criticizing in any way, shape or form what word you chose to use, but I am asking you to analyze and analyze for this court the word you chose to use, very succinctly. You chose to use the word marginal instead of having an absolute statement, correct?
A What do you mean by absolute statement?
Q An absolute statement would be Deutsche Bank did not rely on the information in the SOFC's. You said Deutsche Bank's reliance of - the information in the SOFC's was marginal. You qualified that, correct, yes or no?

A Yes, I did.
Q Okay. Can we go back to paragraph 17. "Mr. Trump's SOFC's for 2011 through 2021 were prepared in a personal financial statement format in accordance with ASC 274 and the valuation of investment properties recognized in those SOFC's were generally consistent with the notion of estimated current

Page 6520
value." Do you see that?
A I do.
Q Here again you chose to limit your statement by using the word generally instead of having an absolute; is that correct?

A Yes.
Q And that was intentional on your part, correct?
A That was intentional, yes.
Q Is it your opinion, as you sit here -- withdrawn.
Did the inclusion of the word generally have any significance?

A No.
Q Did the inclusion of the word marginal in the other paragraph have any significance?

A No, in the context of this litigation. Just the way of talking but it is the same thing. If I have generally, omit generally, in this litigation, the message is the same.
Marginal, I put it in, you put it out, the message is the same.
Q Keeping in mind your prior testimony that every single word matters?
A It does.
Q Please let me finish. Your testimony was that every single word matters. Now, it's your testimony that the inclusion of those words have no significance, yes or no?
A This words has no significance on the general message

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6521
that I am trying to convey here.
Q Professor Bartov, assume that in various statements of financial condition between 2011 and 2021 the following facts. Mr. Trump Triplex was overvalued. Seven Springs, do you remember that property in Westchester, that was overvalued.
Mr. Trumps US golf courses were overvalued. The rent stabilized units at Trump Park Avenue were overvalued in the statement of financial condition. 40 Wall Street was overvalued. Mar-a-Lago was overvalued. The Aberdeen Golf Course from Scotland was overvalued, unrestricted cash was overstated, licensing deals were overvalued. Assume all of those facts for the moment, okay.
A These are hypotheticals. They are no related to this case. They are hypotheticals, yes.

Q They are related to the case insofar as I describe properties in the statement of financial condition. As a hypothetical, I am asking you to assume all of those facts are true that I just read off?

A Okay.
Q If all of those foregoing facts were true, would you consider the cumulative effect of each individual misstatements in determining materiality, yes or no?

A There is no way I can answer it as a yes or no question because it depends on the methodology I used to calibrate materiality. There are many different ways, as the accounting

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

Page 6523

## A Yes.

Q -- either of the following:
One, the methods used in determining the estimated current values of major assets and the estimated current amounts of major liabilities.

Two, the methods used in determining the major categories of assets and liabilities; do you see that?
A Ido.
Q Should there have been an "or" between 1 and 2. Withdrawn.

How would you read that? Would you read in the word "or" between 1 and 2?

A Yes.
Q So it's in the alternative?
A Yes.
Q Have you formed an opinion as to whether Donald Trump's statements of financial condition for all of the years between 2011 and 2021 satisfy this requirement in "C"?

A Well, as far as I remember, in my reports, I don't
address this question, as far as I remember. My memory is also that Mr. Flemmons did address this. This is my recollection, but I did not address it in my report.

MR. SOLOMON: May I have a read back of the question, Your Honor.

THE COURT: Read back the question, please.
Professor Bartov - by Defendant - Cross (Mr. Solomon) Page 6522
literature clearly say, there are many, many differentapproaches to test materiality and depending on the approach youchoose.
Q Would you consider all of them at least in determining which approach you might use to determine materiality?
A I definitely consider the quality of this valuation and if you want, I can explain what it means.
Q I'm not asking you to explain it. I am asking you if you would consider all of those facts that I've asked you to assume when you're determining the methodology or other ways that you would look at materiality? So would you consider all of those facts, yes or no?
A Yes.
Q Let's talk about the notes to the statement of
financial condition. If we can pull up PX1609, please, and go to page ten. You'll see that -- well, are you familiar with this section, sir?
A Yes.
Q This is the disclosure-general, right?
A Yes.
Q Okay. 50-2, personal financial statement disclosure shall include, but are not limited to, all of the following:
And then it lists several items; do you see that?
A Ido.
25 Q Under C --
(Whereupon, the requested testimony was read back by the court reporter.)

MR. SOLOMON: I'm not sure the answer was responsive. He indicated it was not in his report. I am asking if he formed an opinion.

THE COURT: I don't know where we are. I understand the question.

MR. SOLOMON: Right. His answer was he didn't form an -- he didn't put it in his report. So could I have a direction to the witness to answer the question?

THE COURT: That's not responsive. Did you consider whether according to " C ", 1 or 2 is used.
A Okay. I just don't want to clarify, yes. So, I did consider it. I did consider it. Yeah, but I -- yes, I did consider it at one point.

Q And did you reach a conclusion as to whether all of the statements of financial condition between 2011 and 2021 complied with "C"?
A Well, my -- my opinion was that -- that the statement did not violate this paragraph.

THE COURT: Did not violate.
Q Did not violate. So you believe that all of the statements of financial condition complied with paragraph "C"; is that correct?

A That's was my -- again, this is my recollection.

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6525
Q As you sit here today, do you know, one way or the
other, if all of the -- I want to make sure I read this so I
don't get an objection. "All of either the methods used in
determining the estimated current values of major assets and the
estimated current amounts of major liabilities or the methods
used in determining the major categories of assets and
liabilities are disclosed and accurate in this statement of financial condition"?

A We don't use accurate in accounting. Accurate is not defined. We say fairly represent. But the point is my -- my -you didn't ask me how I form my opinion. I form my opinion based on reading the financial statement and you have a "or". You have either "or". So either the methodology or the classification of the assets on the balance sheet. Right, the second -- what is the second -- the categories, right, the second talk about so you don't have to disclose both it's either --
Q The second, just so we're clear, could you put it back up on the screen so there is no misunderstanding, please. The

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

Page 6527
1 either one or two are described for all of the major assets, right?
A Yes, that is my testimony
Q Are you aware of any situation where whatever that disclosure or description is it is not accurate or doesn't fairly represent the actual method that was used, yes or no?

A Materially, materially or not materially? Not materially it doesn't matter. Materially, I don't remember. I don't remember finding any material misstatement with connection to the category -- this -- describing the categories of estimated liability. I didn't look for --
Q What about not materially?
A I didn't look for them.
THE COURT: Okay. Perfect timing. See you all at 11:45. I will order the witness not to discuss his testimony of the case or anything related to them during the break.
(Whereupon, the witness was excused from the stand.)
(Whereupon, a recess was taken.)
COURT OFFICER: All rise, Part 37 is back in session. Please be seated and come to order.

THE COURT: Okay. Let's get the witness back, right.
(Whereupon, the witness resumes the witness stand.)

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6526
second speaks to method.
A Yeah, method of what? Method of -- method of --
Q Let's put it up on the screen so there is no
misunderstanding, sir.
A Methods used to determine the major categories of assets and liabilities. The major categories of asset
liabilities in my opinion are clearly stated on the statement of financial condition.

Q And the second part of my question was, as you sit here
today, do you believe that they are -- I used the word accurate,
let's use your word -- fairly represented on the statement of financial condition?
A My opinion is, yes, the second one, the second one, method used to determine major categories, are clearly stated in the statement of financial condition.

Q And are you aware of any situation in which a method that is described on the statement of financial condition is not the method that was used to obtain the estimated current value of the asset referred to or stated on the SOFC's?
A You're talking about categories of asset. Where are where do you get estimated current value here. You just talking about method used to determine major categories. This --
Q Are you aware, as you sit here today, of any situation in which either one or two under " C ", which is described in the statement of financial condition, it's your testimony that

Page 6528
MR. SOLOMON: May I proceed, Your Honor. THE COURT: Please do. MR. SOLOMON: Thank you.

## CONT'D CROSS-EXAMINATION

## BY MR. SOLOMON:

Q Professor Bartov, you testified on direct that given his cash on hand in June of 2011 Mr. Trump could have self-financed the Doral Project, do you recall that?
A Ido.
Q And you later testified that given his cash on hand in 2013 Mr. Trump could have self-financed all of the 232 million he borrowed on the Doral and Chicago Project; do you recall that?
A Yes, I do.
Q That was where we looked at the 125 and 107 and added those together?

A Yes.
THE COURT: One at a time. Don't talk over each other.
Q Could we please pull up PX707 and go to page four. Under cash and marketable securities, 339,100,000; do you see that?
A Ido.
Q And was that the number you were using when you
25 testified that Mr. Trump could have self-financed the projects?

Professor Bartov - by Defendant - Cross (Mr. Solomon)
A No.
Q What number were you using?
A I talk roughly but this number need to be adjusted based on the information in the footnote. You never read the financial statement by restricting yourself to what is written in the body of the statement. What is written in the footnote is an integral part of the title. You have to read it altogether. If you read the footnote, you can see that some assets are not as liquid as some other assets so the numbers need to be adjusted. I didn't do the exact calculation. I say ballpark he could have financed it by himself. If not, he might need to borrow 20 million or 30 million or whatever. He didn't have to borrow 200 something million. That's what I meant by that.

Q So today you use the term ballpark. I -- did you use that term yesterday in response to questions on your direct examination when you were saying he could have financed the project himself?
A They didn't - they didn't ask me about the 339. They didn't ask me about the specific number. They didn't ask me to provide this detail. So you asked me a different question, so you got a different answer.

Q So with respect to the cash and marketable securities that Mr. Trump held, as adjusted based upon whatever adjustment you would make, would you consider that Mr. Trump would have to

Page 6529

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

Page 6531
the operating entities when you testified under oath that Mr. Trump could have self-financed the projects, yes or no?

A I use my general recollection not the specific number.
So the answer is no, whatever you want it to be. I just explained. I just give you the details.
Q Did you consider how much cash these operating entities needed to fund their daily operations when you testified under oath that Mr. Trump could have self-financed?
A Yes.
Q Did the amount of cash needed by these entities to fund their operations figure into your conclusion that Mr. Trump could have self-financed these projects?
A Roughly, yes.
Q Are you aware that Mr. Trump had committed to put equity into the Doral resort in order to bring it back to a luxury condition?
A Yes.
Q Are you aware that at the origination of the Doral loan Mr. Trump had committed to put $\$ 50$ million of equity into the resort?
A Yes.
Q And are you aware that by 2013 that equity infusion had risen to between 150 and $\$ 160$ million?

A Yes.
Q And did that equity infusion of 150 to $\$ 160$ million

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

Page 6530
sell marketable securities to finance the projects?
A Absolutely.
Q Did you calculate or consider how much he would have to pay in taxes on any potential gains on those sales?
A No.
Q Did the amount of potential taxes figure into your answer on self-financing?

A Well, as I said --
Q Yes or no question, sir?
A I used ballpark numbers.
Q Did the amount of taxes Mr. Trump would have to pay on any potential gain factor into your answer when you said --

A Yes, it did. Yes.
Q So a moment ago you said you didn't know if there would be any gains but you factored in taxes?

A I used ballpark numbers, rough number.
Q Do you know how much of the cash in any -- at any point in time was held in operating entities?
A It varies over here, I believe.
Q Did you know how much cash was held in operating entities when you concluded that he could have self-financed the projects?
A Again, I use it a ballpark number. And I remember that they use -- in different fields, different numbers.
Q Did you know, yes or no, sir, how much cash was held in

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6532
factor into your conclusion that Mr. Trump could have self-financed the projects?
A If he self-financed the project, he might not have -if he self-financed the Doral loan, he might not have done this project, this additional injection of money. This is a completely hypothetical situation.

Q Isn't the fact or isn't your claim that he could have self-financed these projects a completely hypothetical situation since he didn't do it, yes or no?

A Say it again?
Q Sure. You are saying that the equity infusion is a hypothetical if Mr. Trump had self-financed. Isn't your hypothetical that he could have self-financed because he didn't actually do it?
A Of course it is a hypothetical. Everything, yes.
Q So, let's assume that he did put in the $150-150$ million to $\mathbf{1 6 0}$ million to renovate Doral, okay. Assume that for the moment. Would that alter your conclusion that he could have self-financed both projects?
A The investment --
Q Yes or no, sir. Would it have altered your conclusions?
A This question is inaccurate because first he took the loan and then he put the money. So if he took -- if he
self-financed, he may not put the money in later on to keep

Professor Bartov - by Defendant - Cross (Mr. Solomon)
money.
Q So Doral would have remained a rundown old facility as it was when Marriott owned; it is that your testimony?
A If you know better how to manage the business of Trump, you could do it. I'm not managing the business for him. I'm just saying it's all hypothetical. It's all hypothetical.
Those questions arose because hypothetically DB would not have given him the loan. So this is all hypothetical. So there is no evidence of it, but, hypothetically, if DB would not have given him the loan, hypothetically, then, hypothetically, one way to deal with it would be to self-finance it. That's all I'm saying. It's all hypothetical.

Q If he self-financed it, it wouldn't be the beautiful luxury resort that it's claimed to be; is that correct?

A I don't know what to do next. It is a hypothetical.
Q He would not have the cash to do that, correct?
MR. KISE: Objection. Is that hypothetically he
wouldn't or actually he wouldn't?
THE COURT: I guess it is hypothetically. MR. SOLOMON: Hypothetically.
Q He didn't self-finance, but if he did, hypothetically, as the example you said you've given, the self-finance is a hypothetical, would he have been able to bring back Doral to a luxury resort status?

A This is absolutely hypothetical, and I can't answer

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6534
this question because he didn't do it.
Q Okay.
MR. KISE: Your Honor, I keep waiting for Alice or the white rabbit to come through the door. I mean, I don't really understand where we are right now. These hypotheticals are so widely inappropriate.

MR. WALLACE: So is counsel commenting on the
questions and answers of the witness.
THE COURT: I'll allow Mr. Solomon to proceed.
MR. SOLOMON: Thank you, Your Honor.
Q Do you know, if by 2013 The Trump Organization had provided an equity infusion into Doral of between 150 and $\$ 160$ million?

A They did.
Q They did. That's not a hypothetical, right?
A That is not a hypothetical.
Q Can we put up the -- do you understand the equity
infusion refers to Donald Trump's own funds or The Trump Organization own funds?
A Yes.
Q Do you know how much money The Trump Organization of their own monies wind up spending to renovate Doral?
A My recollection, 160 million.
Q Could we pull up D1019 at page 84. This is an exhibit
from the defendants, Professor Bartov. Do you see the statement

## Professor Bartov - by Defendant - Cross (Mr. Solomon) <br> Page 6535

1 on the screen that The Trump Organization invested over
$2 \$ 250$ million into renovating every inch of this iconic property 3 including the feigned blue monster golf course?
4 A I see that, yeah.
5 Q Did you consider the $\$ 250$ million that was allegedly 6 spent in renovating every inch of the property in reaching your conclusion that Mr. Trump could have self-financed the two projects, yes or no?
A It's irrelevant. It's irrelevant because as I said if he hypothetically self-financed the $\$ 125$ million loan, he might take a different course of action in term of the renovation. It is completely hypothetical. I don't know. You have to ask Mr. Trump what would have he done had he self-finance it. My point is that in 2012 before he invest this he could have self-finance the Doral loan himself that's all.
$Q$ Then would you agree with me if he self-financed he wouldn't have the $\$ 250$ million in his own funds to renovate every inch of the iconic property if he self-financed?

A I have no idea. He could get a partner in to help him finance it. He could sell another asset to find something. He could maybe generate. He doesn't have to pay interest now. So he'll have more cash. I don't know. It's too many
hypotheticals to know what -- what he would have done had he self-financed.
Q So you don't know one way or the other, correct?

1 A That's right.
2 Q Let's talk about reverse engineering for the moment?
3 A Sure.
4 Q Are you familiar with that term?
5 A I do. I used it in one of my reports, I believe, right. Maybe not. Yeah.

Q With respect to valuations on a statement of financial condition, what does the term reverse engineering mean?

A Reverse engineering mean that you first pick up a value
and then you pick a model in an assumption to justify this value.
Q In one of your reports or affidavits, on direct
testimony, you mentioned Aswath Damodaran, did I pronounce that correctly?
A I think so, yeah.
Q Who's is he again?
A He is my colleague. He is a very well-known professor in the finance department of NYU and on Wall Street he is known as the dean of valuation.

Q Do you agree with his statement that you cite to in your affidavit that, in fact, in many valuations, the price gets set first and the valuation follows?
A I don't have a reason to disagree with him. He is the leader in this area.

Q I understand you may not have a reason to disagree with

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

him but do you agree with him?
A I do agree with him, yes.
Q Do you understand that statement to mean that the
price; namely, the desirable result of the valuation exercise, is set first and then the valuation model and assumptions are chosen to justify the preset target price?
A That's what is the -- reverse engineering is.
Q Do you know if any of the stated valuations for any of
the assets on the statements of financial condition between 2011
and 2021 were reversed engineered?
A I didn't see any evidence of that.
Q Did you look?
A I did look for the methodology. I -- I'm not serving as a valuation expert, but I did investigate the methodologies and the methodologies that Mr. Trump used to value these assets
are 100 percent consistent with GAAP. I didn't find any GAAP violation in the methodology used.
Q My question though wasn't whether you found any GAAP valuation. My question was do you know one way or the other if any of the valuations on the statements of financial condition were reversed engineer? Whether or not they complied with GAAP, do you know if they were reversed engineer?

A I have no knowledge of that.
Q Okay. You talked about what you -- you just mentioned
about what you had reviewed. Let's talk about what you reviewed

Page 6537

Page 6539

1 what I looked at.
Q Is it your testimony that you reviewed all of the -all of Mazars work papers before your testimony today?

A Not Mazars work paper, the supporting data that was provided to Mazars by Trump Organization.

Q So are you referring to that supporting data
spreadsheet we looked at earlier today?
A Yes.
Q And your testimony is that you reviewed all of those supporting data spreadsheets?
A In preparation for the trial, yes.
Q But not in preparation for your report or your
affidavit, right?
A That's true.
Q Or your rebuttal report, right?
A That's true.
Q You didn't -- did you review Mazars work papers in connection with either your opinion, your affidavits or your testimony here today?
A As I said, if they are included in Dr. Lewis report, I did but I didn't look at them independently. I don't remember whether they are in included in Dr. Lewis report or not.
Q But in coming to your opinions, you didn't think the Mazars supporting -- withdrawn.

In coming to a conclusion or coming to your opinions in

## Professor Bartov - by Defendant - Cross (Mr. Solomon)

Page 6538
before providing your opinions in testifying. We looked at an excel spreadsheet earlier; do you recall that?

A Ido.
Q Is it your understanding those were delivered to Mazars to help them do their compilation process each year?

A Yes, I agree. That's it, yes. Absolutely.
Q In the course of preparing your opinion though, you
only reviewed 2 or 3 of those supporting data spreadsheets, correct?

A That's true. I used like --
Q That's because after reviewing those 2 or 3
spreadsheets you determined they were not relevant to your analysis, correct?
A That's true.
Q Did you review any of the work papers prepared by Mazars in the course of compiling the statements in connection with either your opinions, your affidavits or your testimony here?
A The work papers -- so I looked in preparation for this -- for this testimony today. I did look on all the supporting documents that were delivered to -- that were delivered to Mazars. And I looked also, before delivering my rebuttal report, I read Professor Lewis report and Professor Lewis I don't remember if he had the supporting document or he have the Mazars work paper. I don't remember that but that's

## 

Professor Bartov - by Defendant - Cross (Mr. Solomon)
Page 6540
your reports, did you think the Mazars work papers were relevant?
A To the question that I was answering in my rebuttal report in my affirmative report, I didn't think that I need them.
Q Okay. Is that, sir, because once you have enough
evidence to support your analysis and conclusion you stop looking?
A That's true, yeah, that was my argument in the deposition, yes.

Q Professor Bartov, did you read the opinion on the party respective summary judgement motions?

A I did read the opinion a few weeks ago when it first came out, but I don't remember all the details now as I sit here. I didn't read it just yesterday or something like that.

Q Did you believe it was relevant to know what the Court has already decided in this action before testifying in court?

A Yes, I think it was very informative to me to read the summary judgement, yes.
Q And you are aware what the Court has already decided in this case, correct?
A I'm not a legal expert, but I think I have a general understanding of the ruling.
Q I think you testified in connection with your
qualifications as an expert witness or at some point on direct
that you were deemed an expert and testified at trial in one 1 other case; is that correct?

A Yes.
Q Was that the People of the State of New York v Exxon?
A Yes.
Q And that trial was in this court, correct?
A Yes, I think so.
Q And it was Justice Ostrager was the judge?
A Yes.
Q Can we pull up that opinion just the first page. Is this the decision after trial in the one case in which you were deemed to be or qualified as an expert witness?
A I didn't go. I didn't read it so I don't know. I -once I gave my testimony, I didn't followup on the case.

Q So you haven't read this opinion?
A No. The opinion, no. I didn't read the opinion.
Q Well, let me show you something. If we could please turn to page 46.
(Continued on next page)

10

It is the Government's point that their own witness, in Exxon, was rejected by Judge Ostrager. I'm not sure what relevance that has to these proceedings.

MR. WALLACE: Fool me once.
MR. KISE: This demonstrates that
Mr. Wallace loss that case. And this is one of the reasons why. I'm not sure what relevance that has to this proceeding. I just move to strike the question and answer.

MR. SOLOMON: Your Honor, what another Justice of this Court, has thought about this witness' testimony and reliability and his views as compared to the weight of the evidence is highly relevant in this case.

MR. KISE: That's totally fact dependent. It's not saying he's not qualified as an expert. It is not saying he wasn't qualified to render opinion. It's just based on whatever evidence the government failed to present in Exxon. That was the interpretation of his opinion in that context. But, it has no relevance here. It makes no difference at all.

MR. WALLACE: Your Honor, this was the basis for his qualification, this was used to bolster his credentials, part of the basis for why he was used as an expert. It is rebuttal to those points.
E.Bartov - Defendant - Cross/Mr.Solomon Page 6542

## CROSS EXAMINATION

BY MR. SOLOMON:
Q. "As with Dr. Bartov's testimony about the alleged materiality of an alleged impairment in 2015 of an ExxonMobil facility, in Mobile Bay, in the golf of Mexico, discussed infra, the Court rejects Dr. Bartov's expert testimony as unpersuasive.
"And, in the case of his testimony about the mobile facility, finds Dr. Bartov's testimony to be flatly contradicted by the weight of the evidence."

Before I put this up on the screen, were you aware of Justice Ostrager's holding in that case with respect to your testimony?
A. No.

MR. SOLOMON: Nothing further, your Honor.
THE COURT: Will there be any redirect?
MR. SOLOMON: One housekeeping matter. I want to -- I neglected to -- move PX 03446 into Evidence. That's the staff accounting bulletin that we talked about on Friday.

THE COURT: Granted. It is in.
MR. KISE: Your Honor, while we're waiting, now I am reading the last question and answer, I would just move to strike the last question and answer as irrelevant.

THE COURT: It seems to me the simplist approach here, if it is relevant that he's testified as to whether he should be deemed an expert again, then the fact finder's decision in that case is relevant.

People make mistakes. And I will reserve to the extent if somebody comes up with authority on this situation where if somebody is deemed an expert testifies and the testimony is rejected -- it's probably come up at some point before -- whether that's relevant or not.

So I will leave it in. But, defendants, if you come up with something in particular, obviously, I will consider it.

Okay. Mr. Suarez, you have the honor.
MR. SUAREZ: Thank you, your Honor.

## REDIRECT EXAMINATION

BY MR. SUAREZ:
Q. Professor, a moment ago, you told the Government that the Mazars work paper were not something that you relied on.

## Do you recall?

A. Yes.
Q. How, if at all, were the Mazars work papers relevant to the opinions you have given in this case?
A. The Mazars work paper, to my opinion -- the
opinion that I render -- are irrelevant.
MR. SUAREZ: We could pull backup
Defendants' Exhibit 1019.
Q. Mr. Solomon showed you this document a second ago?
A. Yes.
Q. What was the affect, if any, on Deutsche Bank's
collateral of President Trump investing over $\$ 160$ million into the Doral property?
A. The collateral become much more valuable.
Q. As a result of the collateral becoming much more valuable, what, if any, was the affect of that investment on the risk to the loan or credit facility given by Deutsche Bank?
A. The risk was, substantially, reduced.
Q. Reduced?
A. Reduced.
Q. Thank you.

MR. SUAREZ: We could pull up Plaintiff's
Exhibit 1609, which we reviewed a couple minutes ago with the Government, and turn to page 13 of 21.
Q. Do you recall discussing this with Mr. Solomon a couple minutes ago?
A. Yes.
Q. How is the implementation of estimated current
value, for real estate, which appears at ASC 274 10-55-6 to
very, very, hard to grasp, definition. Because, as I said, I think, a couple of days ago, ASC 274 is the stepchild of the codification.

The definition, particularly, of estimated current value, is extremely unusual. It doesn't use anywhere in the codification other than 274. And it doesn't use anywhere in reality; appraisers don't use it, in economic we don't use it.

So we don't have to create another level of confusion by using the wrong guidance. The guidance is part of the definition. And if you use the wrong guidance, what do you benefit? You just create more confusion.

So you rather use the specific guidance. You must use the specific guidance.

MR. SUAREZ: If we could pull up Plaintiffs
Exhibit 3437.
Q. Do you recall having a discussion, about this document, with Mr. Solomon earlier in his examination?
A. I do.
Q. You wanted to provide context for the use of this document.

Do you recall that?
A. Yes. So, we use this -- I believe I got the definition of materiality from this document, just like did Dr. Lewis which is the defense -- the plaintiff expert.
be read in reference to the definition -- the implementation guidance for estimated current value that appears at academic 274-10-55-1?
A. As I said, if you have a specific provision, the specific provision trump the general provision. Therefore, as I say, hypothetical, people can use whatever they want. But, in realty, I'm not -- I can't believe that any reasonable expert will rely on 55.1 rather than 55.6 . I can't imagine it will ever happen.
Q. What do you base that opinion on, Professor?
A. I base my opinion on my 40 years of accounting
knowledge and my research and my - and everything else that I experience during the last 40 years.

It's really absurd to say that you have a specific provision, that give you specific guidelines for real estate, how to apply the estimated current value and you use general provision that have nothing to do with real estate.
Q. If a student in your class told you that they wanted to use the general language instead of the applicable specific language, what would you tell your student?
A. I will tell him this is wrong. We don't do it this way in accounting. It just get confusion. That's all.
Q. Why, in accounting, would you want to avoid creating confusion at all?
A. Because as it is, the estimated current value is a
E.Bartov - Defendant - Redirect/Mr. Suarez

Page 6548
And, actually, I used this because, I use it as a rebuttal to Dr. Lewis expert. And, I agreed with Dr. Lewis that this is the correct source for the definition of materiality.

So, just like Dr. Lewis used it, and just like Dr. Lewis did not want to confuse the Court and explained that this is non-authoritative statement that should be considered -- the definition should be considered -- as part of GAAP, didn't want to get into this philosophy, so just like Dr. Lewis didn't highlight it, I didn't highlight either.

It is highlighted in SAB Staff Accounting Bulletin 99. In 99, they highlight that this definition is the one to be used together with the definition of the Supreme Court for materiality that they explain. It's, in substance, identical.

The definition, by Supreme Court, on materiality is, in substance, identical to the definition -- Statement of Financial Condition number eight. And, in the SAB 99 they use it interchangeably when they explain how to apply the materiality test.
Q. Now if you see here, this one was amended in December 2021?
A. Yes.
Q. What was the affect of the December 2021

## amendment?

A. Well, as I said, this is not the one, the version that I used. Because, you have to put yourself in the shoes of the user. And this was not available to the user in December 2021.

However, if there is any difference, the differences are minor. So, in practice, there is no difference between using this version and the version that Dr. Lewis and I used.

But I just point out that because every detail here seem to be important so, I just pointed out that this is the wrong version to use. And I did not use it. And, Dr. Lewis did not use it.
Q. Now, if we could pull backup the August affidavit. And, while we're doing that, Professor, which materiality test did you employ in your analysis?
A. So, the accounting literature and the SEC says that they are not going to formulate materiality tests because, there are so many possibilities to do materiality tests depending on the circumstances of the case.

In this case, I had a choice between a number of alternatives. I considered all the alternatives that I could come up with. And, I decided to pick the alternative that I thought was most appropriate in this case.

For example, Dr. Lewis use another methodology.
would use, I will use the experts from the defense. And, using the same methodology, I would arrive at the opposite conclusion that the financial statement are not materially misstated.

But, I thought that was wrong way to go because, this is unfair for -- this would be, totally, unfair for plaintiff. Why should I pick your - the defense expert and not the plaintiff expert?

So, therefore, I said this methodology is inappropriate in this case. And I have to do totally another methodology.

I used totally another methodology that doesn't favor the plaintiff and doesn't favor the defense. But, it is an objective methodology that follow directly from the definition of materiality. And, it should be undisputed that this is valid methodology and the conclusion is, completely, valid.

MR. WALLACE: Objection, your Honor. Non-responsive. The question was, "What materiality test did you have -- did you employ in your analysis?"

THE COURT: Sustained. That wasn't responsive to the question.

MR. SUAREZ: My next question would have been why. We could go through it again if it helps the Government break it up for their purposes.

Dr. Lewis compare the numbers from the financial statement with the numbers provided by the expert from the -- from plaintiff.

Why? Because according to his report, he was instructed -- he was instructed, by the plaintiff, to use these numbers.

This, by itself, should cancel his report.
Because, you never tell an expert what critical assumption you use in your analysis.

If you call me and tell me "I want you to use this assumption in your analysis," I tell you, immediately, "I resign. You should look for another expert."

Now, why is it so critical here? Because, they instructed him to use the valuation of their own experts. And based on this assumption, he concluded that the financial statement are material misstatement.

If the plaintiff would have instructed him to use the valuation, made by your experts, by Mr. Trump's experts, then Dr. Lewis will come up to the opposite conclusion that there is no material the -- the statements are not materially misstated.

In other words, his conclusion follow, directly, from the assumption used that was instructed by the plaintiff to use which is unheard of and make no sense.

Now, if I follow the same methodology, what I
E.Bartov - Defendant - Redirect/Mr. Suarez

Page 6552
THE COURT: How do you want to try to rehabilitate that if you do?

MR. SUAREZ: There would have been a series of questions. He got ahead of my question.

THE COURT: I still strike the answer
because, it wasn't responsive.
MR. SUAREZ: Okay.
THE WITNESS: I am just trying to save time.
Q. Which method, Professor, did you select in your materiality analysis?
A. I selected the method that directly analyzed the information used by DB. Because, in the definition, they say that the financial statement would be --
Q. Don't give me the "why" yet. We'll ask you the "why."
A. So I use the methodology that depends on the analysis used by DB.
Q. Why did you select that methodology over other methodologies that were, perhaps, available to you?
A. So as I said before. And I'll say it again.

There are many methodology. I consider a few of them.
Definitely, I considered the methodology used by Dr. Lewis.
But Dr. Lewis methodology compares the number in the financial statement to the valuation produced by plaintiff expert. This is how he quantify the misstatement.

And based on this number, without doing any qualitative analysis, he computed. Then, the number is large. He doesn't tell us how large is large. But, he computed, in the number, the difference is large.

And based on this, he concluded that the financial statement are materially misstated. However -- he used this assumption, this critical assumption, because according to him he was instructed, by plaintiff, to use this assumption.

Now, the assumptions shape the opinion. You never take assumption from the client you represent or you testify for. This is absurd.

So -- how you can say it? If Dr. Lewis had used the valuation produced by defendant's expert, he would have concluded that there is no material misstatement.

So I want to be fair to plaintiffs. And I did not want to pick methodology that favor the defense. So I could do the same thing as Dr. Lewis but, instead of using the valuation of the plaintiff experts, I use the valuation of the defense experts.

And just by doing this, changing one assumption, I had an opposite conclusion that the statements are not material misstated.

But, this would not be fair to the plaintiff
because, I am using information that is advantageous to defense.
E.Bartov - Defendant - Redirect/Mr. Suarez

Page 6554

So I picked a methodology that is objective. It doesn't favor the defense and it doesn't favor the plaintiff and it is follow directly from the definition of materiality.
Q. Now, if we turn to your affidavit and you see, at paragraph 17 on page five, it state, "Mr. Trump's SOFCs for 2011 through 2021 were prepared in a personal financial statement format, in accordance with ASC 274. And the valuation of the investment properties recognized in those SOFCs were generally consistent with the notion of estimated current value."

Do you see that?
A. I do.
Q. What do you mean by "generally consistent"

## Professor?

A. So, you know, I want to clarify. I did say that, in accounting, every word matters. But, not when you write a report to Courts or not when I communicate with my wife. What I meant is that every word matters when you read a financial statement.

I am not producing your financial statement. I am writing an opinion. So maybe I was not as careful and I should not use the word "generally."

But, I did not pay attention to this minor thing that "generally" is not even considered -- not mean defined
in GAAP. I just wanted to deliver the message that they are consistent.

By "generally" I mean, maybe here and there, there is a random inadvertent deviation from GAAP. But, if there is a deviation, the deviation is not material. So that's what I mean by "generally."

So maybe it was not the best word to use here. Maybe I should use maybe something like "They are not materially misstated" -- or whatever. But, this was -- this was my intention.

MR. WALLACE: Objection, non-responsive Court.

MR. SUAREZ: How is it nonresponsive? It is his interpretation.

## THE COURT: Overruled.

Q. If we go to paragraph 24, it says, "Mr. Trump's SOFCs, for 2011 through 2021, did not impact, significantly, Deutsche Bank's decision to extend loans to defendants or to set these loan's interest rates."

Do you see that?
A. I do, yes.
Q. What did you mean by the word "significantly" in this statement?
A. Well, I mean, it didn't make a difference
for -- did not impact, significantly, Deutsche Bank decision

Page 6556
to extend loans. I mean, it didn't change. It didn't change the decision of Deutsche Bank to extend this loan.
Q. And if we turn to paragraph 25, it says, "Deutsche Bank's independent, rigorous, and subjective valuation process -- which involves models employing a multitude of variables from several data sources, independent appraisals, and a variety of validity checks -- demonstrates that Deutsche Bank's reliance on the information in the SOFCs was marginal in deciding whether to extent the subject loans and what interest rate to require."

Do you see that?
A. Yes, I do.
Q. What did you mean by the term "marginal?"
A. Again, this is not a financial statement. I am not using GAAP language. By "marginal" I mean, that it didn't have any significant affect or any -- it didn't change. It didn't change the -- it didn't change the decision whether to extend loans or the interest rate.
Q. And if we pull up Plaintiff's Exhibit 293 --

MR. SUAREZ: And just leave this up here side by side for a second.

Can we turn Plaintiff's 293 to page six.
Q. And we look at "Club Facilities." At the bottom it says, "For purposes of our analysis, the 1.3 billion in reported value has been reduced by fifty percent for

```
deriving unadjusted value."
    Do you see that?
    A. I do. Yes, I do see it.
    Q. How is that reduction consistent with the analysis
    that you laid out in your affidavit?
    A. Well, as I said before, you cannot take one
    sentence and try to understand it. And the same thing is
    when you try to interpret GAAP. You cannot take one
    sentence and interpret it in isolation.
    In order to interpret this sentence, you have to
    consider the entire report; the 20 page or something entire
    report.
    And if you read the entire report, you understand
    that this fifty percent reduction was based on the economic
    analysis. It is not an arbitrary number they pick and
    therefore, they rely on the financial statement.
    There is no reliance here on the financial
    statement per se. This is a result of their analysis --
    economic analysis -- their experience with other assets of
    Mr. Trump and their knowledge of the properties.
    And if memory serve, I think that even in some
    reports they say, "We pick this 50 percent after
    consultation with the or in consultation with the Valuation
    Services Group."
    So, this is not the first asset that they
```

E.Bartov - Defendant - Redirect/Mr. Suarez
evaluate. Before this, they evaluate many, many -- several
other assets in detail. They understand the relationship.
Because, remember, they use liquidation value.
Mr. Trump use estimated current value. These are completely
different concept.
They did analysis, they figure out that based on
their analysis and based on the significance of this
valuation to them, that fifty percent will be appropriate.
Q. What expertise, Professor, is needed to apply a
fifty percent reduction?
A. That's what I said before. If they just take
arbitrary reduction rate, they don't need -- they don't need
the Valuation Services Group. They don't need the risk
management group. They can higher a high school drop out.
And he can plug these numbers into excel sheet and get the
answer.
This is really, you know -- I cannot even
understand where this argument is coming from or what they
are thinking. I have no idea.
Q. If you look, Professor, on the following page, at
page seven, for partnerships and joint ventures, again it
says, "Due to uncertainty, we have taken a fifty percent
haircut on reported value."
Why is it that they just apply fifty percent
again?
evaluate. Before this, they evaluate many, many -- several other assets in detail. They understand the relationship.

Because, remember, they use liquidation value.
ump use estimated current value. These are completely different concept.

They did analysis, they figure out that based on their analysis and based on the significance of this valuation to them, that fifty percent will be appropriate. fifty percent reduction?
A. That's what I said before. If they just take arbitrary reduction rate, they don't need -- they don't need the Valuation Services Group. They don't need the risk management group. They can higher a high school drop out. answer.

This is really, you know -- I cannot even
understand where this argument is coming from or what they are thinking. I have no idea.
Q. If you look, Professor, on the following page, at page seven, for partnerships and joint ventures, again it says, "Due to uncertainty, we have taken a fifty percent haircut on reported value."

Why is it that they just apply fifty percent
again?
A. Again, this is based on economic analysis. And, in order to believe that this is a arbitrary fifty percent without considering the economic environment here and the entire set of assets and the entire analysis that they perform before -- because remember, this is after they already performed a significant economic analysis.

In order to believe that this is arbitrary -- the reduction -- with no economic analysis, you have to believe that Deutsche Bank is not aware of the guidance in FASB. They are not aware of the guidance for the Federal Reserve. They are not aware what every accounting textbook, every scientific paper, every -- many market participant say again and again and again, that, you cannot rely on the numbers as reported in the financial statement. You have to make your own independent analysis, come up with your own numbers based on the information in the footnotes and based on the information in other sources and make decision based on the independent analysis that you perform.

Dr. Lewis is here in the audience. And I am sure that when Dr. Lewis teaches financial statement analysis, he tell his students don't take the numbers by their face value.

That's what financial statement analysis courses, in every school - I have heard many of them -- that's what we teach the entire semester; how to take the financial
statement, come up with your own valuation and use your own valuation in your analysis.
Q. Professor --

MR. WALLACE: Objection, your Honor;
foundation, relevance on what professor Lewis teaches.
Move to strike that section.
THE COURT: Overruled.
Q. Professor, if a student of yours turned in this
credit report as their homework and you saw the level of analysis performed on partnerships and joint ventures and compared it to the level of analysis done on net cash flow, for example, what would you tell the student about their homework on partnerships and joint ventures?
A. The partnership analysis -- partnership and joint venture analysis was preceded by a detailed analysis of other assets.

So, you cannot look on this, independently, as if it is the only asset that they are evaluating -- that DB is evaluating. You have to read this in the context of the entire analysis, the entire 20 page analysis.
Q. In the context of performing that analysis, why do you say that banks don't like to burn money?
A. Well, banks don't want to burn money because, this is not banks. Every company that is for business - every company that is for business trying to be efficient, they
don't want to burn their investor money.
So, if you don't need to do an analysis, because you already know the outcome and you know what you need then, you save the money and you do this shortcut.

They know that even if they take a 75 percent reduction -- whatever it will take -- it will not affect their analysis. This is immaterial -- this is inconsequential for them. That's why they did this.
Q. Okay. And, let's take a look now at the analysis on page six as it relates to 40 Wall.

You see here it says the property has a NOI of 26.2 million?
A. Ido.
Q. Okay. And, we had a discussion about how 26.2 million is a marathon.

What does -- excuse me. 26.2 is a marathon not 26.2 million.

What does the fact that they used a NOI that doesn't appear on the Statement of Financial Condition tell you about the credit memo?
A. Well, it means that they got this number elsewhere.
Q. Now, if we pull up Plaintiff's Exhibit 798, at line --

MR. SUAREZ: Well, let's pull up Plaintiff's
E.Bartov - Defendant - Redirect/Mr. Suarez

Page 6562
Exhibit 798.
Q. Do you recognize this document?
A. Can you blow it up a little bit? Sorry. Okay.
Yes, I do remember it. Yes, I review it.
Q. Do you see that it's the supporting data for the

2011 Statement of Financial Condition?
A. Yes.
Q. If we go down to line 112, do you see where it says, "40 Wall Street?"
A. I do.
Q. Do you see it has an "NOI" there for 40 Wall

Street of 26,234,000?
A. I do.
Q. And, do you see what the basis for reaching that NOI is right above?
A. Yes.
Q. Do you see that it's an average income for the five-year period subtracting an average expense for the five-year period to reach that NOI?
A. I do. This is known as stabilize net operating income. So, they don't took the number from the statement whatever -- whatever statement they use. Because, net operating income is not even GAAP.
Q. Let's take it piece by piece.

What does it mean that the average income minus the average expenses were subjected from each other to reach a NOI in connection with this?
A. This mean that this is a calculation. There is no GAAP here. This is an economic approach that is recommended by economic theory in order to compute the stabilized NOI; meaning, the NOI which is expecting to recur in the future.

If you take one year NOI, there is a lot of randomness in this number. So, what people do, they average it over a few years.

Statistically, when you average random variables over a few years, you remove the random error and you get an estimate -- it's still an estimate. It's still subject to estimation error. But, statistically, this estimate will be more accurate than if you take one year of data.
Q. And was that method disclosed on the face of the supporting data?
A. Yes, right here. Yes, of course. It says average income for five years, average expenses for five years.
Q. And if you see there, it says 2013 to 2017?
A. Yes.
Q. This was prepared in 2011, correct?
A. Right. So, this is, actually, based on future -on forecasted numbers. So, when you compute a normalized NOI, you can compute it based on past data. You can compute
it based on forecasted data.
In this case, it appears from what is given here that they based stabilized NOI -- so they base their NOI on predictions what will happen, according to them, in the next five years. And they take the average -- totally acceptable. Many companies are doing that. And, it's totally acceptable.
Q. Why is it done that way?
A. Well, it is done that way because, according to economic theory, this will give you a good indication of the value of the asset if you take the NOI and you divide it by the cap rate.

MR. SUAREZ: And I think I previously referred to this as Plaintiff's Exhibit 798. Just so the record is clear, it's Plaintiff's Exhibit 788 in native format.
Q. How does that NOI, on the supporting data, tie to the NOI that was reflected in the credit report?
A. Which credit report.
Q. Plaintiff's Exhibit 293 that we just had up?
A. Oh, I thought they used the same number. They used the same NOI in the one that is reported here.
Q. And what does that tell you about the manner in which Deutsche Bank used the Statement of Financial Condition if anything?
E.Bartov - Defendant - Redirect/Mr. Suarez
A. I think it is appropriate. In appropriate way. There is no -- there is no -- there is no, no obvious inflation or distortion of the valuation.
Q. As a matter of fact, if you look at the document that the Government showed you, Plaintiff's Exhibit 1573, and we turn to the six million dollar figure that they wanted you to focus on, in that appraisal --

MR. SUAREZ: Do we have that up?
(Whereupon, the following proceedings were stenographically recorded Shameeka Harris.)

COURT OFFICER: All rise, Part 37 is back in session, the Honorable Arthur Engoron presiding. Please be seated and come to order.

THE COURT: Okay, let's continue with the redirect.
(Whereupon, the witness resumes the witness stand.)
THE COURT: Welcome back, Professor. I will remind
you you are still under oath as you know, okay.
Mr. Suarez, please continue.
MR. SUAREZ: Thank you, Your Honor.

## CONT'D REDIRECT EXAMINATION

BY MR. SUAREZ:
Q Professor, earlier today in discussion you had with
Mr. Solomon in form or substance, you discussed that when you
find enough evidence to support your analysis for an opinion you stop looking; do you remember that testimony generally?

A Yes.
Q What did you mean by that?
A Well, you know, in - it's when you do an audit, when an accountant does an audit, they have an audit plan and it's impossible to examine all documents because the documents are millions of documents. So what they do, they take a small sample of documents. And if they don't find any suspicious evidence, they would stop. If they find suspicious evidence, then they will -- they will increase the investigation. So in this sense what I meant is I made a plan for myself what

Professor Bartov - by Defendant - Redirect (Mr. Suarez) Page 6567
1 documents I need to review. I reviewed the documents as I
2 thought the most important, the least important, and I concluded
3 that I have sufficient evidence and there is no suspicion, there
4 is no suspicious evidence that will require me to increase my --
5 my investigation of the documents so that's when I stop. If I found suspicious documents, I will expand the investigation.

Q And how, if at all, is that consistent with a manner in which you conduct your academic research?
A Well, academic research is -- is somewhat different because my academic research is typically based on computerized databases. So the computer analyze all the data. So the data analysis course is very small. But even in academia when we hand collect data, we do the same thing. We take a sample and we do the analysis based on the sample. We are not going to collect data from the entire population because this is prohibitedly (sic) costly. If I was using every single available data in this case, I will still be reading documents. I will never have time to write a report.
Q And how is that consistent with the manner in which Deutsche Bank conducts credit analysis if at all?
A Well, from the -- from the credit reports, you see that they actually adopted the same strategy. They started with major assets that are most important to them and they analyzed them in detail. And once they got sufficient confidence that the financial health of the Trump Organization that it is

1 satisfactory, then they move to a different type of analysis where it was based less on -- on data analysis and more of a more general approach.

Q And if we can pull up Plaintiff's Exhibit 293, and I could turn your attention to page four of this document. Do you see where it says key ratios? Do you see where it says unsecured lending guidelines?

A Yes.
Q And, again, if you take a look at page eight, key
ratios, it says, "to demonstrate the strength of the guarantor, we have applied the unsecured lending guidelines." Do you see that?
A I do.
Q Now, I'd like to show you Defendants' Exhibit 193 which are the unsecured lending guidelines and turn your attention to page eight of the unsecured lending guidelines where it says, "based on their evaluation of specific concentrated assets, lending officers use their judgment in setting the appropriate adjustments to achieve conservative valuations of concentrated assets."

How, if at all, is that consistent with the manner in which Deutsche Bank performed credit analysis, the credit analysis reflected in the memos?
A Yeah, this is exactly what they did. They perform independent analysis based on their judgment and assumption.

They didn't choose Mr. Trump's assumptions.
Q And if we turn to Defendants' Exhibit 193 at page nine, do you see where it says, "commercial real estate direct private equity and art"?
A Yes, I do.
Q And it says to be determined case-by-case based on an appropriate valuation formula or acceptable appraisal?

A I see.
$Q$ Is that consistent with your evaluation of the credit analysis performed by the banks and the credit memos?

A That is exactly what I said before. They do their own analysis and they decide on case-by-case how to deal with it.

Q And with respect to the discussions you've had here today and the questions from Mr. Solomon, how, at all, has your opinion changed as to whether the statements contained any material misstatements if at all?
A My opinion doesn't change because I assume and I treat it, the credit reports, and under this assumption that they use their judgment and they make asset-by-asset valuation.

MR. SUAREZ: Your Honor, may I confer with my colleagues for a second?

THE COURT: Of course.
Q Professor, at the conclusion of your discussion with Mr. Solomon, they brought us back to the Exxon case that the New 25 York Attorney General filed here in the Sate Supreme Court of
Professor Bartov - by Defendant - Redirect (Mr. Suarez) Page 6570
1
1 New York; do you recall that testimony?
questions for the witness, the witness is excused. Thank you.
(Whereupon, the witness was excused from the stand.)

MR. KISE: Judge, we have a couple of followup housekeeping items.

THE COURT: Okay.
MR. KISE: Ms. Hernandez, will probably go through these far better than me, but they relate to things that happened during the course of the defense case with respect to Mr. Shubin, Professor Bartov. Remember we wee going to introduce, for record purposes, copies of their reports that the Court didn't allow. And I believe there were some documents associated with Patrick Birney's testimony that we are trying to do by agreement with the Attorney General so that it will save us all the time associated with having Mr. Birney go through those documents.

I believe that happened a couple of weeks or so ago when Mr. Birney was on the stand, but I will let Miss Hernandez touch on those three issues.

MS. HERNANDEZ: Hi, Your Honor. We would like to move into evidence D1079 which is Shubin's report just for appellate purposes as we discussed.

MR. WALLACE: For appellate purposes, no objection.
THE COURT: No objection. It's in.

Page 6572
MS. HERNANDEZ: And the same thing for D1073 which is Mr. Bartov's supplemental report disclosure.

MR. WALLACE: Again, for appellate purposes, no objection.

THE COURT: It's in.
MS. HERNANDEZ: Then exhibits D1074, D1075, D1076 and D1078 which are the exhibits referenced in Mr. Bartov's supplemental disclosure. Those are the Brace Wall Reports that he references in the supplemental disclosure.

MR. WALLACE: Objection. Those are in the record, those are the reports to the monitor.

THE COURT: They are in the record?
MR. WALLACE: They are already in. There is no need to put them in. It's like exhibits as to Mr. Bartov's affidavit or letters.

MR. KISE: They are just referencing Bartov's letter. I guess they are on the NYSCEF so they would be available. If they are part of the record anyway, then we don't need to double it up. It is just for appellate purposes in any event so, yes.

THE COURT: You are going to appeal?
MR. KISE: I don't know. This will be number 7 or 8 in one case so probably.

THE COURT: All right. We all agree that those four documents are in evidence.

MR. WALLACE: They already in the record. We object to adding those as separate exhibits.

MR. AMER: These are Judge Jones' letters that were filed on NYSCEF.

MR. KISE: As long as they are part of the trial record because some of that predates the trial. Some of the letters predate the trial. Most all of them predate the trial. So we are just including it. They're referenced in Professor Bartov's supplemental report so it is just all part of the same package.

MR. WALLACE: I believe everything on NYSCEF is part of the record. We'll waive our objection to the four addition documents being repeated in the record.

THE COURT: Okay.
MR. WALLACE: For appellate purposes.
MS. HERNANDEZ: And then one more thing that Mr. Kise didn't mention is we would like to move in the clips that we used with Mr. Bender on October 4th and October 5th so that's D1062 into evidence.

THE COURT: In the clips?
MS. HERNANDEZ: It is the clip report for the videos that were played on October 4th and --

MR. ROBERT: I think they did the same thing where they put the clips in for the purpose of the audios that they had played as well.

MR. WALLACE: I will accept the defendants' representation that this report reflects the clips that were actually played, but if that's the case, then we have no objection.

THE COURT: Okay. Then --
MS. HERNANDEZ: Then the last --
THE COURT: They're in.
MS. HERNANDEZ: Thank you, Your Honor. The last housekeeping is we would like to move in the backup Mazars documents that were sent to Mazars as we discussed during Mr. Birney's testimony. It is a lengthy list of documents so I'll go through them and then we'll see if plaintiff has an objection.

MR. WALLACE: We do. I believe this is the list of 182 documents that we got at 9:30 something last night. That's not the few documents that they were going to potentially enter with Mr. Birney. 182 documents would represent a significant fraction of the entire record in this case and does not strike us as appropriate that those just come in. Certainly, we have not had any chance to go through the list of all those documents to figure to out which ones are in there, but it doesn't strike as appropriate that exhibits on that volume.

THE COURT: So what if I deny the request without prejudice? Well, I mean, you don't know what 182 are,
right? So, maybe, you won't object to some or all of them.
MS. HERNANDEZ: All of these documents were Mazars Bates labeled and on plaintiffs exhibit list.

MR. AMER: They're not calling a witness to get these documents in.

MR. KISE: That was the whole point. It was going to save us the trouble of having Mr. Bimey come here and go through one by one by one. As the Court may recall, Mr. Birney answer questions fairly slowly. So, we weren't going to go through those, but we're happy to give them more time to look at them. I don't know about the timing. That was the purpose of the colloquy when Mr. Birney was here, as I recall, is that we are going to -- we can bring him to get them in.

MR. AMER: The purpose was to share with us a list of the handful of documents that they were otherwise going to get through Mr. Birney and, you know, we got it last night at 9:30. I think the bigger point is it's not appropriate to try and get in over a 180 documents without having a witness on the stand or even to put us to the
burden of having to review those documents when we should be -- you know, they should be resting right now and we should be moving on to our rebuttal case, then we have a posttrial brief.

MR. KISE: So, Your Honor, two things. One, this
was pursuant to the discussion that took place. We can go back to the discussions that took place on the record with regard to Mr. Birney. I don't know that anyone used the term handful of documents, but we can certainly look at the record, one.

Two, all of these documents are on plaintiff's exhibit list. So there's -- they clearly reviewed them and understand what they are fully. Whether they decided to use them or not it's another matter. It is not like they're new documents. And we can get Mr. Birney down here, if we need to, to go through that exercise, but I would suggest that we would start that at roughly 3 o'clock or $3: 15$ and then it would take the balance of day tomorrow to go through document by document. If they're prepared to do what Your Honor suggest, which is let them look at the documents, you know, and --

THE COURT: Decide whether they want to --
MR. KISE: Decide later. If we need to call
Mr. Birney and bring him in, then we'll be prepared to do that but --

MR. AMER: Can I point out we had a day off yesterday. Why is this coming up now. If they were serious about putting in over 180 documents, then why didn't we get Mr. Birney on the stand yesterday and go through this exercise. This is really unfair to the Court and to us and

1 it's totally inappropriate. And just because a document is 2 a plaintiff's exhibit, doesn't mean they get to put it in
without having a witness on the stand. We can put in documents that are party admissions against interest without necessarily having the author of the document on the witness stand. But if it's their document, they don't get to do that because it's hearsay for them.

So, it is just totally inappropriate to, you know, minutes before you rest your case to say, oh, by the way, I have a 180 some odd documents I want to put into evidence. It is not the way that they should approach this at all.

THE COURT: I mean, just as a general matter of how cases are -- how trials are conducted, plaintiff's points are very valid unless the defendants can point to, you know, some earlier agreement. Apparently, according to the person that sits alongside me, where a handful was used, 182 is an awful lot of documents.

MR. KISE: We can go back and look at the transcript. There was an agreement and an understanding that we would take Mr. Birney off the stand and we would avoid having to go through document by document by document. And, frankly, we never anticipated -- it's not really -- it is the substance of the document not the number. I mean, we never anticipated there was any controversy. It was on their exhibit list. They are just backup documentation

1 want the case to end.
MS. HERNANDEZ: Me too.
MR. WALLACE: On November 29th, colloquy with Mr. Robert was, I think the deal that we made, I'll let Mr. Wallace confirm it, is that we will, later tonight, Miss Hernandez will send a list of documents that we believe constitute the backup that this witness would have authenticated and put into evidence. The Attorney General then review it. If they have anything else they want to add, there may be some discussion. So we may have to bring Mr. Birney back for that limited purpose. We are hoping not to.

If someone had 182 documents sitting in this courtroom ready to have Mr. Birney authenticate on November 29th, there was no reason to wait until last night at 9:30 p.m. to send them to us and ask for us to agree to them. I think the witnesses -- the defendants, they do not have a witness, should be resting. It shouldn't be, well, we can call Mr. Birney back tomorrow. I don't know where the 182 came from.

It strikes me that it would appear they spent the last two weeks finding additional documents they would like to get in using this agreement we had two weeks ago and it's just not appropriate at this point to just dump these documents on us, to dump them into the record and to dump

Page 6580
them on the Court. So we object to this process in its entirety. If the defendants don't have a witness ready to go right now, they should be resting.

MR. KISE: So, Your Honor, might I ask the Court's indulgence because even the number 182 to me seems like a high number. Can we have ten minutes and I can figure out why the number is so high and that may solve the problem itself. I'm not sure why we have 182, that number, that number does seem high because I wouldn't think -- maybe, it's something to do how they're structured, that we can explain to the court. But I don't want to make any representations as to why that number is high or low or perhaps it can be substantially compressed without -without having just a few minutes to review the situation and understand.

THE COURT: Maybe, it's one booklet with 182 pages. See what you can do. I still think the fair thing to do here is that I would deny it without prejudice send them a list of the documents and you can have as long as you want. We're just trying to get them in the record. I mean, it's -- just almost a theoretical construct. Okay, they were listed on an exhibit, are they in the record, so what. Why don't you can see why there are so many. I'll be in the back briefly.
(Whereupon, there was a pause in the proceedings.)

1
use different definition of value than estimated current value So there is no surprise that appraisers would come up with completely different valuation than the estimated current value. There is no contradiction here. It is just expected differences between different values that will derive based on different definitions and they will derive by different people. That's totally expected.
Q And if you look at this appraisal from 2015 and if I could specifically draw your attention to page 15 of the appraisal, which reports a net operating income of $\$ 23,203,919$; do you see that?
A Ido.
Q How does that compare to the estimate that was used in 2011 on a forward looking basis?
A Very close. Every estimate is subject to estimation error but this is extremely close to the -- to the realization.

Q And what does that tell you about the method used in 2011 to determine the estimated current value of 40 Wall in the statement of financial condition?
A So scientists don't assess the integrity or the quality of a focus in hindsight based on the realization. We don't do it this way because even if this number was vastly different than the -- than the predicted number, then the focus is still no evidence of any fraud or any inflation. It just says that the estimation error was lodged because of unforeseen events

THE COURT: We're back on the record. What did you discover?

MR. KISE: Yes, your Honor. So, apparently, the number is what it is just because of the way they were broken out. I can show the Court, if you will allow me to hand this up, an example.

THE COURT: Do you have another copy so plaintiff can see it?

MR. KISE: It's on their exhibit list. It is Plaintiffs Exhibit 701. The point is, Judge, as you can see, its just comparable backup data. It's all routine matter that, really, shouldn't be controversial at all. It's just what Patrick Birney would testify, "Yes, this is on 40 Wall Street. We sent him this piece of paper." It is not there for the truth of the matter asserted.

One thing we could do is just simply submit an affidavit, from Mr. Birney, that says, "Yes, this is all the backup." And that would solve the problem completely without having to call him as a witness.

But, this is it. It's just the documents that we sent to -- that we, the defendants' sent, Mr. Birney to Mazars. And we would never have anticipated there would be any controversy over such a ministerial document. Frankly, there shouldn't be.
that happened between the time the focus was made and the realization. But the fact that this is very close, the fact that this is very close is totally inconsistent with assertion that the focus was inflated or distorted.

THE COURT: Okay. See you all at 2:15. And, witness, you're tired of hearing me say this, you can't discuss the case or your testimony with anybody.
(Whereupon, the witness was excused from the stand.)
(Whereupon a luncheon recess was taken.)

If your Honor wants to deny without prejudice, we could simply save us all a lot of -- we can submit an affidavit, by tonight, that they're business records.

And he can ask the witness without saving the Court the time of calling someone here to just walk-through all of that routine matter, there's nothing particularly controversial in there. They are not being offered for the truth of the matter asserted.

THE COURT: Plaintiff, do you agree they're not being introduced to prove the matter asserted therein?

MR. WALLACE: I am not, entirely, clear because, I don't have a witness saying for what purpose they're being put in for.

These are also the versions that were contained within the Mazars file so, likely contain, oftentimes, notations from Mazars other work.

I would think if we were presenting these, through Mr. Birney, and he were to say, "This is what I gave to Mazars," there would be questions about "Is there information that wasn't sent to Mr. Mazars about, say, I don't know an appraisal."

The fact that they're just noncontroversial, I don't know. I haven't looked at all 182. So, I

|  | lings Page 6593 | Proceedings Page 6595 |  |
| :---: | :---: | :---: | :---: |
|  | purpose they serve. But at all events, we'll try and |  | or do not need a written response from plaintiffs. |
| 2 | work it ou | 2 | Because, my preference would be not to bother |
| 3 | THE COURT: Okay | 3 | responding if the Court is going to do what it's been |
| 4 | MR. KISE: That's all we can do | 4 | doing, which is denying them as they are admitted. |
| 5 | THE COURT: Defendants, do you rest at this | 5 | THE COURT: You know, for one thing, |
| 6 | poin | 6 | s to me motion for directive verdict that's denied |
| 7 | MR. KISE: Yes, your Honor. Subject to the | 7 | at the end of the plaintiff's case is -- that's almost |
| 8 | one issue that you left open, we do rest. Also, at | 8 | never going to be granted during the defendant's case. |
| 9 | this time, we are moving for directed verdict and | 9 | Either the plaintiffs made out a prima facie |
| 10 | asking for the termination of the case | 10 | case or they didn't. I think they did. That's what |
| 11 | Rather than take the Court's time this | 11 | I've already ruled. So, you'd be wasting your time. |
| 12 | afternoon, we'll submit something by Friday -- if | 12 | But I'm not going to tell you not to send me something. |
| 13 | that's okay. But whatever timeline you want -- with | 13 | MR. KISE: Your Honor, two things. My last |
| 14 | respect to the directed verdict. | 14 | recollection of the presentation that we did before we |
| 15 | But, rather than take the Court's time today | 15 | began our evidence, we moved for directed verdict at |
| 16 | with any oral presentation, we'll just submit our | 16 | the close of their cas |
| 17 | presentation then seeking, on the same basis we have | 17 | My last recollection, unless you are now |
| 18 | before, that, now at the conclusion of the defense | 18 | saying that you are denying it, was that you took it |
| 19 | case, there is no evidence, no fraud, no victim, no | 19 | under advisement. That's the last thing I recall you |
| 20 | damage. There is no -- they haven't satisfied the | 20 | saying on that. |
| 21 | elements. | 21 | THE COURT: True. |
| 22 | And the existence of the rebuttal witness, | 22 | MR. KISE: For record purposes, it is now |
| 23 | Professor Lewis, indicates, fully, that they have a | 23 | the close of our case, and we need to move for directed |
| 24 | hole in their case that they're trying to now backfill. | 24 | rdict. |
| 25 | And you've heard our arguments on that. | 25 | Frankly we will -- and, this is why I |
| Proc | ngs Page 6594 |  | ings Page 6596 |
| 1 | But, that would be the -- yeah, we'll submit | 1 | suggested Friday for our submission to streamline this |
| 2 | something, in writing to the Court, Friday morning. | 2 | process. Frankly, once they are done with their |
| 3 | THE COURT: I have a general policy of | 3 | rebuttal case, we'll need again, for record purposes, |
|  | anybody wants to write me, send me something, go ahead | 4 | to make the motion for directed verdict so we could |
| 5 | and do it. There's no way I'm going to grant that. | 5 | submit one brief to the Court or one submission -- it's |
| 6 | But if you want to send something, send it. Plaintiff, | 6 | really not a brief, one submission to the Court, in |
| 7 | do you strongly object to my allowing that? | 7 | lieu of doing what is normally done, which is we |
| 8 | MR. WALLACE: I think I object on a logical | 8 | present it live on the record. But in order to save |
| 9 | basis. There was another motion, for directed verdict, | 9 | the Court that time, we're just going to do it the way |
| 10 | from Ms. Habba, three days ago, that was denied. | 10 | I suggested if that's acceptable to the Court. |
| 11 | By Friday, we'll have certainly rested our | 11 | MR. ROBERT: So the record is clear, that's |
| 12 | rebuttal case. The case will be over. We're already | 12 | on behalf of all defendants, your Honor. Thank you. |
| 13 | scheduled for briefing and arguments. | 13 | THE COURT: How about we do this. You know, |
| 14 | So, adding satellite briefing, strikes us as | 14 | I like to discuss things in a reasonable manner. |
| 15 | unnecessary and not necessary -- relevant. And quite | 15 | So Mr. Kise -- all defendants I should say |
| 16 | frankly, a waste of Court resources. | 16 | Mr. Robert, Ms. Habba et cetera, move for a directed |
| 17 | Maybe Mr. Amer has additional points. | 17 | verdict. It doesn't have to be formal. Send whatever |
| 18 | MR. AMER: I would say if you're going to | 18 | you want. You can move orally so, why not be informal |
| 19 | entertain a written motion from defendants -- | 19 | in writing? |
| 20 | THE COURT: It is more like I'll accept it. | 20 | And I'll give the AG a couple of business |
| 21 | It doesn't mean I will entertain it. | 21 | days to decide whether they need to respond. And then, |
| 22 | MR. KISE: I think you already said it. | 22 | if they say no, it's no. If you say yes, I will give |
| 23 | THE COURT: I will disregard it or ignore | 23 | you what time you need. |
| 24 | it. | 24 | Yes? |
| 25 | MR. AMER: I would like to know if you need | 25 | MR. WALLACE: This is a colossal waste of |

|  | dings Page 6597 |  |
| :---: | :---: | :---: |
| 1 | resources if people are going to be writing, briefing |  |
| 2 | the same thing we're about to be briefing in less than |  |
| 3 | a month. |  |
| 4 | I would ask that -- the defendants have |  |
| 5 | indicated they're moving for a directed verdict. If |  |
| 6 | your Honor is not going to grant the directive verdict, |  |
| 7 | we just ask that it be denied. |  |
| 8 | This is -- we already had a 45 page |  |
| 9 | power-point presentation on directed verdict from |  |
| 10 | Mr. Kise. I've never seen -- that's highly irregular |  |
| 11 | if we're going to talk about things that we've seen. |  |
| 12 | The defendants are not entitled to infinite |  |
| 13 | directive verdict motions every time they think there |  |
| 14 | is a good piece of evidence or they don't like |  |
| 15 | something. This is silly. And I don't know what |  |
| 16 | record Mr. Kise is claiming he needs to keep. They |  |
| 17 | have made multiple motions for directed verdict. None |  |
| 18 | have been granted. |  |
| 19 | We've all been here for weeks. I think we |  |
| 20 | know -- we've already won on summary judgment. I don't |  |
| 21 | even know what we're pretending is happening here. |  |
| 22 | But, for us to be now doing letter briefing |  |
| 23 | on the same subjects that are about to be the subject |  |
| 24 | of posttrial briefing, strikes me as the height of |  |
| 25 | waste of resources. |  |

MR. WALLACE: Yeah, I mean, we're getting close to -- taking your position that you're not going to preclude him from sending things in. Understood, your Honor. We appreciate the time that you have granted us.

THE COURT: Okay. I get letters all the time from people that didn't ask for permission. This is just another one of those but, in a big case.

So that's solved. Now, we have a witness Professor Lewis -- Mr. Lewis. I believe that was -there was another letter over lunchtime.

MR. KISE: There is. Are they calling Mr. Sneddon first so we can, at least, move him along?

THE COURT: You want to do that first.
MR. KISE: Yes, just to save the Court -the witness time.

THE COURT: Okay. Would you like to call your first rebuttal witness?

MS. FAHERTY: Yes, your Honor. The People call, as their first rebuttal witness, Kevin Sneddon, please.

MR. KISE: And we, for the record, renew our objection to the allowance of this rebuttal testimony.

THE COURT: Basically, denied without prejudice. If you think something is not a proper

| Proceedings |  |
| :--- | :--- |
| 1 | Page 6598 |
| 2 | This is -- he's going to have his chance to |
| 3 | make all these arguments as of January 5 and appear |
| 4 | before your Honor on January 11 and get a decision on |
| 5 | letter briefing. |
| 6 | I don't think there is any world in which |
| 7 | we'll respond to this. And if we're talking two extra |
| 8 | days, I guess we're talking to Tuesday of next week. |
| 9 | If you want to allow him to send it in, that's fine. |
| 10 | But, this strikes us as a colossal waste of resources |
| 11 | and time. |
| 12 | THE COURT: To me, it is somewhat analogous |
| 13 | to a prior restraint. You can ask me for something. |
| 14 | No, ask me what you want. Plaintiff, you can decide |
| 15 | whether you need to respond to it or not. I think you |
| 16 | have a lot to go by at this point since I have denied |
| 17 | it, at least, five times or so. |
| 18 | So, by Friday, send me whatever you want. |
| 19 | I'm not promising to read it even. I probably will. |
| 20 | But, you know, I don't want to tell you not to ask me |
| 21 | to do something. So that's it. |
| 22 | Two business days later, plaintiff you will |
| 23 | let me know if you need to respond. And, I hope you |
| 24 | will only need two or three days after that. |
| 25 | Fair enough? |

subject of rebuttal, then you can object.
COURT OFFICER: Witness entering.
Please raise your right hand.
Do you solemnly swear or affirm that any
testimony you give will be the truth the whole truth and nothing but the truth?

THE WITNESS: I do.
KEVIN SNEDDON, called as a witness by the People, having been first duly sworn, testified as follows:

COURT OFFICER: Please have a seat. Please state your name, either home or business address for the record.

THE WITNESS: Kevin Sneddon, 17 Will Merry
Lane, Greenwich, Connecticut.
THE COURT: Welcome.
Ms. Faherty, please, proceed.
MS. FAHERTY: Thank you, your Honor.

## DIRECT EXAMINATION

BY MS. FAHERTY:
Q. Good afternoon, Mr. Sneddon.
A. Good afternoon.
Q. Can you please state your educational background, please?
A. Sure. I have a Bachelor of Science, I did 30
credits of post-graduate study and then, I worked in

| K.Sneddon - Plaintiff - Direct/Ms.Faherty Page 6601 | K.Sneddon - Plaintiff - Direct/Ms.Faherty Page 6603 |
| :---: | :---: |
| 1 corporate America before I got into real estate. | 1 A. To broker real estate on behalf of the Trump Org |
| 2 Q. And, where did you get your Bachelor's Degree | 2 and to oversee salespersons. |
| 3 from, sir? | 3 Q. How many persons did you oversee? |
| 4 A. East Stroudsburg University, in Pennsylvania. | 4 A. Eight to ten. |
| 5 Q. The 30 extra credits -- post-graduate credits -- | 5 Q. Focusing on your time period working at TIR, were |
| 6 you received, where was that from? | 6 you aware that Donald J. Trump owned a personal residence at |
| 7 A. St. John's University. | 7 Trump Tower? |
| 8 Q. Do you currently hold any professional licenses, | 8 A. I was aware. |
| 9 sir. | 9 MR. KISE: Objection. |
| 10 A. Real estate brokers license; the State of New York | 10 THE COURT: Ground. |
| 11 and State of Connecticut. | 11 MR. KISE: What is this rebutting? It is |
| 12 Q. Any other licenses? | 12 back to the same objection. This is something that |
| 13 A. No. | 13 could easily have been elicited on their direct case. |
| 14 Q. How long have you held your real estate broker's | 14 What issue does this go to? |
| 15 license in the State of New York? | 15 THE COURT: I assume this is just some sort |
| 16 A. Since 2004. | 16 of background to questions about that. |
| 17 Q. And that is still a, currently, active real estate | 17 MS. FAHERTY: This is two questions away |
| 18 broker's license, correct? | 18 from putting the transcript up for which I need this |
| 19 A. Yes. | 19 witnesses' rebuttal testimony, your Honor. |
| 20 Q. Are you, currently, employed? | 20 THE COURT: There is, certainly, no |
| 21 A. I am an independent contractor, associate broker | 21 prejudice. There is no jury. Even if there was a |
| 22 with Compass. | 22 jury, there is no prejudice. We all know this fact. |
| 23 Q. And what are you employed to do in your associated | 23 So again, I am just considering you're sort of focusing |
| 24 work with Compass? | 24 the witnesses' attention on something? |
| 25 A. Sell residential real estate. | 25 MS. FAHERTY: I am, your Honor. |
| K.Sneddon - Plaintiff - Direct/Ms.Faherty Page 6602 | K.Sneddon - Plaintiff - Direct/Ms.Faherty Page 6604 |
| Q. For how long have you been doing that? | 1 THE COURT: Overruled, without prejudice. |
| 2 A. Since 2004. | 2 MS. FAHERTY: Can we get a read back of my |
| 3 Q. How long have you been doing that for Compass -- | 3 question? I don't believe there was an answer. |
| 4 in connection with your association with Compass? | 4 THE COURT: Read back the question, please. |
| 5 A. Since 2018. | 5 (The testimony as requested was read by the |
| 6 Q. Where were you before 2018 in your employment? | 6 reporter.) |
| 7 A. I was an independent broker, had my own business. | 7 MS. FAHERTY: Thank you, your Honor. |
| 8 Q. Did there ever come a point in time when you were | 8 A. Yes. |
| 9 employed with an organization known as Trump International | 9 Q. Just, generally, describe for me what that |
| 10 Realty? | 10 awareness was you had about Mr. Trump's residence? |
| 11 A. Yes. | 11 A. It was well-documented in the press. You know, I |
| 12 Q. At what period of time, in your professional | 12 knew before I worked there. |
| 13 career, were you employed with and -- if I say, "TIR" would | 13 Q. Was it a Triplex living abode in which he had a |
| 14 you recognize that entity? | 14 personal residence at Trump Tower? |
| 15 A. That's fine. | 15 Does that sound familiar? |
| 16 Q. What period of time were you with TIR, sir? | 16 MR. KISE: Objection, leading. |
| 17 A. I would say late winter 2011 through late winter | 17 THE COURT: Sustained. |
| 182012. | 18 Q. Can you describe the general description of the |
| 19 Q. What title did you hold while you were with TIR? | 19 living situation Mr. Trump held at his personal residence at |
| 20 A. I was the managing director of the brokerage | 20 Trump Tower? |
| 21 office. | 21 A. I just knew it was the penthouse. I didn't really |
| 22 Q. Was managing director the title you held? | 22 know much about the apartment itself. |
| 23 A. Yes. | 23 Q. Okay. I'm going to put on the screen testimony we |
| 24 Q. Broadly speaking, what were the duties and | 24 heard earlier in this trial. |
| 25 responsibilities you had at TIR? | $25$ <br> MS. FAHERTY: If we could pull up the |

|  | eddon - Plaintiff - Direct/Ms.Faherty Page 6605 | K.Sneddon - Plaintiff - Direct/Ms.Faherty |  |
| :---: | :---: | :---: | :---: |
|  | testimony of Jeff McConney, starting at transcript page | 1 | "QUESTION: Have you Mr. McConney ever |
| 2 | 500 | 2 | personally walked through the entirety of the Triplex? |
| 3 | Q. And, we'll direct your attention to line 20. And | 3 | "ANSWER: The entirety? No. |
| 4 | we're going to continue onto page 5003. | 4 | "QUESTION: Have you ever measured how many |
| 5 | MS. FAHERTY: Counsel, directing your | 5 | re feet the Triplex is? |
| 6 | ntion to th | 6 | ANSWER: No. |
| 7 | Q. And, I am going to read this testimony to you in a | 7 | MR. KISE: Is there a question there, your |
| 8 | question and answer form. And, I am going to ask some | 8 | Honor. |
| 9 | questions. Okay? | 9 | THE COURT: Not yet. |
| 10 | A. Okay. | 10 | MS. FAHERTY: I appreciate the pause, |
| 11 | Q. Beginning at line twenty, there was a question. | 11 | Mr. Kise. |
| 12 | "Do you see there where you have a value for the | 12 | Q. Mr. Sneddon, do you recall sending Mr. McConney an |
| 13 | Triplex apartment?" | 13 | e-mail advising him that the Triplex was 30,000 square feet? |
| 14 | MS. FAHERTY: Mr. McConney responds, yes. | 14 | MR. KISE: Objection, your Honor. So, this |
| 15 | "QUESTION: Do you see -- can you explain to | 15 | squarely within the case law that we've already |
| 16 | me the basis for valuing the Triplex apartment? | 16 | cited to your Honor. |
| 17 | "ANSWER: For the June of 2015 statement? | 17 | Rebuttal evidence is not merely evidence |
| 18 | THE COURT: Question mark | 18 | which contradicts the defendant's evidence and |
| 19 | MS. FAHERTY: Yes, question mark. | 19 | corroborates that of the plaintiff. It is evidence |
| 20 | "QUESTION: Yes. | 20 | overcomes some new matter that the defendant has |
| 21 | "ANSWER: We've reached out to our sale's | 21 | proffered in reply. |
| 22 | office, Trump International Realty, and asked them to | 22 | This subject matter was covered when they |
| 23 | provide us with an amount per square foot so we | 23 | called Mr. McConney and Mr. Weisselberg in their case |
| 24 | could -- which we used to value the um Triplex. | 24 | and chief. They could have called and should have |
| 25 | Believe the e-mail said -- the Triplex is $\mathbf{3 0 , 0 0 0}$ square |  | called Mr. Sneddon at that time during their case and |
|  | ddon - Plaintiff - Direct/Ms.Faherty Page 6606 |  | ddon - Plaintiff - Direct/Ms.Faherty Page 6608 |
|  | feet. It was something about \$10,900 per square foot | 1 | chief |
| 2 | multiply the two and came up with the | 2 | The fact that it came up again in the defense |
| 3 | 327 million-dollar. | 3 | case, on Mr. McConney's second trip to the stand, does |
| 4 | MS. FAHERTY: And we'll scroll to the next | 4 | not now render this witness' testimony rebuttal |
| 5 | page. It continues on. On page 5003. | 5 | testimony. |
| 6 | "QUESTION: What was the value of 30,000 | 6 | It may contradict or it may be different |
| 7 | square feet input into the spreadsheet. | 7 | than, in there view, what Mr. McConney testified to. |
| 8 | MS. FAHERTY: Mr. McConney's answer | 8 | But this is squarely within the prohibition of the |
| 9 | "It was the mechanism so I knew, from year to | 9 | cases we cited to your Honor from the Court of Appeals |
| 10 | year, what the value was based on. Sometimes I would | 10 | on down. There's no basis to admit this now. |
| 11 | just look at the spreadsheet. And this way, I didn't | 11 | Again, a hole in their case that they would |
| 12 | have to go to all of the voluminous backup we had. It | 12 | like to backfill. And, this is -- they certainly could |
| 13 | reminded me how we valued the property at that point in | 13 | have asked Mr. Weisselberg in their case and chief. |
| 14 | time. | 14 | They called him. They could have asked Mr. McConney in |
| 15 | "QUESTION: Where would you have come up | 15 | their case and chief. They called him. And, they |
| 16 | with the number 30,000 square feet? | 16 | certainly could have called Mr. Sneddon to address |
| 17 | "ANSWER: The person running TIR at the | 17 | these points. |
| 18 | time, Kevin Sneddon sent me an e-mail that the Triplex | 18 | These are affirmative points that go straight |
| 19 | was 30,000 square feet. | 19 | their burden of proof. This is not a new matter |
| 20 | "QUESTION: Was the 30,000 square feet | 20 | at we have brought up or some new fact that has come |
| 21 | figure used to inflate the price of the Triplex. | 21 | to light. These are facts that are well -- this is |
| 22 | "ANSWER: It was used based on the | 22 | known and have been well known for some time. |
| 23 | information I received from somebody who knows. He is | 23 | So there is just no basis to admit any |
| 24 | the broker. I would rely on him because, I figured he | 24 | testimony relevant to the |
| 25 | knew the property a lot better than I did. | 25 | MR. WALLACE: If we're going to talk about |

|  | on - Plaintiff - Direct/Ms.Faherty Page 6609 | K.Sneddon - Plaintiff - Direct/Ms.Faherty Page 6611 |  |
| :---: | :---: | :---: | :---: |
|  | this, the witness should be excused if we're going to |  | chief that Mr. McConney, for the first time, identified |
| 2 | repeat this. But, I think we covered this ground | 2 | this witness, Mr. Sneddon, as the source of the 30,000 |
| 3 | extensively. | 3 | square foot figure |
| 4 | THE COURT: Do you want him excused or not? | 4 | And if we are allowed to elicit the testimony |
| 5 | R. WALLACE: Please | 5 | from this witness, on rebuttal, the Court would hear |
| 6 | ERTY: Sorry, Mr. Sneddon | 6 | that he did not calculate that number, that, that |
| 7 | MR. KISE: Your Honor | 7 | number was provided to him by Mr. Weisselberg. |
| 8 | THE COURT: I think Mr. Wallace | 8 | That's why we need this testimony. Because, |
| 9 | MR. KISE: I had something to add for the | 9 | for the first time, on their case, they put in evidence |
| 10 | record that I think is relevant a specific reference. | 10 | suggesting or indicating that Mr. Sneddon was the one |
| 11 | On Mr. McConney, when they called | 11 | who calculated the 30,000 square feet. That's wrong. |
| 12 | Mr. McConney on their case, at page 637 of th | 12 | We're entitled, on rebuttal, to establish |
| 13 | transcript, they asked, specifically, about this | 13 | that, that evidence, that was put in on their case, not |
| 14 | e-mail. | 14 | on our direct case -- there's nothing on page 637 that |
| 15 | "And then, you asked him to send you the | 15 | identifies who calculated that figure. |
| 16 | e-mail he sent to Mr. Weisselberg, right? | 16 | And it is certainly within your Honor's |
| 17 | This is Mr. Amer's examination of | 17 | discretion to allow this under the cases we were citing |
| 18 | Mr. McConney | 18 | before. |
| 19 | "ANSWER: Yes. | 19 | THE COURT: Should you have asked him where |
| 20 | MR. KISE: And then he responds at, quote, | 20 | he got this from? |
| 21 | at 30,000 square feet. DJT Triplex is worth 4,000 to | 21 | MR. KISE: Absolutely. That's the point. |
| 22 | 6,000 per foot or 120 million to 180 million, right? | 22 | The e-mail is mentioned right there at the top of page |
| 23 | "ANSWER: Yes. | 23 | 637. And that's exactly right. They had every |
| 24 | "Okay. And this is a point in time where | 24 | opportunity. |
| 25 | you're still using 30,000 square feet for the valuation | 25 | The testimony was elicited on by them in both |
|  | - Plaintiff - Direct/Ms.Faherty Page 6610 |  | - Plaintiff - Direct/Ms.Faherty Page 6612 |
| 1 | of Mr. Trum | 1 | instances; on their direct case and in our case. They |
| 2 | "Righ | 2 | certainly were aware of this e-mail and this issue. |
| 3 | So, this is on page 637. | 3 | they interviewed Mr. Sneddon some three plus years ago. |
| 4 | THE COURT: Slow down a little. | 4 | They've known about this issue. They asked about it in |
| 5 | MR. KISE: Sorry. 637. I am just looking | 5 | depositions. They asked about it with Mr. Weisselberg. |
| 6 | at lines one through ten where this issue came up in | 6 | MR. AMER: That's not the standard for |
| 7 | their case and chief. And again, this falls, squarely, | 7 | rebuttal. We had no obligation it elicit the |
| 8 | within the prohibition set forth in the case law that | 8 | testimony. But, once it was elicited, on their case, |
| 9 | we have recited to your Honor that -- they haven't | 9 | we're entitled to rebut it |
| 10 | opposed any of that case law or cited any exception to | 10 | MR. KISE: They put the e-mail in evidence |
| 11 | it. | 11 | in their case I believe; PX 1052. |
| 12 | So its just not the proper subject of | 12 | MR. AMER: The e-mail says nothing about who |
| 13 | rebuttal testimony. This is backfilling their case | 13 | calculated the value. |
| 14 | with testimony. | 14 | MR. KISE: As your Honor said, that's your |
| 15 | Simply because it contradicts our evidence | 15 | fault for not asking the question. That's the whole |
| 16 | doesn't make it rebuttal testimony. And that's what | 16 | point of the case law. If you don't ask the question, |
| 17 | the cases provide. | 17 | if you decide, in your affirmative case, not to elicit |
| 18 | MR. AMER: If I may, your Honor since I | 18 | the testimony that you believe necessary to establish |
| 19 | elicited this testimony back on, believe it or not, on | 19 | your case, you can't hold it back and then wait and see |
| 20 | October 5th. | 20 | what happens, in our case, and then declare it all |
| 21 | The testimony was about 30,000 square feet | 21 | rebuttal. |
| 22 | being something that was communicated to Mr. McConney. | 22 | That's, essentially, what they've done with |
| 23 | But, at no time, was Mr. McConney asked where he got | 23 | most of their witnesses. If you look, their witness |
| 24 | that square footage from or who calculated it. It was | 24 | list is filled with rebuttal witnesses. |
| 25 | only when they called Mr. McConney on their case and | 25 | MR. WALLACE: Whom we are not calling |

|  | on - Plaintiff - Direct/Ms.Faherty Page 6613 | K.Sneddon - Plaintiff - Direct/Ms.Faherty Page 6615 |
| :---: | :---: | :---: |
|  | because -- | 1 "Oh, no, you gotta go out in the hallway for 20 |
| 2 | THE COURT: I'm sorry? | 2 minutes." |
| 3 | MR. WALLACE: Whom we're not calling. We're | 3 Okay. Mr. Faherty, please continue. |
| 4 | calling two witnesses to respond to testimony that was | 4 MS. FAHERTY: I think there was a question |
| 5 | presented in the defendants' case. | 5 pending, your Honor. May I have a read back please. |
| 6 | This is not controversial. This is not -- we | 6 THE COURT: Please. |
| 7 | have three lawyers standing up at the defense table | 7 (The testimony as requested was read by the |
| 8 | over a witness who's going to testify -- if we can get | 8 reporter.) |
| 9 | him back in here -- in less time that it takes Mr. Kise | 9 |
| 10 | to make an argument. | 10 |
| 11 | MR. KISE: We don't suspend the rules | 11 |
| 12 | because it's one or two witnesses and it won't take a | 12 |
| 13 | lot of the time. The rules are the rules. They know | 13 |
| 14 | the game. They know how to play the game. If they | 14 |
| 15 | don't, then it's their fault. | 15 |
| 16 | THE COURT: Plaintiff, was it essential to | 16 |
| 17 | your case to get this evidence or testimony in? | 17 |
| 18 | MR. AMER: It was not essential because we | 18 |
| 19 | had the e-mail that established that Mr. McConney was | 19 |
| 20 | told it was 30,000 square feet. We didn't have to | 20 |
| 21 | establish who calculated that value. | 21 |
| 22 | But, once they put in evidence, on their | 22 |
| 23 | case, saying that it was Mr. Sneddon, we are certainly | 23 |
| 24 | entitled to challenge that factual assertion on | 24 |
| 25 | rebuttal. That's what rebuttal is for. Because they | 25 |
| K.Sn | - Plaintiff - Direct/Ms.Faherty Page 6614 | K. Sneddon - by Plaintiff - Direct (Ms. Faherty) Page 6616 |
| 1 | are going to make a big deal out of it on their case. | 1 DIRECT EXAMINATION |
| 2 | MR. KISE: So your Honor, by putting the | 2 BY MS. FAHERTY: |
| 3 | e-mail in, the only evidence at the close of their case | 3 A I don't recall. |
| 4 | was that the e-mail was sent from Mr. Sneddon to | 4 Q Okay. Let's put up plaintiff's exhibit PX10? |
| 5 | Mr. McConney. That was the state of the evidence at | 5 MR. KISE: I don't think the answer made it into |
| 6 | the end of their case. | 6 the record. I don't see that there. |
| 7 | If they wanted to dispute the idea that | 7 THE COURT: Okay, next question. |
| 8 | Mr. Sneddon didn't provide that number that's reflected | 8 Q Turning your attention to the document that's on the |
| 9 | in the documentary evidence -- they were always talking | 9 screen in front of you, the court officer is handing it up to |
| 10 | about this is a documents case, this is one of those | 10 you. You can look at either, sir. Just looking at the cover |
| 11 | documents. | 11 e-mail on this document, do you recognize that e-mail in the |
| 12 | If they wanted to dispute that, then they | 12 "from line" entry there? |
| 13 | certainly should have done so in their case and chief. | 13 A Yes. |
| 14 | They knew about this. They introduced this document. | 14 Q Did you have an e-mail address associated with the work |
| 15 | They asked about the e-mail in the transcript. There | 15 you performed at Trump International Realty? |
| 16 | is no question that this is improper rebuttal. And its | 16 A Yes. |
| 17 | no question that this is just backfilling a hole in | 17 Q And were you employed at TIR on September 20, 2012? |
| 18 | their case. | 18 A Yes. |
| 19 | THE COURT: And there is no question but | 19 Q Okay. Let's scroll down to the bottom of the first |
| 20 | that. I'm going to overrule the objection. It's new. | 20 page. And I'll just represent to you the bottom e-mail carries |
| 21 | And it wasn't part of the case they had to put in. The | 21 over on to the second page so actually if you could put them |
| 22 | defendants' witness brought it up. Now, I am allowing | 22 both on the screen. |
| 23 | the rebuttal. | 23 MR. KISE: Your Honor, just for record, this is |
| 24 | Let's get the witness back. | 24 exact same e-mail PX1052 that they introduced already in |
| 25 | Its like being invited to a dinner party and | 25 their case and they are now going to ask him questions about |

| K. Sneddon - by Plaintiff - Direct (Ms. Faherty) Page 6617 | K. Sneddon - by Plaintiff - Direct (Ms. Faherty) Page 6619 |
| :---: | :---: |
| 1 it on a rebuttal case when this was in the record at the | 1 A Yes. |
| 2 time of their cas | 2 Q And just turning your attention to that very first |
| 3 THE COURT: Objection. Overruled. | 3 sentence, I already valued DJT's Triplex for Allen. Who's |
| 4 Q Drawing your attention to this e-mail from you sent on | 4 Allen? |
| 5 Wednesday, September 19, 2012. It's addressed to Cathy K. with | 5 A Allen Wiesselberg. |
| 6 a "CC" to Jeff McConney and that's your name again there, Kevin | 6 MR. KISE: Same objection. Your Honor, can we just |
| 7 Sneddon, right? | 7 have a standing objection to this entire line of questioning |
| 8 A Yes. | 8 so we can move this along. This is all improper rebuttal in |
| 9 Q Do you see the subject there is re, colon, forward | 9 our view |
| 10 colon, DJT Triplex? | 10 THE COURT: You got the standing objection. Let's |
| 11 A Yes. | 11 go. |
| 12 Q Okay. And do you recognize the name Cathy K.? | 12 Q Sorry. Can you repeat back your answer for me. Who's |
| 13 A Yes, she was my direct supervisor at TIR. | 13 Allen the reference to? |
| 14 Q And do you recognize the name Jeff McConney? | 14 A Allen Weisselberg. |
| 15 A Yes. | 15 Q Who's Allen Weisselberg? |
| 16 MR. ROBERT: Objection. Miss Faherty said the | 16 A He was the CFO of Trump Org. |
| 17 e-mail you sent. The e-mail she is talking about is from | 17 Q What are you referring to when you write DJT's Triplex |
| 18 Cathy K. to Mr. Sneddon. Mr. Sneddon didn't send the | 18 in this message? |
| 19 e-mail. | 19 A Mr. Trump's Triplex penthouse, Trump Tower. |
| 20 THE COURT: She's talking about the other earlier. | 20 Q Were you ever asked to assess the value of Mr. Trump's |
| 21 MS. FAHERTY: Counsel, I will go quicker if I can | 21 Triplex apartment? |
| 22 proceed. | 22 A Yes. |
| 23 MR. ROBERT: If you can ask a proper question. | 23 Q Who asked you to value Mr. Trump's Triplex apartment? |
| 24 MS. FAHERTY: It was a proper question. | 24 A Allen Weisselberg. |
| 25 MR. ROBERT: You don't need to raise your voice to | 25 Q In what way or in what manner did Mr. Weisselberg ask |
| K. Sneddon - by Plaintiff - Direct (Ms. Faherty) Page 6618 | K. Sneddon - by Plaintiff - Direct (Ms. Faherty) Page 6620 |
| 1 m | 1 you to value Mr. Trump's Triplex apartment? |
| 2 MS. FAHERTY: I said at the bottom of the first | 2 A He called me on the phone. |
| 3 page that carries over to the top of the second page. I am | 3 MR. KISE: Objection. Vague. |
| 4 going slowly so you can follow along. I can slow it down | 4 THE COURT: Overruled. |
| 5 more if you would like. | 5 A He called me on the phone and asked me if I could give |
| 6 MR. ROBERT: Maybe, if you would, that would be | 6 him a rough, you know, market value of the Triplex. |
| 7 great. | 7 Q Other than asking you for a rough market value of the |
| 8 THE COURT: Just go at a reasonable speed. | 8 Triplex, did he say anything else? |
| 9 MS. FAHERTY: Thank you, Your Honor. | 9 A No. |
| 10 CONT'D DIRECT EXAMINATION | 10 Q What did you say in response to his request to provide |
| 11 BY MS. FAHERTY: | 11 a value for Mr. Trump's Triplex? |
| 12 Q I believe my question was who was Cathy $K$ ? | 12 A I asked if I could see it, and he said that was not |
| 13 A My direct supervisor at TIR. | 13 possible. So I asked if there was a floor plan or any specks |
| 14 Q And in the body of this e-mail it says, "I already | 14 and he said he didn't have any of that information. So I asked |
| 15 valued DJT's Triplex for Allen our 75MM - is that million? | 15 him, well, you know, what size is it. |
| 16 A Yes. | 16 Q And what do you recall did he say to you in response to |
| 17 Q - Triplex listing is in 240 RSB, period. Total square | 17 the question what is that size? |
| 18 footage is 14.5 K including main residence, guest residence, and | 18 A He said I think -- he said it's quite large. I think |
| 19 staff residence, period. As is 5K plus per foot." | 19 it's around 30,000 square feet. |
| 20 Do you see that there? | 20 Q And why would the size of the apartment be information |
| 21 A Yes. | 21 that you need in order to calculate a value for the Triplex? |
| 22 Q Looking at this e-mail, do you recall sending this | 22 A Well, one metric in valuing residential real estate is |
| 23 message on September 19, 2012? | 23 square footage times, you know, the average selling price per |
| 24 MR. KISE: Objection. Improper rebuttal. | 24 square foot. |
| 25 THE COURT: Overruled. | 25 Q Is that a metric you used today in your professional |

| K. Sneddon - by Plaintiff - Direct (Ms. Faherty) Page 6621 | K. Sneddon - by Plaintiff - Direct (Ms. Faherty) Page 6623 |
| :---: | :---: |
| 1 experience? | 1 Allen Weisselberg along to Jeff McConney in this message? Was |
| 2 A It's one metric, yeah. | 2 this a reflection of the phone call you had with |
| 3 Q Did Mr. Weisselberg tell you why he was calling for | 3 Mr. Weisselberg? |
| 4 your input on what Mr. Trump's Triplex would sale for? | 4 MR. KISE: Objection. Leading. |
| 5 A Because we were valuing some of these sponsored units | 5 THE COURT: Sustained. |
| 6 in various Trump buildings. And he called to ask about that | 6 Q This message to Mr. McConney is this a -- what is this |
| 7 process and asked if we could add the Triplex into that process. | 7 a reflection |
| 8 Q And in regard to that call with Mr. Weisselberg and | 8 MR. KISE: Objection. Asked and answered. A |
| 9 after you received a square footage for the apartment, what was | 9 leading question. She just gave the witness the answer. |
| 10 the response you gave to him about how to value the apartment? | 10 Would you like to write it down for him so he can read the |
| 11 A I believe I gave him a range of I think around 4 to | 11 answer bac |
| 12 6,000 a foot at that time. | 12 THE COURT: Objection overruled. |
| 13 Q Okay. Turning your attention back to Exhibit 105 -- | 13 I can't begin to count the amount of times that |
| 14 1052, Plaintiffs Exhibit 1052? | 14 your team did this and I allowed |
| 15 MR. KISE: Your Honor, all of these questions and | 15 MR. KISE: Disagreed completely, Your Honor. This |
| 16 answers relate to communication that this witness had with | 16 is a free fall but, okay. |
| 17 Mr. Weisselberg. Mr. Weisselberg did not testify in our | 17 A I know I spoke to Allen on the phone. I don't recall |
| 18 case. He testified in their case. The purported rebuttal | 18 sending him an e-mail. Jeff might have thought I did. I don't |
| 19 is necessary for, as they say, Mr. McConney's testimony. | 19 remember. It was a long time ago. |
| 20 Nothing here relates to any communication this witness had | 20 MS. FAHERTY: I think that's it, Your Honor. |
| 21 with Mr. McConney or any e-mails with Mr. McConney. This is | 21 THE COURT: That's it? |
| 22 all the witness testifying about communications with | 22 MS. FAHERTY: That's it. |
| 23 Mr. Wiesselberg, the subject of their direct case, could | 23 THE COURT: Okay. |
| 24 have been asked. It's all improper rebuttal. This is just | 24 Any cross-examination of the rebuttal witness? |
| 25 filling the holes back in in their direct case, but this has | 25 MR. ROBERT: Yes, Your Honor. |
| K. Sneddon - by Plaintiff - Direct (Ms. Faherty) Page 6622 | K. Sneddon - by Plaintiff - Cross (Mr. Robert) Page 6624 |
| nothing to do with Mr. McConney's testimony. So that's | 1 Good afternoon. May I proceed, Your Honor? |
| 2 the -- an additional reason why this is improper rebuttal. | 2 THE COURT: Please. |
| 3 THE COURT: Plaintiff, any response? | 3 CROSS-EXAMINATION |
| 4 MR. AMER: It has everything to do with | 4 BY MR. ROBERT: |
| 5 Mr. McConney's testimony that we saw on the screen and we've | 5 Q Good afternoon, Mr. Sneddon. |
| 6 already argued this so I -- | 6 A Good afternoon. |
| 7 THE COURT: Objection overruled, but incorporate it | 7 Q In answering Miss Faherty's questions, you used the |
| 8 in the standing objection | 8 word Jeff to refer to Jeff McConney; do you remember that? |
| 9 CONT'D DIRECT EXAMINATION | 9 A Yes. |
| 10 BY MS. FAHERTY: | 10 Q You never met Jeff McConney before, did you? |
| 11 MS. FAHERTY: Can we scroll up to the next e-mail, | 11 A I don't recall. I worked in a different building, |
| 12 higher up in this document, please, Ashley. | 12 different location. |
| 13 Q Okay. There's an e-mail from Jeff McConney to you and | 13 Q I am going to ask you a series of questions this |
| 14 Miss K. It states, "Thanks Kevin. Can you please send to me | 14 afternoon, sir. I am going to ask you to answer them yes or no. |
| 15 the e-mail you sent to Allen." | 15 If you can't, you tell me and I'll rephrase them. Fair enough, |
| 16 And then if we scroll up to the next message dated | 16 sir? Sir, you heard what I just said? |
| 17 Thursday, September 20, 2012, it is from you to Jeff McConney | 17 A Yes. |
| 18 and Cathy K, still the same subject, "at 30,000 square feet, | 18 Q If you don't understand the question, you tell me and |
| 19 DJT's Triplex is worth between 4 K to 6K per foot or 120 million | 19 will rephrase it, okay? |
| 20 to 180 million. You sent that message, correct? | 20 A Okay. |
| 21 A Correct. | 21 Q Otherwise, if you can answer my questions yes or no |
| 22 Q This isn't a forward of an e-mail you sent to | 22 understood? |
| 23 Mr. Weisselberg, right? | 23 A Understood. |
| 24 A | 24 Q So you didn't know Jeff McConney when you worked at the |
| 25 Q How were you forwarding information you sent to | 25 Trump Organization, correct? |

| K. Sneddon - by Plaintiff - Cross (Mr. Robert) Page 6625 | K. Sneddon - by Plaintiff - Cross (Mr. Robert) Page 6627 |
| :---: | :---: |
| 1 A Correct. | 1 Q And during that interview, she explained to you the |
| 2 Q As a matter of fact -- withdrawn. | 2 issue of the square footage of the Triplex, correct? |
| 3 You taken an examination under oath that Miss Faherty | 3 A Ye |
| 4 asked you the questions of a long time ago back in March of | 4 MR. ROBERT: So, Your Honor, I got Triplex this |
| 5 2021; do you remember that? | 5 time. I'm learning. May be the last day of the trial, but |
| 6 A Yes. | 6 I am learning. |
| 7 Q And prior to that official interview -- withdrawn. | 7 Q Prior to Miss Faherty -- |
| 8 That interview on March 4, 2021, that was with a court | 8 THE COURT: Five-minute warning. |
| 9 reporter, right? | 9 Q Prior to Miss Faherty mentioning to you the importance |
| 10 A Yes. | 10 of this $\mathbf{3 0 , 0 0 0}$ square foot Triplex issue you were unaware of it, |
| 11 Q And -- | 11 correct? |
| 12 THE COURT: Hold on. You need to speak closer to | 12 A Yes. |
| 13 the mic, louder, clearer. | 13 Q She told you an important part of the case was you |
| 14 Q And you remember there was a court reporter? | 14 being able to say that you're not the person that came up with |
| 15 A Yes. | 15 the 30,000 feet, correct? |
| 16 Q You promised to tell the truth? | 16 A Yes. |
| 17 A Is this -- yeah. Yes. | 17 MR. ROBERT: Your Honor, this may be a good time to |
| 18 Q You took an oath to tell the truth that day, correct? | 18 take the afternoon break now. I may be able to truncate |
| 19 A Yes. | 19 this a lot. |
| 20 Q Prior to that interview under oath, you had a | 20 THE COURT: Let's meet at 10 to 4. |
| 21 conversation with Miss Faherty, correct? | 21 MR. ROBERT: Thank you, sir. |
| 22 A Yes. | 22 THE COURT: I'll direct the witness don't discuss |
| 23 Q And that conversation was about a month or so earlier, | 23 this case or your testimony or anything related to it during |
| 24 correct? | 24 the break, okay. How about 5 to 4. |
| 25 A Yes. | 25 //I |
| K. Sneddon - by Plaintiff - Cross (Mr. Robert) Page 6626 | K. Sneddon - by Plainiff - Cross (Mr. Robert) Page 6628 |
| $1 \quad \mathrm{Q}$ And that conversation -- and during that conversation, | 1 (Whereupon, the witness was excused from the |
| 2 Miss Faherty explained to you who Jeff McConney was, right? | 2 stand.) |
| 3 A Yes. | 3 (Whereupon, a recess was taken.) |
| 4 Q Because prior to Miss Faherty explaining to you who | 4 COURT OFFICER: All rise. Part 37 is back in |
| 5 Jeff McConney was, you had no idea, right? | 5 session. Please be seated and come to order. |
| 6 A Correct. | 6 THE COURT: I apologize for the delay. Let's get |
| 7 Q Okay. And during that conversation with Miss Faherty, | 7 right to it. |
| 8 she explained to you the theory of the Attorney General's case, | 8 MR. ROBERT: Im done with the witness, Your Honor. |
| 9 correct? | 9 No further questions. |
| 10 A Yes. | 10 THE COURT: Will there be any redirect? |
| 11 Q As a matter of fact, it was the first time you had ever | 11 MS. FAHERTY: No redirect, Your Honor. |
| 12 heard of something called a statement of financial condition, | 12 THE COURT: Everybody is finished. Witness |
| 13 correct? | 13 excused. Thank you |
| 14 A Yes. | 14 (Whereupon, the witness was excused from the |
| 15 Q And Miss Faherty explained to you that part of this | 15 stand.) |
| 16 case had to deal with the statement of financial condition, | 16 THE COURT: Okay. Before we call the next witness, |
| 17 correct? | 17 let's discuss -- he's not here, right? |
| 18 A Yes. | 18 MR. WALLACE: The witness is here, Your Honor. He |
| 19 Q And at that point, she told you based on how the | 19 is an expert. So, if we need to excuse him to discuss |
| 20 interview went she would decide whether to have you come and | 20 defendants' motion. |
| 21 testify under oath, correct? | 21 THE COURT: Just right outside the door. I hope |
| 22 A Yes. | 22 this will be brief. We need to discuss the substance of the |
| 23 Q And then based on that interview, she decided to have | 23 latest letter about this witness's report and its |
| 24 you testify under oath, correct? | 24 admissibility or lack thereof. |
| 25 A Yes. | 25 MR. KISE: So, Your Honor, we submitted our letter. |

1 I'll be brief. I won't go through every point. As Your

Honor knows, to be qualified as an expert, the witness must possess the requisite, skill, training, education, knowledge or experience from which it can be assumed the opinion rendered is reliable. And we cite to the Court the Schechter, S-C-H-E-C-H-T-E-R, case from the First Department and several others.

Mr. Lewis does not possess the requisite qualifications. He's not a certified public accountant. He's never sat for the certified public accounting exam. His accounting degree is -- his accounting degree, in quotes, his Ph.D. is from an engineering school. His Ph.D. is actually in engineering not accounting. He doesn't even have an undergraduate degree in accounting. He has no experience at all practicing accounting, none. He's got no experience preparing, reviewing or using compilation statements. He has got no experience auditing financial statements. He's got no experience preparing or using personal financial statements.

He's a professor of practice with no experience in the practice of accounting. He has no lectures that we can uncover that he's identified relative to compilations of personal financial statements or any of the other issues at issue herein. He has no publications or research relative to compilation personal financial statements or any of the

In the Fortich case, there was a general surgeon offering testimony regarding plastic surgery procedures outside of his field of practice and the Court of Appeals held that that expert doesn't possess sufficient knowledge or expertise to testify outside his or her specialty.

Here, Professor Lewis doesn't even have a specialty. Also, Professor Lewis admits that his materiality test was made up, that he created his own test to determine whether the statements or omissions in the statements of financial condition were material to his readers. And we cite the Court in our letter to specific language where he admits that.
"QUESTION: I just wanted to make sure that that was your test, meaning the materiality test, and not anything that's mandated by or per literature?
"ANSWER: Correct."
MR. KISE: So under Frye, as the Court knows, the techniques have to be, when properly performed, have to generate results accepted as reliable within the relevant community. A test that Mr. Lewis his self-developed mandate is definitionally not supported by GAAP and it doesn't pass the Frye test. It doesn't even attempt to pass the Frye test. A test that he created himself cannot conceivably be one that is generally acceptable in the field of accounting.

So his opinions -- and we cite the Court to a

1 other issues here. in this case. reliable. the functions of brakes.

He has no peer review publications at all. And at least as far as our research indicates, there are zero citations to any of his published works. His most recent publications relate to taxpayer identification numbers. I'm not sure that that has anything to do with any of the issues

In 2021 and 2019, again, these aren't peer review publications. They are just publications about understanding taxpayer identification numbers and the history of taxpayer identification numbers. He's simply offering his general opinion after reading the relative accounting guidance, but where an expert is generally familiar with the subject area but otherwise has no specific training or experience pertaining to that subject area, then the expert clearly lacks the requisite skill, knowledge, training or experience from which it can be assumed he is

The Lessard case, L-E-S-S-A-R-D, the Beeley case, B-E-L - B-E-E-L-E-Y, the Fortich case, F-O-R-T-I-C-H, and those three cases, two of those are the Beeley and Fortich cases are Court of Appeals cases that make this same point. In the Beeley case, there was an accident reconstruction specialist that lacked the qualifications to testify about

Proceedings
Page 6632
number of cases on that point. I believe the Cornell case, curiously enough, no relation, but Cornell 22 NY 3d at 7662, I believe that's a Court of Appeals case, and several other cases that deal with the relevant Frye standard and the proposition that his opinion should be disregarded where he has no authority or standard to cite or support it and he has created his own test.

There are several other matters with respect to his opinions raised in our letters. I won't go through all of them, but in sum and substance, this witness doesn't even come close to possessing the requisite qualifications to testify about the subject matters at issue in this case.
And we would also renew our objection on -- on the rebuttal evidence. It's improper rebuttal evidence.

THE COURT: Do you want to give up and go home?
MR. WALLACE: I will take the answer in two parts. I don't want to give up, but I do want to go home. So, sort of Cornell was mentioned in passing. Professor Lewis is a professor of accounting at Cornell. He directs, he masters --

THE COURT: You don't think so?
MR. KISE: No. He heads the master of -- Master of Professional Studies which, from what I can tell, is a ten-month program for nonbusiness majors and you don't need any minimal GPA to get in. It is intended to be

1 introductory in nature. It is cursory business review course. No. As I said, he is the professor of practice which isn't like Professor Bartov on the tenure track and contributing to the research and development of accounting. He is professor of practice that doesn't even have any experience in the practice of accounting.

MR. WALLACE: As opposed to experience in Israel 40 years ago. Some of the things that I'm hearing here also could have been said about Professor Bartov. He is not a practitioner. In fact, I think you heard from Professor Bartov that there is no materiality test in the literature, that that is not required and Professor Bartov came up with his own based on how he reacted to Professor Lewis's materiality test.

This idea that there's some standard that Professor Lewis hasn't passed is laughable. He's been qualified as an expert in this court.

THE COURT: As a what? In what case by what judge?
MR. WALLACE: It was by Judge Debra James. It was, I believe, in accounting and valuation. He's been qualified as an expert in accounting valuation in multiple cases which is one of the things we were planning to walk him through as we move to qualify him. If Mr. Kise is not particularly impressed with professors of practice or a professor who doesn't have tenure, that's fine. He's now established that
Proceedings Page 6634
and they can explore that further on cross-examination. Heis eminently familiar with the accounting standards. He iseminently qualified to an expert.You know, the slight of hand in their papers are alittle silly. They can claim his Ph.D. is in engineering,engineering systems. He has a concentration in accounting.His doctorate dissertation was in an examination of the useof accounting based risk measures for the valuation ofclosely held businesses. The idea that he's not qualifiedto be an expert is laughable.MR. KISE: So, Your Honor --THE COURT: Quickly.MR. KISE: -- there is a materiality test. WhatProfessor Bartov just testified to today is there aremateriality tests in the literature.THE COURT: Let's not talk about Bartov.MR. KISE: Because it's relevant to what he said.THE COURT: Maybe, I am ignoring that part of what 18
he said. I just want to hear about Lewis. What's hisofficial title?MR. KISE: Professor Lewis, the difference isProfessor Lewis made up his own test. That's different thantaking a test -- taking a -- choices from the availablerepresentations and it is sleight of hand to say that hisdegree -- I got my accounting degree from business school.
engineering degree. I have an accounting degree. This man has a Ph.D. in engineering systems and he claims that it's somehow or another related to accounting as if the Cornell business school wants to pass him off as that as a professor of practice with no experience in the practice, that's fine. But for purposes of qualifying him as an expert on the issues in this case, in this case, I don't know about any other cases, but the issues in this case, he doesn't qualify.

THE COURT: Can we bring him in and question him for five minutes or so?

MR. WALLACE: Why not, Your Honor.
MR. KISE: Then I would have an opportunity to voir dire him then.

THE COURT: Of course.
MR. KISE: Thank you.
COURT OFFICER:
ERIC LEWIS, a witness called by and on behalf of the Plaintiff, upon being duly sworn, was examined and testified as follows:

THE WITNESS: I do.
COURT OFFICER: Please have a seat. Please state your name either home or business address for the record. THE WITNESS: My name is Eric Lewis. I reside at 9
That's where you get accounting degrees from. I don't have

Westview Ct. Clifford Park, New York.

| 21 | A. So on a rotational basis, I teach the a | 21 | While I was a doctoral student, I also accepted |
| 22 |  |  | and taught a full-time appointment at a State University of |
| 23 | ce |  | ork |
| 24 | services |  | your current position, at Cornell, tenure |
|  | Q. Let's talk a little bit about your background |  | eligible? |

A. It is not.
Q. So why would you give up a tenure position for a non-tenure position.
A. So as you hear from my history, I have given up tenure positions multiple times. So I don't really ascribe the value to tenure that maybe some of my colleagues do. I like new ventures and new opportunities. And so, I have never really let tenure be the reason that I don't pursue something new.
Q. And so, why did you decide to pursue the current position at Cornell?
A. So the current position is really interesting.

There was an opportunity, at Cornell, to create new programs. Of course, the students are very bright. And, you know, they challenge me everyday. So, it's just a wonderful thing to teach there. And I have tremendous colleagues.

And, of course, Cornell is a well-known university. It has a lot of resources so that I am very well treated at Cornell. And I am given free reign to create curriculum in ways that I wasn't at other places.

I have created more classes in the graduate program and the undergraduate program at Cornell than probably at all of the other places combined.
Q. Just going back to -- I won't make you go back

Page 6642
through the entire history of your academic appointment.
What were, generally, the subjects you taught throughout those positions?
A. Consistently, I have taught advanced financial accounting. That's the class that has the module on partnerships where we discuss Statements of Financial Condition, personal financial statements in general.
Q. So, you've taught advanced financial accounting throughout your academic career?
A. Yes, right; about 30 years now.
Q. Do you also conduct academic research?
A. Ido.
Q. What are some of the areas that you focus on?
A. So early in my career I was doing research that was, pretty closely, related to my doctoral dissertation. It was business valuation type research, valuing assets that are a little bit difficult to value because they don't have a ready market.

So the first thing that I published post doctoral dissertation was a paper called "Valuing Intellectual Assets." That was published in the Journal of Legal Economics.

I've also published papers on valuing companies that are in cyclical industries, valuing businesses that are sitting on large holding gains, preparing businesses for
evaluation if we're getting ready to sell a business.
In the later years now -- in my current position, it doesn't require me to do research. But I have started to do advocacy type research.

The last few things that I have done have related to representing low income taxpayers in front of the IRS or in tax Court. I just published a chapter for the American Bar Association on that.
Q. And were any of your publications in peer reviewed journals?
A. Yes. So, that journal of Legal Economics that I mentioned is a peer review journal, with a fairly low acceptance rate, which is one of the measures by which in academia we say, "Well, that's a good publication."

Two of the other valuation papers that I mentioned were published in the Journal of Business Valuation and Economic Loss Analysis.

And that's a journal where, after I published the second paper in that journal, in 2009, I was invited to join the editorial board. And I still do serve on that editorial board.
Q. And, is the Journal of Business Valuation and Economic Loss Analysis peer reviewed?
A. It is also peer reviewed.
Q. What are your responsibilities on the editorial
board of that journal?
A. So as a member of the editorial board, I fairly, regularly, receive papers that are candidates for publication in the journal.

And, I am asked to review them for quality, make comments, propose edits and then recommend them to the editor for rejection, review and resubmittal or ultimate acceptance.
Q. In addition to your work on the editorial board, for the journal, have you held any other professional affiliations?
A. So, I keep a loose affiliation with the association of certified fraud examiners. I'm not a certified fraud examiner. But, I use some of publications -- Fraud Magazine being a big one -- so I stay associated with them.

I have been an officer, held leadership positions, in the American Accounting Association which is the academic association for accountants -- mostly who teach at colleges and universities. But, also a few professional accountants.

I have been the president of the northeast region of the American Accounting Association which is the region, roughly, from Maine to Rhode Island. And, around a thousand, a little bit over a thousand, accountants are part of that.

| Lewis | - Plaintiff - Direct/Mr. Wallace Page 6645 |  | - Plaintiff - Direct/Mr. Wallace Page 6647 |
| :---: | :---: | :---: | :---: |
|  | I have also been on the northeast Region Steering | 1 | So if they needed something from our CFO, I want |
| 2 | Committee and have been paper chair. So every year the | 2 | to know that they were getting every bit of information that |
|  | region holds a conference -- the conference rotates from | 3 | they needed. |
|  | Boston to Hartford to Providence -- and somebody has to | 4 | So I worked, in that sense, in that role with |
| 5 | organize all of the academic papers that are going to be | 5 | ose is |
|  | presented, decide who gets to present and who can't present. | 6 | Q. Mr. Lewis, are you being compensated for your work |
|  | It's kind of like a journal review sort of process. I | 7 | on this case? |
|  | managed that process before I became region president. | 8 | A. I am. |
| 9 | Q. Any other associations that you are involved with? | 9 | Q. At what rate are you being compensated? |
| 10 | A. The Institute of Management Accountants. I do |  | A. $\$ 750$ per hour. |
|  | teach managerial accounting and cost accounting. So I'm a | 11 | Q. Approximately, how many hours have you spent on |
| 12 | member of the Institute of Management Accountants as well. |  | this matter sense you were retained? |
| 13 | Q. You're not a CPA; is that correct? |  | A. Approximately, 200. |
| 14 | A. I am not. |  | Q. Have you, previously, appeared as an expert |
| 15 | Q. Do you have any affiliation with CPA industry |  | witness at trial? |
| 16 | organizations? |  | A. Yes, I have |
| 17 | A. I do not. |  | Q. On about how many occasions? |
| 18 | Q. You do? |  | A. I believe this is the fourth occasion. |
| 19 | A. I do not. |  | Q. Fourth occasion? |
| 20 | Q. Okay. Do you, currently, hold any positions that |  | A. Yes. |
| $21$ | involve real world financial reporting? |  | Q. What were the subjects of your prior expert |
| 22 | A. I do. So, I am the current chair of the board of |  | engagements? |
| 23 | the Albany Academies. |  | A. They were business valuation and financial |
| 24 | Q. And what are the Albany Academies? |  | accounting. |
| 25 | A. The Albany Academies are a boy school and a girl |  | Q. Were you qualified, as an expert, in those case? |
| Lewis | - Plaintiff - Direct/Mr. Wallace Page 6646 |  | edings Page 6648 |
|  | school that are a private school in Albany New York, about |  | A. I was. |
|  | 210 years old. | 2 | Q. Were any of those cases in New York State Supreme |
|  | And, I have served on the Board of Trustees for 14 | 3 | Court? |
|  | years. I believe this is my 14th year on the Board of |  | A. They were. |
|  | rustees. | 5 | Q. New York County? |
|  | And I have held positions of audit committee |  | A. Yes. |
|  | chair, finance committee chair and also on the finance | 7 | Q. Do you remember the Judge who was presiding in |
|  | committee, I have been on the subcommittee that managing the |  | that case. |
|  | endowment for the school. |  | A. I believe it was Judge James. |
| 10 | Q. And what is the budget of the Albany Academies? |  | Q. And were you qualified as an expert in that case? |
|  | A. It's about $\$ 18$ million a year. |  | A. Yes, I was. |
| 12 | Q. And, so what was your role again in the budget -- | 12 | Q. Has a Court ever declined to qualify you as an |
| 13 | A. So, I was first the chair of the finance and audit |  | expert? |
|  | committee simultaneously. Then some New York State |  | A. No. |
|  | regulations changed and one couldn't be chair of both. So I | 15 | MR. WALLACE: Your Honor, we move to qualify |
| 16 | chose chair of the finance committee. | 16 | Professor Lewis as an expert in the field of |
| 17 | With the finance committee, I was overseeing the | 17 | accounting? |
| 18 | budget, working with the accountants who prepare the tax | 18 | THE COURT: Accounting generally? |
| 19 | returns for institution, signing those returns -- because, | 19 | MR. WALLACE: It's the same qualification we |
| 20 | the finance chair was also the treasurer of the institution. | 20 | had for Mr. Flemmons. So, the field of accounting. |
| 21 | As the audit committee chair, I would work with | 21 | THE COURT: As we had from Mr. -- |
| 22 | the auditors to understand the scope of their work, how | 22 | MR. WALLACE: Flemmons? |
| 23 | their work was going, whether they were having any | 23 | THE COURT: Okay. |
| 24 | difficulties with the leadership team, getting the | 24 | Mr. Kise, go ahead. |
|  | information that they needed. | 25 | MR. KISE: So, generally, just accounting? |

Q. It's in engineering that's your degree.

THE COURT: Slow down.
Q. It's in engineering?
A. In my opinion, it is in accounting.
Q. I didn't ask what your opinion is. I asked what the piece of paper says. The piece of paper says, "engineering."
A. It says, "Concentration: Accounting." It says, "Administrative and Engineering Systems."
Q. You have no experience preparing, reviewing or using compilation statements in practice, correct?
A. Very brief time in public accounting in the early 1990s.
Q. So, thirty years ago I believe you testified that you were a member of the audit staff not as a CPA, you were like a clerk?
A. I wasn't a clerk. I was a staff auditor.
Q. You weren't a CPA?
A. No.
Q. That's the sole extent of your experience with practical accounting?
A. Well, we discussed what I currently do. And my --
Q. You're a teacher. I am talking about your
profession as a practicing accountant?
A. As practicing accountant, yes.

Page 6654
Q. You are a professor at practice, with no experience in the practice of accounting?
A. Some experience.
Q. The limited experience you described thirty years ago?
A. Yes.
Q. You mentioned some peer reviewed publications.

Describe for me -- what year was the Journal of Legal Economics publication?
A. 2002, I believe.
Q. 2002. What year was the Journal of Business Valuation article?
A. I believe -- there were two. So, I'm trying to do my CV from memory. But, I would say 2007 and 2009 or ten. Somewhere in there.
Q. So, in the last ten years, it's fair to say you haven't published anything, in a peer review journal or otherwise, that relates to personal financial statement or compilations, correct?
A. Personal financial statements and compilations?

Yes, correct.
Q. Your last two publications -- I believe you made reference to this, maybe it is the last three, I have two, one from 2021 -- that relates to understanding taxpayer identification numbers; is that correct?
A. Uh-huh.
Q. And the summer of 2021 ; is that correct; sound about right?
A. Yeah, there are two in there; one of them is effectively representing low income taxpayers and the other is understanding alternate tax ID numbers.
Q. Representing low income taxpayers has nothing to do with the issues in this case, correct?
A. That's correct.
Q. Tell me, again, what, exactly, is a Professor of Practice? Explain that to me.
A. So Cornell has three different tracks for faculty; they have research track faculty, who have a lower teaching load and a very high requirement for producing academic research.

They have the track that I am on, which is the Professor of Practice track. And that has a higher teaching load. It does not carry a research requirement but, it carries a requirement to stay current with professional standards, with current practice.

Because it's the job of those of us who are in the Professor of Practice role to prepare our students, our graduates, to go out and do CPA work, to work in private and public practice.

The third track that Cornell has is what is
ewis - Plaintiff - Voir Dire/Mr.Kise
Page 6656
referred to as the lecturer track. Each of those has ranks. I hold the rank of professor which is the highest of those in the Professor of Practice track.
Q. Do I have it correct that your role as a Professor of Practice is not to prepare students to go out into the world and become CPAs?
A. That's what it.
Q. Even though you have no experience at all practicing accounting?
A. We've discussed some experience.
Q. The time isn't on the staffer.

So how does your experience --
Are you familiar with Professor Godwin

## G-O-D-W-I-N?

A. Yes.
Q. He holds a Ph.D in accounting, a Master's and Bachelor's Degree in accounting and he worked, extensively, for a national public accounting firm.

He is a Professor of Practice, right?
A. Yes.
Q. Would you consider yourself more or less qualified to teach students, to prepare students, to go out into the world and become CPAs then Professor Godwin?

MR. WALLACE: Objection, relevance.
MR. KISE: It is his qualification.

|  | eedings Page 6657 | Proceedings Page 6659 |  |
| :---: | :---: | :---: | :---: |
|  | THE COURT: Sustained. It is not a question |  | requisite skills, knowledge and training. |
| 2 | of whether he's more or less qualified than someone | 2 | He may be a fine administer. It sounds like, |
| 3 | else. It is a question of whether he is qualified. | 3 | om his testimony, that's, exactly, what he is, is he |
| 4 | MR. KISE: Your Honor, we're trying to | 4 | administrators the program and does a great job. And |
| 5 | establish a benchmark and explain for the record and | 5 | he teaches some courses that we'll get |
| 6 | for the Court, hopefully, the differences. | 6 | But, we need to have some benchmark to |
| 7 | The government has proffered this individual | 7 | understand whether or not he's qualified to even have |
| 8 | as an expert. He's just told you that despite the fact | 8 | tle as Professor of Practice so the Court |
| 9 | that he only has what appear to be days -- | 9 | understands what his qualifications, actually, are. |
| 10 | I , probably, have more experience in the | 10 | THE COURT: Perhaps Professor Godwin has 40 |
| 11 | practice of accounting than this witness. I suppose I |  | ars of accounting experience. That's not relevant. |
| 12 | should qualify myself as an expert. | 12 | Objection, sustained. Let's move on. |
| 13 | But this witness has limited experience. | 13 | And please, stop making speeches every time |
| 14 | He's described it for you. And I'm trying to establish | 14 | we have to discuss something. |
| 15 | some foundation, some benchmark as to what Cornell | 15 | MR. KISE: Your Honor, I am not making |
| 16 | believes prepares students to go out into the world to | 16 | eeches. I'm trying to point out, for the record, the |
| 17 | practice CPA. | 17 | point we're trying to make. The government has paraded |
| 18 | So if his got qualifications -- if his | 18 | this individual in here as an expert and -- |
| 19 | qualifications are sufficient, he can recite them. If | 19 | THE COURT: This is a speech. |
| 20 | they're not they are not. I'm just trying to come up | 20 | MR. KISE: We, obviously, disagree. |
| 21 | with some benchmark. | 21 | THE COURT: Proving my point. |
| 22 | MR. WALLACE: Mr. Kise could ask | 22 | MR. KISE: We, obviously, disagree. |
| 23 | factual-based questions without being rude. And he | 23 | Q. How, if at all, does your experience differ from |
| 24 | also -- I don't know why he's asking him to compare to | 24 | Professor Libby at the -- |
| 25 | other faculty members on different staffs. | 25 | MR. WALLACE: Objection. |
| Proc | dings Page 6658 | Lew | - Plaintiff - Voir Dire/Mr.Kise Page 6660 |
|  | This isn't necessary for qualification. I | 1 | MR. KISE: I'm trying to understand how his |
| 2 | don't see how any of this is relevant to whether this | 2 | experience differs. I didn't ask him to compare |
| 3 | witness has information, has knowledge and experience | 3 | hisself. |
| 4 | that is useful to the Court. | 4 | Q. I'm trying to understand how your experience |
| 5 | THE COURT: I'm only ruling on the | 5 | differs, at all, from Professor Libby's. |
| 6 | objection. The question was, basically, how does his | 6 | THE COURT: Objection sustained. |
| 7 | experience compare to another professor -- Godwin or | 7 | MR. WALLACE: Mr. Kise is now questioning |
| 8 | something -- at Cornell. | 8 | the witness. He's not sitting at the table giving |
| 9 | I am sustaining the objection. The question | 9 | speeches. This is -- every objection gets answered |
|  | isn't whether he is more or less qualified than someone | 10 | with an extensive speech. It is inappropriate. |
| 11 | else. The question is whether he is qualified. | 11 | MR. KISE: I'm not sure what it has to do |
| 12 | Q. Are you equally qualified, as Professor Godwin, to | 12 | with me sitting there or coming over here. You had the |
| 13 | prepare students to go out into the world and practice | 13 | same objection over there. I don't know if that |
| 14 | accounting? | 14 | changes my physical locus. |
| 15 | MR. WALLACE: Objection. We're not offering | 15 | VOIR DIRE |
| 16 | him as an expert to go -- objection. Sorry. | 16 | BY MR. KISE: |
| 17 | MR. KISE: The government is offering him. | 17 | Q. Have you published any books in accounting lik |
| 18 | And they have touted the fact that this individual is a | 18 | this book? |
| 19 | Professor of Practice. And they are parading that all | 19 | A. No |
| 20 | around the courtroom that he's a Professor of Practice. | 20 | Q. You used this book in your course materials, |
| 21 | I'm trying to get to the point that he really | 21 | though, yes? |
| 22 | doesn't have to the qualifications even as a Professor | 22 | A. Which book do you have? |
| 23 | of Practice within his own school. He's not there. |  | Q. The Libby book on financial accounting. |
| 24 | We need to have some comparison here to |  | A. I have used it. |
|  | demonstrate that this individual doesn't possess the | 25 | Q. This is your colleague, Professor Libby, correct? |

A. Yes.
Q. You've used that book?
A. I have.
Q. What are you teaching right now? I understand that you are planning to teach an on-line course in managerial accounting in Winter 2024; is that correct?
A. I do that every winter term.
Q. Describe, for the Court, how, if at all, that relates to the issues in this litigation; managerial accounting.
A. That course, specifically, doesn't. The courses I just concluded, in the Fall term, certainly do.
Q. Okay. Is that the course you mentioned, the module, that has a module or partnerships?
A. Advanced financial accounting.
Q. I believe your testimony was there was a mini-pieces on ASC 274, correct?
A. It has a section on it.

THE COURT: Slow down.
MR. KISE: I'm trying to get us out of here.
THE COURT: Well, the reporter has to take
it down whether you want to get out of here or not.
Q. I believe your testimony was that it has a
mini-piece of ASC 274, correct?
A. Correct.
things that they will encounter in an accounting context with regard to those technologies and topics.
Q. I mean, that's all lovely. But, what does it have to do with the issues in this case, from your understanding, about personal financial statements, compilation reports?
A. The advance financial accounting course would have more of that. Within the systems course, we discuss the types of analytics that are performed in different levels of service because, it is an accounting course. So that's built into the discussions.
Q. So maybe -- would you call it, sort of, a drive by associated with the issues; a tangential relationship to the issues in this case?
A. Yes, it's one of the things we discussed.
Q. That course we keep coming back to, that's the one with the module on partnerships, correct?
A. Correct.
Q. The mini-piece. All right.

So, let me ask you, I didn't quite catch it.
At the Albany Academy, where you're on the Board of this school, did you say an $\$ 18$ million budget or $\$ 18$ billion budget?
A. No, I wish; 18 million.
Q. 18 million. Okay. How, if at all, does that experience compare with the multibillion dollar -- analyzing
Q. In the fall term, I looked at several of your course offerings. And what I have come up with are cost accounting and management control, in the Fall 2021, systems in analytics and accounting in the Spring of 2021, cost accounting and management control in the Fall term of 2020, managerial accounting in the Spring term of 2020, managerial reporting in the Fall term of 2019, managerial accounting in the spring of 2019.

I mean, I'm just going back through your course offerings. It seems that that's more of your focus. Is that fair to say; the cost accounting and management controls are more --
A. You have missed a few in there. Those are some of the courses I teach.
Q. Which ones did I miss?
A. Systems and analytics courses that I teach.
Q. Sorry. Systems and analytics accounting?
A. Yes.
Q. How, if at all, does that relate to -- it says
here that the topics include big data, data visualization, optimization tools, block chain and AI.

Maybe it's me, I am confused. How does that relate to the issue in this litigation.
A. Those are all applied in an accounting context to
prepare students, who are going out into practice, for the
the financial statements of a multibillion dollar international real estate empire?

MR. WALLACE: Objection. Does this go to qualification?

MR. KISE: Yes. How does it qualify him to render opinions in that industry?

MR. WALLACE: My objections are to the Court. I'm not asking Mr. Kise to answer a question.

THE COURT: Sorry. I lost the train of thought.

MR. WALLACE: Mr. Kise is responding to me. I am saying my objections are to the Court. We're supposed to address the Court.

MR. KISE: I did address the Court. I'm just standing here next to you, so you feel more close to me. Maybe I should sit over there.

Do we need a read back?
THE COURT: Is there --
MR. KISE: I think there was a question.
THE COURT: Was there an objection to question?

MR. WALLACE: How is it going to qualifications at this point?

THE COURT: What was the question?
MR. KISE: Right. We'll need a read back.

| Lewis - Plaintiff - Voir Dire/Mr.Kise Page 6665 | E. Lewis - by Plaintiff - Voir Dire (Mr. Kise) Page 6667 |
| :---: | :---: |
| THE COURT: Read back, please. <br> MR. KISE: I can rephrase it so we can move. <br> Q. How, if at all, sir, does your experience, on the <br> Board of the private school of Albany Academy, render you qualified to opine about matters relative to the personal financial statements and compilations associated with a multibillion dollar international real estate corporation? <br> A. So I deal with the same accounting issues. Many accounting issues, like, say audits are audits; whether they are the audits of a very small entity or the audits of a more extensive one. A lot of it is scaling. And understanding those issues is important. <br> The audit is that top level of service that an accounting firm offers, in terms of assurance, in compilations are at the bottom. <br> Q. You don't perform any audits? <br> A. I do not. <br> Q. You haven't since 30 years ago when you were an audit staff, correct? <br> A. That's correct. <br> Q. I'm not sure you answered my question. How does your service -- strike that. Is it your position that anyone with any background in accounting is qualified to render opinions in a case like this; involving a multinational, multibillion | CROSS-EXAMINATION <br> BY MR. KISE: <br> THE COURT: You're completely misinterpreting, mischaracterizing. He had a very, very varied career. <br> Witness, would you agree? You have done a lot of different things? <br> THE WITNESS: I agree. <br> THE COURT: Mr. Kise, please don't ask him as to each thing he did. How does that help you? I'm no assuming that everything he did qualifies him as an expert. He answered your question. The -- but I'm not allowing -- is it your position that anybody that knows anything about accounting can be deemed an expert. That's a question for a judge. Not for a witness. <br> MR. KISE: Okay, Your Honor. What I am trying to get to is not whether every piece of his background qualifies him as an expert. I'm trying to find out whether any piece. See, we're on the same page for once, last day of trial, maybe. We are on the same page. Any aspect of his background. So far, the only thing I've heard -THE COURT: I don't need a speech. <br> MR. KISE: Any piece. <br> THE COURT: Let me suggest this. Finish the voir dire. Ask him questions, then you can make a speech. MR. KISE: Okay. |
| ```Lewis - Plaintiff - Voir Dire/Mr.Kise Page 6666 dollar real estate empire? As long as you have some walking around understanding of accounting, that's sufficient for you to be an expert in your opinion? MR. WALLACE: Objection. We're not asking this witness to opine on his own qualification. MR. KISE: Yes. THE COURT: Objection sustained. It's a silly question. MR. KISE: It is not a silly question. Does he believe himself qualified? I am trying to explore the limits of his qualification in his own mind. If this witness just testified that his service on the board of a private school with $18 million budget -- THE COURT: You are completely misinterpreting, mischaracterizes. (Whereupon, the following proceedings were stenographically recorded Shameeka Harris.)``` | E. Lewis - by Plaintiff - Voir Dire (Mr. Kise) <br> Q So the master of professional studies program you mentioned that. That's a ten-month program, correct? <br> A It is a one year program, yeah. <br> Q Ten months? With four modules in ten months? <br> A Yes. <br> Q It's for nonbusiness majors? <br> A No, it is -- the master of professional studies in <br> management, yes. It's for students who majored in something <br> other than business and then want a graduate business degree. <br> Q And is that program designed for a focus on accounting? <br> A No. <br> Q Okay. <br> MR. KISE: Just give me one minute, Your Honor. <br> I'm making sure I covered all of these. <br> THE COURT: Sure. <br> MR. KISE: Nothing further, Your Honor. Thank you. <br> We can give the speeches tomorrow morning, perhaps, or do you want them tonight? <br> MR. WALLACE: Your Honor, we renew our request to qualify Professor Lewis as an expert in the field of accounting. <br> THE COURT: I don't see the need for a speech, <br> Mr. Kise. Do you want two minutes or something, go ahead. <br> MR. KISE: I will do less than two minutes, Your <br> Honor. Again, the witness placed on his own testimony the |

1 only thing he identified that he is even remotely relevant
in his experience to testify as an expert in this case, I mean, I am sure that he does a wonderful job for Cornell in the areas that he teaches and practices in. That's not the question. The question is whether he's qualified to render opinions in a case of this nature with these issues. And the on thing in his background, the only thing he has mentioned is one module in a course that he teaches on a rotational basis which, in his own words, contain, quote, a mini piece on ASC 274. The rest of his experience is broad but irrelevant in the accounting sense, and it is no different than a general surgeon coming in to provide the Court testimony upon plastic surgery. They cut me off that might be a reason.

So, Your Honor, his qualifications, while they may, again, render him qualified in a different accounting context, in this case, they've -- the Government has identified absolutely nothing. In the last ten years, he has no publications. His service on the board of a private school, while admirable, is irrelevant and immaterial to his qualifications here.

The journals that he's mentioned that are peer review journals, although we can locate no citations to his publication, are from more than a decade ago. Anything that he's published recently, peered review or otherwise, relates

## E. Lewis - by Plaintiff - Voir Dire (Mr. Kise)

Page 6671
if it seems that this particular -- the witness's particular expertise in accounting would not cover that and, obviously, I'll give whatever weight I want to give to his opinions. So I think --

MR. KISE: Your Honor, just one point for the record, this is precisely my point, cost accounting is a completely different field. So you're saying he is teaching courses in accounting, yes. He may be great at cost accounting. I took cost accounting. I hated cost accounting. It has nothing to do with personal financial statements. It has everything to do with how management, cost factors. It is accounting but it is no different. At all events, you deemed him qualified over our objection and we'll -- we will take it up on question by question basis as you direct.

MR. WALLACE: I am just going to say I really hope we don't have question by question because we just heard from days from a professor at NYU who says NYU doesn't teach ASC 274. The issue is the field of accounting. Your Honor, I -- given the hour, should we start the substance of this testimony tomorrow morning.

THE COURT: Yes, at 10 o'clock.
MR. WALLACE: Thank you, Your Honor.
THE COURT: And I'll direct the witness, witness, witness don't discuss this case or your testimony or
E. Lewis - by Plaintiff - Voir Dire (Mr. Kise) Page 6670

1 to taxpayer identification numbers involving representations of low income taxpayers. Again, while that's admirable, it is completely irrelevant and immaterial to the issues in case and it does not render him even remotely qualified.

It is as if saying, as I mentioned before, because I have an accounting degree that I obtained 30 years ago, four years ago now, that I am somehow qualified to render opinions in this case. It's beyond absurd that the Government would proffer this witness when right at Cornell they have Professor Livy (Phonetic) who would be arguably qualified sitting in the office right next to this individual.

So, the reason clearly that they brought this witness in here is because there's not anyone in the actual recognized profession that would come in and sustain the opinions that they're asking of the witness. So he is not qualified and his -- it does have nothing to do with, A, the trier of fact.

THE COURT: Mr. Kise, in your case, accountings law was laws game so you've probably made the right career choice. Mr. Kise, you're asking him about all of these courses, managerial accounting. I don't know, whatever else accounting, everything but something accounting. It sounds like accounting to me. I hereby deemed him an expert but, obviously, the defendants can object to particular questions

# In The Matter Of: <br> People of The State of New York v. Donald J. Trump, Et. Al. 

## Professor Eric Lewis

December 13, 2023

Supreme Court State of New York - Civil Term
60 Centre Street - Room 420
New York, New York 10007
(646) 386-3012

SMHarris006@gmail.com

Original File 121323 Trump.txt
Min-U-Script® with Word Index

expert discovery.
A. I believe -- the depositions were in the original document.
Q. They are not listed but, were there depositions that you reviewed?
A. Yes.
Q. What depositions did you review?
A. Donald Binder, Jason Flemmons, Frederick Chin, Eli

Bartov. A few others. But, there was -- there were depositions and then there were trial transcripts. So, that was kind of a combination.
Q. We'll get to those in a moment.
A. Probably Weisselberg. I don't know if that was a deposition or a --
Q. Do you remember reading testimony from Mr. Weisselberg?
A. I do.
Q. Did you review the summary judgments in this action?
A. I did.
Q. Have you reviewed materials from the trial record in this action?
A. Yes.
Q. What materials, from the trial record in this action, did you review?
A. City trial transcript from testimony.
Q. From what witness do you recall you reviewed trial transcripts?
A. I recall Mr. Weisselberg, McConney, Birney, Hawthorn, Haigh, of course, Flemmons, Chin, day one of Bartov. Those are the ones that come to mind.
Q. You were also in the audience for the second day of Mr. Bartov's testimony?
A. Third day. I think I missed day two in there.
Q. I would like to focus, primarily, on the testimony of Mr. Flemmons today.

Professor Lewis, did you review Mr. Flemmons testimony concerning ASC 274 ?
A. I did.
Q. Just to reorient us, very briefly, what is ASC 274 ?
A. ASC 274 is the portion of the -- ASC is Accounting Standard Codification. It's the portion of the accounting standards produced by the FASB that governs and determines how personal financial statements are presented.
Q. I'm going to hand you a copy of a document that's already in evidence.

MR. WALLACE: Just for ease of reference, this is a document that has been marked as Plaintiff's Exhibit 1609.
Q. Professor Lewis, do you recognize this document?
A. Yes. This appears to be, at least -- I would have to look through it but -- ASC 274.
Q. If you want to take a minute, feel free to flip through it.
A. Yeah. Yes, this is ASC 274 in written -- in printed form.
Q. If I could direct your attention to page 2 of 21 in this document, under the heading "Basis of presentation of personal financial statements" -- actually, let me stop there for a moment.

What is a basis of presentation?
A. It's really quite like it sounds. It determines how -- in this case, elements within the Statement of Financial Condition are going to be presented. It gives a description of the definition that's going to be used.
Q. And, where is the basis of presentation for personal financial statements to be found in this document?
A. This is --

MR. KISE: Objection, your Honor. We have now gone from just background and context of his generally view to matters which, clearly, could and should have been presented in their direct case.

This is going through the standards of ASC
274, how they apply, what they are. There's no reason

1 that this should be presented on rebuttal.
MR. WALLACE: Yes, there is.
MR. KISE: This witness shouldn't be allowed to testify about general items with respect to the standards. If he's rebutting something specific, let him rebut something specific.

As you know, we don't think that any of his testimony should be admissible on rebuttal. But, certainly, here we're now getting into sort of -- as the witness just did -- narrative on "What the standard is." And the next question is going to be "How does this work." The questions asked. So none of this is proper rebuttal. And, we would object to it.

THE COURT: Overruled without prejudice. I am waiting to see where it goes at this point.

MR. WALLACE: Do I need to explain then. Because, there is a broader explanation. We didn't put in any evidence of ASC 274. The defendants did. And this witness is responding to that.

MR. KISE: Your Honor, that's exactly the point. They had the obligation to introduce that evidence as part of their case and chief. That's the governing standard.

And if they wanted to demonstrate that they had proven therapy case in accordance with the
E.Lewis - Plaintiff - Direct/Mr.Wallace

Page 6682

1 governing standard, then they should have done that in
governing standard, then they should have done that in their case.

They can't wait -- back to the Court of Appeals cases. They can't lay and wait and see what we do and then respond to it.

Just because the evidence is contradictory to our evidence doesn't make it rebuttal evidence. It's still evidence that was necessary to be presented in their case and chief. Because, that is the governing standard as they admit -- freely admit as this witness testified. This is the standard that applies.

As part of their prima facie case, they would need to establish that we violated this standard in some shape, form or fashion.

If they didn't do it in their prima facie case, it's too late to bring in a witness to say, now, that we violated it. They would have had to have done that in the prima facie case.

THE COURT: If they had to do that in the prima facia case or "prima facia case" and they didn't and you moved for a directed verdict then, I should have granted it. But I didn't because, I didn't think they had to.

Now, commonsense tells me that if you bring in something in defense case that they haven't
mentioned, they have the right to rebut it. That's
what a rebuttal witness is. So, overruled.
Mr. Wallace if you want to --
MR. WALLACE: I will just proceed with my exam, your Honor, if that's okay.
Q. Mr. Lewis, I believe the question that was pending, prior to the objection was, "and, where is the basis of presentation for personal financial statements to be found in the document?"
A. So, you will see it there underlined and highlighted, not by me or you, but by the FASB in 274-10-05-2.
Q. The underlined highlighted language you are referring to is?
A. Estimated current value.
Q. Can you read the sentence that includes that highlighting into the record?
A. The primary focus of personal financial statements is a person's assets and liabilities. The primary users of personal financial statements normally consider estimated to current value information to be more relevant for their decisions than historical cost information.
Q. Professor Lewis, I'm going to direct your
attention to Exhibit 1715 which is already in evidence. I don't know that you are going to need to have a copy of it
though. If we could turn to page two. Is this the links definition of estimated current value you were referring to in the passage you just read?
A. Yes. In the codification -- the digitized codification that was --

THE COURT: It was "yes" or "no," question.
The answer was yes.
A. Sorry.
Q. And so, could you tell us, could you provide for the record, what is the definition of estimated current value?
A. Should I read it?
Q. Sure.
A. For an asset, the amount at which the item could
be exchanged between a buyer and seller each of whom is well-informed and willing and neither of whom is compelled to buy or sell.
Q. Could you explain for us, in your own words, what estimated current value means in connection with the preparation of a personal financial statement?
A. So --

MR. KISE: Objection. In his own words or the words on the page or in conjunction with the authoritative guidance that's included in the ASC 274?

THE COURT: You want it in his own words?

MR. WALLACE: Correct. That was the question.

THE COURT: Okay. I'll allow it. I am still waiting for how this is a rebuttal. Obviously, I will give you some leeway.

One way to approach this, I would think, would be to tell us all what you're rebutting and then rebut it. But I will allow you, again, some leeway.

MR. WALLACE: Fair enough, your Honor. I will get there momentarily.
Q. So, again, could I ask, Professor Lewis, in your own words, what is --

MR. KISE: Just to be clear, your Honor, just on that last point, we have a standing objection as to this entire line of questioning with respect to it being improper rebuttal. Just so I don't have to keep interrupting because, I know that bothers Mr. Wallace.

THE COURT: I hope the rest of your staff takes note of the idea of a standing objection. I have been sort of holding back on this one but, the redirect of Bartov, I believe, arguably, opened the door to all sorts of rebuttal. So we'll keep that for what it's

Continue.

MR. WALLACE: I will try to move through this, expeditiously, your Honor.
Q. Professor Lewis, could you please explain for us, in your own words, what estimated current value means in connection with the preparation of a personal financial statement?
A. So estimated current value is -- because it's the basis for presentation, it's the top of the hierarchy of this standard.

So any candidate quantitative result for estimated current value needs to be measured against this definition. FASB created this rational measure against which any quantitative result can be then measured as a final step to determine whether, in fact, an estimated current value has been arrived at.

MR. KISE: Objection, Your Honor. This is clearly now the province of their direct case. This is, exactly, their theory. This has been their theory all along. You heard it from prior to summary judgment.

Now they're coming in, for the first time, on rebuttal and introducing a witness to support the core theory in their case.

This is wholly improper -- wholly improper -that they can bring in, on rebuttal, something that
they clearly had to have done in their case and chief; irrespective of whether the defense introduced evidence on it.

It doesn't matter whether we introduced evidence on it. That doesn't open the door to rebuttal because we introduced evidence on it.

Because we established our defense doesn't forgive them for failing to carry their burden in the first instance.

What this witness just testified to is their core position. That is not rebuttal. That is their core position.

There is no case law, of any kind, that supports the introduction of this sort of testimony on rebuttal.

THE COURT: I will rest on what I said earlier, which I think summed it up very well if I say so myself.

I do have a different objection of sorts, the question was, "What does this mean in your own words?" It's so clear. I must have learned it in accounting 101 in law school.

I think I've said, maybe once, I am so used to cases where the objection is "the document speaks for itself." Here, the document speaks for itself.

And, frankly, I didn't really get much out of that last answer.

MR. WALLACE: Sure. And your Honor, I appreciate that. And in fact, I'm taking the criticism.

Some of this about the GAAP was undisputed on summary judgment and is in the record. I am laying a foundation for how Professor Lewis was going to respond. I was, literally, about to get the testimony from Mr. Flemmons that he is going to respond to.

THE COURT: Let's do it.
MR. WALLACE: I seem to be getting interrupted quite frequently.
Q. Professor Lewis, as part of your view of

Mr. Flemmons' testimony about ASC 274, did you consider his testimony concerning estimated current value?
A. I did.
Q. Professor Lewis, if we could put up on the screen an excerpt of Mr. Flemmons' testimony that begins on page 4258 of the record. I am just going to use this to orient you.

Mr. Flemmons is directed to page 13 of ASC 274.
Do you see that?
A. Yes, I do.
Q. If we look down, just a bit, on his answer that
begins on Line 15 , he refers to the standards under paragraph 55-1A.

Are you familiar with that section of ASC 274 ?
A. I am.
Q. Are you familiar with Mr. Flemmons' testimony
concerning ASC 27410 sections 55 ?
A. Yes.

MR. WALLACE: If we could put up 1609 back on the screen.

If we can go to page 13 of 21.
Q. I'm going to just cut through and ask you, what is reflected in section 55-1?
A. Section 55-1, as it's named there, is the
implementation guidance. And it discusses methods that may
be used to create candidates for estimated current value; candidate quantitative results.
Q. And, what does it mean it's the implementation guidance of ASC 274 ?
A. Here FASB has given some instruction as to allowable methods that can be used within the standard.
Q. I believe you mentioned, in your prior response, there's a hierarchy.

Can you explain what you meant that there's a hierarchy in responses.
A. 551 isn't the end of the any analysis because, the

I'm going to strike the answer as I don't understand it. So, without prejudice, I just didn't understand. You're trying to summarize or explain and didn't explain it for me.

So, without -- I'll just deny without prejudice Mr. Kise's objection because, I am striking the answer. I don't understand it. And, I want to. Q. Professor Lewis, could you give us an example, a practical example, of how the hierarchy, that you referred to in your earlier answer and in the answer that was just struck, plays out in the real world?

MR. KISE: Objection; foundation. This witness has no experience in the real world. He's testified to that. He has no experience in the real world. He's testified to it.

MR. WALLACE: He's been qualified as an expert.

MR. KISE: But not in the real world.
MR. WALLACE: That is not what the Judge said.

Your Honor, at this point, he's just disrupting the exam. He's saying the same things over and over again. This is out of order. This is ridiculous.

MR. KISE: It is not out of order. If there
E.Lewis - Plaintiff - Direct/Mr.Wallace Page 6690
definition is important here. If you take a number that results from one of the methods described in 551 , and then don't compare it to the definition, you've, effectively, written the definition out of the standard if you don't say, "I've arrived at a number. Does that number fit this definition of the willing buyer and willing seller of estimated current value."

Failing to do that, you've said, "Hey, that
definition isn't important. I just do one of these definitions and then I am done. And I take the number." When, in fact, the definition is part of the standard. In fact, it is the basis of presentation for the standard.

MR. KISE: Your Honor, I move to strike that answer. That was not responsive. That was just his opinion. He didn't cite to anything in the guidance that speaks to hierarchy. The word "hierarchy" doesn't appear anywhere.

This is just a Professor of Practice with no practical experience talking about how this is supposed to be done in the real world without any citation nothing. It's completely nonresponsive.

MR. WALLACE: Your Honor --
THE COURT: The definition of "estimated current value" speaks -- as I said before -- I believe it speaks for itself. We were going fast here.

E

- Plaintiff - Direct/Mr.Wallace

Page 6692
is a witness that has no experience, in the real world, on any of these issues, of any kind -- none, other than as a clerk back 30 years ago -- then he has no foundation to render the opinion. None.

MR. WALLACE: You've been overruled on that.
MR. KISE: I haven't been overruled on this question.

THE COURT: Objection overruled. I'll take the answer for what its worth. I hope I understand it better this time.

There is also a standing objection. I realize there is general standing objections and there's specific objections. But we understand you don't approve of this line of questioning but, I am allowing it.

MR. WALLACE: Your Honor, I am just going to say, at this point, defendants spent four days going over, quite frankly, extremely repetitive testimony from their expert and we didn't disrupt and you allowed in.

We would like to lay the foundation for what this witness has to say without interruptions from Mr. Kise on every instance. I've asked the witness -That wasn't an invitation for more speeches. MR. KISE: Your Honor, if the witness has a
proper foundation to support the question then, he can get it in. If he doesn't, he doesn't.

THE COURT: You are making the same objection I just overruled. And please, Mr. Kise, try to keep the objections -- I know you have to do what you have to do. Try to keep them to a minimum so we don't break the flow.

And, whether you agree with this or not I
believe I gave a lot of leeway to your witnesses. Agree or disagree.

MR. KISE: Do you really want me to answer?
THE COURT: No. The record will speak for itself, right?

Hopefully, without further interruption,
Mr. Wallace continue.
Q. Professor Lewis, do you have a real world example for how the hierarchy you describe works?
A. It might be helpful to give a practical example that I think whether you have accounting expertise or you don't have accounting expertise you can understand.

Let's say I have a Derek Jeter rookie baseball card from the 1990s, early or mid 90s, and it is part of my personal assets. So I need to establish an estimated current value.

When I bought it, I bought it in a pack that
included some bubble gum and some other cards. So if I look at the cost of that card, it might be ten cents. So the cost basis for my card is ten cents.

But, I can look at recent sales of that Derek Jeter rookie card and see that depending on the card and condition it may be tens of thousands of dollar -- worth tens of thousands of dollars.

And that's another one of these choices. So
choice (c) would be, in 551, would be the cost, the historical cost; which I maybe adjust for inflation between 1995, let's say, or six. And now, it might get up to a dollar.

So, I got a dollar as my adjusted cost basis or I've got tens of thousands of dollars as my recent transactions, similar assets, similar situations. They can't both be the estimated current value. They're not equally valid as estimated current value.

How do I figure out which one is the estimated current value or better? I put them both to the "willing buyer/willing seller test."

I know because, I can look on-line and see what the card is selling for; where the willing buyers and willing sellers are exchanging.

I wouldn't be willing to sell the card for a dollar. I'd get a lot of willing buyers at that price.

But, I know where the willing buyers and willing sellers who are informed by the cards are.

And that's why you have to take the method or methods. You can run as many methods as you would like. But, a result has to be compared to the definition in order for it to be an estimated current value. That's a practical example.
Q. If we could put up trial transcript page 4276 and 4277. Professor Lewis, I would like to direct your attention to an exchange with Mr. Flemmons that begins on 4276 of the trial transcript.

This is at the end of an exchange, with the Court and then with counsel, about the potential magnitude of variations and valuation using the methods laid out in ACS 274.

Are you familiar with this testimony?
A. Yes, I am.
Q. If we could look at the section that begins on line one of 4277 there's a question.
"So even though the values derived from the various methods are very different or could be very different, would using any one of these numbers comply with ASC 274?"
"ANSWER: Yes.
"QUESTION: And even though the values
derived from the various methods could be very different, would using any one of the different numbers still comply with GAAP?
"ANSWER: That's correct. ASC 274 is GAAP. So to the extent that GAAP is the selected convention to prepare values for personal financial statements, one would be complying with GAAP if using one of these methods."
Q. Professor Lewis, do you agree with Mr. Flemmons' analysis?
A. I do not. I agree ASC 274 is GAAP on this. But, based on -- the example that $I$ just gave is a good example of why I don't agree that you can just use one of the methods. And then, you have an estimated current value when you are done.
Q. So, describe in more detail what is the nature of your disagreement?
A. I don't believe you are complying with GAAP just by using one of the methods.
Q. What do you still need to do?
A. You need to compare the result of that method back to the definition of estimated current value.
Q. The definition you are referring to is the willing buyer/willing seller definition?
A. That's correct.
Q. Does ASC -- let me ask -- let me cut through this. Who has, ultimate, responsibility for determining estimated current value?
A. The issuer of the statement.
Q. And, in the examples, you have seen, from this case, who is the issuer?
A. Mr. Trump or the Trust depending on the year.
Q. Who has ultimate responsibility for compliance
with the standards in ACS 274 ?
A. The issuer.
Q. In this case, who is the issuer?
A. Again, Mr. Trump or the Trust.
Q. Okay. I think way can leave it there. If we could move away from the responsibilities of issuer and talk about the responsibilities of the accountant.

Professor Lewis, did you review testimony from
Mr. Flemmons concerning the obligations of an accountant in the course of the compilation engagement?
A. I did.
Q. Just to orient us, could you tell us what
standards govern the work of an accountant in the performance of compilation engagement?
A. These are standards produced by AICPA. The current standard is ARC 80. The standard that was in effect, from 2009 through 2015, was AR 80.

## DIRECT EXAMINATION

## BY MR. WALLACE:

Q Professor Lewis, this is another excerpt of
Mr. Flemmons' testimony. I am going to direct your attention to an exchange that appears at the bottom of page 4381. There is a series of questions. They're withdrawn and then begin on line 24.
"QUESTION: What obligation would the accounting firm have in placing an asset value on the statement of financial condition based on the information that's been provided in the supporting data?
"ANSWER: Well, the accounting firms's obligation is to understand the methods that are being used and consider the appropriateness of those methods, you know, based on the assets that are being valued and ultimately determine whether they are a GAAP compliance method. And to the extent they are not, the standards require them to perform followup inquires, perhaps, include language in their accountants's report if those amounts are reported in the manner that is inconsistent with GAAP."

Do you agree with Mr. Flemmons' opinion here?
MR. KISE: Objection, Your Honor. I just want to note for the record back to the general objection, on the specific obligation, here, specifically. Again, this is subject matter that was covered in their direct case with
E.Lewis - Plaintiff - Direct/Mr.Wallace Page 6698
Q. I believe Mr. Flemmons testified about this. But, are there any substantive differences between AR 80 and ARC 80 that would affect the work performed by the accountants, at Mazars, in compiling Donald Trump's Statement of Financial Condition between 2011 and 2020 ?
A. No.

MR. WALLACE: If we could put up page 4381 and 4382 of the trial transcript.
(Whereupon, the following proceedings were stenographically recorded Shameeka Harris.)

Mr. Bender and I believe with Mr. Kelly.
Certainly, if they had evidence to offer regarding the governing standards and the accounting firm's obligation, that must have been done on their case-in-chief. It is inappropriate rebuttal.

THE COURT: Overruled. It's what your witness testified and they are trying to rebut it.

MR. KISE: But, Your Honor, he testified in response to their case and they -- their case didn't include their expert by their own choice. They had Mr. Kelly talk about this. I believe they had Mr. Bender talk about this and so that evidence was there and Mr. Flemmons testified in response to their case. The fact that they chose not to call an expert in their case isn't the defenses' fault or problem. It's their fault.

THE COURT: They did call an expert, correct? Mr. --

MR. KISE: Not an accounting expert. They called McCarty. McCarty was the expert. Yes, alleged expert.

THE COURT: Can anybody remember what Mr. McCarty was deemed an expert in?

MR. WALLACE: Banking.
MR. KISE: I believe it was banking, Your Honor. I don't think it was accounting. In all events, they should have called this accounting expert particularly on this

1 subject which was clearly covered in their case-in-chief.
THE COURT: You are still making the same basic objection. It should have been in their direct case. I don't think it had to be. The law of the cases it didn't have to be. Let's move on. Objection overruled.

MR. KISE: Can we get a read back of the question, please?

MR. WALLACE: No, it was an objection to the answer so...

## CONT'D DIRECT EXAMINATION

BY MR. WALLACE:
Q You did not agree with Mr. Flemmons in this analysis? THE COURT: That's leading.
Q To re-orient us to a question that was interrupted, do you agree with Mr. Flemmons' analysis?

A There are a lot of pieces and opinions, lots of and's in there but in general I do not.

Q Well, we can take it in the pieces. Why don't we start with the section you agreed that an accounting firm performing a compilation has an obligation to understand the methods that are being used?

A Yes.
Q What does it mean that they have that obligation?
A It means that as part of a client acceptance process,
25 the firm goes through, do we understand the framework that we're

## Professor Lewis - by Plaintiff - Direct (Mr. Wallace)

Page 6702
being asked to engage and do we understand the methods that the client, the issuers are telling us that they are using to abide by, to comply with the framework. They have an obligation to do that.

Q Okay. Move down. Do you agree that an accounting firm performing a compilation has an obligation to consider the appropriateness of the methods being used by the issuer?
A Only to the extent that they are among the allowed methods.
Q Looking next, do you agree that an accounting firm performing a compilation has a obligation to ultimately determine whether the methods being used by the issuer are a GAAP compliant method?
A No.
Q Why not?
A Because GAAP compliance is the responsibility of the issuer.
Q And is that responsibility spelled out anywhere in the performance standards?
A It is.
Q And where would you find this?
A So, if ARC 80, there are two places where it is kind of
right up front in that document. It is sections 2 and 4,
paragraph 2 and 4.
Q Can we pull up -- I have a spare copy. It is already
in evidence, Defendant's Exhibit 26.
Professor Lewis, do you recognize this document?
A Yes, this is ARC Section 80.
Q And so what are the sections you're referring to?
A These are paragraphs 2 and 4.
Q And could you just read paragraph two into the record?
A Sure.
"Because a compilation engagement is not an assurance engagement, a compilation engagement does not require the accountant to verify the accuracy or completeness of the
information provided by management or otherwise gather evidence to express an opinion or a conclusion on the financial statements."
Q And what is the significance of that language?
A This sets the foundation for the relationship between the issuer, the client and the accountants.

Q I believe you said the other -- what was the other paragraph you --

A Paragraph four.
Q And that's under the heading objective?
A It is.
Q Could you read that into the record, please.
A Yes. That's a long one but, yes.
"The objective of the accountant in a compilation engagement is to apply accounting and financial reporting

Professor Lewis - by Plaintiff - Direct (Mr. Wallace)
Page 6704
expertise to assist management in the presentation of financial statements and report, in accordance with this section, without undertaking to obtain or provide any assurance that there are no material modifications that should be made to the financial statements in order for them to be in accordance with the applicable financial reporting framework."
$Q$ And what is the impact of that language?
A Again, that's reinforcing that the accountants are not in a compilation obligated by the these performance standards to determine whether the statements materially comply with GAAP. GAAP is the financial reporting framework here.

Q If you could turn to page five of this document and this time I'll read this into the record. I just want to direct your attention to the heading, "The Accountant's Knowledge and Understanding of the Entities Financial Reporting Framework." It's item 12 and it states, "The accountant should obtain an understanding of the applicable financial reporting framework and the significant accounting policies intended to be used in the preparation of the financial statements."

What is the significance of -- what does that paragraph mean?

A So this reinforces what we read essentially in paragraph two. So it's saying here's what the accountants' responsibilities are. This is what they -- this is what they need to do.
$1 \quad$ Q And does anything in this paragraph affect the issuer's ultimate responsibility for the contents of the financial statement?
A No.
MR. KISE: Objection. Leading. THE COURT: Sustained.
Q Does this paragraph have any affect on the issuer's responsibility for the contents of the financial statement? MR. KISE: Same objection. Leading. THE COURT: Sustained.
Q How, if at all, does this paragraph have an affect on the issuer's ultimate responsibility for the contents of the financial statement?
A It has no affect.
THE COURT: That technique worked for Mr. Suarez.
It can work for you too.
MR. KISE: That's why I didn't object.
Q If we look at the next section under the heading
compilation procedures, there are four paragraphs number 13 through 16. How if, in any way, does the guidance in this section affect the issuer's responsibility for the contents of the financial statement?
A It does not change the issuer's responsibility. The entirety of ARC 80 is the accountants' responsibilities. The issuer responsibilities are not impacted by it.

Professor Lewis - by Plaintiff - Direct (Mr. Wallace)
Page 6706
Q What obligation do these compilation procedures impose on an accounting firm with respect to ensuring compliance with GAAP?
A No responsibility for ensuring compliance with GAAP. That goes back to paragraph two.
Q Are there any circumstances under which an accounting
firm might need to address GAAP compliance in a compilation engagement?
A Yes.
Q And what would those circumstances be?
A If while doing the compilation, not doing extra work or investigation, but during the compilation something comes to the attention of the accountants, they have that it could be a GAAP departure. It could be a problem. They have the responsibility to bring that issue to the issuer, to the client.
Q What comfort, if any, should an issuer take from the fact that an accountant performing a compilation engagement did not identify a specific GAAP departure?
A Absolutely none.
Q What comfort, if any, should -- I'm sorry. Withdrawn. What comfort, if any, should the user of a financial statement take from the fact that an accountant performing a compilation engagement did not identify a specific GAAP departure?
A Same. None.
$Q$ If we could put up on the screen a demonstrative that has been marked defendant's demonstrative one and go to page two.

Professor Lewis, do you recognize this document?
A Yes.
Q And do you understand what's being reflected on this chart?
A Yes, I do.
Q And what do you understand as being reflected on this chart?
A On the vertical, the Y axis as it were, there is a level of assurance, what level of assurance is the accountant providing in the various levels of service that accountants can provide with regard to financial statements.
Q I'll just ask do you know who prepared this chart?
A I think this came from Mr. Flemmons' report.
Q I want to ask you about the three boxes on the row
18 marked compilation. Does that -- does the analysis in that row 19 make sense to you?

A Not really. I mean, certainly, the no assurance part 21 makes sense. The fact that the check mark is in compilation and 22 we are down at the bottom of the $Y$ axis and there is no 23 assurance given. But in a compilation, the accountants don't 24 characterize their compilation report, that would go to their 25 report and the character of it.

Professor Lewis - by Plaintiff - Direct (Mr. Wallace)
Page 6708
1 In higher levels of service, really in the audit, they characterize their report based on what they found. But in the compilation, they are not trying to find anything so they can't characterize their findings.

Q When you say characterize findings, you're referring to the boxes that are listed as adverse, qualified, nonqualified; is that correct?

A That's correct.
$Q$ If we can focus on the $Y$ axis, what level of assurance is offered in a compilation engagement?
A No assurance. It's not even considered to be an assurance engagement.

Q And what level of assurance is offered in a review engagement?
A In a review engagement, accountants offer a level of assurance that's referred to as negative assurance where, essentially, they are saying we did some procedures, not extensive procedures, and we didn't find any problems. They are not saying there aren't problems there, it's just we didn't find any. It's called negative assurance.
Q And what level of assurance is offered in an audit engagement?
A In an audit engagement, the auditors offer positive assurance. They are saying in their statement this is what we found.
$1 \quad Q$ And what kind of work is involved in a audit engagement to reach that level of assurance?

A It's very extensive. It's doing things like verifying
the accuracy of supporting documentation, tracing documents back
to source documents, tracing numbers in the financial statements
back to individual transactions, lots of sampling, an extensive
amount of work goes into the audit.
Q And in a nonengagement, what happens if the auditor misses a GAAP departure?

A It is a failure, a performance failure.
Q And in review engagement, what happens if the accountant misses a GAAP departure?
A There it is not clearly a performance failure as long as they completed all of the procedures that are normally part of a review.
Q And what about a compilation engagement? What happens when an accountant misses a GAAP departure?
A They are not responsible for finding GAAP departures, so it is not a performance failure to not find a GAAP departure.

Q What if there was a GAAP departure that was obvious but they didn't catch?
A If it was obvious to them and they didn't catch it, then that is a performance failure by the accountants.
Q Who ultimately makes the decision about which level of
25 review to select?

Professor Lewis - by Plaintiff - Direct (Mr. Wallace)
Page 6710
A The issuer.
Q And in general, is one level of review more expensive than another?
A Yes, the audit is very expensive compared to the compilation.
Q And the standards for the compilation are consistent
with what you reviewed in ARC 80; is that correct?
A That's correct. Those are the standards for a compilation.

Q Are the standards that are laid out in AR 80 and ARC 80
reflected anywhere in the communications between the audit firms
of Mazars and Whitley Penn and the Trump Organization? MR. KISE: Objection. Leading. THE COURT: Well, it is leading but it is a preliminary. Is there any way to rephrase so I don't have to rule.

MR. WALLACE: Okay.
Q Professor Lewis, how, if at all, are the standards laid out in AR 80 and ARC 80 reflected in the communications between accounting firms Mazars and Whitley Penn and The Trump Organization?
A They can be found in two places. So they're in the
23 engagement letters between the accountants and the issuer and
24 they are also in the management representations letter where the
25 issuer acknowledges those -- the responsibilities of the various

Page 6711
1 parties.
Q Anywhere else?
A So this is a communication in general not necessarily
between those two, but in the accountant's compilation report, they are repeated again.
Q Professor Lewis, are you familiar with Mr. Flemmons' testimony to the effect that it was a red flag that certain
future revenues in the supporting data spreadsheets were not discounted to present value?

A Yes.
Q And why was that a red flag?
A Well, each of the methods allowed under the
implementation guidance in 274 requires that amount to be brought to present value so the amounts to be discounted.

Q And does that constitute a GAAP failure of not bringing future amounts to present value?

A Yes. It's a technical GAAP failure, written right in the standards, written right into the standards.

Q In the course of your report, did you identify any
valuations in the statement of financial condition that failed to discount revenues to present values?

MR. KISE: Objection. In the course of performing his duties, he simply relied on the valuation numbers from others. So this witness have absolutely no basis to make that determination in the absence of testimony from other

1 experts that are not in the trial record at all. Hirsh and
2 Korologos, he based his opinions on those. He has no 3 independent valuation analysis and he didn't conduct any.

MR. WALLACE: It is not a valuation question. It is a disclosure question.

MR. KISE: No, it is a valuation question. In order to determine whether or not there is an adequate disclosure, you have to look at the valuation and make an assessment. The only way he was able to do that is to rely on what other people that the AG spoon fed him and told him. He didn't conduct any independent analysis of any kind and because they've chosen not to call those experts they can't backdoor that into the case.

THE COURT: Mr. Wallace.
Q Professor Lewis, did you independently review --
THE COURT: You're withdrawing the last question?
MR. WALLACE: If I can lay some foundation for the basis of his opinion, but I was moving on to something else. I can lay further foundation if Mr. Kise thinks it is inappropriate because he is relying on other people. It is not the case.

THE COURT: You are withdrawing the last question? MR. WALLACE: Sure.
THE COURT: You say now you're going to lay the foundation. Okay. Go ahead.

Q Professor Lewis, did you conduct analysis in the course of preparing your report as to whether or not values in the statements of financial condition had been discounted to present value?

## A I did.

Q And so did you independently form a view as to whether or not there were valuations in the statement of financial condition that were not discounted to present value?
A Yes, I did.
Q And did you agree with Mr. Flemmons' testimony that there were amounts in the statements of financial condition that had not been discounted to present value?

A I agree with Mr. Flemmons on that, yes.
MR. KISE: Objection. Mischaracterizes
Mr. Flemmons' testimony.
THE COURT: My objection, if this is a rebuttal, why are we asking him if he agrees.

MR. WALLACE: I am going to the next point. My examinations are being continually interrupted so if they make --

MR. KISE: It is continually interrupted based on improper questions and lack of foundation. Your Honor, this witness didn't conduct an independent analysis other than to rely on those two reports. There is no way that he could have conducted a valuation analysis without relying on those
two reports based on the language of his own reports. It is not possible.

THE COURT: I disagree. Overruled.
Q In your view, was the GAAP departure of not discounting amounts to present value disclosed in the statement of financial condition?

MR. KISE: Objection. Leading.
MR. WALLACE: It is a foundational question.
MR. KISE: That's a substantive question, Your
Honor. That's a substantive question.
THE COURT: Can we do -- can we do the Suarez maneuver.
Q How, if at all, were the GAAP departures disclosed in the statement of financial condition?
A The failure to discount was not disclosed in the statements of financial condition.
Q Okay. I'd like to pull up a section of Mr. Flemmons' testimony concerning the use of undiscounted cash flows in valuing golf clubs. If we can pull up pages 4415 and 4416 of the trial transcript.

Are you familiar with this testimony from Mr. Flemmons? A Yes.
the appropriate disclosure of this methodology -- well, strike that. Withdrawn.

If we look at the first question and answer starting at line seven, the question and answer beginning at line seven.
"QUESTION: Was the lack of apparent discounting disclosed by the supporting data to Mazars?
"ANSWER: In my view, it is clear on the face of the -- this document that there is no discounting. Again, with the very remote caveat that is included in some of these values, that my conclusion from reviewing this document would be that there is no discounting applied."

The next question.
"Would professional accounting standards require Mazars to provide guidance to management on the appropriate disclosure of this methodology?
"ANSWER: Yes. Under professional standards, their obligation is to review the support for obvious GAAP departures. I believe Mr. Bender testified to that as well."

Let's stop there. Do you agree with Mr. Flemmons that under professional standards an accountant performing a compilation engagement has an obligation to review supporting documents for obvious GAAP departures?
A So according to the performance, no, I don't.
Q Why not?

Professor Lewis - by Plaintiff - Direct (Mr. Wallace)
Page 6716

## A Because --

THE COURT: He's learning.
A So according to the performance standards, what the accountant has the obligation to review is the financial statements, the final statements. So it says very clearly in their performance standards that they will not verify accuracy of supporting information. So if, on the other hand, if they noticed something without doing an investigation, they have an obligation to point it out to the issuer but they don't have an obligation to review supporting standards for evidence of GAAP departures, even obvious ones.

Q If we continue in his answer, he states, quote, and to me, this constitutes an obvious GAAP departure that the accountants that are performing the compilation would then have duties under professional standards to followup on. I believe I referred earlier to the requirement to perform inquires, resolve the discrepancies either through the form of having adjustments made to apply the discounting in this case or to include the disclosure in the accountant's report.

Stop there. Do you agree with Mr. Flemmons that under professional standards an accountant performing a compilation engagement is required to perform inquires and resolve discrepancies if they identify a GAAP departure?

A If they identify a GAAP departure, the first step is to 25 bring that to the issuer and then that produces a decision point

## based on the issuer's response.

THE COURT: That was a yes or no question.
A Yes, they have some responsibilities.
Q Now, let's focus on the last section. It says, "I will say that we have seen other examples of lack of discounting and Mr. Bender, as I have said before, testified that the absence of discounting he believed was subsumed in the disclosure in the accountant's report related to the lack of using ECV for a substantial part of the assets reported in the statement of financial condition."

Professor Lewis, do you have an understanding of what opinion Mr. Flemmons is offering here?
A So, I don't. The way I read it he is not actually offering an opinion. He's relating what he believes Mr. Bender testified to.
Q Well, it says as I said before. Let's see if some additional context might be helpful. If we can pull up pages 4339 and 4340 from the transcript. This is another excerpt of testimony from Mr. Flemmons. And as you can see, this is a section at the top addressing the 2014 statement of financial condition in line four. Mr. Flemmons is then asked on line 17:
"QUESTION: And what does it mean in a GAAP departure, does -- excuse me, in a GAAP disclosure when it says that, quote, several of the values have been based on future interests that in some instances are not for fixed or
standards.
Q That's in ASC 274?
A ASC 274-10-35.
Q If we can -- so, if we could put up, split screen,
Plaintiff's Exhibit 1609 and turn to page seven. If we look toward the top of the page, there's a heading that reads, "future interests in a similar assets."

This is the section you are referring to, Professor Lewis?

A It is, yes.
Q I am happy to read this one into the record. It is 3511 "Nonforfeitable rights to receive future sums that have all of the following characteristics shall be presented as assets at their discounted amounts. A, the rights are for fixed or determinable amounts. B, the rights are not contingent upon the holder's life expectancy or the occurrence of a particular event such as disability or death; $\mathbf{C}$, the rights do not require future performance of service by the holder. Under this provision of ASC 274, how is the future interest to be presented?

MR. KISE: Your Honor, I've given Mr. Wallace some latitude. We are so far beyond the bounds of proper rebuttal. All of this, including the SOFC disclosure that he just read into the record, was all the subject of their case-in-chief, the Bible disclosures. I am not sure whether, based on the testimony that he put up, whether

## Professor Lewis - by Plaintiff - Direct (Mr. Wallace) <br> Page 6718

1 determinable amounts and in some instances are based on
21 quoted in the question we were just looking at?
22 A Yes, that's -- that language is the same.
23 Q And are you familiar with this disclosure regarding
24 future interests in the statement of financial condition?
performance of future services?"
I'll stop there. Are you familiar with the
language that's being quoted here?
A Yes. My guess -- I don't want to guess. I believe that comes from Section 35.
Q If we could put up Plaintiff's Exhibit 730. We have a hard copy for you. This is already in evidence. If you could turn to page two of the document. If you look at the fourth paragraph on page two, I'll read it into the record. It states, "Accounting principles generally accepted in the United States of America require that in order to reflect amounts to be received in the future at estimated current values the rights must be nonforfeitable, fixed and determinable, and not require any future services. As discussed in notes 3, 4, 5, and 6, several of the values expressed have been based on future interests that in some instances are not for fixed or determinable amounts and in some instances are based on performance of future services."

Do you see if this is a section of the SOFC that was quoted in the question we were just looking at?
A Yes, that's -- that language is the same.
Q And are you familiar with this disclosure regarding future interests in the statement of financial condition?

Professor Lewis - by Plaintiff - Direct (Mr. Wallace)
Page 6720
1 we're rebutting Mr. Flemmons' testimony or Mr. Bender's 2 testimony because both of them testified the same way. 3 That's what the provision that Mr. Wallace just read. So 4 are they now using their expert on rebuttal to rebut what 5 Mr. Bender said about these disclosures or about what

Mr. Flemmons said? I mean --

THE COURT: You said they said the same thing.
MR. KISE: How do you rebut your own witness? How do you use an expert -- this is the whole reason that this rebuttal is so highly inappropriate because we're wandering off now. Are there no limits of any kind? It appears in this courtroom there are no limits of any kind on what they can do on rebuttal. Let's just -- let's ask whatever question we want even though this was all fully available to them. Under the guise of rebuttal now, we are just back filling, back filling and back filling a giant hole in their case. It his highly objectionable and respectfully just flat reversal. Everything is not but this certainly is.

MR. WALLACE: It is only reversible if the judge relies on it.

THE COURT: I'm lost. And I'm not sure -- again, this may not be Mr. Kise exact objection but you jump from A to $B$ to $C$ and can you put this together and tie it more to Flemmons' testimony?

MR. WALLACE: I am trying to get there, Your Honor.
E.Lewis - Plaintiff - Direct/Mr.Wallace Page 6722

This is an insane standard. I am being continually interrupted. I would like a chance to just present the witness, and we are getting to the point eventually. I guess I need another speech before we continue.

MR. KISE: It is not another speech and petulant and outburst don't really play well in a courtroom. I am not sure you know that, Kevin. The bottom line is I am just as confused. I didn't add that because I figured no one would listen. There is just no guidepost here at all. We are just wandering around in the abyss of letting this witness testify about anything. It is such an improper rebuttal. I don't see how they are allowed to continue.
(Continued on next page)
now been asked what the purpose is and I'm going to say it.

MR. KISE: Again, your Honor, they're rebutting their own witness? They're rebutting Donald Binder with this witness?

THE COURT: Well, it doesn't really matter whether they're rebutting one of their witnesses and one of your witnesses, as long as they are rebutting one of your witnesses.

MR. KISE: Oh, as long as we can just rebut anyone, let's just pick Donald Bender's testimony and allow this witness to rebut their own witness.

THE COURT: I believe there are some strictures and limitations on rebutting your own witness. But, let me ask the plaintiffs a question.

Was Mr. Bender, whom you called, a friendly or a hostile witness?

MR. WALLACE: We did not cross examine him as a hostile witness. He was someone we called on our case and chief.

THE COURT: So are you impeaching your own witness?

MR. WALLACE: We didn't feel the need to as part of our case and chief. They decided to present an expert to say that it was correct. But, we are

THE COURT: You can raise that on appeal. Objection, overruled.

And, you can cross examine, Mr. Wallace.
Continue.
MR. WALLACE: I'm trying to find my place again, your Honor. I believe we read into the record this section of 3511 .
Q. Are you familiar with this section,

Professor Lewis?
A. I am.
Q. So under this provision of ASC 274, how is a future interest being presented?
A. At discounted amounts as the first sentence says.
Q. Based on the disclosure in the SOFC that we just looked at, in what way does the inclusion of future interests fail to comply with GAAP?

MR. KISE: Your Honor, how does that rebut
Mr. Flemmons' testimony? He's asking about the SOFC and whether or not the SOFC complies with this standard. That's not rebuttal. That's just testimony.

MR. WALLACE: Disclosure has nothing to do with discounting the present value. So, to the extent that that's the opinion of Mr. Flemmons and that's the opinion of Mr. Binder, they are wrong. And we're trying to get the witness to explain that. So, I've
rebutting what Mr. Flemmons said.
MR. KISE: This is the whole point. This was in their case and chief. If they thought Mr. Bender's testimony wasn't correct then, in their case and chief, they should have called this witness to explain that and fix it in their case and chief not backfill it out.

THE COURT: Objection overruled. I want to hear what they have to say. That's my general principle at trials. You know, I want to hear what people have to say. Then, I will do my best to reach the correct solution, resolution. Objection, overruled.

Again, you have a standing objection. You don't like any of this, Mr. Kise. That's clearly understood. And, you will have a chance to cross examine. You will have a chance to argue in posttrial submissions. You will have a chance to argue on appeal if you choose to do so. Let's move on with fewer interruptions.

## DIRECT EXAMINATION

BY MR. WALLACE:
Q. Professor Lewis, does the disclosure that we were looking at delay, in any way, the failure to discount present value?
A. No.
Q. Why not?
A. There is no mention of discounting or present value in the disclosure.
Q. And, future interest and similar assets, do those need to be discounted to present value even if they are included in financial statement?
A. They do.
Q. Does ASC 274 provide any guidance on what kinds of assets are encompassed within the kinds of future interests being addressed in section 3511 ?
A. It does.
Q. Where would that be found?
A. There is a link to it if you have a live document.

But, it's in a much later section. Its down in the fifties.
MR. WALLACE: Okay. If we could open up the highlighted section to show a couple of lines below here please?
A. So there at 55-7.

MR. WALLACE: If we could turn to page 14 of Plaintiffs Exhibit 1609.
Q. If we look at section 55-7, under the heading
"future interest and similar assets" it states, "This
paragraph provides implementation guidance on the
application of paragraph
above; separately carved out. And, they don't fit any of the characteristics.

MR. WALLACE: If we could turn to the trial transcript, pages 4339 and 4340.
Q. If we look at the question at the bottom of page 4339, starting on-line 17 :
"QUESTION: And what does it mean in a GAAP departure does --

MR. WALLACE: I will strike that. We already read that section. I will just go to the answer of that section where Mr. Flemmons says, "Well, again, this is a fairly broad disclosure that could cover a variety of different issues with regard to GAAP accounting.
"I know that one of them that this addresses -- and, this was also consistent with Mr. Bender's deposition testimony -- related to certain assets that were not discounted even though the future cash flows was used as a basis for determining the estimated current value. Um, but I think there are several items that would fall under this umbrella." Q. To the extent Mr. Flemmons is expressing an opinion that the disclosure language we were reviewing, concerning future interests related to certain assets that were not discounted, do you agree with that opinion?

I will stop right there. Is that the section you were just looking at?
A. That's where we were, yes.
Q. It continues, "Non-forcible rights that may have
those characteristics include all of the following (a) guaranteed minimum portions of pensions (b) vested interest in pension or profit sharing plans (c) deferred compensation contracts (d) beneficial interests in trust (e) remainder interests in property subject to life estates (f) annuities and (g) fixed amounts of alimony for a definite future period."

Do you know, one way or the other, if the Statements of Financial Condition, for Mr. Trump, valued any assets similar to what's being described in this section?
A. The only one might be (d) the beneficial interests in trust.
Q. Mr. Trump's Trust was a revocable trust; is that correct?
A. Correct.
Q. In your opinion, does future anticipated real estate developments fit within the category of future interests as that term is used in ACS 274?
A. No.
Q. Why not?
A. Because those are dealt with in the section just

## A. No.

Q. To the extent that Mr. Bender, at his deposition, may have been expressing an opinion that the disclosure language we were reviewing, concerning future interests related to certain assets that were not discounted, do you agree with that opinion?
A. So, I don't know what they tried to do. But, no, it doesn't. It doesn't disclose that.

MR. WALLACE: Nothing further, Your Honor. THE COURT: Any redirect?
MR. WALLACE: Cross.
THE COURT: I'm sorry. How could I forget that.

MR. KISE: Your Honor, given that you've allowed this witness to come in as a rebuttal witness, we had no idea prior to the time he took the stand, exactly, what he was going to say, we would ask the Court for a break so that we can, at least, organize our cross.

THE COURT: Sure. How long a break do you want?

MR. KISE: Hold on one moment.
If your Honor would give us until 11:45. I'm assuming, your Honor, based on your ruling yesterday or our discussion yesterday, you're not allowing us to
call our rebuttal witnesses?
THE COURT: Correct. 11:45, plaintiff, is that reasonable for them to --

How long do you think the cross examination will be?

MR. KISE: We should be done by the lunch break if not before.

THE COURT: Okay. All right. 11:45.
MR. WALLACE: If it is before the lunch
break, no objection then.
THE COURT: That's the important part.
Okay. 11:45, everyone.
MS. FAHERTY: Judge, you need to admonish the witness.

THE COURT: Mr. Lewis, please do not or I order you not to discuss this case or your testimony or anything related to it during the long break.
(A recess was taken.)
(After the recess the following occurred:)
COURT OFFICER: All right, Part 37 is back
in session. Please, be seated and come to order.
THE COURT: Okay. Let's start the cross examination of the rebuttal witness.

Please, proceed.
MR. SUAREZ: Thank you.
E.Lewis - Plaintiff - Cross/Mr.Suarez

Page 6730
CROSS EXAMINATION
BY MR. SUAREZ:
Q. Mr. Lewis, you've been paid about 150,000 in this case so far?
A. That's what I billed. Yes.
Q. That's what you billed?
A. Yes.
Q. That's about 40 percent of the 360,000 a year you make as a Professor of Practice at Cornell?
A. Yeah.
Q. How much were the taxpayers billed for the work of the lady from Kroll that has been sitting here in the audience.
A. I have no idea.
Q. How much has Kroll charged the taxpayer for your testimony in this case?
A. Just my billings I believe.
Q. I'm sorry?
A. As far as I understand, just my billings.
Q. So Kroll is not making a markup on you?
A. No.
Q. How do you know that?
A. They haven't indicated that.
Q. Okay. And how much time has Kroll spent preparing
your opinions in this case?
A. They didn't prepare my opinions.
Q. How much time has Kroll spent assisting you in preparing your opinions in this case?
A. I don't know.
Q. At your deposition, do you recall telling me that you had been retained by Kroll in this case?
A. I do.
Q. Why didn't you disclose that in your initial report?
A. My client, in my view, is the Office of the Attorney of General.
Q. When I asked you at your deposition, you said it was Kroll. So who asked you to change that.
A. I wasn't asked to change it. Really, you pointed it out. So --
Q. Okay. So, it's my fault that you recognized that the Attorney General and not Kroll is your client?
A. I recognize the Attorney General as my client. When you asked who retained me, I didn't take it in a legal sense.
Q. Because you're not a lawyer?
A. Correct.
Q. You don't practice law?
A. That's true.
Q. You don't practice accounting either?

## Q. So then --

MR. SUAREZ: Well, we're just trying to understand here, Judge, what the basis for his statements on the record are today.

THE COURT: That's fine but, don't ask the same question four times Which we already knew from testimony yesterday I believe.
Q. Then, you would say that your work at Cornell, teaching accounting, qualifies you to interpret accounting standards?
A. I teach students how to interpret accounting standards.
Q. Are you aware that your students describe you as the worse professor in the Cornell Accounting program?
A. I understand what rate my professor is in cherrypicking.
Q. And that your students say that your lectures lack any useful content for assignments or professionally, so you don't learn much?
A. Did you pick any good ones for balance?
Q. Yeah. Here's a good one. It says, "It's a good class if you want to chill and not learn much."

Does that count as a good one?
A. I wouldn't say so.
Q. Or how about the one that says, "He doesn't teach.
A. I do not.
Q. Do you know that it is zero?
A. I don't know that it is zero.
Q. But you don't know how many you have?
A. No.
Q. If we pull up ASC 274 -- I just want to clarify
what the basis is for certain statements that you made here in Court today under oath.

And we can do that by --
MR. SUAREZ: Let's pull up the same one that
Mr. Wallace used so there is no confusion.
MR. WALLACE: 1609.
Q. 1609. And here we go. If we can turn to --

Let me ask you a simple question. Would you agree, Professor, that regardless of what method or technique one uses to value properties for personal financial statements, at the end of the day, the resulting value must be the amount at which the asset would be exchanged between a willing seller and a willing buyer, both well informed and neither of whom is compelled to buy or sell?
A. Yes, that's the definition.
Q. That's, actually, not the definition, Professor.

MR. SUAREZ: Let's pull up the definition.
A. Okay.

| E.Lewis - Plaintiff - Cross/Mr.Suarez | Page 6734 |
| :--- | :--- |
| 1 | He only likes to share mid-age crisis life in the class?" |
| 2 | You claim -- |
| 3 | MR. WALLACE: Objection; no question. |
| 4 | THE COURT: You need to ask questions not |
| 5 | make speeches. |
| 6 | Q. Is that reflective of your experience practicing |
| 7 | accounting? |
| 8 | A. Absolutely, not. |
| 9 | Q. All right. So, in connection with your practice |
| 10 | of accounting, as a teacher at the Cornell school, you |
| 11 | haven't published any works related to ASC 274, correct? |
| 12 | A. Correct. |
| 13 | Q. In fact, when you go to Google scholar, you can't |
| 14 | even find the name Eric Lewis; is that right? |
| 15 | A. That's not right when I go there. |
| 16 | Q. In reference to you I should say. There are other |
| 17 | "Eric Lewis." |
| 18 | A. I am in Google Scholar. And a bunch of other -- |
| 19 | Q. A bunch of other ones? |
| 20 | A. Yes. |
| 21 | Q. You don't have 14,000 citations in Google scholar, |
| 22 | do you? |
| 23 | A. No. |
| 24 | Q. Do you know how many citations you have in Google |
| 25 | Scholar? |

MR. SUAREZ: Can we pull up the definition?
Q. You see "estimated current value for an asset.

The amount at which the item could be exchanged between a buyer and a seller?"
A. Yes.
Q. Does the distinction between the term "could" and "would" mean anything to you, Mr. Lewis?
A. Sure. So, "could" indicates a possibility as does "would."
Q. So, if we go to the glossary definition of estimated current value -- we could pull that up from Plaintiff's Exhibit 1609.

Let's just clear something up here. If we go to page two, you said, "The primary focus of personal financial statements is a person's assets and liabilities. And the primary users of personal financial statements normally consider estimated current value information to be more relevant than their historical cost information."

Do you see is that?
A. I see it. Yeah, you read the first lines of paragraph two.
Q. You see here where it says, "Estimated current value" you said it was bold and underlined by FASB?
A. Yes.
Q. Do you know what a hyperlink is?
"could" rather than "would." And, so, sorry.
Q. You're the expert in accounting or that's what
we've been asked to believe, right?

## MR. WALLACE: Objection.

MR. SUAREZ: Withdrawn.
Q. If you were to tell your students -- if a student
were to come in and tell you that the definition, provided in the glossary, of "estimated current value" is "the amount at which an item would be exchanged," would you tell that student that he's wrong?
A. We might go look at that together.
Q. Okay. And, is that what the ASC 274 says? Does it say, "would" or does it say, "could?"
A. It says, "could."
Q. So if you used the term "would" it would be an incorrect recitation of what the ASC guidance says, correct?
A. Yes.
Q. You would agree with me --

THE COURT: Hold on.
Witness excuse for a minute.
Question for Mr. Suarez or anyone on the
team. What difference does it make whether it's "could" or "would" in your opinion.

MR. KISE: It's not my opinion. It's the
opinion of actual accounting experts the "would" and

## "could."

As you heard Professor Bartov and, I believe, also, Mr. Flemmons testify that this witness is, apparently, seemingly that "There is no distinction between 'could' and 'would'." Perhaps it's a demonstration of his lack of knowledge. But the point is that the FASB --

THE COURT: Let me jump in. Is this "'Could is more future oriented and 'would' is more present oriented?"

MR. KISE: Right. "Would" is today. And, if you see, we're going to pullup the definition of "fair market value" and compare them side by side.

The definition of "fair market value" means, "What is it today?"
"Estimated current value" which, as you've heard the testimony, is a, completely, different concept. It is, as Professor Bartov calls it, the stepchild. It is a very different concept.

And it doesn't incorporate terms of "currently" and "today." It is a different concept all together. That's why it has different rules and different guidance.

That's why FASB has gone to the trouble of creating two separate definitions. If it was all
supposed to be the same, they would have just used
"fair market value."
THE COURT: To me it is. I'll leave it at that. Let's get the witness back.

Mr. Suarez, do you agree with Mr. Kise?
MR. SUAREZ: Yes, sir, your Honor.
MR. ROBERT: We always agree with Mr. Kise.
MR. KISE: Not always.
Q. Now, Mr. Lewis, are you familiar with the other definitions in the accounting standards for value?
A. I'm familiar with fair value.
Q. What's the definition of fair value?
A. You could -- we were just looking at it. So, I'm not going to recite it as a memory test. If you want to show it to me --
Q. In your own words, what's the definition of fair value?
A. Fair value looks to establish a market-based approach to valuing an asset by looking at three different levels; one, is an active and engaged market, the second level is a model and the third level is an estimate. The word-for-word definition, I won't try to recite.
Q. That's a different value than -- excuse me.

That's a different measure of value than estimated current value, correct?
A. It is a different definition.
Q. ASC 274 doesn't use fair value, does it?
A. ASC 274, no, it does not.
Q. And, just like the FASB was precise when it wrote the definition of estimated current value, it wasn't an accident that they didn't just use the definition of current value?
A. I think they tried to be precise.
Q. So if we go back to ASC 274 and we look at the implementation guidance at ASC 274-10-55, you would agree with me that there is implementation value at 55-7 for future interests and similar assets, right?
A. Yes, that's what 55-7 discusses.
Q. And there is also implementation guidance for real estate, correct?
A. Yes.
Q. And the implementation guidance for future
interest and similar assets is different than the one for real estate, right?
A. Yes.
Q. But in your mind or at least according to what you've told the Court today, you believe that those with the glossary definition of estimated current value?
A. With the definition, yes, I don't think that 55-6
E.Lewis - Plaintiff - Cross/Mr.Suarez

Page 6742
and 55-7 -- because, they're specialty areas, they both go back up to 55-1.
Q. They don't both go back up to 55-1.
A. According to you?
Q. No, according to you.
A. No, they do go back up to 55-1.
Q. You are the teacher and account, right?
A. According to me, they go back up to 55-1. And
these are specialty areas. Four, six and seven say, "If you
have this kind of asset, here are some things you should consider."
Q. And they all have to fit back within the
definition -- is it your view that they all have to fit back within the definition in the glossary?
A. Of estimated current value?
Q. Yes.
A. Absolutely.
Q. I'm sorry?
A. Yes.
Q. Where does it say that?
A. The definition is part of the standard.
Q. Not the question I asked.

Where does it say that in ACS 274 ?
A. In the definition.
Q. Where does it say that?
A. Where it says that assets must be presented at current -- at estimated current fair current value.
Q. You are misunderstanding my question. So I will try to ask it better.

Where does it say, in ASC 274, that the implementation guidance has to be harmonized with the definition in the glossary?
A. Where it says that assets must be presented at estimated current value.
Q. Point it out to me. Because, I don't see where it says what you're saying that it says.

## A. Okay.

THE COURT: Can we put it on the screen.
Q. I understand that there is a different glossary definition. But, where does it say, in this definition, that, the glossary definition overrides the implementation guidelines?
A. In 35-1. At 274-10-35-1.
Q. Where it says, "Personal financial statement shall present assets at their estimated current values and liabilities of their estimated current amounts on the date of the financial statements?"
A. Yes.
Q. Where does it say that the glossary definition trumps the implementation guidelines?
A. That is the glossary. You've got your hyperlink there to the glossary definition that's telling you they are going to be presented at estimated current value.

The implementation guidance tells you how you might seek to establish an estimated current value.
Q. The hyperlink which previously you discussed was FASB's effort to underline, in bold, the glossary definition --
A. In the document.
Q. In the document.
A. You saw how it worked --
Q. So now, if we were to read into the definition the fact that "Because there is a hyperlink, that trumps all the other guidance" --

MR. WALLACE: Objection. At this point, he's just arguing with the witness.
A. In 35-1, it tells you how the assets are going to be presented.

THE COURT: "Withdrawn" since he's answering?

MR. WALLACE: I think he should stop arguing with the witness. But he seems to have answered the question to the extent there was a question.

THE COURT: I'll deem it withdrawn.
So, go ahead.

## CROSS-EXAMINATION

BY MR. SUAREZ:
Q When in the real world -- withdrawn.
You haven't actually been asked to interpret this
definition in the real world outside of this case in a classroom, have you?
A This case in a classroom would be those occasions.
Q You have no real world experience outside of this case
in a classroom as to how that definition is applied?
MR. WALLACE: Objection. Asked and answered and the question is unclear.

THE COURT: Let's stay with the asked and answered.
Q Do you have any other real world experience other than in a classroom and in this case interpreting ASC 274 ?

MR. WALLACE: Objection. Asked and answered.
MR. SUAREZ: I asked him about the specific one and this time I was asking him about generally.

If you would agree with me, Mr. Wallace, if that's the case, I guess I don't need to ask anything further. You want to stipulate to that?

THE COURT: Yes or no, do you want to stipulate?
MR. WALLACE: I am standing on my objection. I am not withdrawing the objection.

THE COURT: You know, I try to be a practical judge. Mr. Suarez, I am giving you all sorts of leeway
because you have promised and Mr. Kise has promised that we would be finished by, let's say, 12:50 or so. By the way, would there be any redirect of the rebuttal?

MR. WALLACE: So far no.
THE COURT: So I am going to be very liberal. It's your time. If you think this is the best way you can use it, go ahead.
CONT'D CROSS-EXAMINATION

## BY MR. SUAREZ:

Q All right. So, can you cite to any accounting
literature that supports your opinion?
A This is the accounting literature.
Q This is your interpretation of the accounting
literature?
A That we're looking at the accounting literature.
Q Can you cite to any scholarly articles that support your opinion?

A No.
19 Q Can you cite to any interpretive guidance that supports your opinion?

A This is the guidance.
Q I understand that that's what you think ASC 274 says.
I am asking you outside of ASC 274 is there any academic work
that supports your opinion?
A I don't believe there is any academic work that doesn't

Professor Lewis - by Plaintiff - Cross (Mr. Suarez)
Page 6748
1 or contradicts it.
2 Q Not what I asked.
3 A No, I don't know of any.
4 Q Do you know of any guidance promulgated by FASB that 5 supports your opinion?
6 A This is the guidance by FASB.
7 Q Other than ASC 274?
8 A Other than ASC 274, no. The ASC 274 is the guidance.
9 Q Are you aware of any guidance by the AICPA that supports your opinion?

A The AICPA writes guidance on performance standards for accountants.

Q The answer is no?
A They don't write the standards so the answer is no.
Q Would you agree with me that Mazars had an obligation to read and understand the supporting data provided in connection with its preparation of the compilation reports?

A Not the supporting data, not the statement themselves.
Q Would you agree with me that Mazars has an obligation to understand the basis of valuation for each asset listed in the statement of financial condition?

A I believe they have the obligation to understand the basis.
24 Q Yes or no?
25 A Yes.

1 Q Would you agree with me that they must also confirm that the valuation method is consistent with the definition of estimated current value?
A It's not a yes or no answer. I can give a short answer.
Q Yes or no?
A Then no.
Q You know who disagrees with you, Professor, the general counsel of Mazars who sat here and testified exactly the opposite than you did.

MR. WALLACE: Objection. That's not a question. I think if he wants to present the testimony from the general counsel of Mazars, he should do that through the form of a question and an answer and not a representation.

THE COURT: It's stricken because it is just a representation without being a question.
Q Well --
THE COURT: You can try to prove that.
MR. SUAREZ: His inconsistent answer is not stricken. My question as to whether he is aware that Mazars did is, correct?
A I can reconcile it for you if you would like.
Q See here where it says on page 2150 of the trial
transcript, "And you would agree with me that Mazars has an obligation to understand the basis of valuation for each asset

Page 6750
Professor Lewis - by Plaintiff - Cross (Mr. Suarez)
listed in the statement of financial condition."
A Correct.
Q "And confirm that the valuation method is consistent with the definition of estimated current value?" Do you disagree with the general counsel of Mazars?
A I don't disagree with the second part of it.
Q So you don't disagree that Mazars had an obligation to confirm that the valuation method is consistent with the definition of estimated current value?

A The method that was presented to them as having been the valuation method, I don't disagree with that.

Q That's not what that says.
A That's not what that says.
Q You are reading words into it again?
A So it is either not a complete question or not a
complete answer.
Q He seems to understand it?
A Okay.
Q He is a general counsel of Mazars. He actually works in an accounting firm. Then it says, you would agree that -"you would agree that Mazars has an obligation to confirm that the notes to a statement of financial condition are consistent to the supporting data when preparing an accountant's compilation report, correct?"

Do you agree with that?

A I disagree with that.
Q Okay. So you disagree with the general counsel of Mazars. Perfect. We can take this down.

MR. WALLACE: We are not supposed to say okay at the end of the question. I think perfect is also inappropriate.

MR. SUAREZ: He just impeached your own witness. I think that's pretty perfect.

THE COURT: That's separate. I have maintained, during the whole trial, the questioner should not listen to an answer and then say okay, perfect, yes. Just do the next question. Ask the next question.
Q We can go back to the trial transcript. If I could
just draw your attention back to the question. "You would agree
with me that Mazars had an obligation to read and understand the
supporting data provided in connection with preparing the compilation of a statement of financial condition?"

Do you see that?
A Ido.
Q Did you read the supporting data?
A Some of the supporting data.
Q But not all of it?
A Not all of it.
Q Okay.
THE COURT: Try not to say okay.

MR. SUAREZ: I'm sorry. That wasn't on purpose this time.
Q Let's take a look at ARC 88, Defendant's Exhibit 26 that you just reviewed with Mr. Wallace. Can we take a look at page 4 at section 13. Section 13, compilation procedure says, "The accountant should read the financial statements in light of the accountant's understanding of the applicable financial reporting framework and the significant accounting policies adopted by management and consider whether such financial statements appear to be appropriate in form and free from obvious material misstatements."

Do you see that?
A Yes, I do.
Q Would you agree that that's a standard?
A I agree that that is the performance standards.
Q And would you agree that Mazars had an obligation to comply with that standard?

A Absolutely.
Q And that Mazars, in fact, look at the supporting data?
A This doesn't reference the supporting data.
Q My question is would you agree with me that Mazars, in fact, looked at the supporting data?

A I believe they did. I think that's fair.
Q But you didn't?
A I looked at some of it.
$1 \quad Q \quad$ But not all of it?
2 A Right.
Q So then Mazars would have an obligation to consider if the financial statements are free of obvious material misstatements, correct?
A If they have the appearance of being free of obvious material --
Q They would have an obligation to consider if the
financial statements are free of obvious material misstatements under the standards, do you agree with that?

A No, that's not what it says.
Q That's not based on -- that's based on your real world experience?

A It's based on reading the standards.
Q Okay. Which you have interpreted in the real world how many times other than in this case?

A A whole bunch of times.
Q In the real world outside of your classroom?
MR. WALLACE: Objection. Asked and answered.
THE COURT: Sustained. Asked and answered many times.
Q Did they teach you how to read the standards in
engineering school?
24 A Who's they?
25 Q Whoever you learned -- withdrawn.

Professor Lewis - by Plaintiff - Cross (Mr. Suarez)
Page 6754
MR. SUAREZ: Give me one second, Your Honor. THE COURT: Sure.
Q Professor, would it surprise you to learn that a Derek Jeter baseball card recently traded for over $\$ 600,000$ ?
A That doesn't surprise me at all.
Q So under your example, you would've got an estimated current value was wrong?

MR. SUAREZ: I withdraw the question. I have nothing further.

MR. WALLACE: No redirect, Your Honor.
THE COURT: Derek Jeter was such an amazing player. It doesn't surprise me. We are excusing the witness. Let's start with that. Witness, you are excused.
(Whereupon, the witness was excused from the stand.)

THE COURT: Any other housekeeping besides the reminder that briefs -- posttrial briefs are due January 5 th and oral argument will be 10 o'clock January 11th. We will be in our regular courtroom 418.

MR. WALLACE: For procedure, I will just confirm the People rest.

THE COURT: I should have asked for that.
MR. KISE: For the record, at the close of their rebuttal case, we, on behalf of all defendants, again, move for a directed verdict. We'll submit the papers as we

1 mentioned on Friday.
As to the posttrial, we plan to do our submissions as we have done to the Court before in the same format. We would just ask for, as I believe, as you did with the summary judgement, that the word limit, if there is going to be a word limit, it be 25,000 words which I think is what we had for summary judgement. I think.

THE COURT: What's the --
MR. WALLACE: No objection to that number. I don't know that the rules call for -- it's not technically. I assume we are putting in findings of fact -- proposed findings of fact and conclusions of law. I'm sure whatever word limits the Court would like to use -- I think that -- I think that was built in to my question, Your Honor, or my statement. It wasn't a question with perhaps I should have asked based on Mr. Wallace.

We were planning to proceed as we have done before with filing likes the summary judgement filing or the dismissal papers, not findings of fact and conclusions of law. If the courts want -- it's whatever the Court wants. Some judges find that far more cumbersome to work with than briefs, but I'll leave that to your discretion.

THE COURT: Any opinion on this?
MR. WALLACE: No strong preferences, Your Honor.
THE COURT: I would like findings of fact and
conclusions of law because that's what I'll be doing.
MR. KISE: Then we don't need to deal with word limits, as Mr. Wallace said, there is no word limits associated with those kind of filings that I am aware of. Not that we are going to exceed the number, it is technical point.

THE COURT: 50 pages is a limit.
MR. KISE: I think I would rather go with word limits because pages. I'd rather to go back to the 25,000 words that we had for summary judgement.

MR. WALLACE: No objection to that.
MR. KISE: Probably will work out to be about the same but...

THE COURT: All right. So, what was it? How many words 25,000 words?

MR. AMER: Was there a time for when the filings need to be made.

MR. WALLACE: It was noon, I believe.
MR. AMER: Just to confirm that on the record.
THE COURT: Did we say noon?
MR. AMER: I think we said noon.
MR. KISE: Do we want noon, okay?
THE COURT: Is there still an open matter about the Allen Weisselberg docs that we just recently spoke about?

MR. WALLACE: We need to send Your Honor -- it does

## Proceedings

Page 6757
1 not affect our resting of the case. We'll send you where we left things with the documents. It is immaterial to us closing our case, Your Honor.

THE COURT: That's it.
MR. KISE: I'm not sure about the prosecution, we certainly, as defense, would like to thank the Court for taking all the time that it did in the case. We most particularly would like to thank the court reporters who diligently worked and all of the court officers that are here that expended a considerable amount of time and I think overtime. So on behalf of the defendants, we certainly thank all of them that participated in what is truly an extraordinary effort even in the New York State court system.

MR. WALLACE: At the end of case, we finally found a point of an agreement between the plaintiffs and the defendants. So we share their position.

THE COURT: I think the most amazing part of the case, the one that I was happiness with is that we actually got to trial on October 2nd come hell or high water written in stone. I know how much work that took, all the reports, depositions, motions. And so I wish you all a happy holiday season and see you next year.

MR. WALLACE: Thank you, Your Honor.
MR. KISE: Thank you.

Page 6758
(Whereupon, the trial is adjourned until Thursday, January 11, 2024, at 10 o'clock a.m.)

Pursuant to Section $202.8-\mathrm{g}(\mathrm{b})$ of the Uniform Civil Rules for the Supreme Court and County Court and the Court's Order dated June 9, 2023 (NYSCEF No. 636), Plaintiff the People of the State of New York, by their attorney, Letitia James, Attorney General of the State of New York ("OAG"), submit the following response to Defendants' Statement of Material Facts ("Defs.' Statement"):

## General Objections:

1. Defendants have either failed to maintain and preserve or failed to produce documents that would establish certain factual assertions made here. For example, Defendants assert that "Mr. Trump previously served as a Trustee for the [Donald J. Trump Revocable] Trust for a period of time." See infra ๆ1. Defendants, however, have failed to produce complete records of the trust, including the specific periods of time when Mr. Trump and others were Trustees. Faherty Opp. Aff. at $9 \mathbb{T l |} 4-7 .{ }^{1}$ Similarly, Defendants assert that Jeffrey McConney "was employed as the Controller of the Trump Corporation until 2021." See infra $\mathbb{\|}$ 5. However, they have failed to produce any severance agreement signed by Mr. McConney, or any evidence that such an agreement exists and dictates the terms of Mr. McConney's severance payments. Faherty Opp. Aff. at $9 \mathbb{l l l} 8$-11. Accordingly, Plaintiff objects to Defendants' assertion of a material fact that is based on documents demanded by Plaintiff, but which Defendants could not produce.
2. Throughout Defendants' Statement of Material Facts, Defendants refer to Donald J. Trump as "President Trump." Plaintiff asserts a general objection to the repeated use of such defined

[^13]term because that shorthand factually mischaracterizes Mr. Trump's status for the time period prior to Jan. 20, 2017, as well as periods after Jan. 20, 2021 (when Mr. Trump became the "former President"). See Former Presidents Act, Pub. L. 85-745, 3 U.S.C. § 102 note, available at https://www.archives.gov/about/laws/former-presidents.html (defining "former President" as a person "(1) who shall have held the office of President of the United States of America; (2) whose service in such office shall have terminated other than by removal pursuant to section 4 of article $\Pi$ of the Constitution of the United States of America; and (3) who does not then currently hold such office.") Plaintiff generally disputes the use of this abbreviation when it is factually inaccurate, even when that objection is not stated specifically.
3. Plaintiff generally objects to and otherwise disputes Defendants' reliance on Mr. Trump's 2021 Statement of Financial Condition ("SFC" or "SOFC") (NYSCEF No. 15) in Paragraphs 18-44, infra, as evidence for any assertions of undisputed material fact, given the evidence that information set forth in Mr. Trump's SOFCs is often unreliable, misleading and/or false. See, e.g., Response to Defs.' Statement 『 44, infra.

## Specific Objections and Responses to Defendants' Statement of Material Facts:

## I. Parties

1. Donald J. Trump ("President Trump") is the 45th President of the United States and the sole beneficiary of The Donald J. Trump Revocable Trust dated April 7, 2014, as amended (the "Trust"). Robert Aff., Ex. A ("Compl.") ${ }^{1}$ qT $29-30$. President Trump previously served as a Trustee for the Trust for a period of time. See, e.g., Robert Aff., Ex. AAA. President Trump also served as President and Chairman of the Trump Organization, Inc. and Trump Organization, LLC until January 19, 2017. NYSCEF No. 501 || 29.

RESPONSE: Undisputed that Mr. Trump was the 45th President of the United States between Jan. 20,

2017 and Jan. 20, 2021. It is further undisputed that Mr. Trump is the sole beneficiary of The Donald J. Trump Revocable Trust dated April 7, 2014, as amended (the "Trust") and has served as a Trustee for the Trust; however, Defendants have failed to document the structure of and amendments to the Trust, including the specific time periods when Mr. Trump and others served as Trustees. See supra, Gen. Obj. ${ }^{-1} 1$.

Defs' Statement Footnote 1: Citations to the Complaint by paragraph number in support of averments made in this Statement of Undisputed Material Facts are intended only to provide support for such averments, and are not intended to adopt all allegations set forth in the cited paragraph as undisputed facts.

RESPONSE: To the extent that Defendants cite to the Complaint as evidence for facts that the parties agree are undisputed, Plaintiff accepts these factual representations, which have been signed and sworn to by Defendants' counsel, as formal judicial admissions that are binding on all Defendants. See Morel ex rel. Hernandez v. Schenker, 64 A.D.3d 403, 403 (1st Dep’t 2009) ("[A]dmissions made by counsel on behalf of their clients are binding").
2. Donald Trump, Jr. is a trustee of the Trust, Compl. ๆ 38, and served, or currently serves, as the Executive Vice President ("EVP") for various corporate entities held by the Trust, NYSCEF No. 501 § 32; Compl. ๆ| 31, Ex. 2.

RESPONSE: Undisputed.
3. Eric Trump is Chairman of the Advisory Board of the Trust, Compl. © 35, and served, or currently serves, as the EVP for various corporate entities held by the Trust, NYSCEF No. 501 \| 32; Compl. ${ }^{[141, ~ E x . ~} 2$.

RESPONSE: Undisputed.
4. Allen Weisselberg was employed as the Chief Financial Officer of the Trump Corporation from 2003 until July 2021. NYSCEF No. 501 \| 37. Mr. Weisselberg also served as Trustee for the Trust beginning on or about 2017 through 2021. NYSCEF No. 501 『 38. On January 20, 2021, Mr. Weisselberg was removed as Trustee for the Trust. See Robert Aff. at Ex. AP.

RESPONSE: Undisputed that Allen Weisselberg served as Chief Financial Officer of the Trump Corporation but disputed to the extent that admitted fact implies his role within the Trump Organization was limited to the Trump Corporation. See, e.g., Plaintiff's Rule 202.8-g Statement of Material Facts ("Pl.'s Statement") ${ }^{9} \boldsymbol{q} 7$ 710-735. Further disputed to the extent the assertion implies Mr. Weisselberg left the employ of the Trump Organization in July 2021. Mr. Weisselberg testified he retained the role of Senior Advisor after his guilty plea. Ex. 1001 at 291-293. Moreover, Mr. Weisselberg's severance agreement-between him and "The Trump Corporation, and/or its parents, subsidiaries, affiliates, and related entities," and produced by counsel in this action to OAG-states that his employment ended on December 30, 2022 and that he remains subject to obligations as a condition of receiving severance over a period of years. Ex. 1002. That agreement is dated January 9, 2023.
5. Jeffrey McConney was employed as the Controller of the Trump Corporation until 2021. Compl. ๆ 39; NYSCEF No. 501 § 39.

RESPONSE: Disputed because the cited evidence does not support the representation that Mr. McConney ceased to be the Controller in 2021. Jeffrey McConney was still employed by the Trump Organization as of February 28, 2023 and signed a severance agreement. Ex. 1003 at 345:15-347:23, 351:20-353:07. Moreover, Mr. McConney's email signature block on communications related to Trump Organization financial records included the title of "SVP/Controller" and listed the Trump Organization's business address (725 5th Avenue, New York, NY 10022) as late as November 2022. Ex.
$1004 .{ }^{2}$
6. The Trust is a Florida trust that was created under the laws of the state of New York and owns various companies for the exclusive benefit of President Trump. NYSCEF No. 501 \| 30.

RESPONSE: Undisputed
7. The Trump Organization, Inc. is a New York entity. NYSCEF No. 501 || 27.

RESPONSE: Undisputed
8. Trump Organization LLC is a New York entity. NYSCEF 501 ๆ 27.

RESPONSE: Undisputed
9. DJT Holdings LLC is a Delaware limited liability company with a principal place of business in New York. Compl. $\mathbb{T}$ 27(c).

RESPONSE: Undisputed
10. DJT Holdings Managing Member is a Delaware limited liability company registered to do business in New York. Compl. \|| 27(d).

RESPONSE: Undisputed
11. Trump Endeavour 12 LLC is a Delaware limited liability company that owns Trump National Doral. Compl. 『| 28(a); NYSCEF No. 501 \| 28.

RESPONSE: Undisputed except to note the correct spelling is Trump Endeavor 12 LLC. See Pl. Statement Ex. 254 at 1.
12. 401 North Wabash Venture LLC is a Delaware limited liability company that owns Trump International Hotel \& Tower Chicago. Compl. ๆ 28(b); NYSCEF No. 501 || 28.

RESPONSE: Undisputed
13. Trump Old Post Office LLC is Delaware limited liability company that held a ground

[^14]lease to operate Trump International Hotel, Washington, DC. Compl. ๆ 28(c); NYSCEF No. 501 \| 28.
RESPONSE: Undisputed
14. 40 Wall Street LLC is a New York limited liability company that holds a ground lease for 40 Wall Street, New York, NY. Compl. ๆ 28(d); NYSCEF No. 501 ๆ| 28.

RESPONSE: Undisputed
15. Seven Springs LLC is a New York limited liability company that owns the Seven Springs property located within the towns of Bedford, New Castle, and North Castle in Westchester County, New York. Compl. 【1 28(e); NYSCEF No. 501 \| 28.

RESPONSE: Undisputed
16. The Donald J. Trump Revocable Trust, The Trump Organization, Inc., Trump Organization LLC, DJT Holdings LLC, DJT Holdings Managing Member, Trump Endeavor 12 LLC, 401 North Wabash Venture LLC, Trump Old Post Office LLC, 40 Wall Street LLC, and Seven Springs, LLC are all distinct entities. See Robert Aff., Ex. S ("Pereless Dep.") 148:13-152:8.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact. Further disputed because all entities within the Trump Organization are under common control and financially interdependent. As the Trump Organization's Assistant Controller, Donna Kidder, testified, "Prior to Donald Trump becoming President of the United States, everything that needed funding for properties that he owned would flow through him . . . And if there was a distribution for excess cash, the chain would have flowed the same way only up to DJT, Donald J. Trump." Ex. 1003 at 103:25-104:10. Donna Kidder further testified that, after Mr. Trump became President, funding for properties that required funding would have come from the Trust and distributions from properties with positive cash flow could have distributed funds to the Trust through a variety of other entities. Ex. 1003 at 104:22-107:6. Donna Kidder further testified, for example, that she typically obtained weekly updates from Trump Organization properties regarding their cash positions because they might either have excess cash that
could be swept to headquarters or require funding for their operations, and that she would "fund" such requests. Ex. 1003 at 246:19-248:15.

## II. Relevant Assets

17. Below is a list of the relevant assets listed in the SOFCs that are beneficially owned by President Trump. See generally Compl. at Exs. 3-13.

RESPONSE: No response needed.

## a. Cash and Cash Equivalents

18. Figures for cash and cash equivalents represent amounts held by President Trump and amounts in operating entities. NYSCEF No. 15, p.4.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact, as the cited 2021 SOFC does not accurately represent the cash and cash equivalents that were under Mr. Trump's control. See Pl.'s Statement qT 384 - 406 and accompanying exhibits; see also General Objections ๆ 3, supra.

## b. Real and Operating Properties

19. Trump Tower. Trump Tower is a sixty-eight-story mixed used property located at 725 Fifth Avenue in New York, NY. NYSCEF No. 15, p.10. The building has commercial space, which includes residential condominiums owned by the residents. NYSCEF No. 15, p.10; Compl. ๆ 51(c). The property includes the Manhattan flagship retail location of Gucci America Inc., as well as office tenants such as IOCC Industries, Inc., S.S. Steiner, Inc., and Industrial and Commercial Bank of China. NYSCEF No. 15, p. 10.

RESPONSE: Undisputed that Trump Tower is a commercial and residential property located at 725 Fifth Avenue in New York, NY, except that Defendants' own records-as provided to Allen Weisselberg by email-state that the height of Trump Tower according to the Certificate of Occupancy on file with
the New York City Department of Buildings is 58 stories and 661 feet. Ex. 1005; Ex. 1006 at -67.
20. Trump Tower Triplex. This is a triplex apartment on the top three floors of Trump Tower. NYSCEF No. 15, p. 16.

RESPONSE: Undisputed.
21. Niketown. Niketown represents two long-term ground leasehold estates for the land and building located between Fifth and Madison Avenues and principally on 57th Street in New York City. NYSCEF No. 15, p.10; Compl. ๆ1 51(e). The property, leased to NIKE Retail Services Inc., is subleased to Tiffany \& Co as its flagship store. NYSCEF No. 15, p.10.

RESPONSE: Undisputed, except that the cited sublease is described in the cited document as a temporary sublease to Tiffany \& Co. while it performed major renovations on its flagship store.
22. 40 Wall Street. 40 Wall Street is a 72-story tower located in lower Manhattan that contains a mix of office and retail space. NYSCEF No. 15, p.11; Compl. q\| 41 (f), 113. 40 Wall Street LLC owns the long-term ground lease for this property. NYSCEF No. 15, p.11.

RESPONSE: Undisputed, except that certificate of occupancy filings in the Trump Organization's possession state that 40 Wall Street is 70 stories tall, and other Trump Organization documents state the building is only leasable up to the 63rd floor. Ex. 1007; Ex. 1008.
23. Trump Park Avenue. Trump Park Avenue is a property consisting of 134 residential condominium units that range from one to seven bedrooms. NYSCEF No. 15, p.11. The property also includes three commercial condominium units containing approximately 30,000 square feet of commercial space. NYSCEF No. 15, p.11.

RESPONSE: Undisputed except to the extent the asserted fact suggests that Mr. Trump or the Trump Organization own 134 residential units or that none are rent-stabilized. See Pl.'s Statement q\|I 336-363. The backup material for the Trump Park Avenue valuation for the 2012 Statement, for example, identifies only 21 units (Pl.'s Statement Ex. 147), and the backup material for that property's valuation for the 2021

Statement identifies only 17 units (Pl.'s Statement Ex. 156).
24. Mansion at Seven Springs. Seven Springs is a property in Bedford, New York, consisting of over 200 acres of land, a mansion, and other buildings. NYSCEF No. 15, p.16. A portion of the land is encumbered by a conservation easement. NYSCEF No. 15, p.16. Seven Springs LLC owns the Seven Springs property. NYSCEF No. 15, p.16. Compl. ๆ| 51(h).

RESPONSE: Undisputed except that the Seven Springs Property is in the towns of Bedford, North Castle, and New Castle, New York, as acknowledged previously by Defendants. See supra ๆ15.
25. Trump International Hotel \& Tower, Chicago ("Trump Chicago"). Trump Chicago is a condominium-hotel building located in Chicago, Illinois. Compl. \| 51(i). 401 North Wabash Venture LLC owns the building doing business as Trump Chicago. Compl. 『 28(b).

RESPONSE: Undisputed.
26. Trump Old Post Office, Washington, DC ("OPO"). OPO refers to the Old Post Office on Pennsylvania Avenue in Washington, D.C. Compl. ๆ 51(j). In February 2012, Trump Old Post Office LLC was awarded a ground lease from the General Services Administration ("GSA") to redevelop the "Old Post Office" on Pennsylvania Avenue in Washington, D.C. Compl.
q\| $51(\mathrm{j}), 626$.
RESPONSE: Undisputed.
27. The Mar-a-Lago Club ("Mar-a-Lago"). Mar-a-Lago is an exclusive, private club consisting of 117 rooms in Palm Beach, Florida. NYSCEF No. 15, p.4. Mar-a-Lago features a 20,000 square foot Louix [sic] XIV style ballroom, dining, tennis courts, a spa, cabanas, and guest cottages. NYSCEF No. 15, p. 4.

RESPONSE: Undisputed that Mar-a-Lago is a private club in Palm Beach, Florida, and otherwise disputed as unsupported by the cited evidence.
28. Trump National Golf Club in Briarcliff Manor ("TNGC Briarcliff"). TNGC

Briarcliff is a golf club in Briarcliff Manor, New York. NYSCEF No. 15, p.5.
RESPONSE: Undisputed.
29. Trump National Golf Club in Hudson Valley ("TNGC Hudson Valley"). TNGC Hudson Valley is a golf club in Hopewell Junction, New York. NYSCEF No. 15, p.7.

RESPONSE: Undisputed.
30. Trump National Golf Club, Jupiter ("TNGC Jupiter"). TNGC Jupiter is a golf club located just north of Palm Beach, Florida. NYSCEF No. 15, p.8.

RESPONSE: Undisputed.
31. Trump National Golf Club, Los Angeles ("TNGC LA"). TNGC LA is a golf club located on the bluffs of the southernmost point of the Palos Verdes Peninsula in California. NYSCEF No. 15, p. 5 .

RESPONSE: Undisputed.
32. Trump National Golf Club, Bedminster ("TNGC Bedminster"). TNGC Bedminster is a 580-acre golf club in Bedminster, New Jersey. NYSCEF No. 15, p.6.

RESPONSE: Undisputed that TNGC Bedminster is a golf club in Bedminster, New Jersey. The acreage figure is disputed by other records prepared by the Trump Organization or its agents. Ex. 1009 at -44 ; Ex. 1010.
33. Trump National Golf Club, Washington, DC ("TNGC DC"). TNGC DC is a golf club outside of Washington, DC. NYSCEF No. 15, p.6.

RESPONSE: Undisputed.
34. Trump National Golf Club, Philadelphia ("TNGC Philadelphia"). TNGC Philadelphia is a 365 -acre property with views of the Philadelphia skyline in Pine Hill, New Jersey. NYSCEF No. 15, p. 7.

RESPONSE: Undisputed.
35. Trump National Golf Club, Charlotte ("TNGC Charlotte"). TNGC Charlotte is a golf club located in Mooresville, North Carolina. NYSCEF No. 15, p.8. RESPONSE: Undisputed.
36. Trump National Doral ("Doral"). Doral is a golf club located on over 650 acres in Doral, Florida. NYSCEF No. 15, p.7. Trump Endeavor 12 LLC owns the property doing business as Trump Doral. Compl. \|| 28(a).

RESPONSE: Undisputed.
37. Trump International Golf Club, Scotland, Aberdeen ("Trump Aberdeen"). Trump Aberdeen is a golf club located on over 1,200 acres on the Northeast Coast of Scotland. NYSCEF No. 15, p. 9.

RESPONSE: Undisputed.
38. Trump International Golf Club in Scotland, Turnberry ("Trump Turnberry"). Trump Turnberry is a golf club located in South Ayrshire, Scotland. NYSCEF No. 15, p.9. Trump Turnberry is home to the renowned Ailsa golf course, which hosted the Open Championship in 1977. NYSCEF No. 15, p. 9 .

RESPONSE: Undisputed.
39. Trump National Golf Club, Colts Neck ("TNGC Colts Neck"). TNGC Colts Neck is a golf club located in Colts Neck, New Jersey. NYSCEF No. 15, p.6.

RESPONSE: Undisputed
40. Palm Beach Properties. This includes three properties in Palm Beach, Florida: 1094 South Ocean Boulevard, 124 Woodbridge Drive, and 1125 South Ocean Boulevard. Robert Aff., Ex. V ("Donald Trump Dep.") at 225-227.

RESPONSE: Undisputed

## c. Partnerships and Joint Ventures

41. $\mathbf{1 2 9 0}$ Avenue of the Americas in New York, NY (" 1290 Avenue of the Americas") and 555 California Street in San Francisco, California ("555 California Street") (collectively, "Vornado Partnership Interests"). In May 2017, President Trump and Vornado Realty Trust became partners in two properties: 1290 Avenue of the Americas and 555 California Street. NYSCEF No. 15, p.14. 1290 Avenue of the Americas consists of an office tower and retail space containing approximately $2,000,000$ leasable square feet and 555 California Street consists of one retail and two office buildings comprising approximately $1,700,000$ leasable square feet along with a subterranean garage. NYSCEF No. 15, p. 14.

RESPONSE: Disputed because the asserted fact is not supported by the cited evidence, including because the cited document states that Mr. Trump and Vornado became partners in these two properties in 2007.
42. Trump International Hotel and Tower, Las Vegas, Nevada ("Trump Las Vegas"). Trump Las Vegas is a luxury hotel condominium tower near the Las Vegas Strip that was built in a joint venture with Phillip Ruffin. NYSCEF No. 15, p.15. The property is the tallest hotel condominium tower in Las Vegas with over 1,200 hotel condominium units. NYSCEF No. 15, p.15.

RESPONSE: Undisputed that Trump Las Vegas is a hotel condominium building located at 2000 Fashion Show Drive, Las Vegas, Nevada, and that it was built in a joint venture with Philip Ruffin; otherwise disputed. Concerning the building's height, an appraisal prepared by an agent of the Trump Organization states that the building is approximately 624 feet tall. Ex. 1011 at -847. Whether that figure is taller than other buildings or hotel condominium towers in Las Vegas is immaterial but not established by the cited evidence.

## d. Real Estate Licensing Developments

43. Figures for real estate licensing developments represent expected cash flow to be derived from associations with developers of quality property seeking to do business with President

Trump because of his skill and reputation. NYSCEF No. 15, p.16.
RESPONSE: Disputed as vague and because the cited evidence does not support the asserted facts. Further disputed because the amounts shown on the SOFC under "Real Estate Licensing Developments" include intercompany contracts that are not with outside developers, as well as purely speculative

## III. The Statements of Financial Condition

44. The 2011 through 2021 Statements of Financial Condition of Donald J. Trump were annual compilation reports which identified and described the assets and liabilities of President Trump, and later, of the Trust, and provided President Trump's net worth (hereinafter, "SOFC" or "SOFCs"). NYSCEF No. 501 ๆ 51; Compl. q\| 6, 52-54.

RESPONSE: Undisputed that the 2011 through 2021 Statements of Financial Condition of Donald J. Trump were annual compilation reports that purported to describe the assets and liabilities of Mr. Trump and the Trust as well as Mr. Trump's net worth, but disputed that they did so truthfully and accurately and without misleading content, including for the following reasons.

Plaintiff's valuation experts, Constantine Korologos and Laurence Hirsh, have provided guidance regarding the real estate valuation methodologies used and the respective conclusions of estimated current value provided in Mr. Trump's SFCs for each of the years 2011 through 2021. Ex. 1012 \| 1; Ex. 1013 at 2. Mr. Korologos analyzed the valuation methodologies provided in the defendant's estimated current values conclusions, and adjusted them giving consideration for inconsistencies, omissions, nonmarket methodologies applied and factually incorrect assumptions, for certain commercial and real estate properties listed in Mr. Trump's SFCs for each of the years 2011 through 2021. Ex. 1012 || 1. Mr. Korologos concluded that " $[t]$ he values of certain assets listed in the SOFCs contain inconsistencies, omissions, and misleading information, and do not utilize methodologies and procedures used by
informed buyers and sellers in the marketplace and are therefore unreliable and misleading." Ex. 1012 \| 15. By taking Defendants' valuations as a starting point and adjusting for discernable factual or methodological errors (such as Defendants' failure to discount cash flows to estimate current value, use of low unsupported cap rates, and use of incorrect square footage values), Mr. Korologos concluded that these adjustments resulted in "significant reduction in value for the assets that [he] assessed" was warranted. Ex. 1012 || 15. Mr. Korologos then calculated a range of values reflecting the minimum estimated overstatement of value for each of the properties he considered. See Ex. 1012 qT1 87 (40 Wall Street); 105 (Trump Tower); 119 (Niketown); 135 (Trump Park Avenue); 152 (Vornado Partnerships); 165 (Seven Springs); 177 (Triplex); 188 (TNGC-LA Subdivision); 198 (TNGC-Briarcliff Subdivision); 219 (Aberdeen Residential Development).

Mr. Hirsh similarly identified significant discrepancies between the valuation methods employed by Defendants when valuing golf and club properties on Mr. Trump's SOFCs and "generally accepted valuation methodology" used by buyers and sellers of such properties. See Ex. 1013 at 15-24. Using the SFCs' valuations as a starting point and correcting for identifiable errors, Mr. Hirsh concluded that "the Statements of Financial Condition contain gross overstatements of golf club property values, which would likely be greater once an analysis of membership refund liability is completed and once an analysis of deferred maintenance was done." Ex. 1013 at 43. Mr. Hirsh then estimated a range of potential value overstatements by applying valuation methodologies accepted in the golf property marketplace to Defendants' own data, including the application of a market-based capitalization rate to net operating income for profitable courses and clubs (the Overall Rate or "OAR" method) and the application of a Gross Income Multiplier (or "GIM") to revenues for properties, including those with a negative cash flow. Ex. 1013 at 9-10, 12-13. Mr. Hirsh concluded that "[c]umulative value differences for the properties range from roughly $\$ 655.3$ million to $\$ 1.45$ Billion (OAR) and $\$ 740.3$ million to $\$ 1.3$ Billion (GIM), depending on the year examined." Ex. 1013 at 43.

OAG also asked accounting professor and expert Eric Lewis to review the valuation opinions of Mr. Korologos and Mr. Hirsh. Prof. Lewis assumed "that the highest values listed for the assets examined in Mr. Korologos' and Mr. Hirsh's reports are the appropriate adjusted amount of current value for purposes of my analysis." Ex. 1014 ๆ 138. Using this conservative approach to the valuation expert reports, and after considering only "the impact of the misstatements of value relating to the real estate assets reviewed by Mr. Korologos and Mr. Hirsh" but not "other material misstatements that are not considered in this analysis but would impact users of the Statements," Prof. Lewis concluded that Mr. Trump's SFCs "contained material misstatements regarding certain real estate assets" in each of the years between 2011 and 2021. Ex. 1014 I 138-39.

Based on this analysis, Prof. Lewis identified a "total minimum overstatement" of Mr. Trump's net worth as stated in the SFCs between 2011 and 2021 of between $\$ 1.46$ billion and $\$ 2.94$ billion depending on the year being evaluated. See Ex. 1014 TTI 143-164. By taking the SFCs’ statements of Mr. Trump’s net worth and subtracting the "total minimum overstatement" identified through the work of Mr. Korologos, Mr. Hirsh and Prof. Lewis, OAG's banking expert Michiel McCarty further calculated an adjusted net worth for Mr. Trump ranging from $\$ 1,943,690,000$ in 2011 to $\$ 3,070,648,756$ in 2021. See Ex. 1015 || 30.
45. Mazars, an accounting firm, compiled the SOFCs until 2020. Compl. ๆf 53.

RESPONSE: Undisputed
46. Another accounting firm, Whitley Penn, LLP, compiled the 2021 SOFC. Compl. \| 59

## RESPONSE: Undisputed

47. The asset values were prepared by personnel who were, in some instances, working in conjunction with outside professionals. Compl. ๆ 1 54; NYSCEF No. 15, p.3.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact. Further disputed because the cited evidence references the work of accounting firms Mazars and Whitley Penn in compiling the SOFCs, whereas the SOFCs falsely and misleadingly claimed that Mr. Trump and other Defendants had valued his properties in conjunction with "outside professionals." See, e.g., Pl.'s

Statement $9 \mathbb{T}$ 108-113 and supporting exhibits. Mazars and Whitley Penn, by the very nature of their working relationship in compiling the SOFCs, cannot have been the "outside professional" referenced in the SOFCs as "working in conjunction" with Trump Organization personnel to prepare asset values. See Pl.'s Statement qTI 1-27 and supporting exhibits.

By contrast, evidence shows that Defendants' specific claims to have worked with outside professionals to value their assets for the SOFCs were false and misleading. For example, when an appraiser with Cushman \& Wakefield was shown workpapers representing that he had provided a cap rate used to value Trump Tower in the 2016 SOFC, he testified that he had not provided the cap rate, that it was not being used appropriately in the valuation, and that it would be "inaccurate" for the SOFC and supporting papers to assert that he worked in conjunction with anyone at the Trump Organization to perform a valuation of Trump Tower in 2016-he performed no such work. Ex. 1016 at 143:16-147:20.
48. The asset values were then forwarded to the accounting firm, who would then use that data, among other things, to generate a compilation report of those valuations (i.e., the SOFC). Compl. q\| 6, 54; NYSCEF No. 501 || 61.

RESPONSE: Undisputed except as to the vague phrase "among other things," which Defendants inserted in one or more of their answers without clarification. NYSCEF No. 501 \| 61.
49. In addition to providing a schedule of assets and liabilities, the SOFC provided President Trump's net worth as of June 30 of the year it covered. Compl. If 6.

RESPONSE: Undisputed that the SOFC listed certain assets and liabilities, and purported to provide Mr. Trump's net worth as of June 30 of the year it covered, but disputed that the net worth figure was true and accurate or otherwise not misleading. See supra, Response to Defs.' Statement q 44.
50. Unlike public companies, "private companies in the US need not prepare financial statements based on GAAP. However, for a variety of reasons (e.g., obtaining financing) private companies may choose to follow GAAP and although not subject to an external audit requirement, private
companies may choose voluntarily to have their financial statements audited." Robert Aff., Ex. AK ("Bartov Aff."), Ex. A ("Bartov Expert Report") ๆ 20.

RESPONSE: Undisputed, but this statement is not a material fact.
51. Nonetheless, the SOFCs were prepared pursuant to GAAP in compilation format in accordance with Accounting Standards Codification ("ASC") 274. See Bartov Expert Report ${ }^{\text {| }}$ 32; Robert Aff., Ex. AI ("Flemmons Aff."), Ex. A ("Flemmons Expert Report") 『 25.

RESPONSE: Undisputed that the SOFCs contain language stating that they were prepared in accordance with GAAP, and undisputed that they were prepared pursuant to compilation engagements, but disputed that the SOFC's actually complied with ASC 274 or otherwise complied with GAAP. See Ex. 1014 โी $61-137$ (concluding that while "Mr. Trump consistently represented that his financial statements were prepared and fairly presented in accordance with GAAP," the SOFCs in fact included significant departures from GAAP that "had a material impact on the financial statements and were not adequately disclosed by Mr. Trump in his Statements").
52. ASC 274 establishes "estimated current value" as the "valuation standard applicable to personal financial statements." Bartov Expert Report at ${ }^{\text {I }} 33$.

RESPONSE: Undisputed.
53. Under GAAP preparers of financial statements have significant latitude when reporting asset values. Flemmons Expert Report at 4-7.

RESPONSE: Disputed as vague and unsupported by the cited evidence. Further disputed as contrary to the language of ASC 274, which requires that valuation methods "provide a satisfactory basis for determining the estimated current value of an asset" and which requires "sufficient disclosures to make the statements adequately informative." See Ex. 1014 qT/ 32-34, 63. Prof. Bartov similarly testified that any method used to determine a value for a Statement of Financial Condition must have the "goal of reaching estimated current value" and the "principle of estimated current value." See Robert Aff. Ex. AJ
at 338:13-19, 340:11-16.
54. "GAAP does not require a specific method to be used to estimate current value for a particular asset for personal financial statements, nor does GAAP require the same method to be used for all assets in the same group." Flemmons Expert Report ๆ| 31.

RESPONSE: Disputed, because under GAAP estimated current value must be determined using methods that reflect a potential exchange between a buyer and seller, each of whom is well-informed and willing, and neither of whom is compelled to buy or sell. See Ex. 1014 9TI 32-34, 63. Prof. Bartov similarly testified that any method used to determine a value for a Statement of Financial Condition must have the "goal of reaching estimated current value" and the "principle of estimated current value." See Robert Aff. Ex. AJ at 338:13-19, 340:11-16.
55. Estimated current value "affords preparers substantial latitude in the selection of asset valuation models and the assumptions underlying those models." Bartov Expert Report ๆ| 33.

RESPONSE: Disputed, because under GAAP estimated current value must be determined using methods that reflect a potential exchange between a buyer and seller, each of whom is well-informed and willing, and neither of whom is compelled to buy or sell. See Ex. 1014 q\| 32-34, 63 (citing ASC Topic 274). Prof. Bartov testified that any method used to determine a value for a Statement of Financial Condition must have the "goal of reaching estimated current value" and the "principle of estimated current value." See Robert Aff. Ex. AJ at 338:13-19, 340:11-16. Mr. Flemmons similarly testified that the valuation techniques listed in ASC 274 are intended to "meet that estimated current value definition," which is "the value at which an asset could be exchanged between a buyer and a seller." Robert Aff. Ex. AH at 86:2-91:12.
56. In a compilation engagement, an accountant provides no assurance or opinion with his or her services. Flemmons Expert Report at 8.

RESPONSE: Undisputed.
57. "A compilation does not contemplate performing inquiry, analytical procedures, or other procedures performed in a review." Id. (quoting AR § 80.03).

RESPONSE: Undisputed.
58. Accordingly, each SOFC states "[w]e have not audited or reviewed the accompanying financial statement and, accordingly, do not express an opinion or provide any assurance about whether the financial statement is in accordance with the accounting principles generally accepted in the United States of America." Compl. at Ex. 3, p.1.

RESPONSE: Disputed because the SFCs for individual years contain different language, but undisputed that certain SOFCs contain this quotation. See Pl.'s Statement Exs. 1-11.
59. The SOFCs also explicitly note that they contain departures from GAAP. Compl. ๆ 60, Ex. 3-13, p.1; see also Bartov Expert Report ๆ 46.

RESPONSE: Undisputed.
60. The Independent Accountants' Compilation Report included with each SOFC explicitly warns users that due to the "significance and pervasiveness" of GAAP departures in the SOFCs, users "might reach different conclusions about the financial condition of Donald J. Trump if they had access to a revised statement of financial condition prepared in conformity with accounting principles accepted in the United States." See, e.g., Compl. at Ex. 3 at p.2.

RESPONSE: Disputed as an inaccurate and misleading citation of the language quoted here. The quote from the Independent Accountants' Compilation Report cited in this paragraph states in full: "Because the significance and pervasiveness of the matters discussed above make it difficult to assess their impact on the statement of financial condition, users of this financial statement should recognize that they might reach different conclusions about the financial condition of Donald J. Trump if they had access to a revised statement of financial condition without the above referenced exceptions to accounting principles generally accepted in the United States of America." Pl.'s Statement Ex. 1 at p. 2 (emphasis added). The
reference to "matters discussed above" in the compilation report refers to the SFCs' representations of GAAP compliance but for expressly enumerated departures. Thus, no user was warned of any undisclosed GAAP departure.
61. This paragraph constitutes the "highest level of warning an accountant can raise in its communication to users when there are significant departures from GAAP." Flemmons Expert Report q 59.

RESPONSE: Disputed as vague and misleading because the cited paragraph does not affect Mr. Trump's obligation to identify and disclose each known departure from GAAP in his personal financial statement, and because the SFCs included numerous undisclosed departures from standard accounting principles that inflated the value of Mr. Trump's assets and net worth. See Ex. 1014 Tथा 61-68.
62. "While it is customary for the accountants' report to be addressed to the client, accounting standards establish that the users of the financial statements expand far beyond the client, including investors, vendors considering executing a contract with the company, banks seeking to lend to the entity, among many other purposes." Flemmons Expert Report \| 40.

## RESPONSE: Undisputed.

63. Additionally, "GAAP acknowledges that immaterial financial statement items do not need to comply with all the detailed requirements of GAAP, and thus allows preparers a reasonable level of flexibility in applying GAAP." Bartov Aff., Ex. B ("Bartov Rebuttal Report")

II 54 (emphasis added).
RESPONSE: Disputed, including because the departures from GAAP that Mr. Trump failed to disclose in his personal financial statement were material under the applicable accounting standards. See Ex. 1014 TTIT 61-68.
64. ' $[F]$ or an omission or misstatement in the financial statements to be material through the lens of a user, the user must rely on the information in the financial statements in his/her decision-
making process." Id. \|\| 63 (emphasis in original).
RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact. Furthermore, disputed because Prof. Bartov is purporting to proffer legal analysis and opinion (see Robert Aff. Ex. AK, Ex. B $\ddagger$ \| 58 -61) which is improperly presented as fact and is not an admissible use of expert testimony. See Measom v. Greenwich \& Perry St. Hous. Corp., 268 A.D.2d 156, 159 (1st Dep’t 2000) ("Expert testimony as to a legal conclusion is impermissible."). Furthermore, disputed that the assertion accurately characterizes "materiality" as defined by applicable accounting standards. See Ex. 1014 -TT 44-45, 140-142.
65. Viewing the SOFCs through the lens of a user like Deutsche Bank, "the SOFCs did not contain material misstatements." Bartov Rebuttal Report ๆ 174.

RESPONSE: Disputed because the asserted fact is not supported by the cited evidence, which is opinion testimony that includes inadmissible legal argument and lacks an evidentiary foundation. See Diaz $v$. New York Downtown Hosp., 99 N.Y.2d 542, 544 (2002) ("Where the expert's ultimate assertions are speculative or unsupported by any evidentiary foundation . . . the opinion should be given no probative force and is insufficient to withstand summary judgment."); Amaya v. Denihan Ownership Co., LLC, 30 A.D.3d 327, 327 (1st Dep't 2006) (finding that expert affidavit has no probative value on summary judgment where it "contained speculative, conclusory assertions" and "cited to various broad or inapt . . . rules, regulations and standards"); Measom v. Greenwich \& Perry St. Hous. Corp., 268 A.D. 2 d at 159. Further disputed because the Deutsche Bank credit risk officer who had credit issuance authority, and who bore responsibility, for approving the recommendations made by lending officers on loans to the Trump Organization testified that the bank would likely have declined the Doral loan had he been aware of only a select number of specific misstatements identified and demonstrated through evidence shown to him by OAG. See Ex. 1017 at 177:25-178:19; 194:2-12; 195:19-196:15. That bank official also testified (i) he was "shocked at the numbers reported on Mr. Trump's financial statement" for 40 Wall Street given
the then-existing appraised values of that property; and (ii) had he learned of discrepancies between net operating income figures used in appraisals of 40 Wall Street and those used for Mr. Trump's SFCs, he would have questioned the accuracy of other information provided and would have asked whether the bank should continue doing business with Mr. Trump. See Ex. 1017 at 237:2-241:25.

Similarly, Plaintiff's expert witness Michiel McCarty has concluded, based on his banking experience and his review of the record in this case, that "if during the loan evaluation process by DB's PWM Group of the first loan for Doral, the Statements had been found to be purposely false and misleading, the Doral loan and those that followed would not have been approved." Ex. 1015 § 40. Mr. McCarty further opines, based on his review of the PWM underwriting memos in this record, that Deutsche Bank would likely not have approved the low interest rate PWM loans to the Trump Organization if it had performed its underwriting analysis using adjusted net worth figures provided by Plaintiff's valuation and accounting experts "in place of the inflated figures found in Mr. Trump's Statements of Financial Condition." Id. qT1 41-47.

## IV. Transactions with Lenders and Insurers

66. The SOFCs were submitted in connection with the loans with Deutsche Bank's Private Wealth Management division for the Doral, Chicago, and OPO properties, the loan with Ladder Capital for the 40 Wall Street property, the loan with Royal Bank of America/Bryn Mawr for the Seven Springs property, the surety bond program with Zurich North America, and the Directors \& Officers ("D\&O") liability coverage with Tokio Marine HCC Insurance Company. See infra §§IV(a)-(f).

RESPONSE: Undisputed
67. In analyzing the SOFCs, banks are aware that the SOFCs are "truly an estimate" and they provide "knowledge to a reader and the user more than anything for them to be able to make their own informed decision." Robert Aff., Ex. AL ("Unell Dep.") 195:7-196:18, Unell Dep. 175:20-22
("[L]enders are trained not to rely on"SOFCs, "which is why the independent analysis in the credit memo is done.").

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact, and because Defendants submitted those Statements knowing that the banks relied on the SFCs' data in order to analyze Mr. Trump's personal guaranty as set forth in the banks' credit memos. See infra $\left.\right|^{1 /[105 ; 106 ;}$ 110; 126; 127; 149. Further disputed because lenders including Deutsche Bank expect and rely on their clients to provide financial information that is "fairly" presented and "true and correct." See Robert Aff. Ex. P at 300:19-301:9; Robert Aff. Ex. S at 53:7-22; Ex. 1018 qT111-17 (opining that "[t]he accuracy of the Statements of Financial Condition (SOFCs) was a crucial foundation to the Deutsche Bank Private Wealth Management approval process," and that Deutsche Bank "relied upon numbers from the SOFCs, as well as variables from other sources" in its underwriting calculations).
68. The SOFCs are a "roadmap" for banks to do their own independent analysis (Unell Dep. 197:2-11) and are just one of many factors that banks use to approve loan transactions and provide loan terms. Robert Aff., Ex. AM ("Unell Aff."), Ex. A ("Unell Expert Report") If 6.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact, but undisputed that SFCs can be one factor that banks use when determining whether to approve loan transactions and provide loan terms.
69. Banks also consider "loan-to-value, cash flow, debt service coverage ratio, and the experience of the borrower in operating similar assets" in determining the pricing of loans. Unell Expert Report ${ }^{\|} 6$.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact, but undisputed that the cited factors may be used by banks to determine the price of loans under certain circumstances.
70. "SOFCs provide ample information . . . for a sophisticated lender to be able to make. . .
their own determination," as those documents "provide the actual amounts" and "how they were calculated" such that if any bank had concerns, it "had an opportunity to challenge those assumptions that were utilized in the preparation of the SOFC." Unell Dep. 112:12-113:2.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact, and because the assertion is contradicted by the record. For example, the SFCs identify categories of assets represented to be worth billions, or hundreds of millions, of dollars with category-wide valuations; thus, for the assets in those categories, no "actual amounts" were disclosed nor do the SFCs disclose "how they were calculated." See Pl.'s Statement Exs. 1-11 (categories of "Club Facilities and Related Real Estate" and "Other Assets"). Similarly, the 2014 SFC notes on Trump Tower represented that the property was valued by "applying a capitalization rate to the cash flow to be derived from the building operations," but failed to provide the actual NOI or capitalization rate needed to evaluate that calculation. Robert Aff. Ex. AH at 126:17-128:18. The notes in the SFCs also provided inaccurate information about calculations, for example by misstating the method used to value Niketown in the 2011, 2012 and 2013 SFCs. Robert Aff. Ex. AI, Ex. B q\| 51-54; Ex. 1014 \| 94.
71. Additionally, banks are focused on the collateral itself as the primary source of repayment in loan transactions. Unell Expert Report IT 7.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact.

## a. Deutsche Bank

72. Beginning in 2011, President Trump and his businesses commenced a relationship with a Deutsche Bank Private Wealth Management division ("PWM") banker. Compl. ๆ 563.

RESPONSE: Undisputed.
73. To qualify as a customer of the PWM division, an individual generally needed to have a minimum total net worth of over $\$ 50$ million. See Robert Aff., Ex. AAD ("Sullivan Dep.") 100:2-8;

Robert Aff., Ex. AAE at 16. ('"Typical borrowers will have a net worth of over $\$ 50$ million). RESPONSE: Undisputed.
74. Pricing on loans made to PWM customers was according to an internal pricing grid based on the particular type of collateral involved. Robert Aff., Ex. P ("Williams Dep.") at 210:17-213:15.

RESPONSE: Undisputed, with the clarification that the Deutsche Bank ("DB") Private Wealth Management ("PWM") pricing grid applied only to recourse loans supported by a personal guaranty, and that non-recourse loans based on the same collateral would be priced much differently. See Pl.'s Statement $9 \mathbb{T}$ 440-44, 461-70, 499-503, 543-49 and supporting exhibits. DB PWM employees and former employees deposed by Defendants testified that PWM approved and priced its loans based on the financial resources of the individual client, and not primarily based on the collateral as would have been the case for a non-recourse loan made by the investment bank's commercial real estate division. See Robert Aff. Ex. P at 180:17-181:23 (testifying that the "distinction between lending on commercial real estate within Wealth Management as opposed to lending secured by commercial real estate in the investment bank" was that "[w]ithin Wealth Management, we're focused . . . predominantly on the individual first. In the investment bank, the approach is to the commercial real estate asset primarily."); Robert Aff. Ex. S at 353:7-356:12; Robert Aff Ex. AAD at 229:19-230:17.
75. The pricing grid "provides a range of spread over LIBOR . . . depending on the collateral type of the credit transaction." Id. at 210:23-25.

RESPONSE: Undisputed, with the clarification that the DB PWM pricing grid applied only to recourse loans supported by a personal guaranty, and that non-recourse loans based on the same collateral would be priced much differently. See Pl.'s Statement $941440-44,461-70,499-503,543-49$ and supporting exhibits. Furthermore, DB PWM employees and former employees deposed by Defendants testified that PWM approved and priced its loans based on the financial resources of the individual client, and not primarily based on the collateral, as would have been the case for a non-recourse loan made by the
investment bank's commercial real estate division. See Robert Aff. Ex. P at 180:17-181:23; Robert Aff. Ex. S at 353:7-356:12; Robert Aff Ex. AAD at 229:19-230:17.
76. Interest rates may have deviated lower than the recommended amount for "competitive reasons," and would not be subject to an upward deviation to a range higher than listed on the pricing grid absent a determination that "that the risk commensurate with a particular credit transaction warrant[ed] charging a higher rate[.]" Id. at 213:2-214:5

RESPONSE: Undisputed, with the clarification that the DB PWM pricing grid applied only to recourse loans supported by a personal guaranty, and that non-recourse loans based on the same collateral would be priced much differently. See Pl.'s Statement qTl 440-44, 461-70, 499-503, 543-49 and supporting exhibits.
77. The factors that PWM looked at when pricing a loan were the collateral, risk, and cost of funding. Id. at 214-215.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact, including because PWM would only price recourse loans supported by a personal guaranty, but undisputed that Mr. Williams testified that "collateral type," "risk rating" and "[t]he bank's internal cost to funds" are among the criteria used in loan underwriting.
78. The PWM pricing grid indicated a price of 2-2.5\% above LIBOR for commercial real estate collateral in the Americas, as applicable to President Trump. Id. at 271:16-25; Robert Aff., Ex. AB.

RESPONSE: Undisputed, with the clarification that the DB PWM pricing grid applied only to recourse loans supported by a personal guaranty, and that non-recourse loans based on the same collateral would be priced much differently. See Pl.’s Statement $9 \uparrow 440-44,461-70,499-503,543-49$ and supporting exhibits. Further clarification that PWM approved and priced its loans primarily based on the financial resources of the individual client, rather than the collateral as would have been the case for a non-recourse
loan made by the investment bank's commercial real estate division. See Robert Aff. Ex. P at 180:17181:23; Robert Aff. Ex. S at 353:7-356:12; Robert Aff Ex. AAD at 229:19-230:17.
79. President Trump's financial profile qualified him to be at the lower range of the pricing guidelines contained on the grid-even potentially qualifying him for a downward deviation-and this pricing would not have changed even if President Trump's net worth was \$1 billion. Id. at 272:20275:17. Mr. Williams was of the opinion that a net worth of $\$ 1$ billion would not have affected the pricing on the loans, even when compared to a net worth of $\$ 4.3$ billion, because a net worth in excess of 1 billion constitutes a strong borrower or guarantor. Id. at 274:6-17.

RESPONSE: Disputed as vague and because the cited evidence (which includes objectionable, speculative deposition testimony that was prompted by leading questions and incomplete hypotheticals) fails to support the asserted facts. Further disputed because the Deutsche Bank credit risk officer who bore responsibility for approving the recommendations made by lending officers (including Mr. Williams) testified that the bank would likely have declined the Doral loan had he been aware of specific misstatements identified in OAG's Complaint and documented by the evidence submitted in support of Plaintiff's Statement of Material Facts. See Ex. 1017 at 177:25-178:19; 194:2-12; 195:19-196:15; 237:2-241:25. Similarly, Plaintiff's expert witness Michiel McCarty concluded, based on his banking experience and his review of the record in this case, that "if during the loan evaluation process by DB's PWM Group of the first loan for Doral, the Statements had been found to be purposely false and misleading, the Doral loan and those that followed would not have been approved." Ex. 1015 § 40. Mr. McCarty further opines, based on his review of the PWM underwriting memos in this record, that Deutsche Bank would likely not have approved the low interest rate PWM loans to the Trump Organization if it had performed its underwriting analysis using adjusted net worth figures provided by Plaintiff's valuation and accounting experts "in place of the inflated figures found in Mr. Trump's Statements of Financial Condition." Ex. 1015 qा 41 47.
80. In Deutsche Bank's view, President Trump "had a verifiable net worth in a top tier of
the regional market." Id. at 160:14-161:7.
RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact.
81. Ultimately, when it came to pricing, Deutsche Bank's "goal is to remain within the range set forth in th[e] pricing grid[,]" Id. at 274:2-4.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact.
82. At all times, Deutsche Bank believed that President Trump had "a proven successful track record in the United States commercial real estate market." Id. at 125:2-6.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact. Further disputed as overbroad considering the history of prior loan defaults and litigation between Mr. Trump and Deutsche Bank. See Ex. 1018 | 22-23.
83. In total, Trump guaranteed three loans with Deutsche Bank's PWM division: (1) the Trump National Doral loan for Trump Endeavor 12 LLC ("Doral loan"), (2) the Trump International Hotel \& Tower Chicago loan for 401 North Wabash Venture LLC ("Chicago loan"), and (3) the Old Post Office Hotel loan for Trump Old Post Office LLC ("OPO loan"). See infra §§ IV(a)(i)-(iii).

RESPONSE: Undisputed.
84. As part of the due diligence process for these loans, Deutsche Bank lenders met with Jeff McConney and reviewed bank statements representing liquid assets and synthesized that information into the Deutsche Bank prepared credit memos. Pereless Dep. 165:23-167:7.

RESPONSE: Undisputed.
85. Deutsche Bank was "[c]omfortable with the level of assets" that President Trump held and was "comfortable that the recordation of that amount of liquid assets that were included in the credit memo" were "accurate." Pereless Dep. 167:8-168:8.

RESPONSE: Disputed as vague and because the cited testimony does not support the asserted fact, and because Defendants misrepresent the testimony of the former Deutsche Bank employee whose deposition
is quoted here. See Robert Aff. Ex. S at 167:8-19:
Q. And as you sit here today, any recollection of having any level of uncertainty about the amount of President Trump's liquid assets based on the due diligence review you performed on these two or three or four occasions?

MR. LADOV: Objection.
A. Yeah, I don't think they ever equaled the amount exactly that would be on the personal financial statement, but I think they did come close. It was enough to -- that we were comfortable.
86. Deutsche Bank also applied "haircuts" to the values listed on the SOFCs. Haircuts are "[d]iscounts to clients' stated values" (Williams Dep. 31:6-7) that are meant to serve as an "adverse scenario analysis" to determine "what happens if the client's financial position is under stress." Robert Aff., Ex. O ("Haigh Dep.") 148:8-21.

RESPONSE: Undisputed.
87. These haircuts are Deutsche Bank's independent assessments of value that it calculates during its application of "stresses" on the client's reported asset values (Pereless Dep. 265:4-8) to determine a "conservative value" (Pereless Dep. 224:22-225:8) of the asset.

RESPONSE: Disputed that Deutsche Bank's "haircuts" constitute "independent assessments of value," but undisputed that the bank applied standard "haircuts" or "stresses" to a client's reported asset values to determine a "conservative" or "adverse scenario analysis" that "is trying to see what happens if the client's financial position is under stress." See Robert Aff. Ex. S at 224:3-225:8; Ex. 1017 at 75:11-77:10; 79:7-24; 148:6-149:21; Robert Ex. O at 147:15-148:21.
88. A "haircut" thus results in an "adjusted value," otherwise synonymous with the "DB adjusted" value. Pereless Dep. 224:11-21.

RESPONSE: Undisputed.
89. Deutsche Bank was "focused on [its] own independent view, so [it] didn't spend a lot of time determining . . . what was disclosed." Sullivan Dep. 83:19-84:13.

RESPONSE: Disputed because the assertions are vague and because the cited evidence does not support
the asserted fact, but undisputed that the bank "didn't spend a lot of time determining . . . what was disclosed" because it expected its clients to submit accurate information. See Robert Aff. Ex. P at 300:19301:9; Robert Aff. Ex. S at 53:7-22; Ex. 1018 q\| 11-17.
90. Ultimately, Deutsche Bank was "comfortable with the assessment [it] did independently." Sullivan Dep. 84:4-13.

RESPONSE: Disputed because the assertions are vague and because the cited evidence does not support the asserted fact, but undisputed that Deutsche Bank's internal credit memos recommended approval of loans to the Trump Organization based on the information known to the bank at the time, including the information provided by Mr. Trump's SOFCs. See infra $\uparrow \mathbb{T} T 105 ; 106 ; 110 ; 126 ; 127 ; 149$ (admitting that Deutsche Bank's underwriting relied upon values provided in Mr. Trump's SOFCs); Ex. 1018 9世/ 11-17 (opining that " $[t]$ he accuracy of the Statements of Financial Condition (SOFCs) was a crucial foundation to the Deutsche Bank Private Wealth Management approval process, and that Deutsche Bank "relied upon numbers from the SOFCs, as well as variables from other sources" in its underwriting calculations); Robert Aff. Ex. S at 206:4-6 (when asked about underwriting review at 2023 deposition, responding that "I don't have a view other than we supported the facility at the time.").
91. In fact, "Deutsche Bank had ample opportunity to investigate anything" in the SOFCs, as "Deutsche Bank had ample material listed in the Statement of Financial Condition to make their own informed decision." Unell Dep. 110:25-113:18.

RESPONSE: Disputed because the assertions are vague and the cited evidence fails to support the asserted fact. Further disputed because the cited expert opinion testimony lacks a foundation in evidence and therefore should be given no probative weight by the Court. See Diaz v. New York Downtown Hosp., 99 N.Y.2d at 544; Amaya v. Denihan Ownership Co., LLC, 30 A.D.3d at 327.

Further disputed because the assertion that a bank has an "opportunity to investigate anything" in the SOFCs conflicts with the standard business practices that apply to a bank's review of non-collateral
assets. As defendants' expert Mr. Unell testified at deposition, banks must take personal financial statements at "face value":

As a lender, you don't go into something with the idea that it's wrong. You take it for -- you trust your client. You take it for worth. They are the ones that know these assets better than anybody. They're non-collateral assets. You don't go get an appraisal on non-collateral assets. It's unrealistic. It's too time consuming, too costly, et cetera.

Robert Aff. Ex. AL at 178:18-179:2, 179:24-180:3. Deutsche Bank accordingly did not conduct an appraisal or any comparable independent valuation for non-pledged commercial real estate assets owned by Mr. Trump. See Robert Aff. Ex. S at 128:25-130:7; 236:25-238:21. Deutsche Bank instead expected and relied on Mr. Trump to provide financial information that was "fairly" presented and "true and correct." See Robert Aff. Ex. P at 300:19-301:9; Robert Aff. Ex. S at 53:7-22.
92. Even if the allegations in the Complaint were true, "the net worth was still sufficient to qualify for inclusion in the private wealth bank" and liquidity is "material" to the bank and that the bank "went and verified it." Unell Dep. 110:25-112:5.

RESPONSE: Disputed because the assertions are vague and the cited evidence fails to support the asserted fact. Further disputed because the cited expert opinion testimony lacks a foundation in evidence and therefore should be given no probative weight by the Court. See Diaz v. New York Downtown Hosp., 99 N.Y.2d 542 at 544; Amaya v. Denihan Ownership Co., LLC, 30 A.D.3d at 327. Further disputed because the cited expert testimony is inadmissible as evidence to support Defendants' legal claims concerning the materiality of misstatements in their SFCs. See Measom v. Greenwich \& Perry St. Hous. Corp., 268 A.D.2d at 159.
93. Generally, materiality "is in the eye of the beholder, not the eye of a third party, not the eye of a regulator, not the eye of, in this case, the Attorney General" and Deutsche Bank "did what they were supposed to do and verified" certain items and "anything else would have been immaterial." Unell Dep. 190:9-17.

RESPONSE: Disputed because the assertions are vague and the cited evidence fails to support the
asserted fact. Further disputed because the cited expert opinion testimony lacks a foundation in evidence and therefore should be given no probative weight by the Court. See Diaz v. New York Downtown Hosp., 99 N.Y.2d 542 at 544; Amaya v. Denihan Ownership Co., LLC, 30 A.D.3d at 327. Further disputed because the cited expert testimony is purporting to offer an opinion concerning "materiality" from the perspective of a regulatory or enforcement agency; such testimony lacks foundation and is inadmissible as a legal opinion. See Measom v. Greenwich \& Perry St. Hous. Corp., 268 A.D.2d at 159.
94. '"T]he information in the Compilation Reports did not impact Deutsche Bank's decisions whether or not to extend loans to Defendants and what interest rate to require." Bartov Expert Report ${ }^{\|} 107$.

RESPONSE: Disputed because the assertions are vague and the cited evidence fails to support the asserted fact. Further disputed because Prof. Bartov lacks any experience in commercial banking or underwriting, Robert Aff. Ex. AJ at 142:13-24, and his unsupported opinion that Mr. Trump's SFCs were immaterial to Deutsche Bank's lending decisions is contrary to the evidence and therefore inadmissible. See Diaz v. New York Downtown Hosp., 99 N.Y.2d at 544; Amaya v. Denihan Ownership Co., LLC, 30 A.D.3d at 327. Further disputed because Deutsche Bank evaluated Mr. Trump's SFCs as part of its underwriting of his personal guaranty, which the bank's Private Wealth Management division relied upon to offer loans at significantly lower interest rates than the investment bank's Commercial Real Estate division could offer to the Trump Organization. See generally Pl.'s Statement qT/ 438-574 and accompanying exhibits.
95. In general, the bank's relationship with President Trump was profitable. See Robert Aff., Ex. AAB ("Vrablic Dep.") 306:3-13.

RESPONSE: Disputed because the assertions are vague and the cited evidence fails to support the asserted fact. Although it is undisputed that the bank earned income from its loans to the Trump Organization, Defendants offer no evidence to establish how much of that income was "profit."

Furthermore, Plaintiff's expert witness Michiel McCarty has concluded, based on his banking experience and his review of the record in this case, that banks who relied upon Mr. Trump's materially-misstated SOFCs to underwrite his personal guaranty took on more Credit Risk than they had bargained for, and that these banks "suffered a loss by charging less interest than was warranted by the Credit Risk profile of the loans." Ex. 1015 种 48-62, 113.
96. There was never a covenant or payment default involving any entity affiliated with President Trump in a credit transaction made by the PWM division. Williams Dep. 187:9-15; 189:1016; 192:13-193:4.

RESPONSE: Disputed because the assertions are vague and the cited evidence does not support the asserted fact, and because the misrepresentations and false statements in Defendants' submissions to Deutsche Bank constituted Events of Default under relevant loan documents, as Deutsche Bank stated to the Trump Organization in 2020. See Pl.'s Statement q/T 447-451, 485, 490-91, 517-19, 558-60 and supporting exhibits. Further disputed because Deutsche Bank contacted the Trump Organization in 2019 after determining that the Doral, Chicago and OPO borrowing entities were "not in compliance with the Debt Service Coverage Ratio ("DSCR") covenant set forth" in each of the applicable loan agreements. Ex. 1050; Ex. 1051; Ex. 1052; see also Pl.'s Statement Ex. 272 (DB credit memo discussing DSCR covenant breaches at Trump properties).
97. [A] $]^{3}$ There was never a recommendation at any time that there was a basis to declare default based on President Trump's failure to maintain a net worth of at least $\$ 2.5$ billion. Williams Dep. 190:25-191:10; Sullivan Dep. 81:21-82:4; Vrablic Dep. 305:21-306:16.

RESPONSE: Disputed because the cited evidence does not support the asserted fact.
97. [B] Additionally, numerous former Deutsche Bank employees testified they did not

[^15]believe there was any material misrepresentation made to the PWM division in connection with any loan affiliated with President Trump. See Williams Dep. 184:21-185:1; Sullivan Dep. 81:21-83:7, 293:7-20; Vrablic Dep. 32:3-13, 229:16-23 ("Q: And as you sit here today, do you have any reason to believe that at any time between January 1, 2011, and the time that you left Deutsche Bank, Eric Trump submitted any materially misleading statements to Deutsche Bank? A: To the best of my knowledge, no."), 229:25230:7 ("Q: And as you sit here today, do you have any reason to believe that at any time between January 1, 2011 and the time that you left Deutsche Bank, Donald Trump, Jr. submitted any materially misleading statement to Deutsche Bank? A: To the best of my knowledge, no.")

RESPONSE: Disputed because the cited evidence (which includes objectionable, speculative deposition testimony that was prompted by leading questions and incomplete hypotheticals) does not support the asserted fact. Further disputed as lacking foundation, because these witnesses also testified that they had not reviewed the specific allegations in the Complaint (see Robert Aff. Ex. P at 16:16-22; Robert Aff. Ex. AAD at 18:9-25) or that they were only responding "to the best of [their] knowledge" (Robert Aff. Ex. AAB at 229:16-230:7). Moreover, Defendants did not present any of these Deutsche Bank witnesses with the specific allegations raised in the Complaint about Mr. Trump's SOFCs, or the evidence that OAG has submitted to the Court in support of its allegations. See generally Robert Aff. Exs. P, AAD, S, AAB.

By contrast, during the OAG's investigation, a former Head of Credit Risk Management for Deutsche Bank's PWM Americas division was asked to review evidence of specific misstatements in Mr. Trump's SFCs, including evidence showing that Mr. Trump reported an inflated valuation for his interest in 40 Wall Street despite possessing an appraisal showing a valuation of $\$ 200$ million as of Nov. 1, 2011, and that Mr. Trump had reported a Net Operating Income (NOI) for 40 Wall Street that was approximately four times the actual NOI used in this same appraisal. See Ex. 1017 at 172:2-177:24. When asked how he would have responded if these discrepancies had come to his attention during the
credit review, he testified that he "would have treated [Mr. Trump's] financial disclosure with - generally with a larger degree of skepticism and specifically I would have adjusted the equity value of that specific asset," and that "if The Trump Organization could not have provided a reasonable explanation then I think I would have recommended declining the transaction." Ex. 1017 at 177:25-178:19. That official also testified he was "shocked at the numbers reported on Mr. Trump's financial statement" for 40 Wall Street given the then-existing appraised values of that property, and that had he learned of discrepancies between net operating income figures used in appraisals of 40 Wall Street and those used for Mr. Trump's Statements he would have questioned the accuracy of other information provided and would have asked whether the bank should continue doing business with Mr. Trump. Ex. 1017 at 237:2-241:25.
98. When Mr. Williams was interviewed by the NYAG as part of their investigation, he was not concerned about whether any of the SOFCs were misleading because "Deutsche Bank has a reasonable expectation the client's, any client's financial reporting that is provided to the bank is true and accurate in all material respects." Williams Dep. 34:23-35:21, 36:16-37:4. Mr. Williams believes this expectation is still reasonable as it relates to the SOFCs. Williams Dep. 37:5-12.

RESPONSE: Disputed because the cited evidence fails to support the asserted fact, but undisputed that "Deutsche Bank has a reasonable expectation the client's, any client's financial reporting that is provided to the bank is true and accurate in all material respects." See also Robert Aff. Ex. P at 300:19-301:9; Robert Aff. Ex. S at 53:7-22.
99. During his deposition, Mr. Williams testified that he still had no concern that the SOFCs were misleading. Williams Dep. 36:9-15.

RESPONSE: Disputed because the cited evidence (which includes objectionable, speculative deposition testimony that was prompted by leading questions and incomplete hypotheticals) does not support the asserted fact. Further disputed as lacking foundation because Mr. Williams also testified that he had not reviewed the Complaint. See Robert Aff. Ex. P at 16:10-22.
100. Moreover, Deutsche Bank earned millions of dollars in revenue from dealing with President Trump. See Robert Aff., Exs. AAI, AAH, AAG, Ex. AAQ ("Garten Aff.") 『 5. RESPONSE: Undisputed.
101. The available revenue figures are as follows: $\$ 13,477$ (2011), $\$ 2.6$ million (2012); $\$ 3.5$ million (2013); projected $\$ 6.8$ million (2014) $\$ 3,305,699$ (2015) $\$ 2,733,072$ (2016), for an estimated total revenue between 2011-2016 alone that ranges upwards of $\$ 15$ million. Robert Aff., Exs. AAI, AAH, AAG.

RESPONSE: Undisputed.

## i. Trump Endeavor 12 LLC (2012)

102. In November of 2011, Trump Endeavor 12 LLC executed a $\$ 150$ million purchase and sale agreement for Trump Doral. Compl. $q$ q 471 , 587. Trump Endeavor 12 LLC held plans to invest another $\$ 50$ million of its own capital in a luxurious renovation. Robert Aff., Ex. T.

RESPONSE: Undisputed.
103. The PWM division offered a loan to support the purchase of Trump Doral with a total loan amount of $\$ 125$ million (Compl. $\| 583$ ), $\$ 19$ million of which was an unsecured personal loan. Compl. ๆ 586. The loan was supported by an appraisal, (Compl. \| 585), and the confirmation that President Trump had roughly $\$ 258.9$ million in liquid assets at the time the loan was negotiated through the review of bank and brokerage statements. Williams Dep. 198:5-201:8.

RESPONSE: Disputed that PWM offered a loan to support the purchase of Doral based just on the support of an appraisal and a review of Mr. Trump's liquidity, because PWM also required the loan to be supported by Mr. Trump's personal guaranty and his personal financial statements, but undisputed that Mr. Williams' testimony refers to the confirmation of roughly $\$ 258.9$ million in "cash and marketable securities."

Further disputed because Deutsche Bank's internal review of this appraisal raised extensive objections, including concerns over the location of the resort, which led the bank's internal reviewer to believe that the unrenovated value of Doral was less than $\$ 150$ million, and that he was "comfortable with concluding a value for the property in the range of $\$ 110-\$ 115$ million." Ex. 1019; Ex. 1020 at -16. Deutsche Bank's valuation of Doral prompted the bank to split the Doral into secured and unsecured tranches, further demonstrating the importance of Mr. Trump's personal guaranty to the underwriting and pricing of this loan. Pl.'s Statement Ex. 266 at DB-NYAG-105524.
104. Deutsche Bank expected the value of the collateral to "increase significantly over the term of the facility" considering the " $\$ 50$ million in capital expenditures" on renovations. Pereless Dep. 268:8-24.

RESPONSE: Undisputed, with the clarification that PWM would not have made this loan based only on the collateral without Mr. Trump's personal guaranty. See Robert Aff. Ex. AAD at 185:15-188:15 (testifying that Doral was "a development type transaction, and the amount of the loan versus the uncertainty of the value because it was a property that was going to be developed" highlighted the importance of "relying on a guarantee . . . as part of the underwriting"). Additional clarification that the value of the Doral collateral was initially insufficient in Deutsche Bank's view to provide security for the full loan, requiring the loan to be split into secured and unsecured tranches, further demonstrating the importance of Mr. Trump's personal guaranty to the bank's credit analysis. See Pl.'s Statement Ex. 266 at DB-NYAG-105524.
105. A condition of the loan was that the 2011 SOFC be provided to Deutsche Bank.

Compl. ๆ 588.
RESPONSE: Undisputed.
106. In reviewing the 2011 SOFC, Deutsche Bank calculated its own values of President Trump's assets by applying "haircuts" to the values reported in the 2011 SOFC. Compl. $\mathbb{1}$ 584; Pereless

Dep. 265:4-17.
RESPONSE: Undisputed that Deutsche Bank applied "haircuts" to the stated values from the 2011 SFC, but dispute Defendants' characterization because the cited testimony states that these adjustments are "the application of stresses or haircuts," and not an independent calculation of the bank's "own values." See also supra, Response to Defs.' Statement q 87.
107. Lending officers completed their "due diligence" in compliance with Deutsche Bank's operational policies (Pereless Dep. 227:14-25) by evaluating specific assets and using "their judgment in setting the appropriate adjustments to achieve conservative valuations of concentrated assets." Pereless Dep. Ex. 13 at 8.

RESPONSE: Disputed because the assertions are vague and because the cited evidence does not support the asserted fact. Further disputed because most of the "due diligence" conducted for the assets of a PWM client consisted of applying standardized reductions of stated value, including those generated by a "standard spreadsheet" used by Deutsche Bank, to help analyze a "conservative" or "adverse scenario analysis" that "is trying to see what happens if the client's financial position is under stress." See Ex. 1017 at 75:11-77:10; 79:7-24; 148:6-149:21; Robert Ex. $O$ at 147:15-148:21. To the extent that lending offers evaluated specific assets during this process, they took the information provided by the bank's clients at "face value," because they relied on the bank's clients to provide financial information that was "fairly" presented and "true and correct," and then applied a "stress" to reach a "stressed value" or "more conservative value." Robert Aff. Ex. AL at 178:18-179:2, 179:24-180:3; Robert Aff. Ex. P at 300:19301:9; Robert Aff. Ex. S at 53:7-22, 224:3-226:7. Therefore, because the Trump Organization provided Deutsche Bank with inflated valuations in the SFCs, as well as other inaccurate information about Mr. Trump's four "trophy" properties (Trump Tower, Niketown, 40 Wall Street and Trump Park Avenue), the bank's adjusted value for those properties was improperly inflated as well. See Pl.'s Statement Ex. 226 at 6.

For example, the Trump Organization told Deutsche Bank that it had reached an "estimated current value of $\$ 524,700,000$ " for 40 Wall Street by applying a $5.00 \%$ cap rate to the property's Net Operating Income (NOI) of \$26.2 million. Pl.'s Statement Ex. 1 at 9; Pl.'s Statement Ex. 226 at 6. The bank then adjusted this valuation by applying a more conservative cap rate of $6.00 \%$ to reach an adjusted valuation of $\$ 438$ million. Pl.'s Statement Ex. 226 at 6 . But even this adjusted valuation was approximately double the current value of 40 Wall Street found by contemporaneous appraisals. See Pl.'s Statement Ex. 70 at 1-2 (appraisal valuation of $\$ 200$ million as of August 1, 2010); Pl.'s Statement Ex. 73 at 1-2 (appraisal valuation of $\$ 200$ million as of November 1, 2011).

This overstatement of value occurred because the $\$ 26.2$ million NOI provided by the Trump Organization to Deutsche Bank was inaccurate and inflated, as demonstrated by the much lower NOI figures provided in a professional appraisal that relied on the Trump Organization's internal accounting spreadsheets. See Pl.'s Statement Ex. 73 at $-3496-3497$; Ex. 1003 at $150: 6-154: 16$. The Trump Organization's use of a $5.00 \%$ cap rate was similarly in conflict with the appraiser's market analysis. See Pl.'s Statement Ex. 73 at $-3365-3368$. The Deutsche Bank credit risk officer who had credit issuance authority, and who bore responsibility, for approving the recommendations made by lending officers on loans to the Trump Organization testified that he was "shocked at the numbers reported on Mr. Trump's financial statement" for 40 Wall Street given the then-existing appraised values of that property, and that had he learned of discrepancies between net operating income figures used in appraisals of 40 Wall Street and those used for Mr. Trump's SFCs he would have questioned the accuracy of other information provided and would have asked whether the bank should continue doing business with Mr. Trump. See Ex. 1017 at 237:2-241:25.

Similarly, Deutsche Bank adjusted the value of Trump Park Avenue by applying an "approximate $35 \%$ haircut on the reported value" of $\$ 311.6$ million to reach an adjusted valuation of $\$ 206.3$ million. Pl.'s Statement Ex. 226 at 6. However, that "reported value" was wildly inflated by the Trump

Organization, including by ignoring the rent-stabilization status of units at the property, by valuing units above the option prices agreed to between the Trump Organization and Ivanka Trump, and by using offering plan prices that exceeded current market values. Pl.'s Statement q\| $334-83$ and supporting exhibits. As a result, even Deutsche Bank's adjusted value far exceeded the appraised market value of $\$ 72,500,000$ that was found by an appraisal performed in 2010. Pl.'s Statement Exs. 141 at $-905,142$, 143, 144.
108. In connection with the proposal from PWM, an internal credit memo evaluated assets reported on the 2011 SOFC. Compl. If 584; Robert Aff., Ex. T. These assets included: Trump Tower, Niketown, 40 Wall Street, Trump Park Ave, "Club Facilities," "Other Property interests," and "Properties under Development." Robert Aff., Ex. T at 5.

RESPONSE: Undisputed.
109. Deutsche Bank chose to perform a "higher level of due diligence on the assets being pledged than [those] not being pledged" because "[the bank was] taking a mortgage on those [pledged] assets and potentially the bank could own those assets[.]". Pereless Dep. 238:8-21.

RESPONSE: Undisputed.
110. Ultimately, Deutsche Bank adjusted the net worth reported in the 2011 SOFC based on haircuts it performed. Compl. ๆ 584; see generally Robert Aff., Ex. T at 4-7.

RESPONSE: Undisputed.
111. This "DB adjusted value" was one that Deutsche Bank lending officers were "comfortable with." That is, "[c]omfortable with the level of liquid assets that Mr. Trump held" and "comfortable that the recordation of that amount of liquid assets that were included in the credit memo" were "accurate." Pereless Dep. 167:8-168:8.

RESPONSE: Disputed because the cited evidence does not support the asserted facts, but undisputed that Ms. Pereless testified at her March 15, 2023 deposition that she recalled being "[c]omfortable with
the level of liquid assets that Mr. Trump held" based on the information available to her during the underwriting process for the Doral loan in 2011.
112. Deutsche Bank lending officers recommended approval of the Doral Loan and determined that President Trump had the financial wherewithal to fully repay the loan if needed as well. Sullivan Dep. 110:19-111:9, 120:21-121:10; Robert Aff., Ex. T.

RESPONSE: Undisputed, with the clarification that Deutsche Bank lending officers recommended approval of the Doral loan in 2011 based on Mr. Trump's personal guaranty and the information available to them at the time, including the asset values reported in the 2011 SFC.
113. Deutsche Bank's adjusted net worth for President Trump when underwriting the Doral Loan was set at \$2.365B. Robert Aff., Ex. T at 4.

RESPONSE: Undisputed, with the clarification that the "adjusted net worth" was based on standardized reductions of stated value used to analyze a "conservative" or "adverse scenario analysis" that "is trying to see what happens if the client's financial position is under stress." See Ex. 1017 at 75:11-77:10; 79:7-24; 148:6-149:21; Robert Ex. O at 147:15-148:21. See also supra, Response to Defs.' Statement ${ }^{\text {§ }} 107$.
114. Other factors considered as a basis for Structured Lending's recommendation of approval for the Trump Doral credit facility included "President Trump's operating experience" as "any client's historical success in a certain business model would be a credit enhancement if ... approving a similar business model[,]" President Trump's "financial profile[,]" Deutsche Bank's "due diligence" conducted at the Trump "family office[,]" and "adjustments to [President Trump's] reported values." Pereless Dep. 266:2-19; Robert Aff., Ex. T at 4.

RESPONSE: Undisputed.
115. The Trump Doral loan closed on June 11, 2012, with a loan to Trump Endeavor 12 LLC.

Compl. $\ddagger 587$.

## RESPONSE: Undisputed.

116. As part of the loan, President Trump signed a personal guarantee with requirements that, inter alia, he maintain: (i) $\$ 50$ million in unencumbered liquidity and (ii) a $\$ 2.5$ billion net worth to be tested and certified on an annual basis based upon the SOFC delivered to Deutsche Bank. Compl. ๆ 592. RESPONSE: Undisputed.
117. The primary and secondary form of repayment on the Doral loan were the underlying collateral, while the Guarantee would only be implicated as a tertiary form of repayment. Robert Aff., Ex. T at 3 ("Primary Source of Repayment: Refinancing of the Resort with long-term financing following the completion of the Renovation Period or upon expiration of the 5-year term. Secondary Source of Repayment: Cash flow from Resort following the Renovation Period. Based on projections the Resort will be able to satisfactorily service principal and interest based on a 25 -year amortization schedule. Tertiary Source of Repayment: Full and unconditional guarantee of DJT which eliminates any shortfall associated with operating and liquidating collateral.")

RESPONSE: Undisputed that this accurately states the sources of repayment listed in the cited Deutsche Bank credit memo, but disputed that this meant that Mr. Trump's personal guaranty was of less importance than the collateral to PWM's underwriting of the Doral loan. See Pl.'s Statement $9 \uparrow 452-478$ (describing the different underwriting processes used by Deutsche Bank's CRE and PWM divisions, and the significantly lower interest rate paid by Mr. Trump when he entered into a recourse loan with PWM that relied on his personal guaranty). Further disputed because Doral's cash flow was not expected to support repayment of the loan during the Renovation Period; therefore, Mr. Trump's guaranty of both loan payments and operating shortfalls was critical for the bank's underwriting. See Pl.'s Statement Ex. 226 at DB-NYAG-001691 ("The Facility will also be supported by a full and unconditional guarantee provided by DJT of (I) Principal and Interest due under the Facility, and (ii) operating shortfalls of the Resort (it being understood that Borrower shall be permitted to utilize all revenues from the Resort to
operate the Resort to reduce the amount of such shortfall).").
118. Simply by closing on the Doral Loan, Deutsche Bank generated fees in the sum of $1.25 \%$ of the loan amount, a $.25 \%$ commitment fee which would be fully earned at the execution of a Commitment Letter, and a $1 \%$ commitment fee payable at closing. Id. at 2 . With a $\$ 125$ million commitment amount, the fees generated by Deutsche Bank at the closing of Doral were upward of $\$ 1.5$ million ( $\$ 125$ million $X 1.25 \%=\$ 1,562,500$ ).

RESPONSE: Undisputed.
119. The primary and secondary form of repayment on the Doral loan were the underlying collateral, while the Guarantee would only be implicated as a tertiary form of repayment. Robert Aff., Ex. T at 3 ("Primary Source of Repayment: Refinancing of the Resort with long-term financing following the completion of the Renovation Period or upon expiration of the 5-year term. Secondary Source of Repayment: Cash flow from Resort following the Renovation Period. Based on projections the Resort will be able to satisfactorily service principal and interest based on a 25 -year amortization schedule. Tertiary Source of Repayment: Full and unconditional guarantee of DJT which eliminates any shortfall associated with operating and liquidating collateral.")

RESPONSE: See supra, Response to identical Paragraph 117.
120. In July 2013, Deutsche Bank approved a modified version of the guarantee that enabled President Trump's guarantee obligation and net worth covenant to step down as the loan- to-value ratio of the loan was reduced, which minimized the "risk profile" absorbed by Deutsche Bank. Compl. $\mathbb{1}$ 596; Pereless Dep. 269:4-17.

RESPONSE: Undisputed that a modified version of the guaranty was executed, with the clarification that the cited testimony describes a lower-risk profile occurring as a general matter if the loan-to-value ratio goes down on a loan; it does not describe the effect of the amended guaranty Mr. Trump executed.
121. Overall, Deutsche Bank believed the Trump Doral loan had "performed quite well,
enough to warrant considering increasing the loan amount secured by the property." Williams Dep. 221:10-19. Deutsche Bank determined this performance rating based on "predominantly the value of the property" and the improvement in terms of "cash flow" and "loan-to-value." Williams Dep. 221:20222:14.

RESPONSE: Undisputed.
122. To certify the maintenance of the net worth covenant, Deutsche Bank considered a representation from the Guarantor, President Trump (or others on his behalf in subsequent years), "sufficient . . . to comply with his obligations under the guarantee[,]" the certification was to effect of:
[T] o the best of Guarantor's current knowledge and information, and Guarantor currently not being aware of facts, circumstances or events that individually, or in the aggregate, establish the contrary conclusion, 'net worth of Guarantor for the period ending June 30th is not less than $\mathrm{X} \$ 2,500,000,000$ times Y , the applicable stepdown percentage on the date hereof.

See Robert Aff., Ex. R. Deutsche Bank accepted this representation from President Trump as a form of compliance with the net worth covenant. Williams Dep. 309:24-310:21.

RESPONSE: Disputed, because Deutsche Bank did not accept this representation on its own as a form of compliance with the net worth covenant, but also required (as a condition in the Doral, Chicago and OPO loan documents) that Mr. Trump submit his statement of financial condition along with this certification annually to demonstrate compliance. See Pl.’s Statement ${ }^{T l l} 489,515,528,554,572$ and supporting exhibits. The importance of this annual submission was demonstrated when the Trump Organization advised Deutsche Bank on or about September 14, 2020 that it would not be providing a financial statement for Mr. Trump as required by its loan documents. In response, the bank's legal counsel held discussions with the Trump Organization, and "Guarantor's request that DBTCA forgo his Statement of Financial Condition entirely this year was modified to a request for an extension of time, from October 28, 2020 to December 31, 2020." Ex. 1021 at 5. After further delays, "[ t$]$ he required Statement of Financial Condition was received on January 12, 2021" by the bank. Id.
123. On May 26, 2022, Trump Endeavor 12 LLC refinanced the Doral Loan through Axos

Bank, repaying the $\$ 125$ million of principal outstanding to Deutsche Bank. Compl. $\uparrow \mathbb{T}$ 587, 600. RESPONSE: Undisputed.

## ii. 401 North Wabash Venture LLC (2012)

124. In June 2012, 401 North Wabash Venture LLC sought a loan from the PWM division at Deutsche Bank to refinance an existing $\$ 130$ million loan from the CRE division of Deutsche Bank secured by the Trump Chicago property. Compl. ๆ 601.

RESPONSE: Undisputed, with the clarification that the Trump Organization also discussed a refinance loan with Deutsche Bank's CRE division in 2012, but pursued a recourse loan with a lower interest rate from PWM after receiving proposals from both divisions of the bank. See Pl.'s Statement q\|q 499-503 and accompanying exhibits.
125. The 2012 SOFC was provided to Deutsche Bank as part of the Chicago loan. Compl. $\ddagger 607$.

RESPONSE: Undisputed.
126. Just as with the Trump Doral loan, Deutsche Bank again assessed its own "DB adjusted values" and conducted its due diligence of President Trump's assets by applying "haircuts" to the values reported in the 2011 and 2012 SOFC. Compl. $\llbracket 605$. The assets considered again included: Trump Tower, Niketown, 40 Wall Street, Trump Park Ave, "Club Facilities," and "Other Property interests." Robert Aff., Ex. U at 8; Pereless Dep. 383:7-17.

RESPONSE: Undisputed, with the clarifications noted above (see supra, Responses to Defs.' Statement T17 106-107) concerning Defendants' characterization of the "haircuts" applied during Deutsche Bank's underwriting process.
127. Deutsche Bank calculated its "DB adjusted" values and recommended approval for the Chicago facility based on its independent analysis of President Trump's 2011 and 2012 SOFCs. Robert Aff., Ex. U at 7-9. Ultimately, Deutsche Bank reached an adjusted net worth for President Trump of
$\$ 2.436$ billion. Id. at 7 .
RESPONSE: Undisputed, with the clarifications noted above (see supra, Responses to Defs.' Statement TIT1 106-107) concerning Defendants' characterization of the "haircuts" applied during Deutsche Bank's underwriting process.
128. Lending officers and bankers understood the Chicago transaction to be a "better loan" in terms of being a lower risk loan in comparison to Trump Doral. Pereless Dep. 359:9-17, 360:2-5. RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact.
129. Ultimately, Deutsche Bank lending officers held no reservations in supporting and going forward with the Chicago transaction. Pereless Dep. 360:22-361:6.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact.
130. Under the Chicago Loan, President Trump was required to: (i) maintain a minimum net worth of \$2.5 billion and (ii) provide a SOFC to Deutsche Bank annually. Compl. ๆ 609.

RESPONSE: Undisputed.
131. The loan for 401 North Wabash Venture LLC closed on November 9, 2012. Compl. वा 606.

RESPONSE: Undisputed.
132. The $\$ 107$ million loan from Deutsche Bank was broken down into two credit facilities given the mixed nature of the hotel-condo property. Id. $1 \mathbb{T l}$ 28(b), 603. The first facility concerned the residential component and the second facility concerned the commercial component. Compl. $\llbracket 63$. Both facilities were supported by President Trump's personal guarantee. Compl. ๆ 604.

RESPONSE: Undisputed.
133. The Chicago Loan was a "superb deal" to the bank that was "structured properly" with pricing that was "appropriate" making it a "very, very good safe deal for the bank" based on the "loan-to-values-and the guarantees involved." Vrablic Dep. 267:9-22.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact, but undisputed that the assertion quotes opinions expressed by Ms. Vrablic at her April 24, 2023 deposition.
134. Simply by closing on the Chicago Loan, Deutsche Bank generated fees in the amount of $.625 \%$ for facility A and $.75 \%$ on Facility B. Robert Aff., Ex. U at 4.

RESPONSE: Undisputed.
135. With a loan amount of $\$ 62$ million on Facility A and $\$ 45$ million on Facility B, Deutsche Bank was projected to generate $\$ 725,000$ in fees at the closing on of the Chicago Loan at the time of loan approval ((.625\% X \$62 million) + (.75\% X 45 million $)=\$ 725,000)$.

## RESPONSE: Undisputed.

136. For both the commercial and the residential loan facilities of the Chicago Loan, the primary and secondary form of repayment would be the underlying collateral, while President Trump's Guarantee would only be used as a tertiary repayment source to eliminate shortfalls (if any) in the collateral's performance. Robert Aff., Ex. U at 5 ("Primary Source of Repayment: Facility A: Sale of the remaining un-sold condo Units. Facility B: Cash flow generated by the Commercial Component of the collateral. Secondary Source of Repayment: Refinancing of the collateral property. Tertiary Source of Repayment: Full and unconditional guarantee of DJT which eliminates any shortfall associated with operating and liquidation of the collateral.")

RESPONSE: Undisputed that the quoted exhibit accurately states the sources of repayment listed in the cited Deutsche Bank credit memo, including Mr. Trump's guaranty to cover any operating shortfalls for the property during its operations by the Trump Organization, but disputed as to Defendants' characterization of the Guaranty or that this meant Mr. Trump's personal guaranty was of less importance than the collateral to PWM's underwriting of the Chicago loan. See Pl.'s Statement qTI 499-509 (describing Deutsche Bank's dueling proposals for a non-recourse CRE loan and a recourse PWM loan for the Chicago refinance, and the significantly lower interest rate paid by Mr. Trump when he entered
into a recourse loan with PWM that relied on his personal guaranty).
137. In 2014, 401 North Wabash Venture LLC obtained an additional $\$ 54$ million loan for Trump Chicago. Compl. $\|\|$ 28(b), 615. This additional loan included a step-down guarantee like the Trump Doral loan, with the personal guarantee and net worth covenant stepping down based on the loan-to-value ratio. Compl. ๆ| 615.

RESPONSE: Undisputed.
138. The loan was amended in 2014. Compl. ๆ| 616.

RESPONSE: Undisputed.
139. Again, as with earlier internal credit memos, the 2014 credit memo prepared in conjunction with this additional loan, (which also recommended approval for the Old Post Office transaction discussed further below), evaluated President Trump's 2011, 2012, and 2013 SOFCs. Compl. q| 617; Robert Aff., Ex. Q.

RESPONSE: Undisputed.
140. Deutsche Bank again reached its "DB adjusted" values of the assets. Robert Aff., Ex. Q at 13-16. The assets considered were Trump Tower, Niketown, 40 Wall Street, Trump Park Ave, Club Facilities, and Other Property Interest. Id. at 14. As of 2015, the personal guarantee was eliminated because the loan-to-value ratio was below the threshold in the step-down provision. Compl. $\mathbb{\|} 619$.

RESPONSE: Undisputed, with the clarification that to the extent that Defendants appear to be incorporating by reference ("again") their earlier assertions about Deutsche Bank's adjustments, Plaintiff similarly incorporates its clarifications concerning the standardized haircuts used by the bank to analyze a "conservative" or "adverse scenario analysis" that "is trying to see what happens if the client's financial position is under stress." See Ex. 1017 at 75:11-77:10; 79:7-24; 148:6-149:21; Robert Ex. O at 147:15148:21; see also supra, Response to Defs.' Statement ๆ 107. Further clarified that Defendants resumed their submission of SFCs and certifications relating to the Trump Chicago loan starting in 2018. See Pl.'s

Statement Exs. 260, 283, 284 \& 285.
141. As with the initial loan, the additional loan on Trump Chicago would be primarily and secondarily repaid through the collateral, and the step-down Guarantee would be the tertiary form of repayment on the loan. Robert Aff., Ex. Q at 10.

RESPONSE: Undisputed that this assertion summarizes the sources of repayment listed in the cited Deutsche Bank credit memo, but disputed that this meant Mr. Trump's personal guaranty was of less importance than the collateral to PWM's underwriting of the Chicago loan. See Pl.'s Statement 9T4 499509 (describing Deutsche Bank's dueling proposals for a non-recourse CRE loan and a recourse PWM loan for the Chicago refinance, and the significantly lower interest rate paid by Mr. Trump when he entered into a recourse loan with PWM that relied on his personal guaranty).
142. 401 North Wabash Venture LLC never defaulted on the loan or missed a payment. See generally Williams Dep. 187:9-15.

RESPONSE: Disputed because the cited evidence does not support the asserted fact, including because Deutsche Bank alerted 401 North Wabash Venture LLC of a DSCR covenant breach in 2019, Ex. 1050, and because the misrepresentations and false statements in Defendants' submissions to Deutsche Bank constituted Events of Default under relevant loan documents, as Deutsche Bank stated to the Trump Organization in 2020, Pl.'s Statement $\uparrow \mathbb{T} \| 47$-451, 517-19 and accompanying exhibits.

## iii. Trump Old Post Office LLC (2014)

143. In 2011, Trump Old Post Office LLC bid on a ground lease from the General Services Administration ("GSA") to redevelop the Old Post Office on Pennsylvania Avenue in Washington, D.C. Compl. $\|_{\|}$51(j), 624 . As required by the GSA, the 2008-2010 SOFCs were submitted as part of the bid. Compl. $941623-24$; RFP at 18 (requesting "[f]inancial statements for the past three years prior to the RFP issuance date").

RESPONSE: Undisputed.
144. Trump's Proposal to the GSA stated: "[t]he attached Statement of Financial Condition was compiled under GAAP, but it should be noted that there are departures from GAAP that are described in the Accountant's Compilation Report attached to the Statement of Financial Condition. Most personal financial statements contain GAAP exceptions. WeiserMazars, LLP has compiled these financials." See Robert Aff., Ex. AQ.

RESPONSE: Undisputed.
145. Additionally, in response to the GSA's inquiries, Trump's presentation indicated again "[u]nlike the statements of public companies, it is not uncommon for personal financial statements to include GAAP exceptions." Robert Aff., Ex. AR. With respect to separately held entities, Trump's presentation explained:

Mr. Trump owns approximately 400 entities that are in various businesses. Unlike Mr. Trump's personal financial statements, which are completed as of June 30th each year, the books for these individual entities are generally accounted for on a calendar year. Including these entities on the June 30th statement would require the books of the 400 entities to be closed twice per year, which would be highly unconventional and costly. Mr. Trump finds that the level of detail that is provided is adequate for his purposes.

Id. Trump's presentation also addressed other inquiries relating to the SOFCs. See generally id.
RESPONSE: Undisputed.
146. In its Source Selection Evaluation Report and Recommendation, the GSA stated: "The Trump Organization presented one of the strongest financial teams of all offerors," while noting that a weakness of Trump's proposal was that "[ f$]$ inancial statements provided by Mr. Trump were qualified by his accountants as not complying with GAAP." Robert Aff., Ex. AS at 13-14. Trump Old Post Office LLC was ultimately selected by GSA in February 2012 to redevelop the OPO property and signed a lease for that purpose on August 5, 2013. Compl. qTI 51(j), 626.

RESPONSE: Undisputed.
147. In advance of executing the lease, Deutsche Bank's CRE and PWM groups were consulted about potential financing for the project. Compl. $\| 627$. The PWM proposal required a personal
guarantee from President Trump. Compl. \|| 631.
RESPONSE: Undisputed.
148. The terms of the $\$ 170$ million included the following requirements: (i) maintaining a minimum net worth of $\$ 2.5$ billion, $\$ 50$ million in unencumbered liquidity, and no additional indebtedness exceeding $\$ 500$ million and (ii) providing SOFC to Deutsche Bank annually. Compl. \| 632.

RESPONSE: Undisputed.
149. A May 2014 Deutsche Bank credit memo, which incorporated information from the 2011, 2012, and 2013 SOFC, approved the $\$ 170$ million loan to Trump Old Post Office LLC. Compl. II 633; Robert Aff., Ex. Q.

RESPONSE: Undisputed.
150. Like in previous years, Deutsche Bank reached its "DB adjusted" performing haircuts on the values of assets, including Trump Tower, Niketown, 40 Wall Street, Trump Park Ave, Club Facilities, and Other Property Interest. Robert Aff., Ex. Q at 13-16.

RESPONSE: Undisputed, with the clarification that to the extent that Defendants appear to be incorporating by reference ("Like in previous years") their earlier assertions about Deutsche Bank's adjustments, Plaintiff similarly incorporates its clarifications concerning the standardized haircuts used by the bank to estimate the potential liquidation value of a client's stated assets. See Ex. 1017 at 75:1177:10; 79:7-24; 148:6-149:21; supra, Response to $\mathbb{\|} 107$.
151. Deutsche Bank internally adjusted President Trump's net worth to $\$ 2.645$ billion. Id. at 13.

RESPONSE: Undisputed, with the clarifications that Deutsche Bank's internal adjustments were standardized reductions of stated value used to help analyze a "conservative" or "adverse scenario analysis" that "is trying to see what happens if the client's financial position is under stress," (Ex. 1017
at 75:11-77:10; 79:7-24; 148:6-149:21; Robert Ex. O at 147:15-148:21), and that the bank relied on the inaccurate information provided in the SFCs and by the Trump Organization and therefore reached inflated adjusted valuations of Mr. Trump's net worth. See supra, Response to \| 107.
152. A term sheet with the material terms of the OPO Loan was agreed to and "executed on January 13 and 14, 2014." Compl. ๆ| 634. Thereafter, the OPO loan closed on August 12, 2014. Compl. $\mathbb{\|} 634$.

RESPONSE: Undisputed.
153. Simply to close the OPO Loan, Deutsche Bank was projected to generate a $.5 \%$ fee of the facility amount, which is equivalent to $\$ 850,000$ based on a $\$ 170$ million loan facility ( $\$ 170$ million X $.5 \%=\$ 850,000$ ). See Robert Aff., Ex. Q at 8-9.

RESPONSE: Undisputed.
154. Trump Old Post Office LLC never defaulted on the loan or missed a payment under the loan. See Williams Dep. 187:9-15; 189:10-16; 295:13-17. The Old Post Office loan was a successful credit transaction for Deutsche Bank, as the property was "redeveloped and opened and was operating successfully," and the loan was performing such that "all interest payments and covenants were being met." See Vrablic Dep. 310:7-311:6.

RESPONSE: Disputed because the cited evidence does not support the asserted fact, including because Deutsche Bank alerted Trump Old Post Office LLC of a DSCR covenant breach in 2019, Ex. 1052, and because the misrepresentations and false statements in Defendants' submissions to Deutsche Bank constituted Events of Default under relevant loan documents, as Deutsche Bank stated to the Trump Organization in 2020, Pl.'s Statement $\uparrow \mathbb{T} 447-451,558-60$ and accompanying exhibits.
155. The primary and secondary source of repayment on the OPO Loan were the collateral, while President's Trump guarantee would only be implicated as a tertiary source of repayment. Robert Aff., Ex. Q at 10 ("Primary Source of Repayment: Refinancing of the Collateral Property. Secondary

Source of Repayment: Cash flow from Hotel following the Redevelopment Period. Based on projections, the Hotel should be able to satisfactorily service the debt paying principal and interest based on a 25 year amortization schedule. Tertiary Source of Repayment: DJT provides a full and unconditional guarantee of the entire facility for the term.").

RESPONSE: Undisputed that the quoted exhibit states the sources of repayment listed in the cited Deutsche Bank credit memo, but disputed as to Defendants' characterization of the Guaranty or that this meant Mr. Trump's personal guaranty was of less importance than the collateral to PWM's underwriting of the OPO loan. See Pl.'s Statement $\mathbb{T} \|$ 543-552 (describing the Trump Organization's negotiations with Deutsche Bank's CRE and PWM divisions over financing for the OPO project, and the Trump Organization's decision to enter into a recourse loan with PWM that had a lower interest rate and relied on Mr. Trump's personal guaranty). Further disputed because Deutsche Bank's internal underwriting analysis considered the Old Post Office lease to be "weak collateral," and accordingly the "rating for that transaction was entirely reliant on the borrower rather than the collateral." Ex. 1017 at 262:18-265:18.
156. On or about May 11, 2022, Trump Old Post Office LLC sold the OPO property for \$375 million, of which \$170 million was used to repay the loan to Deutsche Bank. Compl. ๆ 646. RESPONSE: Undisputed.

## b. Ladder Capital

## i. 40 Wall Street LLC (2015)

157. In November 2015, 40 Wall Street LLC refinanced an existing $\$ 160$ million mortgage from Capital One Bank for 40 Wall Street through Ladder Capital Finance ("Ladder Capital"). Compl. TTT125, 647.

RESPONSE: Undisputed.
158. 40 Wall Street LLC never defaulted on the loan or missed a payment. See Garten Aff.
|l 3.

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact, including because Mr. Garten's sworn statement that " 40 Wall Street LLC has never received notice of the occurrence of an Event of Default under the loan originated by Ladder Capital Finance I LLC" is not proof that 40 Wall Street LLC has never engaged in conduct that would constitute an event of default under the applicable loan documents.

Further, although not evidence of an event of default, the 40 Wall Street loan was placed on a servicer watchlist in 2016 due to the financial performance of the property. Internal correspondence at Ladder Capital concluded that servicer Wells Fargo placed the loan on a watchlist because "of the free rent periods that have not fully burnt off and [W]ells must not be counting on the guarantee for those rents." Ex. 1022. When responding to a press inquiry about this loan, Allen Weisselberg similarly highlighted the importance of Mr. Trump's personal guarantee to the loan underwriting; Mr. Weisselberg suggested that the loan was not a "default risk," even though "the reported financial performance has not yet reached the underwritten level," in part because the "loan was structured with a guarantee in lieu of an upfront escrow to cover the free rent period." Ex. 1023. In connection with Mr. Trump's personal guaranty, Mr. Weisselberg, as trustee, certified to the accuracy of summaries of net worth that were based on the inflated SFCs and Mr. McConney submitted those certifications to Wells Fargo. Exs. 1041-1045.
159. Under the terms of the loan, President Trump had to maintain a net worth of $\$ 160$ million and a liquidity of at least $\$ 15$ million. See Robert Aff., Ex. AX at 10.

RESPONSE: Undisputed.
160. A 2015 appraisal ordered by the Bank appraised 40 Wall Street at a value of $\$ 540,00,000$, which resulted in loan-to-value of $29.6 \%$. See id. at 4. Cushman also appraised the dark value of the Property at $\$ 440,000,000, \$ 280,000,000$ in excess of the loan amount. Id.

RESPONSE: Undisputed, with the clarification that Defendants fraudulently inflated the value of this 2015 appraisal by providing appraisers with false and misleading information to arrive at a pre-
determined value.
For example, Allen Weisselberg directed the Trump Organization's Assistant Controller, Donna Kidder, to reduce the management fee listed in an expense and cash flow report for 40 Wall Street from $\$ 1,007,988$ to $\$ 100,000$, and to send the revised report to his son Jack Weisselberg at Ladder Capital, which had commissioned the appraisal. Ex. 1003 at 69:21-73:19. Ladder Capital then shared this revised and inaccurate management fee amount with appraisers at Cushman \& Wakefield. Ex. 1057, Ex. 1058. The appraisers incorporated that information into the Net Operating Income in the final 2015 appraisal for 40 Wall Street, which helped to increase the property's value from $\$ 500$ million in a draft appraisal to the Trump Organization's target valuation of $\$ 540$ million in the final appraisal report. Ex. 1024 at $-178,-317$ (draft appraisal revenue and expense analysis); Ex. 1025 at $-324,-465$ (final appraisal revenue and expense analysis); see also Ex. 1026 TTI 22-23 (reviewing underlying assumptions that changed during the course of the Cushman 2015 appraisal).

Defendants similarly inflated income at 40 Wall. The appraisal (which was dated June 25, 2015) included as part of the rent roll a $\$ 1.4$ million dollar lease with Dean \& Deluca, even though the lease was still under negotiation and had not yet been signed. Ex. 1027, Tab RENT ROLL. While Dean \& Deluca did eventually sign a lease for the space, it never commenced operations in the building, it declared bankruptcy, and the Trump Organization sued in federal court for unpaid rent. Ex. 1028.

## c. Royal Bank America/Bryn Mawr Bank

## i. Seven Springs LLC

161. On July 17, 2000, Seven Springs LLC obtained an approximately $\$ 8$ million loan from RBA, which was later acquired by Bryn Mawr Bank in 2017. Compl. ๆ654. President Trump personally guaranteed the loan. Compl. I| 654.

RESPONSE: Undisputed.
162. Seven Springs LLC never defaulted on the loan or missed a payment. See, e.g., Garten Aff., § 4; see also Robert Aff., Ex. AAL at 6 (indicating no events of default).

RESPONSE: Disputed as vague and because the cited evidence does not support the asserted fact, including because Mr. Garten's sworn statement that "Seven Springs LLC has never received notice of the occurrence of an Event of Default under the loan currently held by the Bryn Mawr Trust Company" is not proof that Seven Springs LLC has never engaged in conduct that would constitute an event of default under the applicable loan documents.
163. A June 17, 2014 Memorandum prepared by Bryn Mawr to analyze a proposed existing loan renewal indicates the "current value [of the Seven Springs property] more than supports the debt." See Robert Aff., Ex. AAN at 6.

RESPONSE: Undisputed, with the clarification that the referenced credit memo also notes there is "Strong Guarantor Support" and recommended renewal based on the "Personal financial strength of Mr. Trump, evidenced by a reported net worth of $\$ 5$ Billion and liquid assets of $\$ 354 \mathrm{MM}^{\prime \prime}$ as well as Mr . Trump's personal support for the project. See Pl.'s Statement Ex. 338; see also Pl.'s Statement q||l| 599616 and supporting exhibits (demonstrating importance of Mr. Trump's personal guaranty and SFCs to this loan). Additionally, since the property was not income-producing the guarantor's financials were important to the transaction and the bank relied on the SFCs from 2011-2019. See Pl.'s Statement Ex. 345 at 61:12-19; 132:13-18, 138:01-17, 183:03-11
164. Additionally, in connection with the 2019 modification of the loan, the 2019 Credit Approval Memorandum prepared by Bryn Mawr explicitly notes that the Mazars "does not express an opinion, conclusion or any form of assurance on the personal financial statement." See Robert Aff., Ex. AAM 2019 at 7. The loan to value rate was $16.6 \%$ as of the May 30, 2019 appraisal on the property (which gave the property an appraised value of $\$ 37,650,000$ ). See id. at 5 .

RESPONSE: Undisputed, with the clarification that the referenced credit memo states that the property
had a negative NOI, $\$ 1.6 \mathrm{~mm}$ of cash was injected into the LLC to support the loan statements and the guarantor's liquidity and willingness to support the project were noted as reasons to give the loan a pass rating that it otherwise did not qualify for. See Robert Aff., Ex. AAM at 8. When asked about this document a representative from Bryn Mawr said he obtained the liquidity information from the guarantor's personal financial statement and that the bank relied on the representations in that statement in connection with the Seven Springs Loan. See Ex Pl.'s Statement Ex. 345 at 131:20-132:18.

## d. Investors Bank

## i. Trump Park Avenue

165. Investors Bank funded a $\$ 23$ million loan secured by Trump Park Avenue that closed on July 23, 2010. Compl. ๆ| 85-86; NYSECF No. 205.

RESPONSE: Undisputed.

## e. Zurich North America Insurance Company

166. From 2007 through 2021, Zurich North America Insurance Company ("Zurich") underwrote a surety bond program for President Trump's businesses through insurance broker AON Risk Solutions ("AON"). Compl. \| 679. Under the program, Zurich issued surety bonds on behalf of President Trump's businesses in exchange for premium calculated based on a set rate. Compl. ๆ 679. Most of the bonds were statutorily required for President Trump's businesses, such as liquor license bonds for golf courses or release of lien bonds for construction projects. Compl. ब| 679.

RESPONSE: Disputed because it misstates the cited evidence; otherwise, undisputed that from 2007 through 2021, Zurich underwrote a surety bond program for the Trump Organization (Donald J. Trump's businesses) through AON, and that most of the bonds were statutorily required for Mr. Trump's businesses.
167. President Trump entered into a General Indemnity Agreement ("GIA") with Zurich, which indemnified Zurich against any loss incurred by Zurich on the surety bonds underwritten for President Trump's businesses. Compl. q\| 680-81.

## RESPONSE: Undisputed.

168. The GIA executed by President Trump on October 22, 2009, did not have an annual requirement that President Trump disclose to Zurich's underwriter the SOFC. Robert Aff., Ex. X ("Caulfield Dep.") 57:4-8; ZurichNA_008990.

RESPONSE: Disputed as the GIA was an integral part of a larger agreement between Zurich and the Trump Organization that required disclosure of Mr. Trump's SFC. See Ex. 1030. (Surety Term Sheet for Trump Organization and Aon Risk Services requiring "Annual review of Personal Financial Statements of Donald J. Trump (on-site review)"); Pl.'s Statement Ex. 348 at 34:12-35:14; Ex. 1032 at 224:18226:15 (explaining that the conditions listed in this term sheet "were things that were going to have to happen or else they wouldn't be issuing new insurance").
169. It is common practice for a surety underwriter to require disclosure of financial statements, but Zurich's surety underwriter knew of no legal or contractual provision that required disclosure of financial statements. Caulfield Dep. 56:11-57:3.

RESPONSE: Disputed because the asserted fact is not supported by the cited evidence. Although Zurich's surety underwriter testified that she did not know of a specific legal or contractual provision, she testified that disclosure of financial statements was definitively required. Robert Aff. Ex. X at 56:957:3 ("It's a requirement. If they want bonds, they have to give us their financial statements. That's how we underwrite."). Further disputed because the asserted fact ignores the testimony of Zurich's other surety underwriter who took over the account in late 2017, and who testified that annual review of Mr. Trump's personal financial statements was a requirement of this surety program. Pl.'s Statement Ex. 348 at 34:12-35:14.
170. Prior to Zurich's underwriting of the surety program, Zurich had a longstanding insurance relationship with President Trump's businesses that ended in May 2011. Caulfield Dep. 48:26. During that insurance relationship, an insurance underwriter shared financial information from his
review of the SOFC with the surety underwriter. Caulfield Dep. 47:15-25.

RESPONSE: Undisputed.
171. When the insurance relationship ended, Zurich's underwriter reviewed the 2010 SOFC at Trump Tower in July 2011. Caulfield Dep. 66:5-12.

RESPONSE: Undisputed.
172. Between July 2011 and January 2017, Zurich's underwriter did not review the SOFC and routinely threatened to stop writing new bonds until she was given access to updated financial information. Caulfield Dep. at 82:18-21, 102:19-103:10; Robert Aff., Ex. AAO at ZurichNA_008206. Nevertheless, between July 2011 and January 2017, Zurich continued to expand the surety program by adding new bonds based, in part, on media publications reporting President Trump's net worth, including Forbes and USA Today. Caulfield Dep. at 81:5-24, 88:7-21, 93:11-25, 94:2-7.

RESPONSE: Disputed because the asserted facts are not supported by the cited evidence, but undisputed that between July 2011 and January 2017 Zurich expanded the surety program.
173. In 2013, the sole basis for supporting Zurich's underwriting decision was a Forbes publication that estimated President Trump's net worth at \$3.2 billion. Caulfield Dep. 81:5-24.

RESPONSE: Disputed because the asserted fact is not supported by the cited evidence, and excludes the witness's subsequent testimony, which identifies as part of the reason she supported renewing coverage her receipt of an accountant's letter stating Mr. Trump's net worth. See Robert Aff. Ex. X at 88:22-89:18.
174. In 2014, Zurich's surety underwriter underwrote the surety program by relying on a Forbes publication that estimated President Trump's net worth at $\$ 4.1$ billion and a USA Today press release in connection with President Trump's run for President that estimated his net worth at $\$ 10$ billion.

Caulfield Dep. 93:16-94:7
RESPONSE: Disputed because the asserted fact is not supported by the cited evidence, and because it
ignores the information contained in the witness's annual underwriting reports (see, e.g. Ex. 1054) and testimony, which identifies additional support for underwriting the surety program, including the accountants' letter submitted in 2014. Robert Aff. Ex. X at 88:22-89:18; Ex. 1055 at 115:2-117:9.
175. In 2015, Zurich's surety underwriter underwrote the surety program by relying on a Forbes publication that estimated President Trump's net worth at $\$ 4.5$ billion and a USA Today press release in connection with President Trump's run for President that estimated his net worth at $\$ 10$ billion. Caulfield Dep. 111:20-112:11.

RESPONSE: Disputed as unsupported by the cited evidence, and because it ignores the information contained in the witness's annual underwriting reports (see, e.g. Ex. 1056 at -225 ) and testimony. Ex. 1055 at 123:5-13.
176. Despite not receiving traditional financial disclosure of the SOFC from July 2011 to January 2017, Zurich increased its exposure and renewed bonds as an accommodation to AON. Caulfield Dep. 85:19-87:16, 90:6-15, 98:10-17.

RESPONSE: Disputed as unsupported by the cited evidence that the increased exposure and renewed bonds were made solely as an accommodation to AON and because this ignores other testimony that clarifies that Zurich renewed the program for other reasons (Robert Aff. Ex. X at 114:17-20); otherwise, undisputed that Zurich increased its exposure and renewed bonds between July 2011 and January 2017.
177. Zurich's reliance on information provided by Forbes and other media publications continued through January 2017 when Zurich's surety underwriter visited Trump Tower to review the 2015 SOFC. Caulfield Dep. 115:19-116:14

RESPONSE: Disputed as unsupported by the cited evidence; but otherwise, undisputed in January 2017 the Zurich surety underwriter visited Trump Tower and reviewed the 2015 SOFC.
178. In January 2017, Zurich agreed to add DJT Holdings LLC as an additional indemnitor because of concerns Zurich had involving enforcement of the GIA during President Trump's term of
office. Caulfield Dep. 119:4-18.
RESPONSE: Undisputed.
179. The rates charged by Zurich for the surety program were rates filed with insurance regulators in the state of New York. Robert Aff., Ex. AA ("Miller Dep.") 60:17-61:8.

RESPONSE: Disputed because this assertion is unsupported by the cited testimony. Mr. Miller's full testimony explained that filed rates were a starting point, but that an underwriter had discretion to deviate up or down within certain limits from that starting rate, as Zurich did to determine the rates that were charged. See Robert Aff. Ex. AA at 60:17-62:14.
180. Zurich reduced the rate President Trump's businesses were paying as an accommodation to AON and to stave off another insurance company seeking to take the surety program from Zurich. Caulfield Dep. 104:6-105:15. The account rate was lowered despite Zurich not having reviewed updated SOFCs in approximately four years. Caulfield Dep. 105:20-106:3.

RESPONSE: Disputed because the cited evidence does not support the asserted facts; otherwise, undisputed that the premium rate Zurich charged for the Trump Organization account was reduced in 2015 and undisputed that the Trump Organization failed to provide Zurich with an opportunity to review the SOFC financials between 2011-2016. Robert Aff. Ex. X at 102:19-103:10.
181. The total exposure extended to President Trump's businesses in connection with the surety program never exceeded $\$ 20$ million. Caulfield Dep. 133:3-7; Robert Aff., Ex. Y ("Potter Dep.") 68:5-8, 70:2-7, 72:20-25, 73:5-8.

RESPONSE: Undisputed.
182. Zurich did not focus on individual asset values because their focus was on President Trump's liquidity to satisfy any claims on the indemnity agreement. Caulfield Dep. 71:8-14, 95:16-18, 117:23-118:2, 154:20-25; Miller Dep. 93:24-94:7 ("Zurich didn't rely on an asset valuations at all. They looked at liquidity and they looked at keeping AON happy and they looked at keeping a customer and
those were the primary focus that they had in determining whether theywould keep the risk and write the bonding program"); Robert Aff., Ex. Z ("Giulietti Dep.") 108:9-19; 113:4-8 ("Yes, based on our previous conversation, that's all they're relying on, cash, all the way back in the relationship.")

RESPONSE: Disputed because the evidence cited does not support the factual assertions and is contrary to the testimony given by the underwriter who took over the account in late 2017 that she considered both Mr. Trump's liquidity and the asset values (Pl.'s Statement Ex. 348 at 46:13-47:19; 48:2-16); otherwise, undisputed that Mr. Trump's liquidity was a factor in the underwriter's assessment of the surety bond program. (Pl.'s Statement Ex. 348 at 47:13-19; Robert Aff. Ex. X at 95:16-18).
183. Liquidity is an important factor for a surety underwriter in determining if an indemnitor can meet its obligation under an indemnity agreement. Miller Dep. 31:25-32:6. To determine accuracy of financial information provided to a surety, the underwriter can look at previous loss information, S\&P reporting, Comprehensive Loss Underwriting Information. Miller Dep. 97:7-12.

RESPONSE: Undisputed, with the clarification that there are no publicly-available financial filings for a privately-held company as there are for a public company. Robert Aff. Ex. AA at 117:2-9.
184. To determine accuracy of financial information provided to a surety, the underwriter can request independent appraisals. Miller Dep. 98:15-17.

RESPONSE: Disputed as vague and conclusory opinion testimony that conflicts with evidence in the record confirming that such appraisals are economically infeasible and therefore are not done. Ex. 1032 at 222:7-223:17 (explaining that surety rates are "very low" and "if they had to run around doing appraisals, which are very expensive, it would definitely raise their costs and would have to increase their premiums."); see also Robert Aff. Ex. X at 150:14-152:16 (testifying that "insurance companies don't appraise things" for surety underwriting). This type of unsupported expert speculation cannot on its own create evidentiary support for Defendants' factual assertions. See Diaz v. New York Downtown Hosp., 99 N.Y.2d 542, 544, 784 N.E.2d 68, 70 (2002) ("Where the expert's ultimate assertions are speculative or unsupported by any evidentiary foundation . . . the opinion should be given no probative force and is insufficient to withstand
summary judgment."); Amaya v. Denihan Ownership Co., LLC, 30 A.D.3d 327, 327, 818 N.Y.S.2d 199, 200 (1st Dept 2006) (finding that expert affidavit has no probative value on summary judgment where it "contained speculative, conclusory assertions" and "cited to various broad or inapt . . . rules, regulations and standards").
185. Ms. Caulfield indicated that during her time at Zurich, she was never concerned with President Trump's financial health. Caulfield Dep. 146:2-8.

RESPONSE: Disputed because the cited testimony was prompted by objectionable, leading questions and therefore is not sufficient evidence to support the asserted fact.
186. There were no claims ever made on the surety bonds underwritten by Zurich. Caulfield Dep. 155:2-6; Potter Dep. 103:20-22. Thus, Zurich did not incur financial harm because of the surety program. Caulfield Dep. 155:7-12.

RESPONSE: Disputed as to whether Zurich suffered "financial harm" because there is evidence that Zurich incurred unnecessary risk and was accordingly harmed (Ex. 1047 at 926 (g)(i-ii); and Ex. 1032 at 53:19-54:9); and disputed whether claims made on the surety program is material; otherwise, undisputed that any claims were made on the surety bond program.
187. In connection with the surety bond program, Zurich never communicated with Donald Trump, Jr. or Eric Trump. See Caulfield Dep. 144:21-145:2.

RESPONSE: Disputed because the cited evidence does not support the asserted fact.

## f. Tokio Marine HCC Insurance Company

188. As of December 2016, the Trust had in place D\&O consisting of a single primary policy providing a limit of $\$ 5,000,000$ from Everest National Insurance Company ("Everest") at a premium of \$125,000. Compl. ๆ| 692.

RESPONSE: Disputed that the "Trust" had in place the D\&O policy because it is unsupported by the cited evidence; otherwise, undisputed that the D\&O policy in place for the Trump Organization as of the
beginning of December 2016 consisted of a single primary policy providing a limit of $\$ 5,000,000$ from Everest at a premium of $\$ 125,000$.
189. On December 6, 2016, AON, President Trump's insurance broker, obtained a quote from Tokio Marine HCC ("HCC") for additional limits of $\$ 5,000,000$ to sit above the Everest policy. Compl. ๆ 695. Without reviewing a SOFC, HCC quoted a policy to sit above the Everest policy through the expiration date of February 17,2017 , in exchange for a premium of $\$ 40,000$ subject to reviewing financials at renewal. Compl. $\left.\frac{\pi}{} \right\rvert\, T$ 695-96.

RESPONSE: Undisputed, with the clarification that AON was the insurance broker for the Trump Organization. Ex. 1031 at 31:23-32:3.
190. In advance of renewal, an HCC underwriter met with Trump personnel at Trump Tower on January 10, 2017. Compl. ๆ 697. The HCC underwriter reviewed a balance sheet for year-end 2015, which showed total assets of $\$ 6.6$ billion, $\$ 192$ million liquidity, and total debt of $\$ 519$ million. Compl. 『| 698.

RESPONSE: Undisputed.
191. On January 20, 2017, HCC offered the Trust terms for a primary $\$ 10,000,000 \mathrm{D} \& \mathrm{O}$ policy with a $\$ 2,500,000$ retention for an annual premium of $\$ 295,000$. Compl. ๆ 700. Coverage per these terms was bound on January 31, 2017, with effective dates of January 30, 2017, to January 30, 2018. Compl. 『 700.

RESPONSE: Undisputed, except that the cited evidence does not support the assertion that terms were offered by HCC to the "Trust."
192. HCC agreed to renew the D\&O policy on the same terms for another twelve months, with a policy expiration date of February 10, 2019. Compl. ๆ| 710.

RESPONSE: Undisputed.
193. The HCC D\&O policy contained a provision that specified who had to know about a
claim under the policy before it had to be reported to HCC. See Robert Aff., Ex. AD at HCC_00000724. RESPONSE: Disputed because the cited evidence is policy language that was superseded on May 4, 2017 (Ex. 1029 at -894) and not material because the policy notice provision has no relevance to an insurance applicant's disclosure obligations under the penal law during the application process.
194. Under the terms of the policy, only when the risk manager or general counsel became aware of a claim did the insured have to provide written notice. See Robert Aff., Ex. AD at HCC_00000724.

RESPONSE: Disputed because the cited evidence is policy language that was superseded on May 4, 2017 (Ex. 1029 at 894) and not material because the policy notice provision has no relevance to an insurance applicant's disclosure obligations under the penal law during the application process.
195. The policy required notice to HCC as soon as practicable after the risk manager or general counsel become aware of a claim, but in no event later than ninety days after the end of the policy period, which ended January 30, 2018. See Robert Aff., Ex. AD at HCC_00000724.

RESPONSE: Disputed because the cited evidence is policy language that was superseded on May 4, 2017 (Ex. 1029 at 894) and not material because the policy notice provision has no relevance to an insurance applicant's disclosure obligations under the penal law during the application process.
196. On February 8, 2019, AON provided notice to HCC of various "claims and/or circumstances which may reasonably be expected to give rise to Claims." Compl. ๆ 712.

RESPONSE: Undisputed.
197. If there has been materially false information provided by an applicant to a D\&O carrier, the carrier can issue a reservation of rights letter, deny coverage, and rescind a policy. Miller Dep. 75:19-76:8.

RESPONSE: Undisputed, with the clarification that these actions are available to the carrier only if it has become aware that materially false information was provided.
198. HCC was not required to follow filed rates with New York regulators for the D\&O policy. See Robert Aff., Ex. AD at HCC_00000684.

RESPONSE: Disputed because the cited evidence does not support the asserted statement.

## g. The Defendants' Roles in the SOFC Transactions

199. Allen Weisselberg, Jeffrey McConney, Patrick Birney, and President Trump were the only Trump personnel involved in the preparation of the SOFC. Robert Aff., Ex. AAJ ("Weisselberg Dep.") 86:3-10, 106:8-18, 114:19-115:21, 286:24-287:8; Robert Aff., Ex. W
("Eric Trump Dep.") 273:9-20, 280:2-11, 286:22-288:13, 294:14-295:9, 304:2-5; Robert Aff., Ex. AAP ("Bender Dep.") 142:16-20, 143:2-7.

RESPONSE: Disputed because the asserted fact is not supported by the cited evidence, and is contrary to other record evidence showing that Mr. Trump, Mr. Weisselberg, Mr. McConney and Mr. Birney relied on the involvement of other Trump personnel in the preparation of the SOFCs. For example, notes in the underlying work papers for the 2012 SOFC state that the valuation of Seven Springs included information "[p]er telephone conversation with Eric Trump (9/24/2012)." Pl.'s Statement, Ex. 14 at 24 (MAZARS-NYAG-00003456). See also Pl.'s Statement, Ex. 15 at 9 (Rows 253-273) (citing valuation information for TNGC-Briarcliff as "per telephone conversation with Eric Trump" dated 9/25/2013); Pl.'s Statement $\uparrow$ ๆ 696-709 and supporting exhibits (describing Eric Trump's role in SOFCs, guaranties and loans involving Trump Organization); Pl.'s Statement 9T1 680-695 and supporting exhibits (describing Donald Trump Jr.'s role in SOFCs, guaranties and loans involving Trump Organization); Pl.'s Statement Ex. 138 at 1183:181186:18, 1194:10-1195:13, 1196:24-1197:09 (investigative testimony of Patrick Birney describing presentation of 2021 SOFC to Trump personnel including Donald Trump, Jr., Eric Trump and others).
200. Eric Trump was not involved in the preparation of the SOFCs. See Eric Trump Dep. 273:9-20 ("I know nothing about the Statement of Financial Condition. I, certainly, wouldn't know anything about the backup to the Statement of Financial Condition. It's just not what I did."), 280:2-11 ("I
do not ever recall speaking about a Statement of Financial Condition with Jeff McConney. This is not an exercise I was involved in."), 287:2-25 ("To the best of my knowledge, I never saw or ever even remotely worked on the Statement of Financial Condition. This was not in my purview. This is not what I did."), 288:2-13 ("I had nothing to do with the valuation process in the company. That just was not my domain"), 294:14-295:9 ("I knew just about nothing about the Statement of Financial Condition. I had, to the best of my knowledge, never seen the document, never worked on the document"), 304:2-5; Bender Dep. 142:16-20 ("Q: Did you have a discussion with Eric Trump concerning the preparation of the President's Statement of Financial Condition? A: Not to my recollection").

RESPONSE: Disputed because the asserted fact is not supported by the cited evidence and is contrary to other record evidence. Eric Trump was involved in the preparation of the SOFC, including by directly providing information used in asset valuations and by participating in discussions about the preparation of the SOFC. See, e.g., Pl.'s Statement, Ex. 14 at 24 (MAZARS-NYAG-00003456) (notes in 2012 SOFC workpapers stating that the valuation of Seven Springs included information "[p]er telephone conversation with Eric Trump (9/24/2012)); Pl.'s Statement, Ex. 15 at 9 (Rows 253-273) (citing valuation information for TNGC-Briarcliff as "per telephone conversation with Eric Trump" dated 9/25/2013); Pl.'s Statement ๆा 696-709 and supporting exhibits (describing Eric Trump's role in SOFCs, guaranties and loans involving Trump Organization); Pl.'s Statement Ex. 138 at 1183:18-1186:18, 1194:10-1195:13, 1196:241197:09 (investigative testimony of Patrick Birney describing presentation of 2021 SOFC to Trump personnel including Eric Trump); Ex. 1033 at 225:14-228:24, 234:4-235:6, 240:21-245:12 (testifying to specific conversations with Eric Trump regarding SOFC valuations of Seven Springs over multiple years).
201. Eric Trump stated he relied on the work of the accounting department when certifying the accuracy of the 2021 SOFC. See Robert Aff. Ex. W at 336:11-338:7.

RESPONSE: Undisputed.
202. Donald Trump Jr. was not involved in the preparation of the SOFCs. See Bender Dep.

143:2-7 ("Q: Did you have any discussion Donald Trump Jr. in connection with the preparation of the President's Statement of Financial Condition? A: Discussions? No, I did not have - not to the best of my recollection").

RESPONSE: Disputed because the asserted fact is not supported by the cited evidence and is contrary to other record evidence. Donald Trump Jr. has been involved in the preparation of the SOFCs in various capacities in his roles as a Trustee for the Donald J. Trump Revocable Trust and an Executive Vice President with the Trump Organization and for various corporate entities whose assets are valued on the SOFCs. See, e.g., Pl.'s Statement $9 \mathbb{T l}$ 680-695 and supporting exhibits (describing Donald Trump Jr.'s role in SOFCs, guaranties and loans involving Trump Organization); Pl.'s Statement Ex. 138 at 1183:181186:18, 1194:10-1195:13, 1196:24-1197:09 (investigative testimony of Patrick Birney describing presentation of 2021 SOFC to Trump personnel including Donald Trump, Jr.).

Further disputed because the SOFCs from 2016 to 2021 expressly identify the Trustees of the Donald J. Trump Revocable Trust as the persons responsible for the statements' contents, and Donald Trump, Jr. was one of two trustees of that trust. Pl.’s Statement $\|_{\|} \mathbb{\|}$ 681, 743, 750, 756. Mr. McConney testified that Donald Trump Jr. thus would have had final approval authority over the SFC as trustee. Ex. 1033 at 190:3-193:10) (regarding 2017 SOFC, "Q. So at this point in time when this statement was finalized who had final approval authority over it? A. It would be the trustees. It would be Allen and Donald, Don Junior.").
203. With respect to the Deutsche Bank loans, Eric Trump had no role in securing the loan for the Chicago, Doral, or Old Post Office transactions. See Vrablic Dep. 173:18-174:12, 232:17233:18; see also Pereless Dep. 93:10-14; Sullivan Dep. 88:15-89:2 ("Q: As you sit here today, do you recall any involvement that Eric Trump had with respect to the guarantee on the Doral property? A. He was not involved.").

RESPONSE: Disputed because the asserted fact is not supported by the cited evidence and is contrary to
other record evidence. Eric Trump is an Executive Vice President with the Trump Organization, and has been an officer of 401 North Wabash Venture LLC and Trump Old Post Office LLC (Pl. Statement ๆ 709), and is therefore involved in managing the businesses and entities that are parties to these transactions. Eric Trump (along with his siblings Ivanka Trump and Donald Trump Jr.) was also an "indirect beneficial owner" of Trump Old Post Office LLC, and in that capacity "guaranteed a portion of the Loan Agreement" by agreeing to help pay up to $\$ 10$ million of any money paid by Mr. Trump to Deutsche Bank under his personal guaranty of the loan. Ex. 1053.
204. With respect to the Deutsche Bank loans, Donald Trump Jr. was not involved in the Doral transaction. Vrablic 174:8-12, 229:16-23, Sullivan Dep. 89:3-13 ("Q. Do you recall whether Donald Trump, Jr. had any involvement in the guarantee on the Doral property? A. He did not.").

RESPONSE: Disputed because the asserted fact is not supported by the cited evidence and is contrary to other record evidence. Donald Trump Jr. was already a client of the Deutsche Bank PWM division at the time of the Doral transaction (P1.'s Statement Ex. 226 at DB-NYAG-001691), and he has served in various capacities at Trump Endeavor 12 LLC during the time period covered by this litigation (Pl. Statement Ex. 51 \| 16). Further disputed because Donald Trump Jr. was an executive with the Trump Organization, and he has testified that he worked on an equal footing alongside his siblings Eric Trump and Ivanka Trump on a variety of deals, including "trying to grow the Trump Hotel Collection" through deals including Doral. Ex. 1034 at 69:20-74:21 ("[W]e were heavily involved in just finding the original deal. . . constructing it, and then, you know, ultimately operating it as well, as an operating, you know, hotel/resort in the case of Doral and golf course.").
205. Moreover, Ms. Vrablic, a former Managing Director at Deutsche Bank, did not believe President Trump, Eric Trump, or Donald Trump, Jr. had ever submitted any materially false or misleading statements to Deutsche Bank. See Vrablic Dep. 229:16-23, 232:17-234:6; 234:17-20 ("Q. Are you aware of any false oral statements that President Trump ever made to anyone at Deutsche Bank?
A. Not to the best of my knowledge.") 235:8-16 ("Q. Are you aware of any false written statements that President Trump ever made to anyone at Deutsche Bank? A. To the best of my knowledge, no. Q. Are you aware of any false information that Donald Trump, President Trump, ever provided to anyone at Deutsche Bank? A. To the best of my knowledge, no.")

RESPONSE: Disputed because the cited evidence (including deposition responses to leading questions and incomplete hypotheticals offered "to the best of [the witness's] knowledge") does not support the asserted fact.

## V. Other SOFC Submissions

## a. Additional $\mathbf{\$ 5 0}$ Million Loan from Deutsche Bank

206. In February 2016, Deutsche Bank considered extending an additional $\$ 50$ million loan secured by Trump Doral. Compl. \|| 662.

RESPONSE: Undisputed
207. Ultimately, Deutsche Bank declined to extend further credit due to President Trump's then-campaign for office because it could lead to the perception that Deutsche Bank was not politically neutral, which posed a level of reputational risk. Compl. ๆ 666.

RESPONSE: Undisputed

## b. Buffalo Bills

208. In July 2014, President Trump bid to purchase the Buffalo Bills football team.

Compl. ๆ| 667. In support of its bid, President Trump obtained a confidence letter from Deutsche Bank indicating that President Trump would have the financial wherewithal to fund his bid to purchase the Buffalo Bills. Compl. $1 / \pi$ 667, 669.

RESPONSE: Undisputed, with the clarification that Deutsche Bank provided a confidence letter based upon the bank's "preliminary review of the current financial information of Mr. Donald J. Trump made
available to us, including liquidity and asset value." Ex. 1036. Further clarification that when sending his bid package, Mr. Trump wrote a personal letter offering to pay $\$ 1$ billion dollars in cash, with an immediate closing, and stating that his net worth was in excess of "Eight Billion Dollars (financial statements to be provided upon request)." Ex. 1035.
209. In connection with the confidence letter, Jeff McConney certified that, as of June 30, 2014, there had been no material decrease from the 2013 SOFC. Compl. $\|\|$ 668, 670.

RESPONSE: Undisputed
210. President Trump did not purchase the Buffalo Bills. Compl. ๆ 669.

RESPONSE: Undisputed.

## c. Trump Golf Links at Ferry Point in Bronx, New York

211. In 2010, an offer was submitted to the City of New York for a concession to operate, maintain, and manage an 18 -hole golf course and related facilities at Ferry Point Park, Bronx, New York. Compl. \| 671.

RESPONSE: Undisputed
212. The contract award included a personal guarantee by President Trump. Compl. © 674. The guarantee stated that the 2010 SOFC had been furnished to the City of New York. Compl. 『| 674.

## RESPONSE: Undisputed

213. After being awarded the contract in 2012, President Trump was required to periodically represent there had been no material change in his financial position. Compl. ๆ| 675. Mazars submitted such letters to the City of New York in 2010, 2011, 2013, 2016, 2017, 2018, and 2021. Compl. ๆ 675.

RESPONSE: Disputed as the cited evidence does not support the proposition, including because the Trump Organization and not Mazars submitted such letters to the City of New York. Compl. ๆ1 675; Ex. 1037 at -396-399 (letter from Trump Organization CFO Allen Weisselberg stating "We have enclosed a statement
from the Certified Public Accounting firm of Weiser LLP, indicating a net worth in excess of $\$ 3$ billion and cash on-hand in excess of \$200 million.").

## VI. Methods of Asset Valuation

214. The American Institute of Certified Public Accountants ("AICPA") provide for various methods to value real property. Robert Aff., Ex. AO ("Chin Aff."), Ex. A ("Chin Expert Report") \| 4142.

RESPONSE: Disputed because the cited evidence does not support the asserted fact, and because the cited evidence misstates the AICPA standards referenced therein. The applicable accounting guidance for calculating the current values for real estate assets in a personal financial statement can be found in ASC Topic 274. Ex. 1014 § 34 (quoting ASC Topic 274-10-55, paragraph 6); see also Robert Aff. Ex. AI Ex. A q\|\| 25-29 (quoting same ASC Topic 274 methods for estimating the current value of real estate in a personal financial statement). Prof. Bartov testified that any method used to determine a value for a Statement of Financial Condition must have the "goal of reaching estimated current value" and the "principle of estimated current value." See Robert Aff. Ex. AJ at 338:13-19, 340:11-16. Moreover, Prof. Bartov testified that in applying the definition of estimated current value to a personal financial statement, the definition is applied to reach a value at the date of the financial statement. See Robert Aff. Ex. AJ at 311:3-312:22.
215. The market value ("As Is") and investment value ("As If") for a property may produce differences in estimated valuation because they provide different perspectives. Robert Aff., Ex. AN ("Chin Dep.") 98:3-19, 108:4-10.. ${ }^{4}$

RESPONSE: Disputed because the cited testimony is vague, fails to define these terms sufficiently and lacks evidentiary support, but undisputed that "market value" and "investment value" as understood by

[^16]professional appraisers are different valuation methods. See Ex. 1026 at 9T17-11. Furthermore, this statement of opinion is immaterial because the SFCs state that they present Mr. Trump's assets and net worth at estimated current value, which is consistent with the accounting principles that govern personal financial statements. See Ex. 1014 q\| 32-34; Robert Aff. Ex. AI Ex. A $\mid \mathbb{\|}$ 25-29.
216. Market value is generally described as "As Is," as of a specific date, reflective of a price that a willing buyer and seller would agree upon in an open and competitive market. Chin Expert Report II 43.

RESPONSE: Undisputed.
217. Investment value is "the value of the property to a particular investor based on that person's (or entity's) investment requirements rather than market norms." Robert Aff., Ex. AAC ("Laposa Dep.") 74:16-75:24, 135:9-11.

RESPONSE: Disputed because the cited testimony is vague, fails to define these terms sufficiently and lacks evidentiary support, but undisputed that "investment value" is an appraisal term of art that differs from market value, see Ex. 1026 at ๆ| 8, and that also differs from estimated current value, see Robert Aff., Ex. AAC at 137:7-138:6; 139:22-140:25. Furthermore, this statement of opinion is immaterial because the SFCs state that they present Mr. Trump's assets and net worth at estimated current value, which is consistent with the accounting principles that govern personal financial statements. See Ex. 1014 ๆ\| 32-34; Robert Aff. Ex. AI Ex. A $\uparrow \mathbb{\|} \|$ 25-29.
218. Investment value is usually estimated based on anticipated future market and property conditions from the vantage point of a specific investor or owner and is often expressed as an "As If" value. Chin Expert Report || 42; Chin Dep. 90:3-19, 91:24-92:8.

RESPONSE: Disputed because the cited testimony is vague, fails to define these terms sufficiently and lacks evidentiary support, but undisputed that "investment value" is an appraisal term of art that differs from market value, see Ex. 1026 at ๆ| 8, and that also differs from estimated current value, see Robert

Aff., Ex. AAC at 137:7-138:6; 139:22-140:25. Furthermore, this statement of opinion is immaterial because the SFCs state that they present Mr. Trump's assets and net worth at estimated current value, which is consistent with the accounting principles that govern personal financial statements. See Ex. 1014 T\|\| 32-34; Robert Aff. Ex. AI Ex. A $\uparrow \mathbb{\|} \|$ 25-29.
219. The AICPA does not mandate or require reporting "As Is" values in compilation reports, nor does it mandate or require that a market value definition be applied. Chin Expert Report ๆ| 42.

RESPONSE: Disputed, because ASC 274 requires the use of estimated current value in personal financial statements, and the applicable accounting standards do not establish different valuation standards depending on whether the personal financial statement is presented in a "compilation" or other type of format. See Ex. 1014 ๆ32; Robert Aff. Ex. AI, Ex. A q\|26; and Robert Aff. Ex. AK, Ex. A q33. Further disputed because Mr. Trump's SFCs state that they contain estimated current values of his assets, and therefore the SFCs were required to apply that standard on that basis alone.
220. Appraised values prepared by certified professional appraisers generally reflect as is market values. Chin Dep. 91:24-92:8, 104:23-105:5.

RESPONSE: Disputed as vague and not supported by the cited evidence, but undisputed that appraisals prepared by certified professional appraisals generally describe a current value as of a specific date, subject to any disclosed conditions or assumptions. See Ex. 1026 ||l| 27-37.
221. Bank and developer appraisals often yield contrasting value estimates due to their distinct perspectives and considerations. Chin Expert Report 9| 53. As lenders, banks prioritize safeguarding their investment and therefore approach collateral valuation with a conservative mindset, focusing on worst-case scenarios. Chin Expert Report II 53. Bank-ordered appraisals heavily rely on historical data and performance, while potential market changes that could impact values may receive less emphasis. Chin Expert Report § 53.
